ORIGINAL JOURNALS
OF THE
LEWIS AND CLARK EXPEDITION
1804–1806

WITH FACSIMILES, MAPS, PLANS, VIEWS, PORTRAITS, AND
A BIBLIOGRAPHY

IN SEVEN VOLUMES AND AN ATLAS

VOLUME ONE

Journals and Orderly Book of Lewis and Clark, from
River Dubois to Two-Thousand-Mile Creek:
Jun. 30, 1804—May 5, 1805
ORIGINAL JOURNALS
OF THE
LEWIS AND CLARK EXPEDITION
1804-1806

PRINTED FROM THE ORIGINAL MANUSCRIPTS
in the Library of the American Philosophical Society and
by Direction of its committee on Historical Documents
TOGETHER WITH
MANUSCRIPT MATERIAL OF LEWIS AND CLARK
from other sources, including Note-Books, Letters, Maps, etc.,
and the Journals of Charles Floyd and Joseph Whitehouse

NOW FOR THE FIRST TIME PUBLISHED IN FULL
AND EXACTLY AS WRITTEN

Edited, with Introduction, Notes, and Index, by
REUBEN GOLD THWAITES, LL.D.
Editor of "The Jesuit Relations and Allied Documents," etc.

VOLUME ONE

American Journeys - www.americanjourneys.org
To

THEODORE ROOSEVELT, LL.D.

PRESIDENT OF THE UNITED STATES

Upon the Hundredth Anniversary of the Departure of the

Mississippi Expedition of Lewis and Clark, this

first publication of the Original Records of

their "Winning of the West" is most

respectfully dedicated.

MADISON, WISCONSIN

May 14, 1904
ACKNOWLEDGMENTS

The greater part of the Original Manuscript Journals of Meriwether Lewis and William Clark, herein literally followed, are in the library of the American Philosophical Society at Philadelphia, and are published by arrangement with and at the suggestion of its committee on Historical Documents.

Several important note-books by William Clark, together with an Orderly Book, a Field Book, the maps in the Atlas, and a number of letters, memoranda, etc., are the property of Mrs. Julia Clark Voorhis and Miss Eleanor Glasgow Voorhis, of New York, General William Clark’s granddaughter and great-granddaughter, respectively; and are published by arrangement with them.

The Journal of Charles Floyd is published by consent of the State Historical Society of Wisconsin, in whose library the original manuscript is preserved.

The Journal of Joseph Whitehouse was purchased by the publishers expressly for this work, but now is the property of Edward Everett Ayer, Esq., of Chicago.

The material in the Appendix is from various sources, as therein indicated.

INTRODUCTION

PREVIOUS EXPLORATIONS

SLOWLY pushing northward from Mexico, Spaniards had by the close of the seventeenth century established towns and Indian missions at many points in Texas, New Mexico, and Arizona—a slender chain, stretching across the continent from the Gulf of Mexico to the Pacific Ocean. By the opening of our Revolutionary War, their mission villages, with an aggregate population of over thirteen thousand barbarian converts, extended upwards through California to San Francisco and Monterey; Spanish mariners, seeking vainly for a waterway through to the Atlantic, that should furnish a short route between Spain and India, had by this time become familiar with the coast as far north as the modern Sitka, and developed a considerable trade with the natives, chiefly at Nootka Sound, on Vancouver’s Island; while adventurous Spanish missionaries had contemporaneously penetrated eastward to the Great Basin.

The pioneers of New France, on their part seeking a transcontinental waterway from the east, had throughout the first two-thirds of the eighteenth century made several costly attempts to discover and surmount the great divide. Upon New Year’s day, 1743, the Chevalier de la Vérendrye, journeying overland from his fur-trading post on the Assiniboine River, sighted the Wind River Range. Affairs moved slowly, under the French régime; but yearly the prospect was growing brighter of reaching the Pacific by way of a chain of posts across the Canadian Rockies, via the Assiniboine and Saskatchewan, when the victory of Wolfe cut short these ambitious projects, and England succeeded both to the responsibilities and the dreams of New France.

[ xvii ]
INTRODUCTION

The Hudson's Bay Company, organized in London in 1667, had long held actual dominion over the sub-arctic regions to the north of New France; and on paper claimed the far-stretching lands to the south and west, upon which the more adventurous French had actively ranged from Lake Superior westward to the headwaters of the Saskatchewan—a distance of twelve hundred miles. At first disinclined to explore beyond the sphere of influence immediately exerted by her profitable posts on Hudson and James bays, “the old lady of Fenchurch Street” was early in the eighteenth century forced by public opinion in England to make a show of seeking from the East the waterway which Sir Francis Drake, in the “Golden Hind,” had sought from the Pacific as early as 1579, and for which both Spain and France were still vainly striving. The company’s spasmodic, apathetic, and fruitless searches for the “Northwest Passage” extended through half a century.

When New France fell, both independent and organized English and Scotch fur-traders, with headquarters at Montreal and Mackinac, disregarding the claims of the Hudson’s Bay Company at once occupied the vast country through which Verendrye and his compatriots had so long conducted their wilderness barter. The story of the rival trading corporations—chiefly the Hudson’s Bay Company on the one hand, and the North West Company (1783) on the other—although with occasional disruptions of the latter, and several kaleidoscopic reshiftings and amalgamations—is a stirring and sometimes bloody chapter in the history of the continental interior.

The situation cultivated mighty passions within strong men. One of these, Samuel Hearne, in the employ of the Hudson’s Bay Company, stirred by great ambitions, descended the Coppermine River in 1770, and reached the Arctic Ocean. Nineteen years later (1789), Alexander Mackenzie, a “Nor’ Wester” in charge of the Athabasca department, reached the Arctic Ocean by way of Mackenzie River; in 1793, after almost incredible difficulties, he crossed the Canadian Rockies and descended Fraser River to the Pacific, a feat preceding Lewis and Clark’s venture by a dozen years.
INTRODUCTION

While these various hardy enterprises were in progress in the North, many deemed the Missouri River the most feasible gateway to the Pacific. There long existed a tradition among Indians living upon the Mississippi, that the Missouri sprung from a low-lying watershed that might easily be portaged to some stream flowing into the Western Ocean. Joliet and Marquette (1673) had at first hoped that the Mississippi might be found emptying into the Pacific; but ascertaining that its flood was received by the Gulf of Mexico, they looked upon the Missouri as the undoubted highway to the Ocean of the West. Thirty years later, charts were published in Europe which showed west-flowing waters interlocking with the Missouri. Several French expeditions were organized for exploring the Missouri and some of its lower affluents—La Harpe and Du Tisné (1719), De Bourgmont (1722), and Mallet (1739); but they accomplished little more than obtaining a knowledge of the country for a few hundred miles above the mouth, with side ventures upon the South Fork of the Platte, the Arkansas, and the plains southwestward to the Spanish seat of Santa Fé.

Upon the eve of the downfall of New France, the crafty Louis XV, in order to prevent England from obtaining them, ceded to Spain (November, 1762) the town and neighborhood of New Orleans and the broad possessions of France west of the Mississippi. But the Spaniards who came to New Orleans and St. Louis were in the main only public officials. French habitants occupied their little waterside villages, as of old; being joined in the closing decade of the century by Kentuckians like Boone, who, weary of the legal and social restraints of growing American settlements, were willing to accept Spanish land grants with their promise of a return to primitive conditions, in which farming operations alternated with hunting. French trappers, many of them blood relatives of the red men, and now released from the tyranny of the fur-trade monopoly of New France, freely plied their nomadic calling upon the lower reaches of the Missouri and its branches, and even up the Platte and Arkansas to the bases of the Rockies. French and half-breed

INTRODUCTION

fur-traders — either on their own account or, in the northern regions, as agents of the warring British companies — wandered far and near among the tribesmen, visiting them in their permanent villages and accompanying them upon hunting-, fishing-, and war-parties. Their long journeyings by land and water occasionally carried them as far afield as the great northern bend of the Missouri, where were the villages of the trade-loving Mandans, who bartered indiscriminately with Gauls from St. Louis and Britons from the Assiniboin.

Such was the situation when the United States was born, and when Thomas Jefferson — philosopher, seer, statesman — always interested in the Middle West, first felt within him yearnings for a more intimate knowledge of the spacious territory of Louisiana, lying beyond the great river. The country belonged to Spain, but this fact gave him no pause; he felt that so long as British traders were profitably exploiting the trans-Mississippi, Americans might be excused for opening through it a trade route to the Pacific, and incidentally extending the bounds of human knowledge, in geography and the natural sciences.

In 1783 he proposed to General George Rogers Clark, the hero of Kaskaskia and Vincennes, to lead an expedition “for exploring the country from the Mississippi to California;” he intimated that a similar enterprise was being broached in England — “they pretend it is only to promote knowledge. I am afraid they have thoughts of colonising into that quarter.” 1 Nothing came of this suggestion — possibly Clark did not reply; or very likely Jefferson, just then in private life, thought that the necessary funds could not be raised.

Three years later, when minister to Paris, Jefferson met John Ledyard, a Connecticut adventurer who had been a petty officer with Captain James Cook on the latter’s third voyage around the world (1778), and had written a widely-read account of that enterprise. Ledyard agreed to cross Europe and Asia to Kamchatka, thence em-

American Journeys - www.americanjourneys.org
INTRODUCTION

barking on a Russian vessel trading to Nootka Sound, from which he was to find his way to the sources of the Missouri, whose current was to be descended to the American settlements. But Ledyard, when within a few days of the Kamchatka port, was arrested by imperial orders from St. Petersburg, and ignominiously carried back to Poland, where, "disappointed, ragged, and penniless," he was dismissed.

In 1789, General Henry Knox, Washington's secretary of war, ordered General Josiah Harmar, commanding the Western frontier at Cincinnati, to "devise some practicable plan for exploring that branch of the Mississippi called the Missouri, up to its source," and possibly beyond to the Pacific. Captain John Armstrong, then in command at Louisville, was despatched upon this adventure in the spring of 1790. Entirely alone in a canoe, he "proceeded up the Missouri some distance above St. Louis . . . but, meeting with some French traders, was persuaded to return in consequence of the hostility of the Missouri bands to each other, as they were then at war, and he could not safely pass from one nation to the other."

Jefferson was the next to make a venture in transcontinental exploration. This time (1793) in his capacity as a vice president of the American Philosophical Society at Philadelphia, he made an arrangement therefor with André Michaux, a distinguished French botanist then herborizing in the United States. A small subscription was raised by the society, to which many of the prominent men of the day contributed, and detailed instructions for Michaux were drafted by Jefferson. The intending explorer was to "cross the Mississippi and pass by land to the nearest part of the Missouri above the Spanish settlements, that you may avoid the risk of being stopped;" he was then to "pursue such of the largest streams of that river as shall lead by the shortest way and the lowest latitudes to the Pacific ocean." The previous year, Captain Robert Gray, of Boston, had discovered the mouth of the Columbia, and Jefferson hoped that this stream might be found to interlock with the sources of

1 See Appendix, for this document.
INTRODUCTION

the Missouri. Just then, however, there had arrived in the United States Charles Genet, minister of the French Republic, who was charged with the secret mission of forming a filibustering army of American frontiersmen in the Carolinas, Georgia, and Kentucky to attack Spanish possessions on the Gulf of Mexico and beyond the Mississippi. Michaux was selected by Genet as his agent to deal with the Kentuckians, led by George Rogers Clark, who had proposed, under the banner of France, to descend the Mississippi with fifteen hundred borderers and attack New Orleans. Michaux tarried in Kentucky to carry out these ill-fated plans, with the result that his project of exploration was abandoned.¹

Meanwhile, there had been important developments upon our Northwest Coast. We have seen that by the opening of the Revolutionary War the Spanish had explored the whole extent of this shore, nearly up to the site of the modern Sitka. In 1778 Captain Cook was here, on behalf of England, searching for the Northwest Passage, a movement which induced fresh zeal on the part of Spanish navigators, and watchfulness on the part of the Russians in Alaska. Eight years later, the French navigator and scientist, Count de la Pérouse, visited these shores and gave to the world its first definite knowledge of Spain's California missions. English fur-trading vessels now appeared on the scene, bartering with the natives for furs, which were carried to China, to be there exchanged for teas, silks, spices, and other Oriental wares. Friction between Spanish and English trading interests at Nootka Sound — where the latter had made small settlements — led to a spirited controversy that might readily have precipitated war, but which ended peacefully in the withdrawal of Spain (1795). By this time, American trading craft were sharp competitors for the China-American fur traffic of the Northwest Coast. Owing to the monopoly of the East India Company in British trade on the Pacific Ocean, most of the Englishmen gradually withdrew:

¹ Several important documents connected with these early American projects in transcontinental exploration, will be found in the Appendix to the present work. For a fuller narrative, see Thwaites, Rocky Mountain Exploration (N. Y., 1904), chap. iv.

[ xxii ]

American Journeys — www.americanjourneys.org
INTRODUCTION

thus for some twenty years leaving New England navigators almost complete masters of the situation.

When Thomas Jefferson became president of the United States, perhaps two score American trading vessels were annually visiting Nootka Sound and the mouth of the Columbia; British overland traders were operating among the Mandans and their neighbors, at and below the great bend of the Missouri; French and half-breed trappers and traders, together with a few expatriated Kentuckians, were familiar with the Missouri and its lower affluents; upon St. Peter’s River (near the Minnesota), British free-traders were profitably operating among the Sioux, a proximity which caused much uneasiness among Americans in the West. As yet, few citizens of the United States were operating in the vast territory of Louisiana, which Napoleon, dreaming of another New France in North America, had now (October 1, 1800) obliged Spain to recede to him; but of which he had not thus far taken formal possession.

Amidst the manifold duties of his great office, Jefferson had not forgotten his early scheme for exploring the trans-Mississippi. Greater opportunity now presented itself—he possessed influence to secure governmental aid, and recognized the existence of a stronger public spirit. The lapse in the winter of 1802-03 of an “act for establishing trading houses with the Indian tribes,” was made the occasion for addressing (January 18) a secret message to Congress, in which he urged the importance of reaching out for the trade of the Indians on the Missouri River, that thus far had in large measure been absorbed by English companies; and suggested an exploring party as the best means of accomplishing this object. He recognized that the country which he thus proposed to enter was the property of France, although still governed by Spain; but thought that as the latter nation’s interests were now waning, she would not be disposed to jealousy and would regard the enterprise merely “as a literary pursuit.” An estimate of the necessary expenses was placed at only $2,500; but the correspondence which we

1 See Appendix, for this document.
INTRODUCTION

give in the Appendix, shows that Jefferson intended that the exploring party should, while still in the United States, be subsisted by the War Department; and in addition thereto we shall see that he issued in their favor a general letter of credit, which proved of no avail, but further demonstrates the fact that the explorers were not expected to limit themselves to the appropriation.

MERIWETHER LEWIS

Congress having proved complaisant, in secretly giving the necessary authority and passing the modest appropriation, Jefferson at once appointed his private secretary, Captain Meriwether Lewis, as head of the proposed expedition. Lewis was born near Charlottesville, Virginia, August 18th, 1774, his people being prominent in colonial and Revolutionary affairs. His father, William, died when Meriwether, named for his mother's family, was a child. The boy came under the guardianship of his uncle Nicholas, who had in 1776 commanded a regiment in the campaign against the Cherokees; but his education remained under the direction of his mother, a woman of capacity and judgment. When but eight years of age, the lad had established a local reputation as a hunter; and until his thirteenth year, when he was sent to a Latin school, had ample opportunity to satisfy his adventurous cravings in this direction. After five years of tuition, he returned to his mother's farm, where the succeeding two years were spent in careful attention to the details of husbandry, in the course of which he acquired some skill in botany, that was to stand him well in stead during the great expedition of a few years later.

In 1794, when Lewis was twenty years of age, the so-called Whisky Rebellion, against a federal excise tax, broke out in Western Pennsylvania, and threatened to spread into Virginia and Maryland. President Washington issued a requisition for some thirteen thousand militia from New Jersey, Pennsylvania, Maryland, and Virginia, and this force promptly marched towards the seat of [ xxiv ]
INTRODUCTION

disturbance, thus speedily causing the subsidence of what was practically an insurrection against the national government. Lewis enlisted as a private in this little army, and at the close of the disturbance was given employment in the regular service — originally as ensign in the First Infantry (May 1, 1795), later as first lieutenant, and then captain (1797) in the same regiment. He served with distinction under General Wayne, in the latter’s Northwestern campaigns, and in the first year of his captaincy was in charge of the infantry in Captain Isaac Guion’s expedition to take over the Spanish posts in Mississippi. He also was for several years the paymaster of his regiment.

Captain Lewis appears early to have won the esteem and confidence of his distinguished neighbor, Thomas Jefferson; and in the spring of 1801 the latter, as president of the United States, appointed him as his private secretary. We have already seen that in 1783 Jefferson, not then in official life, suggested to George Rogers Clark an exploration of the trans-Mississippi country, and that his subsequent negotiations with Ledyard (1788) and Michaux (1793) came to naught. The last-named mission had been unsuccessfully sought by his adventurous young friend Lewis, although but nineteen years old. When, apparently as early as July, 1802, President Jefferson revived his long-considered project, he offered the post of leader to his private secretary.

1 See Claiborne, Mississippi (Jackson, 1880), p. 184, note.
2 A manuscript book in the possession of the American Philosophical Society, containing Lewis’s meteorological and natural history data, also has a few brief records of his accounts as paymaster in 1800. In that year he made an extended official tour by land and water, to the posts at Pittsburg, Cincinnati, Fort Wayne, and Detroit, visiting Limestone (Maysville, Ky.), Chillicothe, and Wheeling en route.
3 The original of Jefferson’s letter to Lewis, offering this appointment (dated Washington, February 23, 1801), is in the Bureau of Rolls, Department of the Interior, Washington, where its press-mark is “Jefferson Papers, 2d series, vol. 51, doc. 110.” Jefferson writes that the salary is but $500, “scarcely more than an equivalent for your pay & rations” in the army; but it is an easier office, would give him opportunity to meet distinguished people, and he could board and lodge with the president’s family, free of charge. The original of Lewis’s letter of acceptance, dated Pittsburg, March 10th, may be found in ibid, doc. 95.
INTRODUCTION

who, now having attained the age of twenty-eight, had again pleaded for this honor. In his Memoir of Lewis, the president pays him this generous tribute:

I had now had opportunities of knowing him intimately. Of courage undaunted; possessing a firmness and perseverance of purpose which nothing but impossibilities could divert from its direction; careful as a father of those committed to his charge, yet steady in the maintenance of order and discipline; intimate with the Indian character, customs, and principles; habituated to the hunting life; guarded, by exact observation of the vegetables and animals of his own country, against losing time in the description of objects already possessed; honest, disinterested, liberal, of sound understanding, and a fidelity to truth so scrupulous that whatever he should report would be as certain as if seen by ourselves — with all these qualifications, as if selected and implanted by nature in one body for this express purpose, I could have no hesitation in confiding the enterprise to him.

The president had at first sought as commandant a scientist who possessed, in addition to his scholarly attainments, the necessary "courage, prudence, habits & health adapted to the woods & some familiarity with the Indian character." Failing in this, Captain Lewis was chosen as being, in his chief's opinion, "brave, prudent, habituated to the woods, & familiar with Indian manners and character. He is not regularly educated, but he possesses a great mass of accurate observation on all the subjects of nature which present themselves here, & will therefore readily select those only in his new route which shall be new."

In order to acquire "a greater familiarity with the technical language of the natural sciences, and readiness in the astronomical observations necessary for the geography of his route," Lewis proceeded to Philadelphia, where he received instruction in the rudiments of the sciences from

1 Introduction to Biddle edition, pp. xi, xii.
2 Jefferson's letter to Dr. Caspar Wistar, in Appendix.
3 Jefferson's letter to Dr. Benjamin Rush, in Appendix.
4 Jefferson's Memoir of Lewis does not mention that Lewis went to Philadelphia as early as July, 1802; but his letter to Lewis, dated January 22nd, 1803 (see Appendix), indicates that such was the fact.
several eminent specialists — that city being the home of the American Philosophical Society, and then the principal seat of learning in the country. His correspondence with Jefferson during this period, which is given in our Appendix, abounds in allusions to scientific and practical details, showing him to have been not only an apt pupil, but already possessed of a large fund of information of the sort essential to the equipment of an explorer.

WILLIAM CLARK

Early in the course of these preparations Lewis determined, with Jefferson's consent, to secure a companion who should share his honors and responsibilities. His choice fell upon Captain William Clark, four years his senior, but who had been the friend of his boyhood in Virginia, and his comrade in Wayne's Indian campaigns.

The Clarks, a large and now widely-ramified family group, had long lived in Albermarle County, Virginia, near the seat of the Lewis family, and here were born the two oldest children of John Clark and his wife Ann — Jonathan (1750–1816) and George Rogers (1752–1818). In 1754 John Clark removed to the neighborhood of Charlottesville, in Caroline County, where William, their ninth child, was born August 1st, 1770. This branch of the family — preceded several years by George Rogers Clark, who had become famous because of his campaign against Kaskaskia and Vincennes — moved to Kentucky in 1784, their estate being Mulberry Hill, on Beargrass Creek, near Louisville. The Clark home was the centre of hospitality and sociability for the region roundabout. It was frequented not only by sturdy pioneers of the Kentucky movement, with their tales of Indian warfare, and other perils and hardships of the early settlements; but the second generation of Kentucky emigrants also found here a welcome — gentlemen and lawyers of the new settlements, Revolutionary soldiers seeking homes in the growing West, men of enterprise, culture, and promise, permanent founders of a new civilization.

[ xxvii ]
INTRODUCTION

Among them all, young “Billy” was a marked favorite. In his nineteenth year he marched in the ranks of Colonel John Hardin’s expedition against the tribesmen north of the Ohio River; the following year he was despatched upon a mission to the Creeks and Cherokees; and in 1791 was ensign and acting lieutenant on the Wabash Indian expedition, under General Scott. “Your brother William,” writes one of the family friends,¹ “is gone out as a cadet with Genl Scott on the Expedition. He is a youth of solid and promising parts, and as brave as Cæsar.” Two years later (1793) we find him commissioned as a first lieutenant in the Fourth sub-legion, in General Anthony Wayne’s Western Army.

After being engaged as an engineer in constructing forts along the line of advance, he was, late in the season, sent upon a perilous expedition up the Wabash as far as Vincennes, during which his progress was for several weeks blocked by ice. The next year (1794) we read of him as being in charge of a train of seven hundred pack-horses and eighty men, transporting supplies to Fort Greenville. Attacked by the savages, he lost five men, but gallantly repulsed the enemy and won praise from Wayne, under whom he later (August 20) fought in the Battle of Fallen Timbers. Twice (1795) he was entrusted by his general with important commissions to the Spaniards, an account of which is to be found in the Spanish Papers of the Draper Manuscripts, in the Wisconsin Historical Library. It is said that no officer impressed the Spanish with a more wholesome respect than young Lieutenant William Clark. His four years’ service in the Western Army had familiarized him with the methods of handling large bodies of men under military discipline, and given him opportunity to exercise the courage and resource needed to deal with savage foes; and it put him in touch with the prominent men of his time. It had also—an important consideration, in view of his subsequent career—once more thrown him into the com-

¹ Dr. James O’Fallon to Colonel Jonathan Clark, Caroline County, Virginia, May 50th, 1791. — Draper MSS., z.L.28.
pany of Meriwether Lewis, now a fellow campaigner, and upon at least one expedition he was Lewis's superior officer.¹

Retiring from the army in 1796 — apparently with the brevet rank of captain, for thereafter he was given that title — William Clark lived quietly at home with his family, chiefly occupied in seeking to adjust the tangled affairs of his brother, George Rogers, who had been sued by many persons for supplies furnished in the Illinois campaigns. In the attempted settlement of these claims, William not only gave his time and effort, but sacrificed the small estate he had himself accumulated.

Such was the situation of his affairs when, on the sixteenth of July, 1803, he received a letter from his friend Captain Lewis²—dated Washington, June 19th—in which the latter,

¹ Much confusion has arisen because three William Clarks were prominent in the West, in those stirring days. (1) Judge William Clark, of Indiana Territory, who died at Vincennes in 1802; (2) William Clark, the son of Benjamin, and a cousin of George Rogers Clark; and (3) the subject of this sketch. Confusion between Nos. 2 and 3 has been especially common, among historians; Coues's sketch, in his Lewis and Clark (i, pp. lxviii, lix) is an instance — the "captain of militia," whose commission is given on the latter page, undoubtedly being William No. 2. In the Draper MSS., in the Wisconsin Historical Library, the papers of these two men have been indiscriminately commingled. This was the more natural, because the signatures of the two are so similar that it would require an expert to differentiate them. William No. 2 was one of the most efficient officers in the Illinois campaigns. He must have been quite young at the time; but in the later period of the Revolutionary War was entrusted with various important commissions. When Fort Jefferson was built in 1780, near the mouth of the Ohio, Lieutenant William Clark was sent with a convoy from Kaskaskia to provision it, and late the following year he removed to the Falls of Ohio, where Louisville now stands. He was here employed in garrison duty and in protecting the new settlement against its Indian foes. So valuable were his services, that on the reduction of the regiment in February, 1783, he was one of three officers retained in the service; and was only finally mustered out by the order of the governor in 1784. About this time a large tract of land (150,000 acres) was assigned to the Illinois regiment in return for its services, and laid off on the Indiana side of the Ohio River, opposite Louisville. Clark was appointed one of the allotment commissioners, also principal surveyor of the grant. From that time until his death in 1791, he was chiefly occupied in the business of this office. A man of good habits, kind heart, courage, and resource, he was popular and successful among the early inhabitants of that country. He was on intimate terms with his more illustrious cousins, and it is to be conjectured that he was particularly admired by William Clark No. 3, just then growing into manhood. He never married, and at his death left a considerable landed property to his brothers and sisters, most of whom had not yet removed from Virginia.

² See Appendix, for the correspondence in full.
INTRODUCTION

after giving confidential information of the projected expedition to the Pacific, proposed that Clark "participate with me in its fatigues, its dangers and its honors," assuring him that "there is no man on earth with whom I should feel equal pleasure in sharing them as with yourself." Clark promptly responded to this cordial offer, saying, "as my situation in life will admit of my absence the length of time necessary to accomplish such an undertaking, I will cheerfully join you."

It will be seen that Lewis's letter, owing to the slowness of Western mails, was nearly a month in reaching Clark. Failing to hear from his comrade as soon as he had expected, and fearing that he could not go, Lewis opened tentative negotiations with Lieutenant Moses Hooke of his own regiment (the First Infantry), who was then in charge of military stores at Pittsburg. In a letter to Jefferson (July 26, 1803) Lewis describes him as a young man "about 26 years of age, endowed with a good constitution, possessing a sensible well informed mind, is industrious, prudent and persevering and with all intrepid and enterprising." A few days later, however (August 3), Lewis, then at Pittsburg, anxiously waiting for his keel-boat to be completed, received Clark's acceptance, and promptly expressed to the latter that he felt "much gratified with your decision; for I could neither hope, wish, or expect from a union with any man on earth, more perfect support or further aid in the discharge of the several duties of the mission, than that, which I am confident I shall derive from being associated with yourself."

THE EXPEDITION

It will be remembered that when Jefferson instituted the ambitious enterprise, the original records of which we are here publishing for the first time, the trans-Mississippi Louisiana Purchase was the property of France, although still in the hands of Spain. This fact gave rise to the secrecy with which the preparations were invested. But upon the

---

1 For text, see Appendix.
second of May, 1803, the American commissioners in Paris had signed a treaty with Napoleon by which Louisiana was sold to the United States. Lewis's invitation to Clark shows that some inkling of this unexpected and startling negotiation had reached Jefferson by that date (June 19); but the official news thereof did not arrive in Washington until the first days in July. The circumstance in no way altered Lewis's arrangements, save that it was no longer necessary to maintain that privacy as to the purpose of the exploration, which had been hitherto enjoined upon him.

Organized as a military detachment, under the orders of the secretary of war — although President Jefferson remained the moving spirit — the party, when complete, consisted of twenty-nine persons officially recognized on the rolls; with French and half-breed interpreters, Clark's negro slave York, and the Indian woman Sacajawea as supernumeraries — forty-five in all, including the two captains. Lewis — who had bidden good-bye to his friends at the White House on the morning of July 5th — embarked at Pittsburg on the thirty-first of August; but owing to shallows in the Ohio River, and the necessity of stopping at some of the forts to obtain volunteers from their garrisons, his passage was slow. At Louisville he picked up Clark and several young Kentucky recruits. December was a third spent, before the expedition went into winter camp at River Dubois, in Illinois, opposite the mouth of the Missouri, where the men were rigorously drilled both as soldiers and frontiersmen. It had been Lewis's intention to camp at some distance up the Missouri; but the lateness of the season, the technical objections raised by Spanish officials, and Jefferson's characteristic suggestion 4 that a camp on the east side, in American territory, would save the appropriation by allowing

INTRODUCTION

the men to draw their winter's rations from the War Department, induced him to stop at River Dubois.

The journals show that the winter was a busy one — Clark being engaged at camp for the most part, in organizing and disciplining the party, and accumulating stores and boats for the long up-river journey; while Lewis was often in St. Louis, consulting with French fur-traders and others who knew the country. On March 9th and 10th, 1804, we find him the chief official witness at the formal transfer of Upper Louisiana — at first from Spain to France, and then from France to the United States.

The expedition started from Camp River Dubois on May 14th, "in the presence of many of the neighboring inhabitants, and proceeded on under a gentle breeze up the Missouri." The long and painful up-stream journey during the summer and autumn of 1804 was followed by a winter spent in log huts enclosed by a stout palisade, among the Mandan Indians not far from the present Bismarck, North Dakota. Making a fresh start from Fort Mandan, upon the seventh of April, 1805, there ensued a toilsome experience all the way to the headspring of Jefferson Fork of the Missouri, which was reached August 12th. Then came the crossing of the rugged, snow-clad Bitterroot Mountains, which here constitute the divide, and the descent of the foaming rapids and cataracts of the Columbia, until the Pacific Coast was reached in November. By Christmas the party were safely housed within Fort Clatsop, a rude structure — like Fort Mandan, log huts within a palisade covering a plot of ground some fifty feet square.¹

Another dreary but busy winter was spent in studying the natives and making other scientific observations in the neighborhood, and filling their large note-books with these interesting data. This was not the season, however, for meeting any of the numerous trading mariners who frequented the Northwest Coast; thus the letter of credit which Jefferson had given to Lewis proved of no avail, and for several months the explorers were obliged to exercise great

¹ See plan of the fort, in chapter xxi, vol. iii of the present work.

[ xxxii ]
INTRODUCTION

ingenuity in making trinkets with which to obtain supplies from the natives, who exhibited an avaricious temperament.

Leaving Fort Clatsop the twenty-third of March, 1806, the return of the expedition was delayed by heavy snows on the mountainous divide, and much hardship was experienced. The actual crossing of the range commenced June 15th. By the first of July the party had arrived at Travellers' Rest Creek, where the native trails converged, and here they divided into two sections—Lewis’s party going direct to the Falls of the Missouri, and afterwards exploring Maria’s River with a view to ascertaining its availability as a fur-trade route to the north; Clark and his contingent proceeding to the head of navigation of the year before, and then crossing over to the Yellowstone and descending that stream to its junction with the Missouri. Parting company on the third of July, it was the twelfth of August before the two branches of the expedition reunited on the Missouri, several days below the mouth of the Yellowstone. Their final happy arrival at St. Louis, on the twenty-third of September, after an absence of two years, four months, and nine days, is one of the familiar events in American history.

THE STORY OF LEWIS AND CLARK’S JOURNALS

The final entry in the journal of Captain Clark is significant:

Friday 25th [26] of Sept., 1806

a fine morning we commenced weighting &c.

This shows that on the third day after their return to civilization, the commanders began placing its literary records into definitive form. The history of these records, thus promptly commenced, proved to be almost as romantic as that of the great discovery itself.

In his detailed instructions to Lewis (June 20, 1803), President Jefferson had displayed particular concern for the journals of the proposed expedition to the Pacific, which with all possi-

American Journeys — www.americanjourneys.org
ble scientific data were to be prepared "with great pains & accuracy, to be entered distinctly, & intelligibly for others as well as yourself." The notes of the two captains were to be guarded against loss by making copies of them — "one of these copies [to] be written on the paper of the birch, as less liable to injury from damp than common paper."¹ Not only were Lewis and Clark to keep such journals, but they were to encourage their men to do likewise. Jefferson especially requested of Lewis that "several copies of ... your notes should be made at leisure times & put into the care of the most trustworthy of your attendants, to guard by multiplying them, against the accidental losses to which they will be exposed." The captain was reminded that "in the loss of yourselves, we should lose also the information you will have acquired;" and as a further precaution was required "to communicate to us, at reasonable intervals, a copy of your journal, notes & observations of every kind, putting into cypher whatever might do injury if betrayed" — for we have seen that at the time these instructions were written the country to be explored and thus opened to American trade, was in the hands of the Spanish, whose suspicions must not be aroused.

The two leaders faithfully performed their duty in this regard, and the four sergeants — Charles Floyd, Patrick Gass, John Ordway, and Nathaniel Pryor — also wrote various journals.² Tradition has it that at least three of the twenty-three privates (Robert Frazier, Joseph Whitehouse, and possibly George Shannon) were, as well, diarists upon the expedition — but the only private's note-book now known to us is that of Whitehouse.

It was the daily custom of the captains to make rough notes, with rude outline maps, plans, and miscellaneous sketches,³ in

¹ This suggestion was not adopted, in practice.
² In the camp orders issued by Lewis and Clark, May 26th, 1804 (see post, p. 33), occurs this sentence: "The serg[t in addition to those [other] duties are directed to keep a separate journal from day to day of all passing occurrences, and such other observations on the country &c. as shall appear to them worthy of notice."
³ Clark was the draughtsman of the party. His maps, sketches of birds, fishes, leaves, etc., in the note-books of both Lewis and himself, and on separate sheets of paper (for which latter, see our atlas volume), are worthy of an engineer with better training than he had received. They are all carefully reproduced in the present work.
INTRODUCTION

field-books which they doubtless carried in their pockets. When encamped for a protracted period, these were developed into more formal records. In this development, each often borrowed freely from the other’s notes—Lewis, the better scholar of the two, generally rewriting in his own manner the material obtained from Clark; while the latter not infrequently copied Lewis practically verbatim, but with his own phonetic spelling. Upon returning to St. Louis, these individual journals were for the most part transcribed by their authors into neat blank books—bound in red morocco and gilt-edged—with the thought of preparing them for early publication. After this process, the original field-books must have been cast aside and in large measure destroyed; for but one of these is now known to exist. There have come down to us, however, several note-books which apparently were written up in the camps.

Collectively, these journals of the captains cover each and every day the expedition was out—largely a double record, although there are occasional periods when we have the journal of but one of them. The manuscripts well exemplify the habits and characteristics of the two men—Clark, the more experienced frontiersman of the two, expressing himself

1 By Clark, dated Sept. 13th-Dec. 31st, 1805, and described post.
2 We have much more of Clark in these journals, than of Lewis. The lacunae in the Lewis manuscripts, as compared with the dates covered by Clark, are as follows:
1804—May 14, 16-19, 21-September 15; September 18-December 31 = 228 days.
1805—January 1-February 2; February 14-April 6; August 27-September 8; September 11-17, 23-November 28; December 1-31 = 168 days.
1806—August 13-September 26 = 45 days. But during much of this period Lewis was disabled from a wound, and therefore unable to write.

The only apparent gap in the Clark journals, is the brief period from February 3 to 12 (inclusive), 1805 = 10 days. But the omission is only nominal, for under February 13th he gives a summary of events during this period of absence; see vol. i, p. 253, note, and pp. 259-261. Actually, we have from Clark a perfect record of his movements day by day throughout the expedition.

Whether the missing Lewis entries (441 days, as compared with Clark; but we may eliminate 41 for the period when he was disabled, thus leaving 400) are still in existence or not, is unknown to the present writer. There appears to be no doubt that he regularly kept his diary. It is possible that the missing notes, in whole or in part, were with him when he met his death in Tennessee, and were either accidentally or purposely destroyed by others.
sententiously with Doric simplicity and vigor of phrase, and often amusingly eccentric orthography; Lewis, in more correct diction, inclined to expatiate on details, especially with regard to Indians and natural history, and frequently revealing a poetic temperament and a considerable fund of humor.

In February, 1806, when the expedition was upon the Pacific coast, President Jefferson sent to Congress a message enclosing, among other matters, a letter from Lewis, dated at Fort Mandan in the previous April, just as the explorers were leaving for the upper country;¹ at that point the party had passed their first winter. This communication, describing the experiences of the expedition as far as Fort-Mandan, was accompanied by brief reports of explorations on the Red and Washita rivers by Dr. Sibley, Dr. Hunter, and William C. Dunbar, together with statistics of the Western tribes and other data of the kind; the ill-assorted whole being promptly printed as a public document.² Based upon this fragmentary publication there soon sprung up, both in England and America, a long list of popular compilations telling the story of the Lewis and Clark expedition during its first year, expanded with miscellaneous information about the Western Indians, picked up here and there—some of it singularly inaccurate.³

A year later (early in 1807), only a few months after the return of the party, there was published at Philadelphia the first detailed report of the entire tour; being the journal of Sergeant Patrick Gass, an observant man, whose rough but generally accurate notes had been expanded with small regard to literary style, by an Irish schoolmaster, named David McKeehan, of Wellsburg, West Virginia. This little volume of about 83,000 words,⁴ with its curiously crude illustrations, was reprinted in London in 1808, while new American editions appeared at Philadelphia in 1810, 1811, and 1812, and a French translation at Paris in 1810. It is now, in any form, a rarity.

¹ For this document, see Appendix.
² See first item in Bibliographical Data, in the present volume, post.
⁴ See Bibliographical Data, for description of the various editions of Gass's Journal.
INTRODUCTION

It had been the intention of Lewis and Clark to publish their own journals; they had presented no official detailed report to the government, it being left with them by Jefferson, as we shall see, to make such literary use of their material as they saw fit. During the year following the return, and the one in which Gass’s Journal had appeared, Lewis issued a prospectus announcing the speedy publication of the official narrative by C. & A. Conrad, of Philadelphia. The first volume was to contain the “narrative of the voyage,” the second to be devoted chiefly to an account of “the Indian nations distributed over that vast region,” and the third “exclusively to scientific research.” Apart from this, was to be published “Lewis and Clark’s Map of North America, from longitude 9° west to the Pacific Ocean, and between 36° and 52° north latitude, with extensive marginal notes, dimensions five feet eight inches by three feet ten inches, embracing all their late discoveries, and that part of the continent heretofore the least known.”

Unfortunately for this enterprise, both explorers soon after their return had received, together with commissions as generals, important government appointments: Lewis being made governor of Louisiana Territory; and Clark its superintendent of Indian affairs and brigadier-general of militia. The onerous duties appertaining to these offices, in the new and vast territory through which they had journeyed, were necessarily absorbing; and neither being a literary man, the task of publication under such circumstances was easily deferred.

Urged by Jefferson—who from the first had been keenly desirous to have the records of the exploration as soon as possible made the common property of the world—it was in 1809 agreed that General Lewis should in earnest undertake the work. He was travelling on horseback through Tennessee,

1 See Appendix, for this prospectus.
2 Upon the expedition, Lewis held a captaincy in the First Infantry; Clark had been commissioned as second lieutenant of artillery. On their return they both resigned from the army—Clark on February 27th, 1807, and Lewis on March 2d following. March 3d, Jefferson signed Lewis’s commission, and nine days later Clark’s.
on his way to Washington, intending thereafter to go to Philadelphia to enter upon this editorial task, when he lost his life during the night of October 11th. A guest, at the time, of a wayside settler some sixty miles southwest of Nashville, it was reported that he had committed suicide—a theory which Jefferson, probably his closest friend, accepted without question; but it was and still is believed by many that he was murdered for the small sum of money upon his person at the time.¹

Clark, now the sole surviving head of the expedition, prompted by the indefatigable Jefferson, appears to have soon sought the assistance of an editor in bringing out the proposed publication. It seems that, probably early in 1810, overtures were made to him from some literary person in Richmond, Virginia;² but these he rejected, and earnestly solicited the aid of Nicholas Biddle, of Philadelphia. Biddle, who was descended from one of the oldest Philadelphia families, had graduated from Princeton in his sixteenth year (1801); he had been secretary to John Armstrong, our minister to France (1804), and while in Paris had superintended the payment of American claims growing out of the Louisiana Purchase—in this capacity greatly surprising the French officials both by his brilliancy and his youth. After travelling extensively in Europe, he became secretary to Mr. Monroe while the latter was minister to Great Britain, but in 1807 returned to practise law in Philadelphia. At the time of Clark's invitation, Biddle was but twenty-four years of age; nevertheless he had already attained considerable reputation as a financier, lawyer, and man of letters—in the last-named field being editor of the *Port-folio*—and socially was by many considered both the handsomest and the most charming man in Philadelphia, as he certainly was one of the most cultivated. It is small wonder that Clark selected him as the writer of the narrative.

² See Biddle-Clark correspondence in Coues, *Lewis and Clark*, i, pp. lxxxii et seq.
INTRODUCTION

In his second letter to Biddle, dated February 20th, 1810, from the home of his father-in-law, Colonel George Hancock, near Fincastle, Virginia—then being visited by the general—he invites his correspondent to come to him at that place, "where I have my books and memorandums and stay with me a week or two; read over & make yourself thereby acquainted with everything which may not be explained in the Journals. . . . Such parts as may not be full, I can explain, and add such additional matter as I may recollect. I brought the Books with me to Copy such parts as are intended for the Botanical work which I shall send to Doct' Barton, and will deliver the Books to you if you will engage to write the naritive &c."

On the third of March Biddle replied to Clark, regretting "that it will be out of my power to undertake what you had the politeness to offer;" explaining that "My occupations necessarily confine me to Phil' and I have neither health nor leisure to do sufficient justice to the fruits of your enterprize and ingenuity. You cannot be long however without making a more fortunate selection."

Two weeks later, however (March 17), he again addressed Clark—who was still at Fincastle—and reports having been seen by some of the latter's friends in Philadelphia; the result of the conference being that he "will therefore very readily agree to do all that is in my power for the advancement of the work; and I think I can promise with some confidence that it shall be ready as soon as the publisher is prepared to print it. Having made up my mind today, I am desirous that no delay shall occur on my part." He therefore will soon visit the general at Fincastle. The latter replied (March 25) with "most sincere acknowledgements for the friendly sentiments," and urged an immediate visit, "as my business calls me to Louisiana; and nothing detains me, but the business I wish with you."

Biddle made the trip to Fincastle, noted Clark's oral statements, and carried back with him to Philadelphia the journals and maps of the expedition, from which he at once began to prepare its history. In May, Clark sent to the editor George
INTRODUCTION

Shannon, who, when a lad of sixteen years, had creditably served as one of the privates in the detachment. Then twenty-three years old, and studying for the law, Shannon appears to have remained in Philadelphia during most of the time spent in draughting the narrative, and to have materially assisted Biddle both in interpreting the note-books and giving personal recollections of the tour. Not only did Clark tender the services of Shannon, but he himself was in frequent correspondence with the editor, and purchased and forwarded to him the journal of Sergeant Ordway. The journal of Sergeant Gass being already in print, was of course also accessible to Biddle.

The talented young editor at once surrendered himself almost completely to the difficult task before him; he had promised Clark that the narrative should be ready for the press within twelve months. By the seventh of July he appears to have finished the story up to July 7th, 1805, above the Falls of the Missouri; for in a note to his distinguished correspondent, chiefly concerning the maps for the publication, he playfully says: "Today I have sent you and ten men up into a bottom to look for wood to make canoes after the unhappy failure of your iron boat." A year later (July 8, 1811) he wrote to Clark, informing him that he had "completed the work agreeable to our engagement," and was "ready to put it to the press whenever Mr. Conrad chose."

1 Shannon was born in Pennsylvania, of a good family, in 1787. After the return of the expedition he lost a leg as the result of a wound at the hands of Indians, the amputation having taken place at St. Charles, Mo. Soon after serving Biddle, he was admitted to the bar at Louisville, Ky.; becoming a circuit judge in Kentucky, a state senator in Missouri, and U. S. district attorney for Missouri. He died suddenly in court in 1836, aged forty-nine years.

2 The following memoranda, found in Clark-Voorhis note-book No. 4, were evidently made by General Clark at this time:

"Mem. Enquire at St. Louis into the Situation & number of the Crow Indians & which, if either, of their hands is called the Paunch Indians.
Also for some Indian speeches.
Story of the Osage on the subject of the Beaver.
Send to M. Biddle every thing authentic & not yet published on the subject of the Fur Trade.
Get an Indian Song
about the Fur Trade
Fur Compy " — Ev.

INTRODUCTION

In our day, a manuscript of this character would eagerly be sought by publishers. Stanley, Nordskjöld, Nansen, and Hedin have had but to choose among applicants from the book-trade. Ninety years ago, the situation was far different. John Conrad, a prominent publisher of his day, was finally prevailed upon to undertake the work, the financial outcome of which seemed to some others doubtful. He appears to have entered into the project with much interest; but by the time Biddle was ready, Conrad had fallen into financial straits, and in due course was plunged into bankruptcy; for this was the period of the second war with England, and business was unsettled. Biddle accordingly writes to Clark, July 4th, 1811, stating the facts in the case, and incidentally mentioning that "Last winter I was prevented from going to the legislature chiefly by a desire to stay & superintend the printing." He has, however, made an arrangement with Thomas Bradford, "one of the best booksellers here," and hopes that "we can proceed vigorously & soon get the volumes out."

Despite Biddle’s optimism affairs dragged slowly, for Bradford’s terms were unsatisfactory. Over a year later (September 5, 1812), we find Clark offering Biddle "the half of every profit arising from it, if you will attend to it, have it completed as far as it is possible and necessary. printed published &c. including the advances which have and may be necessary &c."

Biddle does not appear to have accepted this financial proposition; familiar with the book market, he probably anticipated the failure of the project.

Throughout the course of the work Conrad continued his friendly concern, and assisted Biddle in his strenuous search for a publisher. November 12th, he writes Biddle that he has tried Johnson & Warner without success; that firm "seem to have so incorrect an idea of the value of the work and probable profits arising from the publication of it." He advises Biddle to "agree to Mr. Bradford’s offer. It is I am confident the best bargain you can make for Genl Clarke. The copyright I presume will be in him (Genl. C.) & I suppose he will derive the entire benefit of the sale of the M. S. in England."

[ xli ]
INTRODUCTION

This advice Biddle in due time felt impelled to accept, and February 23d, 1813, tells Clark that having found Bradford's terms "not such as I thought advantageous I made proposals to all the booksellers in town. The stagnation in that branch of business was so great that no one was willing to embark in it, and after a great deal of fruitless negotiation I was obliged to return and on the advice of M' Conrad accept M' Bradford's proposals . . . I now wait only for the engravers who will soon I hope finish their work and then we can strike off the printing immediately & in a little time the work will be published." Nevertheless a year was spent in the mechanical execution of the two small volumes. Meanwhile the publishing firm of Bradford & Inskeep, who had undertaken the work, in their turn became insolvent and at the actual time of publication (February 20, 1814)¹ were in the bankruptcy court.

Just before going to press, Biddle was elected to the legislature, in which he soon won an enviable reputation for statesmanlike qualities. Being thus prevented from paying that attention to the book which he thought it deserved, he engaged Paul Allen, a Philadelphia newspaper writer, to supervise the issue. In a letter to Clark (March 23), reviewing some of the circumstances of the publication, Biddle says: "The gentleman who received and prepared it for the press, Mr. Allen, is a very capable person, and as I did not put the finishing hand to the volumes I did not think it right to take from him the credit of his own exertion and care by announcing personally the part which I had in the compilation. I am content that my trouble in the business should be recognized only by the pleasure which attended it and also by the satisfaction of making your acquaintance, which I shall always value. I could have wished that your time had permitted you to revise the whole of the work, as no doubt some errors and inadvertencies have from the nature of the volumes and the circumstances attending the publication crept into them. I hope however that you will not

¹ The date of the first sale of volumes. See Coues, Lewis and Clark, i, pp. xci, xcii, for detailed statement of the financial outcome of the enterprise.
INTRODUCTION

find them very numerous or important . . . Henceforth you may sleep upon your fame, which must last as long as books can endure. Mr. Bradford has I presume sent you a copy of the work."

Despite Biddle’s determination to claim no credit for the narrative which has long been regarded a classic in American history, it is quite apparent that Allen’s connection with the enterprise was but that of reviser for the press. He himself frankly states in the Preface, that he does not wish “to arrogate anything from the exertions of others;” that “he found but little to change, and that his labor has been principally confined to revising the manuscript, comparing it with the original papers, and inserting such additional matter as appears to have been intentionally deferred by the writer [Mr. Biddle] till the period of a more mature revisal.” Allen secured from President Jefferson an admirable memoir of Lewis; possibly, he also blocked out the chapters; and in a measure the mechanical form may be due to him. His labors were doubtless important from the typographical and clerical side; but of course the credit for the enterprise should chiefly rest with Biddle. That the latter had finished the work, ready for the final touches of a practical reviser for the press, is evident from his own letters to Clark, as well as the confirmatory statement which has come down to us from Conrad.

In his richly annotated edition of the Travels (N. Y., 1893, 4 vols.), Dr. Elliott Coues spends much space and energy in persistently heaping vituperation on Allen for fathering a work mainly performed by another. Biddle had the undoubted right to withdraw his name from public connection with the narrative. We may consider his reasons Quixotish, but he was entitled to be guided by them, and they certainly bespeak a nature more generous than we are accustomed to meet. As for Allen, it is evident that he did his part with becoming modesty; no doubt he well earned the fee of $500 — partly taken out in trade — with which he was rewarded by the publishers. Press-revision and proof-reading are no light tasks; although we might wish that, while he was at it, he had also given us an index.
INTRODUCTION

The size of the edition was, apparently, 2,000 copies.\(^1\) Of these it would seem that 583 were either lost in some manner—

A profitless undertaking

"supposed to be destroyed in binder's or printer's hands"—or were defective from lacking plates; this would leave for sale only 1,417 perfect copies, which explains why the book is now rare. The net profits on the enterprise were computed at $154.10, of which neither Clark nor Biddle appears to have received a penny. The copper plates of the engraved maps became the property of the latter, and are now owned by his son, the Hon. Craig Biddle, of Philadelphia. To Clark was left the copyright. As for the heirs of Lewis, we find them\(^2\) as late as 1816-17 making application to Clark for their share of the earnings, "persuaded that profit arising from that work has been received," and being informed by the latter of the dismal result of the enterprise.

Over two and a half years after the publication, a letter from Clark to Jefferson (October 10, 1816)\(^3\) reveals the fact that the explorer had himself "not been so fortunate as to procure a single volume, as yet"—thus showing that Bradford, in the midst of his financial troubles, had not carried out the above-mentioned agreement with Biddle, to transmit a copy of the work to the man chiefly concerned in its appearance.

The service of Biddle in editing the journals of the Lewis and Clark expedition, was a far more difficult literary undertaking than is commonly supposed. The entire mass of notes which he had before him may be thus roughly computed:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lewis and Clark journals (Amer. Philosophical Society codices)</td>
<td>900,000</td>
</tr>
<tr>
<td>Gass Journal (as printed)</td>
<td>83,000</td>
</tr>
<tr>
<td>Ordway Journal — unknown, but possibly</td>
<td>100,000</td>
</tr>
<tr>
<td></td>
<td>1,083,000</td>
</tr>
</tbody>
</table>

To this we should add about 160,000 words in the Clark-Voortis collection, later to be described, and undoubtedly at

INTRODUCTION

one time in Biddle's hands; and whatever additional notes he may himself have made during conversations with Clark and Shannon, or as the result of correspondence with the former — and they must have been copious. A large proportion of the scientific matter of the Lewis and Clark note-books, however, which may have aggregated a fourth of the journals as a whole, had at the outset been eliminated by Clark and Biddle. This material, carefully copied out, was sent to Dr. Benjamin Smith Barton, an eminent naturalist in Philadelphia.1 Dr. Barton agreed to edit a special volume, “which was to have been (by contract) prepared in six months from the time” of the appearance of the narrative of the journey. Owing to Barton's illness and consequent death, this “scientific part”2 was not written. Thus, while the Biddle narrative gives a popular account of some of the principal discoveries, the scientific data so laboriously kept by Lewis and Clark, chiefly the former, has not heretofore been published.

It was Biddle's task to weave this mass of heterogeneous data into a readable paraphrase which should have unity and a simple and forceful literary style. Adopting so far as possible the language of the original journals, where essential he amplifies and explains them from his additional data — Clark and Shannon's verbal statements, and the Ordway and Gass journals, assisting him to a more complete understanding. The nearly 1,500,000 words of manuscript he condensed into 370,000 printed words. The first person plural is used, save where the captains are individually mentioned, and then we have the third person singular. So skilfully is the work done, that probably few have realized that they had not before them the veritable journals of the explorers themselves, written upon the spot. The result will always remain one of the best digested and most interesting books of American travel, comparable in many respects with Astoria and Bonneville’s Adventures — of course lacking Irving’s

INTRODUCTION

charm of style, but possessing what Irving's two Western classics do not, the ring of truth, which never fails to appeal to those who love a tale of noble adventure in the cause of civilization.1

We have seen that Jefferson, who set on foot the expedition, had from the first expressed much concern in its records, both in the making and the publication. He had urged their early printing, and on Lewis's death spurred Clark to action; with what result, has been related. The dilatoriness of that performance — for which Clark, however, was only partly responsible — fretted the great man. December 6th, 1813, he wrote to Baron von Humboldt: "You will find it inconceivable that Lewis's journey to the Pacific should not yet have appeared; nor is it in my power to tell you the reason. The measures taken by his surviving companion, Clark, for the publication, have not answered our wishes in point of dispatch. I think, however, from what I have heard, that the mere journal will be out within a few weeks in two volumes, 8vo. These I will take care to send you with the tobacco seed you desired, if it be possible for them to escape the thousand ships of our enemies spread over the ocean. The botanical and zoological discoveries of Lewis will probably experience greater delay, and become known to the world through other channels before that volume will be ready. The Atlas, I believe, waits on the leisure of the engraver." 2 Nearly a hundred years have elapsed, and until the present work neither scientific data nor atlas has been given to the public.

Three years later (1816), we find Jefferson instituting a search for the manuscript journals of the explorers, with a view of placing them in the archives of the American Philosophical Society. He writes (April 26) 3 to Prof. Joseph F. Correa da Serra, a botanist then holding membership in the Society, asking him in the cause of science to interest himself in the matter, and

INTRODUCTION

describing in some detail the character of the documents — with which he was himself familiar, for he had handled them at Monticello. These papers, he informs Da Serra, "are the property of the government, the fruits of the expedition undertaken at such expence of money and risk of valuable lives. They contain exactly the whole of the information which it was our object to obtain for the benefit of our own country and of the world, but we were willing to give to Lewis and Clarke whatever pecuniary benefits might be derived from the publication, and therefore left the papers in their hands, taking for granted that their interests would produce a speedy publication, which would be better if done under their direction. But the death of Cap'l Lewis, the distance and occupations of General Clarke, and the bankruptcy of their bookseller, have retarded the publication, and rendered necessary that the government should attend to the reclamation & security of the papers. Their recovery is now become an imperious duty. Their safest deposit as fast as they can be collected, will be the Philosophical society, who no doubt will be so kind as to receive and preserve them, subject to the order of government. . . . As to any claims of individuals to these papers, it is to be observed that, as being the property of the public, we are certain neither Lewis nor Clarke would undertake to convey away the right to them, and that they could not convey them, had they been capable of intending it. . . . My interference will, I trust, be excused, not only from the portion which every citizen has in whatever is public, but from the peculiar part I have had in the design and execution of this expedition."

It appears that Biddle, who still held the majority of the note-books, was disinclined to surrender them to Jefferson save on order of Clark. September 8th, Jefferson wrote to the general, soliciting such an order, to "be given in favor either of the War office or myself. . . . I should receive them only in trust for the War office to which they belong, and take their orders relating to them." He wishes to deposit with the Philosophical Society "for safekeeping the travelling pocket journals as originals to be recurred to on all interesting questions arising out of the published journal;" his desire
being to secure "to the world all the beneficial results we were entitled to expect from it [the expedition], and which would so fully justify the expences of the expedition incurred by the United States in that expectation."

October 10th, Clark responds to Jefferson by enclosing "an Order on my friend M: Biddle for the papers in his possession," Biddle being at the same time instructed, as his agent, "to collect all the Books, papers, specimens, &c." in the hands of Dr. Barton's heirs or others. Clark expresses interest in Jefferson's desire to collect the papers, and adds: "From the mortification of not having succeeded in giving to the world all the results of that expedition, I feel Relief & greatitude for the interest which you are willing to take, in effecting what has not been in my power to accomplish." Nevertheless, we shall presently see that Clark had retained in his possession at St. Louis five of his own original journals, nearly all the maps made by him upon the expedition, and many miscellaneous documents concerning the enterprise; these he did not surrender.

Jefferson now writes to Dr. John Vaughan of the Society (June 28, 1817), saying that although Da Serra had obtained several note-books from Mr. Biddle and Mrs. Barton, considerable difficulty is being experienced in collecting all the documents. Evidently much annoyed, he proposes to bring pressure to bear, through the secretary of war, "that office having some rights to these papers." The further suggestion is made, that the Society publish "in their Transactions or otherwise," a digest of the "zoological, vegetable & mineralogical papers & subjects."

On the eighth of April, 1818, we learn from the manuscript minutes of the corporation that "Mr. Nicholas Biddle deposited the original journals of Lewis and Clark, with an account of them and of those journals and documents which he was not possessed of." The deposit consisted of eighteen note-books and twelve parcels of loose sheets; of these, thirteen are in red-morocco covers—seven by Lewis and six by Clark.¹

¹ The correspondence touching upon this event will be found in full in the Appendix.
INTRODUCTION

Here the records of Jefferson's search suddenly cease. Neither the federal government nor the American Philosophical Society having decided to publish them, these precious manuscripts slumbered untouched for nearly seventy-five years in the library vault of the Society, practically unknown to historical scholars outside of that institution. In 1892, Dr. Elliott Coues, eminent as a scientist and traveller, as well as an editor of American historical sources, was engaged in preparing the new edition of Biddle, to which frequent reference has already been made. Most if not all of his matter was before him in galley proofs, when he learned for the first time of the existence of the original manuscripts in Philadelphia. Armed with a letter from the explorer's son, Jefferson Kearny Clark, of St. Louis, Coues requested the loan of the note-books from their custodian. This was granted by the Society (vote of December 16), and the manuscripts were accordingly sent to him at Washington. Concluding that it was too late to block out the work afresh and discard Biddle's text, he compromised by enriching his notes with many citations from the originals—unfortunately freely modernized, as was his custom with all the Western manuscripts which he edited; and from them he also compiled a new chapter in the Biddle style, which he inserted into the body of the book, as though a part of the Biddle text. His modified excerpts but served to whet the appetites of students of American history, and thus led to the project for their eventual publication in extenso and with literal accuracy.

In returning the journals to the Society, Coues transmitted therewith a detailed report upon their scope and condition. While in his possession, he attached to each codex (note-book) a memorandum summarizing its contents, and to each gave an identifying letter, running from A to T. This was commendable; but certain other liberties which he took with the manuscripts merit our condemnation—for in many codices he freely interlined the text with his own verbal changes and comments; and in general appeared

INTRODUCTION

to treat the material as though mere copy for the printer, which
might be revised by him with impunity. Apparently the
codices remained unopened after their return; for it was not
until the summer of 1903 that the Society authorities were
made aware, by one who was examining them in detail, of the
surprising treatment to which they had been subjected.

The next chapter in the story opened in the spring of 1901,
when the Society's Committee on Historical Manuscripts
determined—in view of the forthcoming centennial
of the Louisiana Purchase—at last to carry out
Jefferson's suggestion, and secure the publication of
the Lewis and Clark journals direct from the original
manuscripts in their custody. They interested in this project:
the present publishers, who in turn engaged the writer as
Editor of the work.

In the course of consequent investigation into the sources,
there came to view in the Society's library a few other Lewis
and Clark items, besides the codices handled and labelled by
Coues; these were chiefly statistical tables regarding the Western Indians, a meteorological record, and a list of the explorers'
specimens sent from Fort Mandan to the Society 1—matters
of considerable although not commanding importance. 2

In Coues's report on the codices, occurs this note: "One
of Clark's Journals is now in the possession of his son, [the
late] Mr. Jefferson K. Clark, of St. Louis. I am
not informed of the date covered by this volume,
nor of the nature of its contents." Upon assuming
charge of the proposed publication, the present writer at once
approached the heirs of General William Clark for permission
to use the Ordway Journal, in case it could be found among

1 See Appendix, for this document.
2 Several copies of the Indian vocabulary blank prepared by Jefferson are also in
the possession of the American Philosophical Society, having been presented by him
in October, 1820. It consists of a sheet 7 3/4" x 19 3/4"", printed on both sides—
although there are some which were printed on but one side of a sheet twice this
width, the two pages standing side by side. Those filled out represent, among
others, the Miami, Micmac, Shawnee, Chippewa, and Lenape languages; while
several are still blank. In the collection are no vocabularies which appear to have

[1]
the family papers. As the result of protracted negotiations, an unexpected situation was revealed. The third son and fourth child of General Clark and his first wife, Julia Hancock, was George Rogers Hancock Clark, born at St. Louis in 1816 and dying in 1858. This son was his father’s executor, and as such came into possession of the explorer’s papers and many other family relics, which he appears to have arranged and labelled with some care. Upon his death they descended to his eldest child, now Mrs. Julia Clark Voorhis of New York City, whose proprietary rights are at present shared with her daughter, Miss Eleanor Glasgow Voorhis.

It appears that a few years ago Mrs. Voorhis began the examination of the collection with a view to selecting therefrom, for a projected compilation of her own, certain documents which pertained to the public careers of various members of the Clark family, particularly William and George Rogers. This examination was still privately in progress when, in the autumn of 1903, the present Editor—quite unconscious of the existence of other historical manuscripts at the Voorhis home—appeared upon the scene with his application for the Ordway Journal. Indeed, the ladies themselves were as yet unaware of the full significance of their treasures, especially those appertaining to the great expedition. The result was that the writer in several visits personally completed the examination of the collection, with the papers of the expedition especially in view; and arrangements were concluded between the proprietors of the documents and the publishers, by which all those essential to the complete narrative of the Lewis and Clark exploration are to be published in the present work.

The Voorhis collection of Lewis and Clark material is of surprising richness, and consists of the following items:

*Clark Journals*

Red morocco note-book No. 1—Diary, April 7–July 3, 1805; 38,000 words, with 3 maps of the Falls of the Missouri.

Field-book, bound in a rude piece of elk skin, secured by a thong and button, and undoubtedly carried in Clark’s pocket upon the expedi-
INTRODUCTION

Diary, Sept. 11-Dec. 31, 1805; 20,000 words, with over a dozen full-page sketch-maps of the trail over the mountains, and the neighborhood of Fort Clatsop, interwoven with the badly blurred text. On the skin cover is a rude plan of the fort itself.

Red morocco note-book No. 2—Diary, Jan. 30-April 3, 1806; 41,000 words, with numerous pen sketches of canoes, birds, dwellings, tools, etc. by the same hand (Clark's) as those contained in Lewis's codices of similar dates, in the American Philosophical Society's collection.

Red morocco note-book No. 3—Diary, April 4-June 6, 1806; 35,000 words, with some sketch-maps.

Fragment of Journal—Detached leaves, giving evidently first draft of entries, April 16-21, 1806; 2,300 words.

Red morocco note-book No. 4—No diary, but containing sundry notes and tables of weather, distances, astronomical and ethnological data—all covered, however, in more finished manuscripts in the American Philosophical Society's collection. There are also in this book four excellent colored maps.

Miscellaneous Material

An orderly book, by several hands, running from April 1 to Oct. 13, 1804, and a detached entry for Jan. 1, 1806; detached orders promulgated at River Dubois camp, Feb. 20 and March 4, 1804; also a few detached orders issued during the expedition.

Ten letters (some of them drafts) — Lewis offering (June 19, 1803) Clark an equal partnership in command of the expedition; Clark's acceptance thereof (July 17); Clark's letter to President Jefferson (July 24), informing him of this fact; Lewis to Clark (Aug. 3), expressing his gratification at the latter's favorable response; six others, chiefly by Clark, relating to various phases of the expedition.

Letter of Clark to "Mr. Hugh Henry at the N. W. Co. establishments on the Assiniboine River," written from the Yellowstone, July 20, 1806 (2,000 words); and Clark's order to Sergeant N. Pryor, dated July 25, 1806, directing him to take the aforesaid letter to Henry, together with twelve or fourteen horses (220 words).

An address from the citizens of Fincastle and its vicinity to Captains Lewis and Clark, dated January 8, 1807 (300 words); and Clark's undated answer thereto (300 words).

Numerous other letters and memoranda—among them the original of Jefferson's letter of credit; Clark's various military commissions,
INTRODUCTION

before, during, and after the expedition; fragmentary records of courses and distances, Indian tribes, weather data, and the like; information concerning the Assiniboine country obtained from British traders at Fort-Mandan; and one of Clark’s speeches to the Indians, in 1806.

Maps

Most important of all are about sixty detailed maps, for the most part made by Clark while on the trip, he being engineer of the detachment. Collectively, these illustrate the greater part of the journey both going and returning, indicate camping-places, and contain many interesting comments on the country and the Indians. These charts vary in size from eight inches square to several feet long.

In addition to the above manuscripts, there are in this collection several oil paintings of the Clarks—chiefly George Rogers and William—together with numerous valuable relics of these men, making of the Voorhis home a museum of great interest to students of Western history.

Why did not General Clark surrender this wealth of manuscripts either to the American Philosophical Society or to Jefferson, when the latter was searching for all the documents of the expedition, stoutly claiming them as the undoubted property of the government? The probable answer is, that Biddle found the four Clark-Voorhis morocco note-books of no service to him; for practically all the facts contained in them are either in Lewis’s journals of similar dates or in other drafts by Clark. He doubtless returned the books to Clark, in the early stages of the work, keeping only those which later were placed in the Society’s archives. It is probable, also, that the engraver having completed such maps as he deemed necessary for the publication, all the charts made upon the expedition were returned to Clark. As for the skin-bound field-book, this having already been transcribed into a red morocco note-book, very likely the original did not go to Biddle at all; the orderly book, the various fragments, the Lewis-Clark correspondence, and the letter of credit, were doubtless also retained at St. Louis as being deemed, for Biddle’s purpose of a popular narrative, unusable
INTRODUCTION

On his part, it is probable that Clark had either forgotten the existence of these documents, or, like Biddle, considered them as of relatively slight historical value. His seemingly careless treatment of them would appear to bear out the last conclusion. In all events, they remained among his papers untouched, until tied into packets and labelled by his son and executor, George Rogers Hancock Clark. The manuscripts again suffered a long period of neglect, and eventually were sent to New York, where they became the property of Mrs. Voorhis, the story of whose connection with them has already been told.

It has often been asserted that Sergeant Pryor wrote a journal of the expedition, and some have assumed that Biddle used it in preparing the narrative of 1814; but evidence to this effect is wanting — in any event, no one now seems to know the whereabouts of this manuscript.

The journal (12,500 words, covering the dates March 13—August 18, 1804) of Sergeant Floyd, the only man of the party to meet death during the trip, was in the spring of 1805.

1 General William Clark's appointment as Superintendent of Indian Affairs and Brigadier General of Militia for the Territory of Louisiana (1807) has already been noted in the text. In this dual part, he was eminently successful. Governor Lewis had been succeeded in that office by Benjamin Howard, and the following year (1810) the name of the territory was changed to Missouri. July 1, 1813, Clark was appointed by President Madison as governor of Missouri Territory, being several times recommissioned as such — in 1816, 1817, and 1820. In the last-named year, Missouri entered the Union, and Clark was a candidate for the first State governor, but was defeated in the election by Alexander McNair. In 1820, President Monroe appointed him to the newly created office of federal Superintendent of Indian Affairs; two years later, he was commissioned as Surveyor General for the States of Illinois and Missouri and the Territory of Arkansas. He died at St. Louis, September 1st, 1838, in his sixty-ninth year, and was given an impressive funeral, in which the entire community took part. Governor Clark was twice married — first, at Fincastle, Virginia, January 5, 1808, to Julia Hancock, who died in 1830, leaving four sons and a daughter; second, at St. Louis, November 28, 1821, to Mrs. Harriet Kennerly Radford, who died in 1831, leaving one son by William Clark.

2 Floyd, aged about twenty years (possibly twenty-three), died near the site of the present Sioux City, Iowa, May 14th, 1804, and was buried on the top of a neighboring bluff. The site is now marked by a stately stone monument dedicated (May 30, 1901) to his memory by the Floyd Memorial Association. See Reports of the association — First, 1897; Second, 1901.

The Floyds were prominent Kentucky pioneers. Colonel John Floyd, the head
INTRODUCTION

sent from Fort Mandan to his parents in Kentucky, and eventually became the property of the Wisconsin Historical Society. With many textual errors in transcription, it was published in 1894 in the Proceedings of the American Antiquarian Society, with an introduction by Dr. James Davie Butler.

Soon after the return of the expedition, Robert Frazier, one of the privates, solicited subscriptions in Vermont for a publication of his journal, to be "contained in about 400 pages octavo;" but it did not appear, and the present writer has no knowledge of the manuscript.1

The existence of a journal by Private Joseph Whitehouse was unknown until recently. It was purchased in San Francisco by Dodd, Mead & Co., to be published in connection with the Original Journals of Lewis and Clark; after having been edited for the press, the manuscript (containing 67,000 words, covering the dates May 14, 1804-November 6, 1805) was acquired from the publishers by Edward E. Ayer, the well known Chicago collector.2

1 See Appendix, for Frazier’s prospectus.

2 Nothing appears to be known concerning the history of Joseph Whitehouse, save that he was one of the nine young Kentuckians whom Clark recruited for the expedition. The manuscript of his journal was purchased by Dodd, Mead & Co. from Mrs. Gertrude Haley (widow of Captain John Haley), of San Francisco, from whom it has been impossible for the present Editor to obtain any very definite information concerning its career. According to Mrs. Haley’s statements, obtained only after a protracted correspondence with her, it would appear that Whitehouse, when upon his death-bed (date unknown), gave the journal to his confessor, Canon de Vivaldi, who subsequently (1860) went as a Roman Catholic missionary to Patagonia. Upon leaving the United States, Vivaldi deposited the manuscript with the New York Historical Society, in whose museum it rested until 1893. In that year, Vivaldi was in Los Angeles, California. Captain and Mrs. Haley were stopping at the same
INTRODUCTION

Thus, seventy-five years after Jefferson's quest, and within the centennial year of the departure of the Lewis and Clark expedition from their preliminary camp on River Dubois, there have at last been located presumably all the literary records now extant, of that notable enterprise in the cause of civilization. The Original Journals, now definitively published to the world, in a dress which surely would have satisfied Jefferson, must create a new interest in the deeds of Lewis and Clark. They are, in the mass, much more extensive than the Biddle narrative; the voluminous scientific data here given—in botany, zoölogy, meteorology, geology, astronomy, and ethnology—is almost entirely a fresh contribution; and we obtain from the men's note-books as written from day to day, a far more vivid picture of the explorers and their life, than can be seen through the alembic of Biddle's impersonal condensation.

The pages of the journals are aglow with human interest. The quiet, even temper of the camp; the loving consideration that each of the two leaders felt for the other; the magnanimity of Lewis, officially the leader, in equally dividing every honor with his friend, and making no move without the latter's consent; the poetic temperament of Lewis, who loved flowers and animals, and in his notes discoursed like a philosopher who enjoyed the exercise of writing; the rugged character of Clark, who wrote in brief, pointed phrase, and, less educated of the two, spelled phonetically, capitalized chaotically, and occasionally slipped in his grammar—all these and more, are evident on every page; causing the reader deeply to admire the men, and to follow

hotel. Mrs. Haley says that her husband advanced money to the missionary, and was in return given an order on the New York Society for the journal, which the historian, Hubert Bancroft, had told them was of great value. Haley obtained the document in 1894, and it remained Mrs. Haley's property until sold to the present publishers. The Editor's attention had been directed to the manuscript because of its being offered to the Library of Congress. That institution declined to pay the price asked for it, and Dodd, Mead & Co.'s successful negotiations followed. The authenticity of the journal is self evident, and its historical value is considerable. While for the most part in the writing of Whitehouse, many entries are in other hands as will be noted in the publication of the document itself, in vol. vi of the present work.
INTRODUCTION

them in their often thrilling adventures with the keenest sympathy and anticipation. We shall henceforth know Lewis and Clark as we never knew them before. The Biddle narrative will no doubt continue to live as the brief popular account of an exploration fraught with great consequence to American expansion; but at least the student of history will feel that the original records, as the men wrote them on the spot, are by far the more satisfying of the two.

In preparing for the press these Original Journals of the Lewis and Clark Expedition, many editorial problems have arisen, which it is unnecessary here to discuss in detail. In brief, it may be said that the abundance of material has in itself often proved an embarrassment. As already stated, the two captains frequently rewrote their records; for the most part, only the definitive form remains to us, but there are long periods for which we have two or more drafts. Then again, each leader freely copied from the other, although generally with some variation. In the case of the narrative proper, the Editor has, with a few exceptions, thought best to retain the several drafts in the order of their preparation; this method involves occasional repetition of statement, but in a publication of the original records it appears advisable to exhibit the literary methods of the explorers. With regard, however, to the statistical and scientific material, it has not seemed essential to publish the different drafts — the best only has been presented. In the department of Scientific Data, it will be noted that in a few instances some of the tabular matter has been co-ordinated, the sources being indicated either by differentiation in type or by explanatory foot-notes. Some of the tables were prepared by the explorers in a manner quite impossible of reproduction in type. But wherever practicable, we have sought to imitate the original as closely as the limitations of typography will allow.

We have seen that the codices in the possession of the American Philosophical Society contain many erasures, interlineations, and emendations — by Clark, Biddle, Coues, and an unknown hand. The scientific entries were generally crossed in red ink, with the note, “Copy for Dr. Barton;” this meant...
INTRODUCTION

that such matter was to be reserved for Barton's proposed volume on the scientific results of the expedition, which, however, was not prepared. The present Editor has disregarded marks of this character. His method of indicating to the reader the various emendations, is explained in the foot-note to page 11 of the present volume, post.

The arrangement of chapters follows the Biddle edition of 1814. In that narrative the chapters were of proper and nearly equal length; whereas in this, owing to the greater extent of material, they are unequal and some of them abnormally extended. A new system of chaptering would have obviated this difficulty and thus presented a better mechanical appearance. Nevertheless, it has been deemed best to retain the Biddle chapters — they are convenient chronological and geographical divisions; they are familiar to scholars, and thus have acquired a certain historical and bibliographical standing; moreover, comparisons between the Biddle paraphrase and the Original Journals will be facilitated by their retention.

A work of this character, involving so wide a range of territory, interests, and studies, must in considerable measure be co-operative in its character. The Editor's requests for advice and assistance have on every hand met with most cordial responses, for which a mere enumeration of names seems only cold acknowledgment; it is hoped that each of his correspondents and colleagues will between the lines read a heartier appreciation than to others may be apparent. The Bibliographical Data contributed to the present work by Mr. Victor Hugo Paltsits, of the New York Public Library, is a work of great value; like the Original Journals themselves, this chapter on the literature of the subject will doubtless prove definitive. The officers of the American Philosophical Society, particularly the secretary, Dr. I. Minis Hays, have been kindness itself. Valuable notes on the scientific results of the expedition have been freely contributed by Dr. William Trelease, Director of the Missouri Botanical Garden at St. Louis; Messrs. Stewardson Brown and Witmer Stone, assistants to the curators of the Academy of Natural Sciences at Philadelphia; Mr. James Newton Baskett, of

American Journeys - www.americanjourneys.org
INTRODUCTION

Mexico, Missouri; Professor Edwin H. Barbour, of the University of Nebraska; Professor E. E. Blackman, archaeologist for the Nebraska Historical Society; Professor Charles V. Piper, botanist and entomologist of the Washington (State) Agricultural and Experiment Station at Pullman; and Professor Franklin H. King, of the United States Department of Agriculture. Detailed information concerning the over-mountain trail of the expedition has been obtained from Mr. Olin D. Wheeler, of the General Passenger and Ticket Department of the Northern Pacific Railway, whose two-volume work, The Trail of Lewis and Clark, will prove of much practical value to American historians; and Professor F. G. Young, of the University of Oregon. Mrs. Eva Emery Dye, of Oregon City, Oregon, has contributed most liberally from the surprisingly rich store of historical materials which, with remarkable enterprise and perseverance, she accumulated during her preparation for the writing of The Conquest; her persistent helpfulness has laid the Editor under unusual obligations. Courtesies of various kinds have also been received from the following persons — to mention but a few of the many who, throughout the past two years, have aided the publication: Hon. Pierre Chouteau, and Hon. Walter B. Douglas, of St. Louis, members of the Missouri Historical Society, and the society's librarian, Miss Mary Louise Dalton; Hon. Craig Biddle, of Philadelphia; Mrs. Laura E. Howey, secretary and librarian of the Historical and Miscellaneous Department of the Montana State Library; Mrs. S. Lou Monroe-Farmer, of Portland, Oregon; Mr. Peter Koch, of Bozeman, Montana; Mr. Charles H. Conover, of Chicago; Mr. J. W. Cheney, librarian of the War Department, Mr. Robert Chapman, of the United States Coast and Geodetic Survey, Mr. C. H. Lincoln, of the Manuscripts Division of the Library of Congress, and Major William Hancock Clark, of Washington, D. C.; Mr. C. H. Anderson, of Ivy Depot, Virginia; Hon. Nathaniel P. Langford, of St. Paul; and Mr. William Harvey Miner, of Cleveland.

Emma Helen Blair, A.M., editorial assistant upon The Jesuit Relations and Allied Documents and now one of the editors of The Philippine Islands, 1493–1898, assisted materially [ lix ]
INTRODUCTION

upon a majority of the annotations; further help in this direction, as well as in the difficult work of comparing transcriptions with the original manuscripts, has been rendered by Louise Phelps Kellogg, Ph.D., of the Manuscripts Division of the Wisconsin Historical Library. Finally, the Editor takes especial pleasure in acknowledging the patient and kindly cooperation of the Publishers, who have exhibited the deepest interest in every detail of the work, which owes much to their many suggestions and their generous determination to leave nothing undone that might add to its scholarly value and artistic embellishment.

BIBLIOGRAPHICAL DATA

By VICTOR HUGO PALTSITS

A PART from a few insignificant references in the prefaces or introductions of some of the earlier editions of Lewis and Clark, the first attempt to record the publications related to the expedition of those explorers was made by Joseph Sabin in his Dictionary of Books relating to America, vol. vi, p. 443, under William Fisher; vol. vii, p. 181, under Patrick Gass; and vol. x, pp. 310-313, under Meriwether Lewis. Unfortunately Sabin read into his record several titles or editions that never existed, and in his descriptions committed a number of egregious errors, which have been only too freely copied and perpetuated by others.

An incomplete list was given by Field in his Essay towards an Indian Bibliography (New York, 1873).

The late Elliott Coues made the first comprehensive bibliographical study of these problematic books in his An Account of the various publications relating to the Travels of Lewis and Clarke (sic), printed in the "Bulletin of the Geological and Geographical Survey of the Territories" (Hayden's), Second Series, No. 6, published by the Department of the Interior in 1876. A few copies thereof were also issued as separates. This material Coues "recast and improved" for his 1893 edition of the Lewis and Clark History; it appears in vol. i, pp. cvii-cxxxii. In many respects it is a worthy endeavor, especially if regarded as a pioneer effort; yet it must be admitted that it teems with errors, some of which are inexplicable.

There are some brief bibliographical notes in Hubert Howe Bancroft's Northwest Coast, vol. ii. pp. 7, 8, 31, which present some inaccuracies. The same may be said of Justin Winsor's Narrative and Critical History of America, vol. vii, pp. 556-558.

The latest attempt to cover the subject was made by William Harvey Miner, in The Literary Collector, vol. iii (1902), pp. 204-209. The form is poor; the collations are not nearly accurate, and numerous errors perpetuated from Coues and Sabin, as well as some omissions, detract from its usefulness as a bibliography.

[ lxi ]
In order to serve its real purpose — namely, to afford the scholar, the librarian, and the collector media for determining what is a complete work — a monographic bibliography must give in minutest detail an analysis of each volume. Only by this method can imperfections and variations be determined. Starting out with this ideal in view, I have endeavored to find and examine one or more copies of every work related to the expedition. This task was great, but an insatiable appetite would not permit deviation from this plan. If the results attained prove at all of service, the compiler will consider himself rewarded for his arduous labor.

The material is arranged in five chronological groups, namely: Jefferson’s Message (1806–1808); Counterfeit Publications (1809–1851); Gass (1807–1904); Genuine History (1814–1904); Miscellanea (1804–1904). Only a few analytical references have been included, on account of their special importance, and magazine articles have intentionally been barred. The various editions of Jefferson’s Writings and Works, edited by Washington and by Ford, are worth consulting for valuable materials. References to the official publications of the government of the United States, not included here, are given by another hand at the end of my bibliography.

The following key is explanatory of the abbreviations used to locate copies:

- BA = Boston Athenæum
- BM = British Museum, London
- BPL = Boston Public Library
- CHC = Collection of Charles H. Conover, Esq., Chicago
- CHS = Connecticut Historical Society, Hartford
- CU = Columbia University, Washington, D. C.
- EI = Essex Institute, Salem, Mass.
- HSP = Historical Society of Pennsylvania, Philadelphia
- LCP = Library Company of Philadelphia, Philadelphia
- MHS = Massachusetts Historical Society, Boston
- NA = New York Public Library (Astor Library Building)
- NL = New York Public Library (Lenox Library Building)
- NYHS = New York Historical Society, New York
- NYSL = New York State Library, Albany
- WD = War Department Library, Washington, D. C.
- WHS = State Historical Society of Wisconsin, Madison
JEFFERSON'S MESSAGE

1806

Message from the President of the United States, communicating Discoveries made in exploring the Missouri, Red River and Washita, by Captains Lewis and Clark, Doctor Sibley, and Mr. Dunbar; with a Statistical Account of the countries adjacent. February 19, 1806. Read, and ordered to lie on the table.

This is the original and official edition, as well as the first separate publication with data on the expedition of Lewis and Clark.

Copies: AAS; BM; BPL; C; CHC; CHS; CU; EI; HC; LCP; MHS; NA; NL; WD; WHS.

1806

Message from the President of the United States, communicating Discoveries made in exploring the Missouri, Red River, and Washita, by Captains Lewis and Clark, Doctor Sibley, and Mr. Dunbar; with a Statistical Account of the countries adjacent. Read in Congress, February 19, 1806.

New-York: Printed by Hopkins and Seymour, and sold by G. F. Hopkins, No. 118, Pearl-Street. 1806.

Copies: AAS (uncut copy); BPL; CHC; LCP; NYHS; WHS.

BIBLIOGRAPHICAL DATA

1806

Discoveries made in exploring the Missouri, Red River and Washita, by Captains Lewis and Clark, Doctor Sibley, and William Dunbar, Esq. with a Statistical Account of the Countries adjacent. With an Appendix by Mr. Dunbar.

Natchez: Printed by Andrew Marschalk, 1806.

8vo; title, verso blank; "Message", pp. [3] and 4; "Extract of a letter from Captain Meriwether Lewis, to the President of the United States, dated Fort Mandan, April 17th, 1805", pp. [5]–8; "A statistical View of the Indian Nations", pp. [9]–64; "Historical Sketches of the several Indian Tribes of Louisiana", pp. [65]–83; "To General Henry Dearborn, Secretary of War", signed by John Sibley, pp. 84–109; "Distances up Red river by the course of the river", pp. 110–112; "Observations", pp. 113–164; "Extracts from the Appendix", pp. [165]–166, 159–169; "Meteorological observations", pp. 170–177; verso of last leaf blank. Two pages 127, also erratic pagination after 166. Signatures: [A]–W in fours, X in six. The only copy which I have seen was one kindly loaned to me by Dr. Samuel A. Green, of Boston, Mass., purchased by him many years ago in Paris, France. It appears not to be in the various libraries which I have visited, but the British Museum has a copy.

1806

Boston: Published by Munroe & Francis N° 7 Court Street. 1806 Callender Set.

[Same title] Vol. 4th 1807 Boston: Published by Munroe & Francis N° 7 Court Street. 1807 Callender Set. The appendix of this fourth volume, also entitled, "The Political Cabinet", consists of 80 pp. On pp. 5, ff. is printed a "Letter from Capt. Clark", dated at "St. Louis, 23d Sept. 1806."

These descriptions are from a set in MHS. Also in WHS.

1807

Travels in the Interior Parts of America; communicating Discoveries made in exploring the Missouri, Red River and Washita, by Captains Lewis and Clark, Doctor Sibley, and [lxiv]
BIBLIOGRAPHICAL DATA

Mr. Dunbar; with a Statistical Account of the Countries adjacent. As laid before the Senate, by the President of the United States. In February, 1806, and never before published in Great Britain.

This edition is part of Richard Phillips's Collection of Modern and Contemporary Voyages and Travels.

The copy described is in HC. It is also in BM; C; CHC; NYS; WHS.

1808

American State Papers, containing Authentic Documents relative to the History, Politicks, Statisticks, &c. of the United States of America. Communicated to Congress by the President.

Boston: Printed by Munroe, Francis, & Parker, No. 4, Cornhill. 1808.

8vo. On pp. 39, ff. Jefferson's Message of February 19, 1806 and other documents are printed in part; and on pp. 6, ff. the "Letter from Capt. Clark", dated at "St. Louis, 23d Sept. 1806." It is a reissue, with separate title-page, of the appendices from the Monthly Anthology, vols. 3 and 4.

The description is from a copy in MHS. Also in WHS.

COUNTERFEIT PUBLICATIONS

1809

The Travels of Capts. Lewis & Clarke, by order of the Government of the United States, performed in the years 1804, 1805, & 1806, being upwards of three thousand miles, from St. Louis, by way of the Missouri, and Columbia Rivers, to the Pacific-Ocean: Containing an Account of the Indian Tribes, who inhabit the Western part of the Continent unexplored, and unknown before. With copious delineations of the manners, customs, religion, &c. of the Indians. Compiled from various authentic sources, and Documents. To which is subjoined, A Summary of the Statistical view of the Indian Nations, from the Official Communication of Meriwether Lewis. Embellished with a Map of the Country inhabited by the Western tribes of Indians, and five Engravings of Indian Chiefs.

Philadelphia: Published by Hubbard Lester. 1809. Price — 1 dollar 62½ cts.

12mo; title, with copyright on verso; "Recommendation" of Jefferson, verso blank; "Message", verso blank; "Introduction", pp. [vii]-xi; "Estimate", p. xii; "Travels to the Pacific Ocean", pp. [13]-153; "Statistical View", pp. [154]-178; "Historical Sketches of the several Indian Tribes in Louisiana", pp. [179]-204; "Origin", pp. 204-228; "Observations", pp. [229]-292; "Anecdotes", pp. 293-300. Five portraits, of "Sioux Warrior", "Sioux Queen", "Mahas King", "Ottoes Queen", and "Serpentine Chief"; also folded map, entitled, "Map of the Country Inhabited by the Western Tribes of Indians". Two of the plates in different copies exhibit a curious metamorphosis, by serving in one case for masculinity and in the other for femininity, namely, as "Mahas King" and "Mahas Queen"; "Ottoes Chief" and "Ottoes Queen". Signatures: [A]-BB in sixes.

Copies: C; CHC; NL (lacks map); NYHS (two copies, one lacks map).

1809

The Travels of Capts. Lewis & Clarke, from St. Louis, by way of the Missouri and Columbia Rivers, to the Pacific Ocean; performed in the years 1804, 1805, & 1806, by order of the Government of the United States. Containing Delineations of the Manners, Customs, Religion, &c. Of the Indians, compiled from Various Authentic Sources, and Original Documents, and a Summary [lxvi]
BIBLIOGRAPHICAL DATA

of the Statistical View of the Indian Nations, from the official communication of Meriwether Lewis. Illustrated with a Map of the Country, inhabited by the Western Tribes of Indians.

London: Printed for Longman, Hurst, Rees, and Orme, Pater­noster Row. 1809. 1

Copies: BM; C; CHC; HC; NL; NYHS; NYS L.

1811

Libanon, (P.) Gedruckt bey Jacob Stöver.—1811.

On p. 60 the publisher says: “Die unerwartet grosse Ermunterung, die diese gegenwärtige Reisebeschreibung durch eine zahlreiche Subscription von einem geehrten Publikum erhalten hat, und wofür der Herausgeber hiermit seinen aufrichtigsten Dank abstattet” [etc.].

The only copy I have found is in the Historical Society of Pennsylvania (Cassel Collection).

1 See Eclectic Review for November, 1809, p. 1051, for a caustic review of this publication, which is reprinted in Monthly Anthology and Boston Review, viii, p. 142. — Ed.

[ lxvii ]
BIBLIOGRAPHICAL DATA

1812

Friedrichstadt: Gedruckt bey M. Bartgis. — 1812.

Signatures: A-E in sixes, F in two. The third leaf of sig. D is misnumbered C. A complete copy, apparently, should have several cuts of Indian chiefs ("Abbildungen Indianischer Könige").

This little pamphlet, printed at Frederick, Maryland, is entirely unknown to bibliographers, and Seidensticker did not know of a single item printed there during the year 1812. The only copy I have located is owned by Charles H. Conover, Esq., of Chicago, who kindly loaned it to me for this study. It has not the cuts of Indian chiefs which the title-page calls for.

1812 (FISHER)

An interesting Account of the Voyages and Travels of Captains Lewis and Clark, in the Years 1804, 1805, and 1806. Giving a faithful description of the river Missouri and its source — of the various tribes of Indians through which they passed — manners and customs — soil — climate — commerce — gold and silver mines — animal and vegetable productions interspersed with very entertaining anecdotes, and a variety of other useful and pleasing information remarkably calculated to delight and instruct the readers. — To which is added a complete dictionary of the Indian tongue. By William Fisher, Esq.

Baltimore. Printed by Anthony Miltenberger, For the Purchasers. 1812.
BIBLIOGRAPHICAL DATA

Sm. 12mo; two frontispieces, Lewis and Clark; title, verso blank; "Recommendation", p. (1); "Message", pp. (2); "Introduction", pp. [x]-xiv; "Estimate", p. xv; text, pp. [16]-326. Pp. 179 and 265 are mis-paged 178 and 295, respectively. Signatures: [A]-Bb in sixes, Cc in one.

Copies: BM; BPL; C; CHC; NYHS.

1812 (FISHER)

New Travels among the Indians of North America; being a compilation, taken partly from the communications already published, of Captains Lewis and Clark, to the President of the United States; and partly from other authors who travelled among the Various Tribes of Indians. Containing a variety of very pleasant anecdotes, remarkably calculated to amuse and inform the mind of every curious reader; with a Dictionary of the Indian Tongue. Compiled by William Fisher, Esqr.

Philadelphia: Published by James Sharan. J. Maxwell, printer. 1812.

12mo; two leaves with portraits of Lewis and Clark; title, with "Copyright secured" on the verso; a second title: "The Voyages and Travels of Captains Lewis and Clarke", with verso blank; "Recommendation", p. (1); "Message", pp. (2); one blank page; "Introduction", pp. [vii]-xi; "An Estimate", etc. on p. xii; "Travels to the Pacific Ocean", etc., pp. [13]-153; "Statistical View", pp. [154]-178; "Historical Sketches of the several Indian Tribes in Louisiana", pp. [179]-204; "Origin", pp. 204-228; "Observations", pp. [229]-292; "Anecdotes", pp. [293]-300. The pagination of 155 is inverted in some copies. In most copies the second title-page is lacking. Signatures: Two leaves with portraits; Main title-page, A—BB in sixes.

Copies: BM; C; CHC; NA; NL; NYHS; NYS; WHS.

1813 (FISHER)

An interesting Account of the Voyages and Travels of Captains Lewis and Clarke, in the Years 1804-5, & 6. Giving a faithful description of the river Missouri and its source—the various tribes of Indians through which they passed—manners and customs—soil—climate—commerce—gold and silver mines—animal and vegetable productions. Interspersed With very entertaining anecdotes, and a variety of other useful and pleasing information,Remarkably calculated to delight and instruct the readers. To which is added A complete Dictionary of the Indian Tongue By William Fisher, Esqr.

1810

Vol. | of the | Voyages and Travels of a Corps of Discovery, under the command of Capt. Lewis and Capt. Clarke of the army of the United States, from the mouth of the river Missouri through the interior parts of North America to the Pacific Ocean, During the Years 1804, 1805 and 1806. | Containing | An authentic description of the countries, nations, and people discovered; together with their manners, customs, and productions; the natural history of the animals and plants; and the productions of the soil; their topography and climate; and an accurate map of the territory from the Missouri River to the ocean pole.

Copies: BM; BPL; CHC; HC; NYHS; NYS.
relation of the most interesting transactions during the expedition,—
A description of the country,—And an account of its inhabitants, soil, climate, curiosities and vegetable and animal productions. By Patrick Gass, one of the persons employed in the expedition. With geographical and explanatory notes. Second Edition—with six engravings. [Copy-Right secured according to Law.]

12mo; title, with copyright on verso; "Preface by the publisher of the first edition", pp. [iii]-viii; half-title, with verso blank, forming pp. [9-10]; "Journal", pp. [11]-262. Signatures: A-Y in sixes, the last leaf blank. This is the first Gass which has plates, as follows: Frontispiece, to p. 220, "A Canoe striking on a Tree"; opp. p. 26, "Captains Lewis & Clark holding a Council with the Indians"; opp. p. 60, "Captain Clark & his men building a line of Huts"; opp. p. 95, "Captain Clark and his men shooting Bears"; opp. p. 239, "An American having struck a Bear but not killed him, escapes into a Tree"; opp. p. 245, "Captain Lewis shooting an Indian." These cuts are very crude, artistically considered, and are insets.

The subject-matter and location of the plates in Carey's three editions, 1810, 1811, 1812, are the same, but the plates as engraved differ in each edition. For example, the bear in the plate to page 239 of the 1810 edition looks like a Newfoundland dog; in the other editions he looks either like a pig or anything other than a bear. On the whole, the best illustrations are those of the 1812 edition, and this has a map of Louisiana not in the preceding editions. The three editions are typographically different.

Copies of 1810 edition: CHC; HC; HSP; LCP; NYHS; NYSL; WHS.

1811

Journal of the Voyages and Travels of a Corps of Discovery, Under the command of Capt. Lewis and Capt. Clarke of the army of the United States, from the mouth of the river Missouri through the interior parts of North America to the Pacific Ocean, During the Years 1804, 1805, and 1806. Containing An authentic relation of the most interesting transactions during the expedition; a description of the country; and an account of its inhabitants, soil, climate, curiosities, and vegetable and animal productions. By Patrick Gass, One of the persons employed in the expedition. With geographical and explanatory Notes. Third Edition—With six Engravings. [Copy-right secured according to Law.]

Printed for Mathew Carey, No. 122 Market Street, Philadelphia. 1811.

Map, as below. Signatures: a in five, A-Y in eight, Z in five.

This is a translation made from the French edition (Paris, 1810), and is so uncommon in the United States that Dr. Coues had never seen it, and was unable to identify it. I have not traced a copy in any of the many large libraries which I have consulted, and it was only after some difficulty that I succeeded in obtaining a copy from Germany which contains a later map. Subsequently, by good fortune, I procured a perfect copy with the correct map. This chart measures 7 3/4 by 9 3/4 inches, and is entitled: "Carte | Pour Servir au Voyage | des Capts. Lewis et Clarke, | à l'Océan Pacifique." The similar map in the French edition was engraved by Tardieu, but no engraver’s name is attached to the German copy. In my other copy of the book, this map is replaced by a much larger colored map, possibly designed for a reissue of the book, and is entitled: "Nord | America | entworfen u. gezeichnet | von | C. F. Weiland. | Weimar | im Verlage des Geograph. Instituts. | 1839." It measures 12 3/4 by 14 3/4 inches, and was probably also included in Stieler’s atlas of the period.

There is a copy of the book in the British Museum. In Germany it is classed as "Selten" (rare). The German translator, Philipp Christoph Weyland, in his preface refers to Gass as "Sir Patrick Gass." Weyland was the translator of several works of travel.

1847

Lewis and Clarke's | Journal | to the | Rocky Mountains | In the years 1804, 5, 6; | as related by | Patrick Gass, | one of the officers in the expedition. | New Edition with Numerous Engravings. |

American Journeys – www.americanjourneys.org
BIBLIOGRAPHICAL DATA

This edition collates almost the same as the preceding London edition of 1815. The large map and plates are the same in both, but the editions differ typographically; the 1817 edition is entirely reset. The following variations should be noted: A comma at the end of the third line of the title-pages, not in the 1815 edition. On the verso of sig. a 6 , in vol. i, "Directions for placing the Maps", not in the 1815 edition. A half-title to vol. ii, with verso blank, making sig. A in six, of which this half-title is the first leaf. In vol. iii sig. A is arranged in six leaves, as follows: Title, with printer's name on verso; "Contents of the third volume", pp. [iii]–xii.

BIBLIOGRAPHICAL DATA

1816–1818

Te Dordrecht, | bij A. Blusé & Zoon. | 1816. |

In this work the imprints of the first two volumes agree, save that the second volume is dated 1817; but the third volume has the following imprint: “Te Dordrecht, | bij Blusé en Van Braam. | 1818.” The only copy which I have seen is in the Library of Congress. It is also in WHS.

1842–1901

History | of | the Expedition | under the command of | Captains Lewis and Clarke, | to | the sources of the Missouri, thence across the Rocky Mountains, and down the River Columbia to the Pacific Ocean: performed during the | Years 1804, 1805, 1806, | by order of the | Government of the United States. | Prepared for the press | by Paul Allen, Esq. | Revised, and abridged by the omission of unimportant [sic] de- tails, with an introduction and notes, | by Archibald McVickar. | In two volumes. | Vol. I. [II.] |

New-York: | Harper and Brothers, 82 Cliff-St. | 1842. |

BIBLIOGRAPHICAL DATA

Books", on verso of p. 371. Vol. II: — Title, with copyright on verso;
"Contents", pp. [iii]-x; text, pp. [9]-338; "Appendix", pp. [339]-
395; verso of p. 395 blank. Plates: Vol. I, "Map of Lewis and Clark's,
Track across the Western Portion of North America, . . . Drawn & Engraved
by W. G. Evans N. Yk", to face title; "Fortification" opp. p. 87;
"Principal Cascade of the Missouri" opp. p. 223; "The Falls & Portage"
II, 5 prel. leaves, A in two, B-K in sixes.

The foregoing description is from a set of the original edition in the Library
of Congress. It is a curious fact that all of the editions which I have seen, even
those of a late date, perpetuate an error in the stereotype plates, namely "unim­
portant" on the title-pages, which is given as "unimportant."

By the kindness of Mr. A. V. S. Anthony, of Harper and Brothers, I have
been able to test my record of subsequent editions by the books of the publishers.
He also states that "several small editions have been published since 1891, of
which no record was kept." The following is a conspectus of the issues of this
oft-printed work, brought out originally in Harpers' popular "Family Library":
—September, 1842; January, 1843; May, 1843; January, 1844; July,
1845; April, 1847; May, 1850; August, 1851; June, 1855; April, 1858;
November, 1860; February, 1861; March, 1871 (vol. II); April, 1872
(vol. I); February, 1874 (vol. II); December, 1875 (vol. I); 1876 (copy
in NYHS, but publishers have no record); February, 1881; March, 1882;
July, 1883; April, 1886; February, 1887; June, 1891; June, 1901; several
undated editions of late publication (one such in NYHS).

Sabin in his Dictionary of Books relating to America mentions a London,
1842, edition of McVickar, but it is not in the British Museum. I have not
been able to verify his statement, yet it is not unlikely that the American
publishers may have made up some sets for the English market.

Index, by Elliott Coues, Late Captain and Assistant Surgeon, United States Army, Late Secretary and Naturalist, United States Geological Survey, Member of the National Academy of Sciences, etc. In Four Volumes. Vol. I. [-IV.]

Dr. Coues did not believe in strictly adhering to the text of the 1814 edition. “I have not found it necessary to make a fetich of that text”, is his declaration. So in his other edited works he took liberties with originals; for example, in Larpenteur he tells us that “there was scarcely a sentence in it all that did not need to be recast to some extent in preparing the manuscript for publication. But this is a mere matter of grammar; I have simply helped the author to express himself; the sense and sentiment are his own, if the style is not.” Of the Lewis and Clark he says, “I have punctiliously preserved the orthography of proper names in all their variance and eccentricity; and wherever I have amplified any statement in the text, or diverted the sense of a passage by a hair’s breadth, square brackets indicate the fact. Yet I have not hesitated to touch the [ lxxxii ]

American Journeys – www.americanjourneys.org
text here and there in a mere matter of grammar or punctuation. For the rest, I have prepared new titles and synopses of the chapters, and new headlines of the pages; one new chapter is interpolated, by digesting the Clatsop diary for that purpose. Excepting in these several respects, the present edition is literally true to the original. Nothing whatever is omitted."

Copies: AAS; BA; BPL; C; CHC; HC; LCP; NA; NL; NYHS; NYSL; WHS.

1902

History of the Expedition under the command of Captains Lewis and Clark to the sources of the Missouri, across the Rocky Mountains, down the Columbia River to the Pacific in 1804-6. A reprint of the edition of 1814 to which all the members of the expedition contributed with maps. In three volumes. Vol. I. [II.] [III.]

An issue for the Canadian market from the same sheets and in the same binding of "The Commonwealth Library", has the following imprint on the title-pages: "George N. Morang & Company, Limited | Toronto | ". This is the only variation from the regular New York edition.

BIBLIOGRAPHICAL DATA

1806

Message from the President of the United States, containing his Communication to both houses of Congress, at the commencement of the Second Session of the Ninth Congress, 2d December, 1806. Printed by Order of the Senate.

Washington City: Printed by Duane & Son. 1806.

8vo; title, verso blank; text, pp. [3]-12. In this message Jefferson refers incidentally to Lewis and Clark, and mentions that "they have traced the Missouri nearly to its source."

1806

Report of the Committee appointed on the third instant, on so much of the Message of the President of the United States as relates to the farther exploring of the western waters. December 22, 1806. Referred to a committee of the whole House on Thursday next.

8vo; title, verso blank; text, p. [1], with verso blank. Refers to Lewis and Clark.

1806? — PROPOSALS FOR PUBLISHING FRAZER'S JOURNAL

[From a MS. in the Library of the Wisconsin Historical Society.]

Proposals for publishing by subscription Robert Frazer's Journal, from St. Louis in Louisiana to the Pacific ocean,—containing an accurate

Early in the first decade of our [the nineteenth] century a brother of my father sold a hat in Vermont to Robert Frazer, a fencing-master there, who absconded without paying for it. This Frazer enlisted under Capt. Lewis, and his name was given to a rapid and a creek near the head-waters of the Missouri. Before Frazer's return to St. Louis, my uncle himself had removed thither and was managing the hotel to which Frazer came for entertainment. Each recognized the other, and my uncle had no difficulty in collecting his debt. But Frazer proved to be one of the seven journalists [of the Lewis and Clark expedition] and purposed to print his journal, he having, as well as Gass, obtained permission from Capt. Lewis. His prospectus, which of necessity was written, since there was no printing in St. Louis till 1808, shows beautiful chirography, and promised a volume of four hundred pages. A copy of it is in my hands, which came to my father in Vermont from his brother at the West.—James Davie Butler, in "The New Found Journal of Charles Floyd", Proceedings of American Antiquarian Soc., April 25th, 1894.

Later, Professor Butler presented this MS. prospectus to the Wisconsin Historical Society, as above. Apparently there was insufficient patronage, for the proposed book was not published. The whereabouts of the Frazer Journal is unknown to the present Editor. — Ed.

[ lxxxv ]
description of the Missouri and its several branches, of the mountains
separating the eastern from the western waters, of the Columbia River
and the Bay it forms on the Pacific ocean, of the face of the country in
general; of the several tribes of Indians on the Missouri and Columbia
rivers; of the vegetable, animal [and mineral] productions discovered
in those extensive regions, the latitudes and longitudes of some of the
most remarkable places,—together with a variety of curious and interest­
ing occurrences during a voyage of 2 years 4 months and 9 days,
conducted by Captains Lewis and Clark.

Published by permission of Capt. Meriwether Lewis. This work
will be contained in about 400 pages octavo, and will be put to the
press as soon as there shall be a sufficient subscription to defray the
expenses. Price to subscribers three dollars.

1807

Documents | accompanying | a Bill making Compensation | to |
Messieurs Lewis and Clarke, | and | their Companions, | presented |
the 23d January, 1807. |

8vo; title, verso blank; communication signed by "Willis Alston, Jun.",
dated January 12, 1807, on p. [3]; answer to the former by H. Dearborn,
dated January 14, 1807, pp. [4]-5; letter from Meriwether Lewis to Gen.
Dearborn, dated at "City of Washington, January 15, 1807", pp. [6]-8;
large folded broadside entitled, "A Roll | Of the men who accompani­
ted captains Lewis and Clarke on their late tour to the Pacific ocean,
through the interior of the continent of | North America, showing their rank,
with some remarks on their respective merits and services ", signed with Meriwether
Lewis’s name, and dated at "City of Washington, January 15, 1807."

Copies: BPL; C; CHS; WD.

1808, etc.

The Navigator, published in many editions at Pittsburgh, by Zadok
Cramer, contains in an appendix to some of the editions a short account
of the expedition of Lewis and Clark. This work is a composite,
mostly devoted to "directions for navigating the Monongahela, Alle­
gheny, Ohio, and Mississippi rivers", together with correlative matter.
Its structure is crude. The first edition appeared in 1801. It was in
its inception a small pamphlet, devoted solely to the Ohio.

So far as I can ascertain, the Lewis and Clark appeared for the first time in
the "Sixth Edition" of 1808, on pp. 146-156, based on Gass, etc. It is
entitled, "A brief account of the Missouri river, and the extensive and fertile
BIBLIOGRAPHICAL DATA

country through which it winds, as traversed by captain Lewis and captain Clark — A short notice of the Indians and their customs — different kinds of wild animals — fowls — fish — curiosities &c. And of the Columbia river." In the "Advertisement" of "The Editor", this part purports to have been "collected from the letters of captain Clark and other publications since the return of the party". The "Seventh Edition" (1811) reproduced this text on pp. 254–268. Beginning with the "Eighth Edition" (1814), pp. 343–349, the text is very different from that of the sixth and seventh editions. All of these subsequent editions have a mere summary headed, "Abridgment of Lewis and Clark's Expedition." I have seen the editions of 1802 (third), 1808 (sixth), 1811 (seventh), 1814 (eighth), 1817 (ninth), 1818 (tenth), and 1821 (eleventh); but there were others.

1830

Tales of Travels | west of the Mississippi | [Cut] | By Solomon Bell, | Late Keeper of the Traveller's Library, Province-House Court, Boston. | With a map, and numerous engravings. |

Boston: | Gray and Bowen — Washington Street. | 1830. |

18mo; advertisement leaf, pp. (2); half-title, with frontispiece illustration on verso; title, with copyright on verso; "Prefatory, including some account of the author", pp. [vii]–x; "Contents", pp. [xi]–xvi; text and illustrations, pp. [1]–162. Numerous woodcuts in the text. Signatures: [*]–[**] in fours, 1–13 in sixes, 14 in four, the last leaf being blank. The volume is the first of a series by the publishers, having for design the supplying "to the children of the United States" of "an entertaining abstract of the most popular books of travels, which have lately appeared". Lewis and Clark's travels make up the bulk of the volume; the remainder being devoted to Long and Jewitt. Described from a copy loaned by Mr. Charles H. Conover.

1848

In Senate of the United States. | January 20, 1848. | Submitted, and ordered to be printed. | Mr. Westcott made the following | Report: |
The Committee of Claims, to whom was referred the petition of Da-||vid Whelply, report: | [text of the report] |

8vo; pp. 3, verso of last leaf blank. David Whelply claimed governmental aid as a reward for his participation in Pike's explorations. Lewis and Clark are introduced by the petitioner as one of the precedents under which he lodged his claim. It was, however, adversely reported by the senatorial Committee of Claims. The public document is in Senate Reports of Committees, 30th Cong., 1st Sess., No. 37.

THE JOURNALS PROPER
Chapter I

From River Dubois to the Platte

Clark's Journal and Orders, January 30—July 22, 1804
Entries and Orders by Lewis, February 20, March 5, May 15, 20, 26, and July 8, 12

[Preliminary Memoranda]

Capt. Lewis & Clark wintered at the enterance of a Small river opposit the Mouth of Missouri Called Wood River,† where they formed their party, composed of robust helthy hardy young men, recomended

[Sentence unfinished.—Ed.].²

[The following memoranda of events in the history of the expedition prior to its departure from River Dubois, May 14, 1804, are selected from a record, mainly of natural phenomena, kept by Clark, which is written near the end of Codex C;]

---

1 Local traditions here place the mouth of the Missouri River in 1803 at one mile north of Maple Island; it is now four miles below the island. The mouth of Wood River is one mile below Maple Island, and is supposed to have been in the same place in 1803.—G. B. Dorsey, Gillespie, Ill.

2 This unfinished memorandum is found on the fly-leaf at beginning of the small note-book designated by Elliott Coues—in his report upon the journals, made to the American Philosophical Society, Jan. 20, 1893, and reprinted in our Appendix, post—as "Codex A," from which book is here reproduced Clark's journal of the expedition from May 13 to August 14, 1804. Occasional entries, written by Lewis during that period, will be here designated by his name within brackets at the beginning of such matter.

As stated in the Introduction to the present volume, there are two collections of original journals of the explorers—that made by Thomas Jefferson and now in the custody of the American Philosophical Society at Philadelphia; and that owned by [3]
this begins at p. 231, and continues (the pages being in reverse order) to p. 216, covering the time from Jan. 1, 1804, to April 7, 1805. The expedition had gone into camp in December.—Ed.]

[The following memorandum, by both Lewis and Clark, occupies a detached sheet in the Clark-Voorhis collection.—Ed.]

Lewis:

Information of M! John Hay, commencing at the discharge of the Ottertail Lake, which forms the source of the Red River, to his winter station on the Assinneboin River.

Mrs. Julia Clark Voorhis and Miss Eleanor Glasgow Voorhis, of New York—granddaughter and great granddaughter, respectively, of William Clark. In all references to the Philadelphia codices, we shall for convenience give Coues's lettered designations thereof (e. g., "Codex A"); the four Voorhis note-books will be designated by their Arabic numerals (e. g., "Clark-Voorhis note-book, No. 1"). Other Clark manuscripts in the Voorhis collection will be specifically alluded to, as they appear in our volumes.—Ed.

1 Lewis appears to have spent his time chiefly in St. Louis, where, on March 9 and 10, he was principal witness to the formal transfer of Upper Louisiana. See act of transfer, in Billon, Annals of St. Louis (St. Louis, 1886), pp. 360, 361.—Ed.

M. Garrous Boat loaded with provisions pass up for Prairie du chien, to trade at St. Louis

The Country about the Mouth of Missouri is pleasant and partially Settled. On the East Side of the Mississippi a leavel rich bottom extends back about 3 miles, and rises by several elevations to the high Country, which is thinly timbered with Oaks & On the lower Side of the Missouri, at about 2 miles back the Country rises gradually, to a high pleasant thinly timbered Country, the lands are generally fine on the River bottoms and well calculating for farming on the upper Country. In the point the Bottom is extensive and immensely rich for 15 or 20 miles up each river, and about \( \frac{3}{4} \) of which is open leavel plains in which the inhabitants of S. Charles & portage de Scioux had their crops of corn & wheat. On the upland is a fine farming country partially timbered for Some distance back.

**[DISCIPLINE AND ORGANIZATION]**

[The following “Detachment Orders” are in the Voorhis collection of Lewis and Clark manuscripts — see note 2, p. 3, ante. The documents show that the “robust helthy hardy young men,” many of them fresh from the Kentucky woods, found it not easy to accustom themselves to the rigid discipline of a military corps; and illustrate the difficulties which beset the two captains during the first winter camp. The orders relating to the personnel of the expedition, with the organization of the messes, etc., are especially interesting and suggestive.—Ed.]

1 Little is known of this Garreau, save that it is probably his son Pierre (whose mother was an Arikara woman) who was long an interpreter at Fort Berthold; see Coues's *Narrative of Larpenteur* (N. Y., 1898), i, pp. 125, 126. Clark's Garreau may be the Jearreau (of Cahokia, Ill.) mentioned by Pike in 1806; see Coues's *Expeditions of Pike* (N. Y., 1895), i, p. 263. — Ed.

2 The first two orders (Lewis) are on separate sheets of paper. The others are contained in a pocket note-book, which we designate as the "Orderly Book." This
The Commanding officer directs that During the absence of himself and Cap'l Clark from Camp, that the party shall consider themselves under the immediate command of Serg't Ordway, who will be held accountable for the good police and order of the camp during that period, and will also see the subsequent parts of this order carried into effect.

The sawyers will continue their work until they have cut the necessary quantity of plank, the quantity wanting will be determined by Pryor; during the days they labour they shall receive each an extra gill of whiskey per day and be exempt from guard duty; when the work is accomplished, they will join the party and do duty in common with the other men.

The Blacksmiths will also continue their work until they have completed the articles contained in the memorandum with which I have furnished them, and during the time they are at work will receive each an extra gill of whiskey per day and be exempt from guard duty; when the work is completed they will return to camp and do duty in common with the detachment.

The four men who are engaged in making sugar will continue in that employment until further orders, and will receive each a half a gill of extra whiskey per day and be exempt from guard duty.

The practicing party will in future discharge only one round each per day, which will be done under the direction of Serg't Ordway, all at the same target and at the distance of fifty yards off hand. The prize of a gill of extra whiskey will be received by the person who makes the best shot at each time of practice.

Floyd will take charge of our quarters and store and be exempt from guard duty until our return, the commanding book (at first in Clark's hand, and then for the most part in that of Sergeant John Ordway, with a few entries by Lewis) covers the dates April 1-October 13, 1804. It is but a fragment; the remaining leaves are missing, save those containing an entry dated Fort Clatsop, January 1, 1806. After the start of the expedition from River Dubois camp, we have incorporated into the text the several entries from this document, designating them as "[Orderly Book: ]". —Ed.
Officer hopes that this proof of his confidence will be justified by the rigid performance of the orders given him on that subject.

No man shall absent himself from camp without the knowledge and permission of Serg't Ordway, other than those who have obtained permission from me to be absent on hunting excursions, and those will not extend their absence to a term by which they may avoid a tour of guard duty, on their return they will report themselves to Serg't Ordway and receive his instructions.

No whiskey shall in future be delivered from the Contractor's store except for the legal ration, and as appropriated by this order, unless otherwise directed by Cap't Clark or myself.

MERIWETHER LEWIS Cap't
1st U. S. Reg't Infty.

Serg't Ordway will have the men paraded this evening and read the inclosed orders to them.

M. LEWIS

[Indorsed:] to Floyd

Detachment Orders
March 3rd 1804.

The Commanding officer feels himself mortified and disappointed at the disorderly conduct of Reubin Fields, in refusing to mount guard when in the due roteen of duty he was regularly warned; nor is he less surprised at the want of discretion in those who urged his opposition to the faithful discharge of his duty, particularly Shields, whose sense of propriety he had every reason to believe would have induced him rather to have promoted good order, than to have excited disorder and faction among the party, particularly in the absence of Cap't Clark and himself: The Commanding officer is also sorry to find any man, who has been engaged by himself and Cap't Clark for the expedition on which they have entered, so destitute of understanding, as not to be able to draw the distinction between being placed under the command of another officer, whose will in such case would be their law, and that of obeying the orders of
Cap' Clark and himself communicated to them through Serg' Ordway, who, as one of the party, has during their necessary absence been charged with the execution of their orders; acting from those orders expressly, and not from his own caprice, and who, is in all respects accountable to us for the faithfull observance of the same.

A moments reflection must convince every man of our party, that were we to neglect the more important and necessary arrangements in relation to the voyage we are now entering on, for the purpose merely of remain[ing] at camp in order to communicate our orders in person to the individuals of the party on near points of police, they would have too much reason to complain; nay, even to fear the ultimate success of the enterprise in which we are all embarked. The abuse of some of the party with respect [to the] prevelege heretofore granted them of going into the country, is not less displeasing; to such as have made hunting or other business a pretext to cover their design of visiting a neighbouring whiskey shop, he cannot for the present extend this previlege; and dose therefore most positively direct, that Colter, Bolye, Wiser, and Robinson do not recieve permission to leave camp under any pretext whatever for ten days, after this order is read on the parade, unless otherwise directed hereafter by Cap' Clark or himself. The commanding officers highly approve of the conduct of Serg' Ordway.

The Carpenters Blacksmiths, and in short the whole party (except Floid who has been specially directed to perform other duties) are to obey implicitly the orders of Serg' Ordway, who has recieved our instructions on these subjects, and is held accountable to us for their due execution.

Meriwether Lewis.
Cap' 1st U. S. Reg't Infnty Comd't Detatchment

[Indorsed:] Serg' Ordway will read the within order to the men on the parade the morning after the receipt of the same.

M. Lewis Cap'

[10]
The Commanding officers did yesterday proceed to take
the necessary inlistments, and select the Detachment destined
for the Expedition through the interior of the Continent of
North America; and have accordingly selected the persons
herein after Mentioned, as those which are to Constitute their
Permanent Detachment. (Viz).

William Bratten, John Ordway
John Colter, Nathaniel Pryor
John Collins, John Potts
Reubin Fields, Moses B Reed
Joseph Fields, George Shannon
Charles Floyd, John Shields
Patrick Gass, John B. Thompson
George Gibson, Richard Winser
Silas Goodrich, William Werner
Thomas P. Howard, Peter Wiser
Hugh Hall, Joseph Whitehouse
Hugh Mc Neel, Alexander Willard
John Newton

The commanding officers do also retain in their service
untill further Orders: The following Persons, Richard Var­
ington, Robert Frasure, John Robertson, & John Boyley
(Moses B. Read)\(^1\) who whilst they remain with the Detachment

\(^1\) The Lewis and Clark manuscripts were, as explained in the Introduction, ante,
for a time in the hands of Nicholas Biddle, who prepared from them his paraphrase
Narrative, published in 1814. Clark, in assisting Biddle, not infrequently made
interlineations in the text; so did Biddle—in our opinion, the former thus wrote in
black ink, the latter in red. In 1893, Elliott Coues also made emendations in the
Philadelphia codices, and there are some erasures and interlineations by an unknown
hand. In seeking to reproduce the manuscripts with fidelity, the present Editor has
deemed it desirable to retain all emendations made by contemporaries, although he
has ignored many made by Coues, who often sought to correct and modernize the
spelling of proper names. Words reproduced by us in Italics enclosed by parentheses,
are corrections in red ink, presumably by Biddle—e. g. (Moses B. Read); those set
in Italics enclosed by brackets, are in black ink and by several persons—Clark, Coues,
or an unknown hand—e. g. [Petite Côte]; words in Italics, unenclosed, were under­
lined by the author himself; the present Editor’s signed or unsigned emendations are
in Roman, bracketed—e. g. [Lewis]; plain parentheses’ (enclosing matter in Roman
type) are as in the text. — Ed.
shall be incorporated with the second, and third squads of the same, and are to be treated in all respects as those men who form the Permanent detachment, except with regard to an advance of Pay, and the distributions of Arms and Accoutrements intended for the expedition.

The following persons (viz Charles Floyd, John Ordway, and Nathaniel Pryor are this day appointed Sergeants, with equal Powers (unless when otherwise specially ordered). The authority, Pay, and emoluments, attached to the Said rank of Sergeants in the Military Service of the United States, and to hold the Said appointments, and be respected Accordingly, during their good behaviour or the Will and pleasure of the first Commanding officers.

To insure order among the party, as well as to promote a regular Police in Camp, The Commanding Officers have thought proper to divide the detachment into three Squads and to place a Sergeant in Command of each, who are held immediately responsible to the Commanding officers, for the regular and orderly deportment of the individuals composing their respective Squads.

The following individuals after being duly balloted for, have fallen in the several Squads as hereafter stated, and are Accordingly placed under the direction of the Sergeants whose names precedes those of his squad. (Viz:)

1 The above spelling is somewhat erratic. Following is the now generally accepted list of members of the expedition, as verified by the official pay-roll at the close of the venture: Meriwether Lewis, Captain in 1st Reg. U. S. Infantry, commanding; William Clark, and Lieutenant in U. S. Artillery; sergeants—John Ordway, Nathaniel Pryor, Charles Floyd, Patrick Gass; and privates—William Bratton, John Colter, John Collins, Peter Cruzatte, Reuben Fields, Joseph Fields, Robert Frazier, George Gibson, Silas Goodrich, Hugh Hall, Thomas P. Howard, Francis Labiche, Hugh McNeal, John Potts, George Shannon, John Shields, John B. Thompson, William Werner, Joseph Whitehouse, Alexander Willard, Richard Windsor, Peter Wiser. Besides these men, the party included two interpreters, George Drewyer (or Drouillard) and Toussant Charbonneau; an Indian woman, Sacajawea ("Bird-woman"), Charbonneau's wife; and a negro slave of Captain Clark's, named York. Two soldiers, John Newman and M. B. Reed, who had set out with the expedition, were punished for misconduct, and sent back to St. Louis on April 7, 1805. Baptiste Lepage was enlisted in Newman's place, at Fort Mandan, Nov. 2, 1804, and remained with the expedition until the discharge of its men at St. Louis, Nov. 10, 1806. For more detailed information regarding them, see Coues's Lewis and Clark, i, pp. 255-259. — Ed.

[12]
The Camp Kettles, and other Public utensels for cooking shall be produced this evening after the parade is Dismissed; and an equal division shall take place of the same, among the non commissioned officers Commanding the squads. Those non-commissioned officers shall make an equal Division of the proportion of those utensels between their own Messes of their respective squads,—each squad shall be devided into two Messes, at the head of one of which the commanding Sergeant shall Preside. the sergeants Messes will Consist of four pri­vates only to be admited under his discression, the ballance of each squad shall form the second mess of each squad.

During the indisposition of Sergeant Pryor, George Shannon is appointed (protempor) to discharge his the Said Pryor’s duty in his squad.

The party for the co[n]venience of being more immediatly under the eye of the several sergeants haveing charge of them, will make the necessary exchanges of their Bunks and rooms for that Purpose as shall be verbally derected by us.

Untill otherwise derected, Sergeant John Ordway will continue to keep the rouster and detaile the men of the detachment
for the several duties which it may be necessary, they should perform, as also to transcribe in a book furnished Him for that purpose, those or such other orders as the Commanding officers shall think proper to publish from time, to time for the government of the Party.

Signed

Meriwether Lewis

Monday, May 14th, 1804

Received the first part of the day.

I determined to go at four a.m. from River Dubois village, up the Allegheny and west at that point until Capt. Lewis could speak the canoe in which he was obliged to attend to at St. Louis and join me by land from that place 24 miles. By this movement calculated was the arrival of the latter or other canoes or necessary that they might be made at St. Charles. Set out at 4 o'clock P.M. in the presence of many of the friendly inhabitants and proceeded on under joint command. The canoe to the upper point of the 1st Blance 4 1/2 miles.
brease up the Missourie to the upper Point of the 1st Island 4 Miles and camped on the Island which is Situated Close on the right (or Starboard) Side, and opposit the mouth of a Small Creek called Cold water, a heavy rain this after-noon

The Course of this day nearly West wind from N. E.

[Lewis:] Tuesday May 15th —

It rained during the greater part of last night and continued until 7 OCc A. M. after which the party proceeded, passed two Islands and incamped on the Starb.4 shore at M' Fifer's landing opposite an Island. the evening was fair. some wild gees with their young brudes were seen to-day. the barge run foul three several times on logs, and in one instance it was with much difficulty they could get her off; happily no injury was sustained, tho' the barge was several minutes in eminent danger; this was cased by her being too heavily laden in the stern. Persons accustomed to the navigation of the Missouri and the Mississippi also below the mouth of this river, uniformly take the precaution to load their vessels heavyest in the bow when they ascend the stream in order to avoid the danger incident to running foul of the concealed timber which lyes in great quantities in the beds of these rivers.

[Clark:] May 15th Tuesday —

Rained the greater part of the last night, and this morning until 7 oClock. at 9 oClock Set out and proceeded on 9 miles passed two Islands & incamped on the Starb. Side at a M' Pipers Landing opposit an Island, the Boat run on Logs three times to day, owing [to] her being too heavily loaded a Stern, a fair after noon, I saw a number of Goslings to day on the Shore, the water excessively rapid, & Banks falling in.

1 This creek was just above Bellefontaine, Mo., where a U. S. military post was established in 1803. — Ed.
2 This entry, made by Lewis, is found at end of Codex Aa. — Ed.
3 Where, as herein, there are consecutive entries by the same hand, we only thus indicate the commencement of a stretch. — Ed.

1 These characters are used by Clark to signify "the sun's lower limb," or, with "U. L.," its "upper limb." — Ed.
(at St. Charles) A Cloudy morning rained and hard Wind from the last night. The letter George lost yesterday found by a Country man, I gave the party leave to go and hear a Sermon to day delivered by M: [Blank space in MS.] a roman Carthlick Priest at 3 oClock Cap: Lewis, Capt: Stoddard accompanied by the Officers & Several Gentlemen of S' Louis arrived in a heavy Showr of Rain. Messr: Lutenants Minford & Worriss. M: Cholteau[,] Gratiot, Deloney, Laberde, Rankin. D: Sodrang 1 rained the greater part of this evening, Suped with M: Charles Tayon, the late Comd: of S' Charles a Spanish Ensign.

[Sunday May 20th 1804.]

The morning was fair, and the weather pleasant; at 10 O'C: A M. agreeably to an appointment of the preceeding day, I was

---

1 Louisiana (receded by Spain to France in 1800) was sold by Napoleon Bonaparte (April 30, 1803) to the United States; and Captain Amos Stoddard was the commissioner appointed by Jefferson to receive the upper portion of the territory from the Spanish authorities. France never having taken actual possession of Louisiana, the transfer from Spain to France took place at St. Louis, March 9, 1804, Lewis being chief official witness; the transfer from France to the United States occurred the following day; and Stoddard became military governor of Upper Louisiana, pending its reorganization by Congress, which took effect on October 1 of that year. One of his officers was Lieutenant Worrall (the name spelled Worriss by Clark); another was named Milford (Minford, in Clark).

Pierre and Auguste Chouteau were among the earliest settlers of St. Louis, and the Chouteau family has always been prominent in its annals; Pierre was the son of its founder, Pierre Laclede. Their sister Victoire was the wife of Charles Gratiot, who was engaged in the Indian trade in the Illinois country from 1774, settling at St. Louis in 1784; upon the organization of the District of Louisiana (1804), Gratiot was appointed the first presiding justice of the new Court of Quarter Sessions at St. Louis, afterward filling various public offices. Another sister, Pelagie Chouteau, married Sylvester Labbadie (misspelled Laberde by Clark). David Delaunay was an associate justice in the above-mentioned court. James Rankin was another early settler of St. Louis. Dr. Antoine François Saugrain (the "Sodrang" of Clark) was a French chemist and mineralogist, who had made several voyages to America, for scientific purposes, from 1784 to 1788. In 1790, he was one of the French colonists who settled at Gallipolis, O., and finally located with his family at St. Louis, where he practised medicine until his death in 1820. See W. V. Byars's Memoir of Saugrain's life (St. Louis, 1903). For detailed accounts of these and other early settlers of St. Louis, see Scharf's Saint Louis, pp. 167-203; and Billon's Annals of St. Louis, pp. 389-492. — Ed.

[22]
joined by Capt Stoddard, Lieut Milford & Worrell together with Messrs A. Chouteau, C. Gratiot, and many other respectable inhabitants of St Louis, who had engaged to accompany me to the Village of St Charles; accordingly at 12 OC, after bidding an affectionate adieu to my Hostis, that excellent woman the spouse of M: Peter Chouteau, and some of my fair friends of St Louis, we set forward to that village in order to join my friend companion and fellow labourer Capt. William Clark, who had previously arrived at that place with the party destined for the discovery of the interior of the continent of North America the first 5 miles of our route laid through a beatifull high leavel and fertile prairie which incircles the town of St Louis from N. W. to S. E. the lands through which we then passed are somewhat broken less fertile the plains and woodlands are here indiscriminately interspersed untill you arrive within three miles of the village when the woodland commences and continues to the Missouri the latter is extremly fertile. At half after one P.M. our progress was interrupted by the near approach of a violent thunder-storm from the N. W. and concluded to take shelter in a little cabin hard by untill the rain should be over; accordingly we alighted and remained about an hour and a half and regaled ourselves with a cold collation which we had taken the precaution to bring with us from St Louis.

The clouds continued to follow each other in rapaid succession, insomuch that there was but little prospect of it's ceasing to rain this evening; as I had determined to reach St Charles this evening and knowing that there was now no time to be lost I set forward in the rain, most of the gentlemen continued with me, we arrived at half after six and joined Capt Clark, found the party in good health and spirits. Suped this evening with Mons: Charles Tayong a Spanish Ensign & late Commandant of St Charles at an early hour I retired to rest on board the barge. St Charles is situated on the North bank of the Missouri 21 miles above it's junction with the Mississippi, and about the same distance N. W. from St Louis; it is bisected by one principal street about a mile in length running nearly parallel with the river, the plain on which it stands is
narrow tho’ sufficiently elevated to secure it against the annual
inundations of the river, which usually happen in the month
of June, and in the rear it is terminated by a range of small
hills, hence the appellation of petit Cote, a name by which this
village is better known to the French inhabitants of the Illi-
nois than that of St. Charles. The Village contains a Chappel,
one hundred dwelling houses, and about 450 inhabitants;
their houses are generally small and but illly constructed; a
great majority of the inhabitants are miserably pour illiterate
and when at home excessively lazy, tho’ they are polite hos-
pitable and by no means deficient in point of natural genious,
they live in a perfect state of harmony among each other, and
place as implicit confidence in the doctrines of their spiritual
pastor, the Roman Catholic priest, as they yeald passive obe-
dience to the will of their temporal master the commandant.
a small garden of vegetables is the usual extent of their culti-
vation, and this is commonly imposed on the old-men and
boys; the men in the vigor of life consider the cultivation of
the earth a degrading occupation, and in order to gain the
necessary subsistence for themselves and families, either under-
take hunting voyages on their own account, or engage them-
selves as hirelings to such persons as possess sufficient capital
to extend their traffic to the natives of the interior parts of the
country; on those voyages in either case, they are frequently
absent from their families or homes the term of six twelve or
eighteen months and alwas subjected to severe and incessant
labour, exposed to the ferocity of the lawless savages, the
vicissitudes of weather and climate, and dependant on chance
or accident alone for food, raiment or relief in the event of
malady. These people are principally the decendants of the
Canadian French, and it is not an inconsiderable proportion
of them that can boast a small dash of the pure blood of the
aboriginies of America. On consulting with my friend Capt C.
I found it necessary that we should postpone our departure
untill 2 P. M. the next day and accordingly gave orders to the
party to hold themselves in readiness to depart at that hour.
Capt. Clark now informed me that having gotten all the
stores on board the Barge and perogues on the evening of the
13th of May he determined to leave our winter cantoonment at the mouth of River Dubois the next day, and to ascend the Missouri as far as the Village of St. Charles, where, as it had been previously concerted between us, he was to wait my arrival; this movement while it advanced us a small distance on our rout, would also enable him to determine whether the vessels had been judiciously loaded and if not timely to make the necessary alterations; accordingly at 4 P. M. on Monday the 14th of May 1804, he embarked with the party in the presence of a number of the neighbouring Citizens who had assembled to witness his departure. during the fore part of this Day it rained excessively hard. In my last letter to the President dated at St. Louis I mentioned the departure of Capt. Clark from River Dubois on the 15th Inst, which was the day that had been calculated on, but having completed the arrangements a day earlier he departed on the 14th as before mentioned. On the evening of the 14th the party halted and encamped on the upper point of the first Island which lies near the Larbord shore, on the same side and nearly opposite the center of this Island a small Creek disimbogues called Couldwater.

The course and distance of this day was West 4 Miles — the Wind from N. E.¹

[Clark:]

May 21st 1804, Monday —

All the forepart of the Day arranging our party and procuring the different articles necessary for them at this place. Dined with M: Ducett and Set out at half passed three oClock under three Cheers from the gentlemen on the bank and proceeded on to the head of the Island (which is Situated on the Stb Side); 3 Miles Soon after we Set out to day a hard Wind from the W. S W accompanied with a hard rain, which lasted with Short intervales all night, opposit our Camp a Small creek coms in on the Lb Side.

¹ The entry here closed, written by Lewis, is found in Codex Aa. — Ed.

May 22nd Tuesday 1804 —

A Cloudy Morning Delay one hour for 4 French men who got liberty to return to arrange Some business they had forgotten in Town, at 6 oClock we proceeded on, passed Several small farms on the bank, and a large creek on the Lb^4 Side Called Bonom [bon homme] a Camp of Kickapoo^2 on the S^4 Side (An Indian nation residing on the heads of Kaskaskis & Illinois river 90 miles N.E. of the mouth of the Missouri, & hunt occasionally on the Missouri)

Those Indians told me several days ago that they would Come on and hunt and by the time I got to their Camp they would have Some provisions for us. We camped in a Bend at the Mo of a Small creek, Soon after we came too the Indians arrived with 4 Deer as a Present, for which we gave them two qt^4 of Whiskey

May the 26th: Saturday 1804 —

Set out at 7 oClock after a heavy Shour of rain (George Drewyer, & John Sheelds, sent by Land with the two horses with directions to proceed on one day & hunt the next)

The wind favourable from the E.N.E. passed Beef Island and River on Lb$^4$ Side at 3½ m: [a large island called Buffalo Island separated from the land by a small channel into which Buffalo creek empties itself]. Passed a creek on the Lb$^4$ Side called Shepperds Creek, passed Several Islands to day, great Deel of Deer Sign on the Bank, one man out hunting, W[e] camped on an Island on the Starboard Side [near the Southern extrem of Luter Island (La L'outre)²]

---

1 Gass and Floyd, in their journals, call this place St. John's, and say that it was "the last white settlement on the river." — Ed.

2 Referring to the Siouan tribe of Poncas, whose village was on the Ponca River, a stream flowing into the Missouri not far above the Niobrara River. When visited by our explorers, their town was found deserted, the tribe (then reduced to a few cabins) being absent on a hunting expedition, and having joined the Omahas, also a Siouan tribe, for mutual aid and protection. — Ed.

3 L'Outre Island, as given on modern maps — this, as well as the form in the text, corrupted from the French word loutre ("otter"). — Floyd and Biddle use the English name for the island or the creek. — Ed.

Detachment Orders.  
May 26th 1804.

The Commanding Officers direct, that the three Squads under the command of Serg't Floyd Ordway and Pryor heretofore forming two messes each, shall untill further orders constitute three messes only, the same being altered and organized as follows (viz)

Serg't Charles Floyd.

Privates
Hugh M: Neal
Patri Gass
Reubin Fields
John B Thompson
John Newman
Richard Winsor
Francis Rivet & (French)
Joseph Fields

Alexander Willard
William Warner
Silas Goodrich
John Potts &
Hugh Hall

Serg't Nathaniel Pryor

Privates
George Gibson
George Shannon
John Shields
John Collins
Joseph Whitehouse
Peter Wiser
Peter Crusat &
Francis Labuche

The Commanding officers further direct that the remainder of the detachment[?] shall form two messes; and that the same be constituted as follows. (viz)

[ 30 ]
The Commanding officers further direct that the messes of Sergt: Floyd, Ordway and Pryor shall until further orders form the crew of the Batteaux; the Mess of the Patroon La Jeunesse will form the permanent crew of the red Perogue; Corp: Warvington's mess forming that of the white perogue.

Whenever by any casualty it becomes necessary to furnish additional men to assist in navigating the Perogues, the same shall be furnished by daily detale from the Privates who form the crew of Batteaux, exempting only from such detale, Thomas P. Howard, and the men who are assigned to the two bow and two stern oars. For the present one man will be furnished daily to assist the crew of the white perogue; this man must be an expert boatman.

The posts and duties of the Sergt: shall be as follows (viz) — when the Batteaux is under way, one Sergt: shall be stationed at the helm, one in the center on the rear of the starboard locker, and one at the bow. The Sergt: at the helm, shall steer the boat, and see that the baggage on the quarterdeck is properly arranged and stowed away in the most advantageous manner; to see that no cooking utensels or loose lumber of any kind is left on the deck to obstruct the passage between the burths — he will also attend to the compas when necessary.

The Sergt: at the center will command the guard, manage the sails, see that the men at the oars do their duty; that they come on board at a proper season in the morning, and that the boat gets under way in due time; he will keep a good lookout for the mouths of all rivers, creeks, Islands and other remarkable places and shall immediately report the same to the com-
manding officers; he will attend to the issues of spirituous liquors; he shall regulate the halting of the batteaux through the day to give the men refreshment, and will also regulate the time of her departure taking care that not more time than is necessary shall be expended at each halt—it shall be his duty also to post a centinel on the bank, near the boat whenever we come too and halt in the course of the day, at the same time he will (accompanied by two his guard) reconnoiter the forest around the place of landing to the distance of at least one hundred paces. when we come too for the purpose of encamping at night, the Serg: of the guard shall post two centinels immediately on our landing; one of whom shall be posted near the boat, and the other at a convenient distance in rear of the encampment; at night the Serg: must be always present with his guard, and he is positively forbidden to suffer any man of his guard to absent himself on any pretext whatever; he will at each relief through the night, accompanied by the two men last off their posts, reconnoiter in every direction around the camp to the distance of at least one hundred and fifty paces, and also examine the situation of the boats and perogues, and see that they ly safe and free from the bank.

It shall be the duty of the Serg: at the bow, to keep a good look out for all danger which may approach, either of the enimy, or obstructions which may present themselves to the passage of the boat; of the first he will notify the Serg: at the center, who will communicate the information to the commanding officers, and of the second or obstructions to the boat he will notify the Serg: at the helm; he will also report to the commanding officers through the Serg: at the center all perogues boats canoes or other craft which he may discover in the river, and all hunting camps or parties of Indians in view of which we may pass. he will at all times be provided with a setting pole and assist the bowsman in poling and managing the bow of the boat. it will be his duty also to give and answer all signals, which may hereafter be established for the government of the perogues and parties on shore.

The Serg: will on each morning before our departure relieve each other in the following manner—(viz) The Serg: at the [32]
helm will parade the new guard, relieve the Sergt and the old guard, and occupy the middle station in the boat; the Sergt of the old guard will occupy the station at the bow, and the Sergt who had been stationed the preceding day at the bow will place himself at the helm.

The Sergts in addition to those duties are directed each to keep a separate journal from day to day of all passing occurrences, and such other observations on the country &c as shall appear to them worthy of notice.

The Sergts are relieved and exempt from all labour of making fires, pitching tents or cooking, and will direct and make the men of their several messes perform an equal proportion of those duties.

The guard shall hereafter consist of one sergeant and six privates & engages.

Patroon Dechamp, Cpl. Warvington, and George Drewyer, are exempt from guard duty; the two former will attend particularly to their perogues at all times, and see that their lading is in good order, and that the same is kept perfectly free from rain or other moisture; the latter will perform certain duties on shore which will be assigned him from time to time: all other soldiers and engaged men of whatever discription must perform their regular tour of guard duty.

All details for guard or other duty will be made in the evening when we encamp, and the duty to be performed will be entered on, by the individuals so warned, the next morning. Provision for one day will be issued to the party on each evening after we have encamped; the same will be cooked on that evening by the several messes, and a proportion of it reserved for the next day as no cooking will be allowed in the day while on the march.

Sergt John Ordway will continue to issue the provisions and make the details for guard or other duty.

The day after tomorrow lyed corn and grice will be issued to the party, the next day Poark and flour, and the day following Indian meal and poark; and in conformity to that roteine provisions will continue to be issued to the party until further orders. should any of the messes prefer Indian meal to flour
they may receive it accordingly — no poark is to be issued when we have fresh meat on hand.

Labuche and Crusat will man the larboard bow oar alternately, and the one not engaged at the oar will attend as the Bows-man, and when the attention of both these persons is necessary at the bow, their oar is to be maned by any idle hand on board.

Meriwether Lewis Cap!
Wm Clark Cap!

Clark:]

as we were pushing off this morning two Canoos Loaded with fur &c came to from the Mahas [Mahar; Omaha — Ed.] nation, [living 730 miles above on the Missouri] which place they had left two months, at about 10 oClock 4 Caiux 1 or rafts loaded with furs and peltries came too, one from the Paunees, [Paunees on the river Platt] the others from Grand Osage, they informed nothing of Consequence, passed a creek on the Lb! Side called ash Creek 20 yd! Wide, passed the upper point of a large Island on the Sh! Side back of which comes in three creeks one Called Otter Creek, her[e] the man we left hunting came in we camped on a Willow Island in the mouth of Gasconnade River George Shannon killed a Deer this evening.

Error of Sextion 8' 45" -

O° Magnetic Azimuth S. 83° W.

Time at place of observ'd by bromt! P. M. 4 h - 4 m - 44 s

Double altitude of O L Limb — 71° - 24' - 00"

Cap Lewis observed Meridian altitude of O U L. back observation with the octant & artificial horizons — gave for altitude on the Limb 38°. 44' - 00".

octant error — 2 - 0 - 0 +

had the Perogues loaded and all prepared to Set out at 4 oClock after finishing the observations & all things necessary found that one of the hunters had not returned, we determined to proceed on & leave one perogue to wate for him, accordingly at half past four we set out and came on 4 miles & camped on the Lb Side above a small Creek called Deer Creek. Soon after we came too we heard several guns fire down the river, we answered them by a Discharge of a Swivell on the Bow.
Rained all last night. Set out at 6 oClock after a heavy shower, and proceeded on, passed a large Island a Creek opposit on the S' Side, Just above a Cave Called Monbrun [Montbrun's] Tavern & River, passed a Creek on the Lb' Side call Rush Creek at 4 miles several Showers of rain, the Currents verry Swift, river rising fast. Passed Big Miry [Muddy] River at 11 miles on the Starboard Side, at the lower point of a Island, this River is about 50 yards Wide, Camped at the mouth of a Creek on Lb! Sd. of ab: 15 y' Wide Called Grimestone Creek, opposit the head of a Is' and the mouth of Little Miry [Muddy] River, on the S' Side, a heavy wind accompanied with rain & hail we made 14 miles to day, the river Continud to rise, the Country on each Side appear full of Water.

*June 2nd Saturday*

Cap Lewis Took the Time & Distance of O° & Moons nearest limbs, the Sun East — and Meridian altitude of Suns U. L. with Octant, back observation gave for altitude 37° - 28' - 00".

Errors of Octant 2° - 00' - 00" +. made Several other observations. I made an angle for the Wedth of the two rivers. The Missourie from the Point to the N. Side is 875 yards wide the Osage River from the point to the S. E. Side is 397 yards Wide, the distance between the two rivers at the p' of high Land (100 foot above the bottom) and 80 poles up the Missouris from the point is 40 poles, on the top of this high land under which is a limestone rock two mouns or graves are raised. from this p' which comes (com-

---

1 In Biddle (i., p. 7) this phrase reads "the letter announcing the cession of Louisiana." — Ed.
mands) both rivers I had a delightfull prospect of the Missouris up and down, also the Osage R. up.¹

George Drewyer & John Shields who we had sent with the horses by Land on the N. Side joined us this evening much worsted, they being absent Seven Days depending on their gun, the greater part of the time rain, they were obliged to raft or Swim many Creeks, those men gave a flattering account of of the Countrey Commencing below the first hill on the N Side and extend'g Parrelal with the river for 30 or 40 M. The Two Muddy rivers passing thr? & som fine Springs & Streems our hunters kill several Deer to day, Some Small licks on the SE of the Osage River.

June 3rd Sunday 1804 —

The forepart of the day fair Took Meridional altitude of O° U. L. with the Octant and glass Horreson adjusted back observation. the instrument gave 38° - 2' - 00'' it was Cloudy and the Suns disk much obscured and cannot be Depended on.

We made other Observations in the evening after the return of Cap! Lewis from a walk of three or four m' round. We Set out at 5 oClock P. M. proceeded on five miles to the mouth of a Creek on the L. S. 20 y.² wide Called Murow,² passed a Creek at 3 m' which I call Cupbord Creek as it mouths above a rock of that appearance. Several Deer killed to day. at the mouth of the Murow Creek I saw much sign of War parties of Ind! haveing crossed from the mouth of this Creek. I have a bad cold with a Sore throat. near West 5 Miles

June 4th Monday 1804 —

a fair day three men out on the right flank passed a large Island on the S. Side called Seeder Island, this Is² has a great Deel of Ceedar on it, passed a Small Creek at 1 m! 15 y.² Wide which we named Nightingale Creek from a Bird of that discription which Sang for us all last night, and is the first

¹ Biddle here furnishes (pp. 8, 9) an enumeration of the bands of the Osage tribe, then numbering over 2,500 warriors; also their own tradition of their origin, which made them descendants of the beaver. — Ed.

June 7th Thursday 1804 —
Set out early passed the head of the Island opposit which we Camped last night, and brakfast at the Mouth of a large Creek on the S. S. of 30 yd' wide called big Monetou,¹ from the p[ of the Is[ of our Course of last night to the mouth of this Creek is N 61° W 4½ M; a Short distance above the mouth of this Creek, is Several Courious paintings and carving on the projecting rock of Limestone inlade with white red & blue flint, of a very good quallity, the Indians have taken of this flint great quantities. We landed at this Inscription and found it a Den of Rattle Snakes, we had not landed 3 Minites before three very large Snakes was observed in the Crevises of the rocks & killed. at the mouth of the last mentioned Creek Cap! Lewis took four or five men & went to Some Licks or Springs of Salt Water from two to four miles up the Creek, on R[ Side the water of those Springs are not Strong, say from 4 to 600 g[ of water for a Bushel of Salt passed some Small willow Islands and camped at the mouth of a small river Called Good Womans River² this river is about 35 yards Wide and said to be navigable for Perogues Several Leagues. Cap! Lewis with 2 men went up the Creek a short distance. our Hunters brought in three Bear this evening, and informs that the Countrey thro: which they passed from the last Creek is fine, rich land, & well watered.

Passed the Mo. of Good Womans R.

8th of June, Friday 1804—

Set out this morning at Daylight proceeded on the Course of last night Passed two Willow Islands & a Small Creek above a Rock point on the L. S. at 6 miles on which there is a number of Deer Licks, passed the Mine River at 9 m: this river is about 70 yards wide at its mouth and is Said to be navigable for Perogues 80 or 90 m: the Main [West] branch 1 passes near the place where the Little Osage village formerly stood on the Missouries, & heads between the Osage & Kansias Rivers, the left hand fork heads with nearer Branches of the Osage River, The french inform that Lead Ore has been found in different parts of this river, I took Sj: Floyd and went out 4 M: below this river, I found the land very good for a mile or 1 ½ M: back, and sufficiently watered with Small Streems which lost themselves in the Missouries bottom, the Land rose gradually from the river to the Summit of the high Countrey, which is not more than 120 foot above High Water Mark, we joined the Boat & Dined in the point above the mouth of this River, Cap: Lewis went out above the river & proceeded on one mile, finding the countrey rich, the wedes & vines so thick & high he came to the Boat. proceeded on passed an Island and Camped at the lower point of an Island on the L. S. Called the Island of Mills about 4 M: above Mine River at this place I found Kanteens, axs, Pumey Stone & peltry hid and buried (I suppose by some hunters) none of them (except the pumey Stone) was touched by one of our party, our hunters Killed 5 Deer to day, commenced raining Soon after we came too which prevented the party cooking

1 At the point of junction are some very rich salt springs; the west branch, in particular, is so much impregnated, that, for twenty miles, the water is not palatable. — BIDDLE (i, p. 13).

10th of June 1804—

A hard rain last night, We set out this mornng very early passed Some bad places in the river, Saw a number of Goslings [this] morning pass near a Bank which was falling in at the time we passed, passed two Rivers of Charletons which mouth together, above some high land which has a great quantity of Stone Calculated for whetstons the first of those rivers is about 30 yd! Wide & the other is 70 yd! w! and heads Close to the R. Dumes [des Moines] The Aieways [Ayauway] Nation have a Village on the head of these Rivers.¹ they run through an even Countrey [a broken rich thickly timbered country] and is navagable for Perogues Cap Lewis took Med! alt! of Ω U. L. with Octant, back obsv! made it 37° 12' —00" delayed ½ hours.

Cap. Lewis Killed a large Buck, passed a large Is! call'd Shecco² and camped in a Prairie on the L. S. I walked out three miles, found the prairie composed of good Land and plenty of water roleing & interspursed with points of timber land. Those Praries are not like those, or a number of those

¹ The name Charleton now appears on maps as Chariton. The etymology of Des Moines is suggested in the form used by Clark, “Dumons.” This river was formerly named (from the tribe dwelling on its shores) Rivière des Moïgonaux—a name soon abbreviated to Moïns, and that to River Des Moins (with many variants, of which Clark’s is one). Aieway and Ayauway are among the many variants of the name of a Siouan tribe, now known as the Iowa, from whom a State and river are named. Biddle says that the Iowas numbered 300 men. — Ed.

² Chicot (a French word, meaning “stump”), now Harrison Island. — COVES (L. and C. i, p. 20).
E. of the Mississippi void of every thing except grass, they abound with Hasel Grapes & a wild plumb of a Superior size & quality, Called the Osages Plumb Grows on a bush the height of a Hasel (and is three times the size of other Plumbs,) and hang in great quantities on the bushes I saw great numbers of Deer in the Praries, the evening is Cloudy, our party in high Spirits.

15th June, Friday 1804.—

Set out early and had not proceeded far e’er we wheeled on a Sawyer which was near injuring us verry much, passed a plain on the L. S. a Small Ist in the midle, the river rising, water verry swift. Passed a Creek on the L. S. passed between two Islands, a verry bad place, moveing Sands, we were nearly being swallowed up by the rolling Sands over which the Current was so Strong that we could not Stem it with our Sales under a Stiff breese in addition to our ores, we were compelled to pass under a bank which was falling in, and use the Toe rope occasionally. Continued up pass two other Small Islands and Camped on the S. S. nearly opposit the antient Village of the Little Osarges and below the ant Village of the Missouries both Situations in view and within three M. of each other, the Osage were Settled at the foot of a hill in a butifull Plain, which extends back quite to the Osage River, in front of the Vilg. next to the river is an ellegant bottom Plain which extends several miles in length on the river in this low Prarie the Missouries lived after they were reduced by the Saukees at their Town Some Dist. below. The little osage finding themselves much oppressed by the Saukees & other nations, left this place & built a village 5 M. from the Grand Osarge Town, about years ago a few of the Missouries accompanied them, the remainder of that Nation went to the Otteaus on the River Platt. The River at this place is about 3 [one] M. wide. our hunters did not come in this evening the river beginning to fall

1 Near the present Malta Bend, and not far below the site of the old French Fort Orleans. — Ed.

16th June Saturday 1804 —

Set out at 7 oClock at about a mile ¼ we came to the Camp of our hunters, they had two Bear & two Deer, proceeded on pass a Island on the S. S. a heavy rain came on & lasted a Short time, we came to on the S. S. in a Prarie at the place where M! Mackey lais down a old french fort; I could See no traces of a Settlement of any kind, in the plain I discovered a kind of Grass resembling Timothey which appeared well Calculated for Hay. this Plain is very extensive in the evening I walked on the S. S. to see if any timber was conv! to make Oars, which we were much in want of, I found some indifferent timber and Struck the river above the Boat at a bad Sand bar, the worst I had Seen which the boat must pass or Drop back Several Miles & Stem a Swift Current on the

1 Lewis's map of 1806 indicates "Mr. J. Mackay's route," which embraces most of the valley of the Niobrara River; this Mackay may be the person referred to in the text. Biddle's narrative mentions (i, p. 44) a man of this name who had in 1795-96 a trading establishment farther up the Missouri. The French fort was probably the post (Fort Orleans) established by Bourgmont (1723) not far (according to Coues) from the Malta Bend of the Missouri (see Margry's Découvertes et établissements, vi, p. 393; Le Page du Pratz's Louisiane, i, p. 324; and Coues's L. and C., i, p. 24, note 51).

The exact site of Fort Orleans is not definitely known, and there are diverse opinions regarding it. Hon. Walter B. Douglas, of St. Louis, thinks that the fort was on "the north bank of the Missouri, above the mouth of Wakenda Creek, in what is now Carroll County, and 15 to 20 miles above the town of Brunswick, which stands a little below the place where was the old mouth of Grand River (about six or seven miles from its present entrance). The action of the river-current has caused great changes in the course of both rivers, even within the last thirty years." Later there was another French post upon the river at a village of the Kansas Indians, not far from the present site of Fort Leavenworth. — Ed.
ops: Side of an Is: the Boat however ascended the middle of the Streem which was difficult Dangerous. We came to above this place at Dark and Camped in a bad place, the Mosquitoes and Ticks are numerous & bad.

June 17th Sunday 1804 (S. 65° W. 1 M! S. Side.)

Cloudy morning wind from the S. E we Set out early and proceeded on one mile & came too to make oars, & repair our cable & toe rope &c. &c. which was necessary for the Boat & Perogues. Sent out S! Pryor and Some men to get ash timber for ores, and Set some men to make a Toe Rope out of the Cords of a Cable which had been provided by Cap! Lewis at Pittsburg for the Cable of the boat. George Drewyer our hunter and one man came in with 2 Deer & a Bear, also a young Horse, they had found in the Prarie, this horse has been in the Prarie a long time and is fat, I Suppose, he has been left by Some war party against the Osage, This is a Crossing place for the war parties against that nation from the Saukees, Mioances, [Ayauways] & Souix. The party is much afflicted with Boils, and Several have the Deassentary, which I contribute to the water [which is muddy.] The Countrey about this place is butifull on the river rich & well timbered on the S. S. about two miles back a Prarie com! [commences] which is rich and interspersed with groves of timber, the count' rises at 7 or 8 miles Still further back and is rolling. on the L. S. the high lands & Prarie com' in the bank of the river and and continus back, well watered and abounds in Deer Elk & Bear. The Ticks & Musquitoes are verry troublesome.

[51]
Some rain last night, and some hard showers this morning which delay our work very much. Send out six hunters in the Prairie on the L. S. they kill 5 deer & coho [caught] a bear, which very large & fat, the party to work at the oars, make rope, & jerk their meat all day. Dry our wet sales &c. in the evening, the musquitoes very bad.

June 19th, Tuesday

Rain last night after fixing the new oars and making all necessary arrangements, we set out under a gentle breeze from the S. E. and proceeded on passed two large islands on the S. S. leaving J. Shields and one man to go by land with the horses some very hard water, passed several islands & sand bars to day at the head of one we were obliged to clear away driftwood to pass, passed a creek on the L. Side called Taboo [Tabo] 15 yd. wide passed a large creek at the head of an island called Tiger River 25 yd. on the S. S. the island below this is large and called the Isle of Pant[h]ers, formed on the S. S. by a narrow channel, I observed on the shore goose & raspberries in abundance in passing some hard water round a point of rocks on the L. S. we were obliged to take out the rope & draw up the boat for 1/2 a mile, we came too on the L. S. near a lake of the circumference of several miles, situated on the L. S. about two miles from the river this lake is said to abound in all kinds of fowls, great numbers of deer frequent this lake during summer season, and feed on the hows [haws] &c. &c. they find on the edges the land on the North Side of the river is rich and sufficiently high to afford settlements, the land on the South Side ascends gradually from the river not so rich, but of a good quality and appear well watered.

1 The musquitoes and other animals are so troublesome that musquitoe biers or nets were distributed to the party. — Biddle (I, p. 16).

6 3/4

21st June Thursday—

The river rose 3 Inches last night after the Bows man Peter Crousat viewed the water on each Side of the Island which presented a most unfavourable prospect of Swift water

1 At a place 7 1/2 miles above the present town of Dover. — COUES (L. and C., i, p. 28).
over rolling Sands which roared like an immense falls, we concluded to ascend on the right Side, and with much difficulty, with the assistance of a long Cord or Tow rope, & the anchors, we got the Boat up without any further danger than Braking a Cabbin window & losing some oars which were Swung under the windows, passed four Is* to day two large & two Small, behind the first large Island two Creeks mouth, called Eue-bert [Hubert] Creek & River & Is the upper of those Creeks head against the Mine River & is large, passed a very remarkable bend in the River to the S. forming an acute angle, the high lands come to the river on the S. opposit the upper large Island, this Is* is formed by a narrow chanel thro. the P: of the remarkable bend just mention: below this Is* on the L. S. is a Counter Current of about a mile. passed between several Small Islands Situated near the L. Side and camped above on the Same Side. Two men Sent out to hunt this evening brought in a Buck & a pore Turkey.

at Sunset the atmospier presented every appearance of wind, Blue & White Streeks centering at the Sun as She disappeared and the Clouds Situated to the S. W. Guilded in the most butifull manner.

The Countrey and Lands on each Side of the river is various as usual, and may be classed as follows, viz: the low or overflowed points or bottom land, of the groth of Cotton & Willow, the 2nd or high bottom of rich furtile Soile of the groth of Cotton, Walnut, Som ash, Hackberry, Mulberry, Lynn [Linden] & Sycamore. the third or high Lands rises gradually from the 2nd bottom (except whin it Coms to the river then from the river) about 80 or 100 foot roleing back Supplied with water (the small rivers of which loses themselves in the bottom land) and are covered with a variety of timber such as Oake of different Kinds Blue ash, Walnut &c. &c. as far as the Praries, which I am informed lie back from the river, at Some places near & others a great Distance

---

1 Biddle gives this name (i, p. 17) as "Eau Beau or Clearwater;" Gass calls it Du Beau or Du Bois. — Ed.
river rose 4 Inch last night I was waken’d before daylight this morning by the guard, preparing the Boat to receive an apparent Storm which threatened violence from the West at daylight a violent wind accompanied with rain came from the W. and lasted about one hour; it cleared away, and we set out and proceeded on under a gentle breeze from the N. W. passed some very swift water, crowded with Snags, pass two large Island opposit each other, and immediately opposit a large & extensive Prairie on the Left Side, This Prairie is butifull a high bottom for 1½ mile back and rises to the Common levell of of the Countrey (about 70 or 80 feet) and extends back out of view. Cap‘ L walked on Shore a few miles this after noon (at 3 oClock P. M. Faren° Thermometer Stood at 87° = to 11° above Summer heat) We came too on the L. Side opposit the mouth of a large Creek called the River of the Fire Prairies, at the mouth of this Creek, the Party on Shore were waiting our arrival, they informed that the Lands thro: which they passed was fine & well watered

1 The present name of a creek on the south side of the Missouri; on the north side is Clear (or Fishing) creek, but four or five miles higher, which may be the one meant by Clark, as its mouth may have shifted since their time. Gass says that Fire-prairie creek was 60 yards wide. — COUES (L. and C., i, p. 30).
Some wind this morning from the N. W. we set out at 7 oClock, and proceeded on to the head of a Island on the S. S. the wind blew hard and down the river which prevented the P'ty moveing [proceeding] from this Island the whole day, Cap! Lewis had the arms examined &c. at the lower end of this Island I got out of the boat to walk on Shore, & expected the party on Shore would overtake me, at the head of the Island, they did not & I proceeded on round a round and extensive bend in the river, I Killed a Deer & made a fire, expecting the boat would come up in the evening, the wind continueing to blow prevented their moveing, as the distance by land was too great for me to return by night I concluded to Camp, Peeled Some bark to lay on, and geathered wood to make fires to keep off the musquirts & knats, Heard the party on Shore fire, at Dark Drewyer came to me with the horses, one fat bear & a Deer, river fell 8 Inches last night.

June 27th Wednesday —

a fair warm morning, the river rose a little last night, we
determine to delay at this Place three or four Days to make
observations & recruit the party, Several men out Hunting,
onloaded our Perogue, and turned her up to Dry with a view
of repairing her after completing a Strong redoubt or brest
work from [one] river to the other, of logs & Bushes Six feet
high, The Countrey about the mouth of this river is verry
fine on each Side as well as North of the Missourie the
bottom, in the Point is low & overflows for 250 yards. it
rises a little above high water mark and continu of that hight
of good quality back to the hills  A high Clift, on the upper
Side of the Kanses ½ a mile up below the Kanses the hills
is about 1½ Miles from the point on the North Side of the

[ 59 ]
Missourie the Hills or high lands is Several Miles back, we compared the instrumts Took equal altitudes, and the Meridian altitude of the Suns L. L. to day Latitude 38° 31' - 13° Longitude [Blank space in MS.] measured the width of the Kansas River by an angle and made it 230 yd: ¼ wide,1 it is wider above the mouth the Missourie at this place is about 500 yards wide, The Course from the Point down the Mid! of the Missourie is S. 32° E, & turns to the North. up Do: is N 21° W. & do do [i. e. turns to the North — Ed.] Do. up the right side of the Kansas is S. 54° E, & the river turns to the left, Several Deer killed to day.

28 June Thursday — 

took equal altitudes &c. &c. &c. & varaiition of the Compass repaired the Perogue cleaned out the Boat sund the Powder [and] wollen articles examined every thing 8 or 10 hunt:2 out to day in different directions, in examining our Private Store of Provisions we found Several articles Spoiled from the wet or dampness they had received, a verry warm day, the wind from the South, The river Missourie has raised yester-day last night & to day about 2 foot. this evening it is on a Stand, Capt! Lewis weighed the water of the Two rivers The Missourie 78°. the Kansais 72°. (the weight is)2

To Describe the most probable of the various accounts of this great river of the Kansas, would be too lengthy & uncertain to insert here, it heads with the river Del Noird in the black Mountain or ridge which Divides the Waters of the Kansas Del Nord, & Callaro & [a word almost illegible; possibly “offshoots.” — Ed.] from those of the Missourie (and not well ascertain:) This river receves its name from a Nation which dwells at this time on its banks & [has] 2 villages one about 20 leagues & the other 40 Leagues up, those Indians are not verry noumerous at this time, reduced by war with their neighbours, &c, they formerly lived on the South banks of the Missourie 24 Leagues above this river in a open & butifull plain, and were verry noumerous at the

American Journeys — www.americanjourneys.org
John Potts to act as Judge advocate.

The Court Convened agreeable to order and proceeded to the trial of the Prisoners Viz

John Collins Charged "with getting drunk on his post this Morning out of whiskey put under his charge as a Sentinel, and for Suffering Hugh Hall to draw whiskey out of the Said Barrel intended for the party."

To this Charge the prisoner plead not Guilty.

The Court after mature deliv[er]ation on the evidence adduced &c. are of oppinion that the prisoner is Guilty of the Charge exhibitd against him, and do therefore sentence him to receive one hundred Lashes on his bear Back.

Hugh Hall was brought before the Court Charged with takeing whiskey out of a Keg this morning which whiskey was stored on the Bank (and under the Charge of the Guard) Contrary to all order, rule, or regulation."

To this Charge the prisoner "Pleaded Guilty."

The Court find the prisoner Guilty and Sentence him to receive fifty Lashes on his bear Back.

The Commanding Officers approve of the Sentence of the Court and orders that the Punishment take place at half past three this evening, at which time the party will Parrade for inspection.

30th June Satturday 1804

Set out very early this morning, a very large wolf came to the bank and looked at us this morning, pass\(^1\) the \((\text{t})\) mouth of a Small river \(\text{10 M}!\) above the Kansas called by the french Petite River Platte (or Shoal river) from the number of falls in it, this river is about 60 yards wide at its mouth and runs Parrilel with the Missouries for ten or twelve miles,\(^1\) Some of the party who went up told that the lands on this Small river is good, and on it several falls well calculated for mills, The wind from S. W. came to at 12 oClock & rested three hours, the [day] being hot the men becom very feeble, Farn!\(^1\) Thermometer at 3 oClock stood at 96° above 0,

\(^1\) Now Little Platte River; the location of its mouth has changed much since 1804.
—COUES (L. and C., i, p. 35).

[62]
emence numb' of Deer on the banks, Skipping in every direction, the party killed nine Bucks on the river & Bank today, The Countrey on the S. S. between the Shoal River & Missouri is indifferent Subject to overflow, that below and on the L. S. is high & appers well timbered, camped on the L. S. ops\textsuperscript{t} the Lower point of a Is\textsuperscript{i} Called Diamond Island, Broke our Mast

paccacun [pecan — Ed.] Trees Seen on the S. S. Deer and turkeys in great quantities on the bank

July 27th 1804—

Set out early and proceded on the left of the Islands, two of which are large a high bottom Situated on the L. S. passed the mouth of a Creek on the S. S. called Turquie [Parques] Creike, at this place I observed that the river was crowded With Drift wood, and dangerous to pass as this dead timber Continued only about half an our, I concluded that Some Island of Drift had given way (3) passed a Creek on the L. S. called Turkey Creek, a bad Sand bar on the L. S. we could with dificulty Stem the Current with our 20 oars & and all the poles we had, passed a large Island on the S. S. Called by the Indians Wau-car-ba war-cand-da or the Bear Medesin Island¹ at 12 oClock landed on the Island a [nd—Ed.] put up a mast which detained us four hours. a verry hot day winds from the S. E. George Drewyer informs that the Lands he passed through, yesterday and to day on the S. S. was verry fine, few Springs, We camped after dark on the S. S. above the Island & opposit the 1st old village of the Kanzes. which was Situated in a Valley, between two points of high Land, and imediatly on the river bank, back of the village and on a riseing ground at about one mile The French had a garrison for some time and made use of water out of a

¹ Now Kickapoo island, above Fort Leavenworth.—Cousens (L. and C., i, p. 37).
Spring running into Turkey Creek, an extensive Prairie, as the Current of the river Sets against the banke and washes it away the landing place for Boats is indifferent. The high lands above the Fire river, approaches nearer east, than below, being from 3 to 6 Miles distant and above Kansas from 3 to 5 Miles distant and the Hills at Some places are from 160 to 180 feet above the bottom.

1° old village Kansas

July 3rd Tuesday 1804 —

Set out very early this morning and proceeded on under a gentle Breeze from the S. passed two Islands (1) one a Small Willow Island on the L. S. the other large Called by the french Isle de Vache or Cow Island, opposit the head on the S. S. is a large Pond containg Beever, & fowl, a bad Sand bar on the S. S. above the Island, on the L. S. we halted at an old Tradeing house [deserted], here we found a very fat horse, which appears to have been lost a long time, a butifull small run passes back of the Tradeing house near the high land, we came to at a round bend on the L. S. and camped.

1 The Biddle text states that Lewis and Clark found some remains of the French fort; this was the post among the Kansas Indians, tributary to Fort Chartres, with a garrison sent from New Orleans. In 1757 it produced one hundred bundles of furs. See Bougainville on the French posts, in Northern and Western Boundaries of Ontario (Toronto, 1878). — Ed.

July 4th Wednesday,

ussered in the day by a discharge of one shot from our Bow piece, proceeded on, passed the Mouth of a (1) Bayeau [leading from a large Lake on the S. S. which has the appearance of being once the bend of the river & reaches parallel for Several Miles] Came to on the L. S. to refresh our selves &. Jos. Fields got bit by a Snake, which was quickly doctered with Bark by Cap Lewis¹ (2) Passed a Creek 12 yd? wide on L. S. coming out of an extensive Prairie reaching within 200 yards of the river, as this Creek has no name, and this being the 4th of July the day of the independance of the U S. call it 4th of July 1804 Creek, we dined (on Corn) Cap Lewis walked on Shore above this Creek and discovered a high Mound from the top of which he had an extensive View, 3 paths Centering at the mound Saw great numbers of Goslings to day which Were nearly grown, the before mentioned Lake is Clear and contain great quantities of fish and Gees & Goslings, The great quantity of those fowl in this Lake induced me to Call it the Gosling Lake, a Small Creek & several Springs run in to the Lake on the East Side from the hills the land on that Side very good. (3) We came to and camped in the lower edge of a Plain where the 2d old

¹ A poultice of bark and gunpowder was sufficient to cure the wound. — BIDDLE (1, p. 21).
Kanzas village formerly stood, above the mouth of a Creek 30 yd wide this Creek we call Creek Independence as we approached this place the Prairie had a most butifull appearance Hills & Valies intersps† with Coops [Copses] of Timber gave a pleasing dentity to the Senery. the right fork of Creek Independence Meandering thro: the Middle of the Plain a point of high Land near the river givs an ellivated Situation. at this place the Kanzas Indians formerly lived, this Town appears to have covd a large Space the Nation must have been noumerous at the time they lived here the Cause of their moveing to the Kanzas River, I have never heard, nor can I learn; war with their neibors must have reduced this nation and Compelled them to retire to a Situation in the plains better Calculated for their defence, and one where they may make use of their horses with good effect, in persueing their enemey, we closed the [day] by a Descharge from our bow piece an extra Gill of whiskey.

Set out verry early, proceeded on near the bank where the old village stood for two miles (swam the hors found a few days ago) passed Some bad Sand bars, The orrigan of this old village is uncertain M. de Bourgmont, a French officer who Comd‡ a fort near the Town of the Missouris in about the year 1724 and in July of the Same year he visited this Village at that time the nation was noumerous & well disposed towards the french M' Du Pratz must have been badly informed as to the cane oppos‡ this place we have not Seen one Stalk of reed or cane on the Missouris, he States that

[67]
the "Indians that accompanied M De Bourgmont crossed to the Canzes Village on floats of Cane." ¹

Those people must have been very numerous at that time as M De B: was accompanied by 300 Warsiers, 500 young people & 300 Dogs of burthen out of this Village.

The Cause of those Indians Moving over to the Kanzis river I have never learnt. We passed Some bad Sand bars, Situated parrel to each other (1) The Boat turned twice on the quick Sand & once on a raft of Drift. No prouveable damage the Prarie continu on the high land on the L. S. passd a Small Creek (2) on L. S. in the first bend to the L. S. I call Yellow Oaker [Ochre — Ed.]. Creek from a quantity of that Mineral in a bank a little above

The river continus to fall a little. I observe great quantity of Summer & fall Grapes, Berries & Wild roses on the banks. Deer is not so plenty as useal, great Deel of Elk Sign. (Wind from S. E.)

Detachment Orders.
Nadawwa Island July 8th 1804.

In order to insure a prudent and regular use of all provisions issued to the crew of the Batteaux in future, as also to provide for the equal distribution of the same among the individuals of the several messes, The Commanding Officers do appoint the following persons to receive, cook, and take charge of the provisions which may from time to time be issued to their respective messes, (viz) John B. Thompson to Sergt Floyd's mess, William Warner to Sergt Ordway's Mess, and John Collins to Sergt Pryor's Mess.

These Superintendants of Provision, are held immediately responsible to the commanding Officers for a judicious consumption of the provision which they receive; they are to cook the same for their several messes in due time, and in such manner as is most wholesome and best calculated to afford the greatest proportion of nutriment; in their mode of cooking they are to

[71]
exercise their own judgment; they shall also point out what part, and what proportion of the mess provisions are to be consumed at each stated meal (i.e.) morning, noon and night; nor is any man at any time to take or consume any part of the mess provisions without the privity, knowledge and consent of the Superintendent. The superintendent is also held responsible for all the cooking utensels of his mess. in consideration of the duties imposed by this order on Thompson, Warner, and Collins, they will in future be exempt from guard duty, tho' they will still be held on the royster for that duty, and their regular tour shall be performed by some one of their respective messes; they are exempted also from pitching the tents of the mess, collecting firewood, and forks poles &c for cooking and drying such fresh meat as may be furnished them; those duties are to be also performed by the other members of the mess.

M. Lewis

Wm. Clark

[Clark:]

July 9th. Monday 1804—

one man Sent back to the river we passed last night to Blase [notch] a tree with a View to notify the party on Shore of our passing. Set out and passed the head of the (1) Island which was Situated opposit to our Camp last night a Sand bar at the head (2) ops: this Island a Creek or Bayauve coms in from a large Pond on the Starboard Side, as our flanking party saw great numbers of Pike in this Pond, I have laid it down with that name anex'd, at 8 oClock the wind Shifted from the N. E. to S. W. and it commenced raining. (3) at Six Miles passed the mouth of Creek on the L. S. called Monter's [Mountains] Creek, about two mile above is some Cabins where our Bowman & Several frenchmen Camp'd two years ago (4) passed an Island on the S. S. in a Bend of the river opposit some Cliffs on the L. S. the Wind Shifted to the N W opposit this Island and on the L. Side, (Loup) or Wolf River coms in, this river is about 60 yards wide and heads with the

1 Floyd here remarks: "Passed a prairie on the South Side where several French families had setled and made Corn Some Years ago Stayed two years the Indians Came Freckentley to See them and was verry frendley." —Ed.

[72]
waters of the Kansis, and is navigable for Perogues "Some distance up". Camped at a point on the L. S. opposit the head of the Island, our party was incamped on the Opposit Side, their not answering our signals Caused us to Suspect the persons Camped opposit to us was a War party of Souxs, we fired the Bow piece to alarm the party on Shore, alled prepared to oppose if attacted.

July 10th Tuesday 1804—

Set out early this Morning and cross' the river with a view to See who the party was that Camped on the other Side, we soon discovered them to be our men, proceeded on passed a Prairie on the L. S. at 4 Miles passed a creek L. S. called (1) Pappie [Pape's Creek] after a man who killed himself at its mouth, this Creek is 15 yds wide (2) Dined on an Isl! called de Salamin [Solomon's Island]. Delayed 3 hours on this Island to recruit the men opposit on the L. S. is a butifull bottom Plain of about 2000 acres (3) covered with wild rye & Pota­
toes [ground apple pomme de terre],¹ internix't with the grass, We camped on the S. S. opposit a yellow Clay Clift, Cap' Lewis killed to young Gees or Goslings this evening. The men of the party getting better, but much fatigued. The river on a stand. The bottom is verry extensive on the S. S. and thickly intersperced with Vines.

The High Land approaches near the river on the L. S. and well timbered next to the river, back of those hills the Plains commence.

¹ Apparently the plant here referred to was Psoralea esculenta, the tubers of which had long been used as food by the Indians and voyageurs of the Northwest. — Ed.

July 11th Wednesday 1804—

Set out early passed a Willow Island (1) in a bend on the S. S. back of this Island a Creek comes in called by the Indians Tar-ki-o. I went on Shore above this Creek and walked up parallel with the river at about half a mile distant, the bottom I found low & Subject to overflow. Still further out, the under groth & vines were so thick that I could not get thro: with ease after walking about three or 4 miles I observed a fresh horse track where he had been feeding. I turned my course to the river and prosud the track and found him on a Sand beach. This horse probably had been left by some party of Otteaus hunters who wintered or hunted in this quarter last fall or Wint! I joined the party on a large Sand Island immediately opposite the mouth of Ne Ma how [Nemaha] River, at which place they had Camped, this Island is Sand about half of it covered with small Willows of two different kinds, one narrow & the other a Broad Leaf. Several hunters sent out to day on both Sides of the river, Seven Deer killed to day, Drewyer killed six of them, made some Lunar observations this evening.

6 Miles

[74]
Concluded to Delay here to day with a view of takeing equal altitudes & making observations as well as refreshing our men who are much fatigued. after an early Brackfast I with five men in a Perogue assended the River Ne-Ma-haw about three [2] Miles to the Mouth of a Small creek on the Lower Side, here I got out of the Perogue, after going to Several Small Mounds in a leavel plain, I assended a hill on the Lower Side, on this hill Several artificial Mounds were raised, from the top of the highest of those Mounds I had an extensive view of the Serounding Plains, which afforded one of the most pleasing prospect I ever beheld, under me a Butifull River of Clear Water of about 80 yards wide Meandering thro: a leavel and extensive meadow, as far as I could See, the prospect much enlivened by the few Trees & Srubs which is bordering the bank of the river, and the Creeks & runs falling into it, The bottom land is covered with Grass of about $4\frac{1}{2}$ feet high, and appears as leavel as a smooth surface, the 2d bottom [the upper land] is also covered with Grass and rich weeds & flours, interspersed with copses of the Osage Plumb, on the rising lands, Small groves of trees are Seen, with a numbers of Grapes and a Wild Cherry resembling the common Wild Cherry, only larger and grows on a small bush on the tops of those hills in every direction, I observed artificial Mounds (or as I may more justly term graves) which to me is a strong evidence [indication] of this Country being once thickly Settled. (The Indians of the Missouris Still keep up the Custom of Burrying their dead on high ground) after a ramble of about two miles about I returned to the perogue and decended down the river, gath Som grapes nearly ripe, on a Sandstone Bluff about $\frac{3}{4}$ of a Mile from its mouth on the Lower Side I observed some Indian Marks, went to the rock which jucted over the water and marked my name & the day of the month & year. This river heads near one of the (see note) villages of the Pania [Pawnee] on the River Blue [Blue River], a branch of the Kansas River. above this river about half a mile the Praire comes to the Missouri, after my return to Camp on the Island [75]
completed Som observations. Tri[e]d a man (W. C.) for Sleeping on his Post & inspected the arms ammunition &c. of the party found all complete, Took Some Luner Observations. three Deer killed to day.

Lat° 39° - 55' - 56" N.

[Orderly Book; Lewis:] 
Camp New Island July 12th 1804.

A Court mar[t]ial consisting of the two commanding officers will convene this day at 1 Ock. P.M. for the trial of such prisoners as may be brought before them; one of the court will act as Judge Advocate.

M. Lewis
W* Clark

[Clark:] 
The Commanding officers, Capn M. Lewis & W. Clark constituted themselves a Court Martial for the trial of such prisoners as are Guilty of Capatal Crimes, and under the rules and articles of War punishable by Death.

Alexander Willard was brought for ward Charged with "Lying down and Sleeping on his post" whilst a Sentinal, on the Night of the 11th Instant" (by John Ordway Sergeant of the Guard) 

To this Charge the prisoner pleads Guilty of Lying Down, and Not Guilty, of Going to Sleep.

The Court after Duly Considering the evidence aduced, are of opinion that the Prisoner Alexrd Willard is guilty of every part of the Charge exhibited against him. it being a breach of the rules and articles of War (as well as tending to the probable destruction of the party) do Sentence him to receive One hundred lashes, on his bear back, at four different times in equal proportion. and Order that the punishment Commence this evening at Sunset, and Continue to be inflicted (by the Guard) every evening untill Completed

W* Clark
M. Lewis

[76]
Set out at Sun rise, and pros'd on under a gentle Breeze, at two Miles passed the mouth of a Small river on the S. S. called by the Indians Tar-ki-o,¹ a channel running out of the river three miles above (which is now filled up with Sand) runs into this Creek and formed a Island Called S. Josephs Several Sand bars parralel to each other above. In the first bend to the left is Situated a Butifull & extensive plain, cover'd with Grass resembling Timothy except the Seed which resembles Flax Seed, this plain also abounds in Grapes of different kinds Some nearly ripe, I Killed two Goslings nearly Grown, Several others Killed and caught on Shore, also one old Goose, with pin fethers, she Could not fly. at about 12 Miles pass'd a Island Situated in a bend on the S. S. above this Island is a large Sand bar Covered with willows, The wind from the South, Camped on a large Sand Bar makeing out from the L. S! opposit a high handsom Prairie, the hills about 4 or 5 Miles on S. S. this plain appeard exten­sive, the Clouds appear to geather to the N. W. a most agreeable Breeze from the South (I walked on Shore on the S. S. the lands are low Subject to overflow)

Last night at about 10 oClock a Violent Storm of wind from the N. N. E which lasted with Great violence for about one hour, at which time a Shower of rain Succeeded.

20 ½ Miles

¹ The Big Tarkio, according to Biddle; this is also its present name. — Ed.
The men on Shore did not join us this after noon. The river nearly on a Stand the high lands on the S. S. has only been seen at a Distance above the Nordaway River, those on the L. S. approaching the river at every bend, on the Side next to the river well timbered, the ops Side open & the Commencm of Plains.

July 14th Saturday 1804 —

Some hard Showers of rain this morning prevented our Setting out untill 7 oClock, at half past Seven, the atmisp became Sudenly darkened by a black and dismal looking Cloud, at the time we were in a Situation (not to be bettered,) near the upper point of the Sand Island, on which we lay, and the opposit Shore, the bank was falling in and lined with snags as far as we could See down, in this Situation the Storm which pass over an open Plain from the N. E. Struck the our boat on the Starb quarter, and would have thrown her up on the Sand Island dashed to pices in an Instant, had not the party leaped out on the Leward Side and kept her off with the assistance of the ancker & Cable, untill the Storm was over, the waves washed over her windward Side and she must have filled with water if the Lockers which is [had not been — E.D.] covered with Tarpoling & threw of the Water & prevented any quantity getting into Bilge of the Boat In this Situation we Continued about 40 Minits. when the Storm Sudenly Seased and the river become Instancetaniously as Smoth as Glass.

The two peregu[e]s dureing this Storm was in a Similar situation with the boat about half a mile above. The wind shifted to the S. E. & we Sailed up passed a Small (1) Isld Situated on the S. S. and Dined & continued two hours, men examine their arms about a Mile above this Island, passed a Small Tradeing fort on the S. S. where, M. Bennet of S! Louis Traded with the Otteaus & Panis two years. I went on Shore to Shoot Some Elk on a Sand bar to the L. S. I fired at one but did not get him, Went out into a large extensive bottom the greater part of which over flows, the part that dose not over flow, is rich and well timbered, Some Small
open Praries near the hills, the Boat passed the lower part of a large Island Situated on the S. S. above the Lower point of this Island on the S. S. a (2) large Creek Coms into the river called by the Maha's [Mahar] Indians Neesh-nah-ba-to-na (Neesh-nah-ba-to-na) 50 yds. this is a Considerable Creek, nearly as large as the Mine River, and runs parrallel with the Missouri, the Greater part of its course. In those small Praries or Glades I saw wild Timothy, lambs-quarter, Cuckle burs,1 & rich weed. on the edges Grows Sump' Grapes, Plum's, & Goose berries. I Joined the boat which had Came to and Camped 2 in a bend opposit the large Island before mentioned on the L. S. Several men unwell with Boils, Felons, &c. The river falls a little.

July 15th. Sunday —

a heavy Fog this morning prevented our Setting out before 7 oClock, at nine I took two men and walked on the L. S. I crossed three butifull Streems of running water heading in the Praries on those Streem the lands verry fine covered with pea vine & rich weed the high Praries are also good land Covered with Grass entirely void of timber, except what grows on the water, I proceeded on thro those praries Several Miles to the Mouth of a large Creek on the L. S. called (?) [Little] Nema har this is a Small river, about 100 yds. above the Mouth it is 40 yards wide, at the mouth (as all other Creeks & rivers falling into the Missourie are) much narrower than a little distance up. after continueing at the mouth of

1 Cockle-burs (Xanthium strumarium). "Lamb's-quarter" is Chenopodium album, a succulent weed often used as "greens." — Coues (L. and C., p. 46, note 103).
2 We encamped on the north side of this island, a little above Nishnabatona. — Biddle (3, p. 26).
this Creek about an hour, I swam across and proceeded on about 3 miles and halted to wait for the boat, which was some distance below. In all this days march thro woods & Praries, I only Saw three Deer & 3 fawns. I had at one part of the Prarie a very extensive view of all the Countrey around up and down the river a Considerable distance, on the Larb! S!: one continued Plain, on the S. S. Some timber on the bank of the river, for a Short distance back of this timber is a bottom Plain of four or five miles back to the hills and under the hills between them & the river this plain appeared to extend 20 or 30 miles, those Hills have but little timber, and the Plain appears to Continue back of them. I saw Great quantities of Grapes, Plums of 2 kinds, Wild Cherries of 2 Kinds, Hazelnuts, and Goosberries.

We Camped in a point of woods on the Larboard S. ops: a large Island.

July 17th Tuesday 1804  

Bald Pated Prairie —  

We concluded [to] lay by at this place to day to fix the Lattitude & Longitude of this place (to Correct the cronometer run down Sunday) Several men out by day light hunting, Cap'l Lewis conclu'd to ride out to Neesh-nah-ba-to-na Creek which passes under the ball hills near this place and at one place a little above this Camp is within 300 yards of the Missourie on this Creek grows Some few trees of oake Walnut & Mulberry.  

I took Meridean altitude of "L. L. (43° 27'"") which made the Lattitude 40° - 27' - 5" - 4/10 North. Wind from the South E. Several of the party much inflicted with tumers of different kinds, Som of which is verry troublesom, and difficelt to cure. Cap'l Lewis returned in the evening, he Saw Som handsom Countrey, & Says that the aforesaid Creek is rapid muddy and running. This Creek which [where he saw it] is at 10 or 12 from its mouth, within 300 yd: of the river [Miss:] is at least 25 [16] foot Lower than the river.¹ The high Lands from our Camp in this Bald Pated Prarie bears N 25° W. up the R.

July 19th. Thursday 1804 —

Set out early passed between two small Islands, one in the Middle of the river, the other close on the L. S. opposit a prarie S. S. called (1) by the french Four le tourtre, The Bakers oven Islands. passed (2) Some high cliff 4½ Miles above the Islands on the L. S. of yellow earth passed Several Sand bars, that [were] wide and at one place very Shallow (two Small butifull runs falls into the river near each other at this Clift, a Deer Lick 200 yards up the Lowest of those runs head at no great distance in the plains and pass thro' Scirts [skirts] of timber to the river. In my walk on Shore I found Some ore in the bank above those runs which I take to be Iron ore. (3) at this place the Side of the hills has sliped about half way into the river for ¾ of a Mile forming a Clift from the top of the hill above. In the first bend to the right passed a Small Island a Sand bar opposit, worthy of remark as We approach this great River Platt the Sand bars much more numerous and the quick or moveing Sands much worst than they were below at the places where Praries approach the river, it is very wide those places being much easier to wash & under mine than the Wood Land's. (4) passed a Willow [84]
Is't situated near the middle of the river, and a large Sand makeing out from the S. S. a Deep bend to the L. S. we camped at the head of this Island on the Starboard Side of it,\(^1\) Hunters Killed Two Deer. Saw great numbers of young Gecs, River falling a little.

July 22nd Sunday 1804 —

Set out very early with a view of Getting Some Situation above in time to take equal altitudes and take observations, as well as one Calculated to make our party Comfortable in a Situation where they Could receive the benefit of a Shade. passed a large Sand bar opposit a Small river on the L. S. at 3 miles above Platt Called Papillion, or Butterfly Creek a Sand bar & a Willow Island opposit a Creek 9 M' above the Platt on the S. S. Called Morqueton Creek Prairie on both Sides of the river, Came too and formed a Camp on the S. S. above a Small Willow Island, and opposit the first Hill which aproach the river on the L. S. and covered with timber of Oake Walnut Elm &c. &c.

This being a good Situation and much nearer the Otteaus town than the Mouth of the Platt, we Concluded to delay at this place a few days and Send for Some of the Chiefs of that nation, to let them know of the Change of Government the wishes of our government to Cultivate friendship with them, the Objects of our journey and to present them with a flag and Some Small presents.

Some of our Provisions in the French Perogue being wet it became necessary to Dry them a few days. wind hard from N W. five Deer Killed to day. the river rise a little.

The Course & Distance from the Plate river to Camp N. 15° W. 10 Miles, ps. 3 pts. L S. & 2 p't S. S.
Camp White Catfish Nine [17] Miles above the Platt River,
Monday the 23rd of July 1804.

A FAIR morning Set a party to look for timber for Ores, two parties to hunt, at 11 oClock Sent off George Drewyer & Peter Crousett with some tobacco to invite the Otteaus if at their town and Panies if they saw them, to come and talk with us at our Camp &c. &c. (at this Season the Indians on this river are in the Praries hunting the Buffalow, but from some signs of hunters, near this place & the Plains being on fire near their towns induce a belief that they this nation have returned to get some Green Corn or roasting Ears) raised a flag Staff Sund and Dryed our provisions &c. I commence Copying a Map of the river below to Send to the P. [President - Ed.] U. S. five Deer Killed to day one man with a turner on his breast, Prepared our Camp the men put their arms in order Wind hard this afternoon from the N. W.¹

¹ The astronomical observations following, have been transferred to "Scientific Data." — Ed.
White Catfish Camp 10 M' above Platt
24th of July 1804 Tuesday—

a fair day the wind blows hard from the South, the Breezes which are very frequent in this part of the Missouri is cool and refreshing. Several hunters out to day, but as the game of all kinds are scarce only two Deer were brought in. I am much engaged drawing off a map, Cap! Lewis also much engaged in preparing Papers to Send back by a perogue—which we intended to Send back from the river Platt observations at this place makes the Lattitude 41° 3' 19" North.

This evening Guthrege Cought a White Catfish, its eyes Small & tale much like that of a Dolfin.

White Catfish Camp 25th of July Wednesday—

a fair morning Several hunters out to day, at 2 oClock Drewyer & Peter returned from the Otteau village, and informs that no Indians were at their towns, they saw Some fresh Signs of a Small party But Could not find them. in their rout to the Towns (which is about 18 miles West) they passed thro a open Prarie crossed papillion or Butterfly Creek and a Small butifull river which run into the Plate a little below the Town called Corne de charf [corne de Cerf] or Elk Horn river this river is about 100 yards wide with Clear water & a gravely Channel. wind from the S. E. two Deer killed to day i Turkey Several Grous Seen to day.2

I took one man R. Fields and walked on Shore with a view of examoning Som Mounds on the L. S. of the river those [91]
Mounds I found to be of Different height, shape, & size, some composed of sand, some earth, & sand, the highest next to the river all of which covered about 200 acres of land, in a circular form, on the side from the river a low bottom & small pond. The Otteaus formerly lived here. I did not get to the boat until after night.

July 28th, Saturday 1804—

Set out this morning early, the wind from the N. W. by N., a dark smokey morning. Some rain passed at 1 ml. a bluff on the S. S. 1 the first high land above the Nodaway approaching the river on that side, an island and creek 15 yds. wide on the S. S. above this bluff, as this creek has no name, call it Indian Knob Creek, our party on shore came to the river and informs that they heard firing to the S. W. below this high land on the S. S. the Aiauway Indians formerly lived, below this old village about 5 miles passed some mounds on the L. S. in a bend where the Otteauze Indians formerly lived, this situation I examined, found it well situated for defence, about 2 or 300 acres of land covered with mounds.

The flank came in & informed they heard two guns to the S. W. the high land approaches in the 1st bend to the left, we camped on the S. S. below the point of an island, G Drewyer brought in a Missourie Indian which he met with hunting in the prairie. This Indian is one of the few remaining of that nation, & lives with the Otteauz, his camp about 4 miles from the river, he informs that the 'great gangue' [body - BIDDLE] of the nation were hunting the buffalo in the Plains. His party was small consisting only of about 20 lodges. 2 [Blank space in MS.] Miles further another camp where there was a French man, who lived in the nation,

1 A trading post, called Fort Croghan, was afterward built at or near this bluff. — COUES (L. and C., i, p. 61).
2 The rest of this paragraph is crossed out by another pen, in the original MS. Biddle says that the Iowas "emigrated from this place to the river Des Moines." — Ed.
3 Floyd here says: "The reason this man gives of his being with so small a party is that he has not got horses to go in the large praries after the buffalo but stays about the town and river to hunte the elk to seporate thare familys." — Ed.
this Indian appear'd Spritely, and appeared to make use of
the Same pronouncation of the Osarge, Calling a Chief Inca

PLATTE TO VERMILION

Countrey Ops presented it Self which I ever beheld; The River meandering the open and butifull Plains, interspersed with Groves of timber, and each point Covered with Tall timber, Such as Willow Cotton sum Mulberry, Elm, Sucamore Lynn & ash (The Groves contain Hickory, Walnut, coffee nut & Oake in addition) Two ranges of High Land parrelel to each other, and from 4 to 10 Miles Distant, between which the river & its bottoms are Contained. (from 70 to 300 feet high)

Joseph Fields Killed and brought in an Anamale Called by the French Brarow, and by the Panies Cho car tooch this Anamale Burrows in the Ground and feeds on Flesh, (Prairie Dogs) Bugs & Vigatables " his Shape & Size is like that of a Beaver, his head mouth &c. is like a Dogs with Short Ears, his Tail and Hair like that of a Ground Hog, and longer; and lighter. his Interals like the interals of a Hog, his Skin, thick and loose, his Belly is White and the Hair Short, a white Strreek from his nose to his Sholders. The toe nails of his fore feet is one Inch & 3/4 long, & feet large; the nails of his hind feet 3/4 of an Inch long, the hind feet Small and toes Crooked, his legs are short and when he moves Just sufficent to raise his body above the Ground He is of the Bear Species. We have his skin stuffed.

Jo. & R. Fields did not return this evening, Several men with verry bad Boils. Cat fish is caught in any part of the river Turkeys Geese & a Beaver Killed & Cought every thing in prime order men in high Spirits. a fair Still evening Great no. Musquitors this evening

July 31st Tuesday —

a fair Day three Hunters out, Took Meridian altitude made the Latt° 41°. 18'. 1" 5/10 N. R. & Jo. Fields returned to Camp they Killed 3 Deer; The Horses Strayed off last night. Drewyer Killed a Buck one inch of fat on the ribs, R. & Jo. Fields returned without any meet haveing been in persuit of the horses. The Indians not yet arrived. Cought

---

1 Corruption of blaireau, French name of the badger (Taxidea Americana). — Ed.
a young Beever alive which is already quite tame. Cought a Buffalow fish. The evening verry Cool, the Musquito[s]tors are yet troublesom.

August the 1st 1804 —

a fair morning Despatched two men after the horses lost yesterday, one man back to the place from which the Messenger was Sent for the Ottoes to see if any Indians was or had been there sence our dept’ he return’d and informed that no person had been there Sence we left it. The Praire which is situated below our Camp is above the high water leavel and rich covered with Grass from 5 to 8 feet high interspersed with copse of Hazel, Plumbs, Currents (like those of the U. S.) Rasberries & Grapes of Diff: Kinds. also producing a variety of Plants and flowers not common in the United States, two Kind of honeysuckle one which grows to a kind of a Srub Common about Harrodsburgh in Kentucky the other are not so large or tall and bears a flour in clusters short and of a light Pink colour, the leaves differ from any of the other Kinds in as much as the Lieves are destinct & does not surround the stalk as all the other kind do.

One Elk and three Deer Killed to day also two Beever Cought

The wind rose at 10 oClock from the W. S. W. and blew a steady and agreeable Breeze all Day.

The Musquito[s]tors verry troublesom this evening in the bottom.

Took equal altitudes to day and the azimuth with the commencement of the A. M.

Time of alt’d

N. 86° E  A. M. 7 h . 52 m . 55 s — P. M. 3 h . 50 m . 42 s
“ 7 . 54  20 — “ 3 . 52 — 3
“ 7 . 55  47 — “ 3 . 53 — 3

The Altitude given 68° — 47' — 15"

The Indians not yet arrived we fear Something amiss with our messenger or them.

[96]
a very pleasant Breeze from the S. E. The Two men Drewyer & Colter returned with the horses loaded with Elk, those horses they found about 12 miles in a Southerly direction from Camp.

The Country through which they passed is Similar to what we see from Camp. one Beaver & a foot [of Beaver caught in trap] Caught this morning at Sunset M' Fairfong (Otte interpreter resident with them) and a p' of Otteau & Missourie Nation Came to Camp, among those Indians 6 were Chiefs, (not the principal Chiefs) Cap' Lewis & myself met those Indians & informed them we were glad to see them, and would speak to them tomorrow, Sent them Some roasted meat, Pork flour & meal, in return they sent us Water millions. every man on his Guard & ready for anything.

Three fat Bucks Killed this evening, the 4 qrs. of one weighed 147 lbs.

Mad up a Small present for those people in proportion to their Consequence, also a package with a Medal to accompany a Speech for the Grand Chief after Brackfast we collected those Indians under an owning of our Main Sail, in presence of our Party paraded & Delivered a long Speech to them expressive of our journey the wishes of our Government, Some advice to them and Directions how they were to conduct themselves. The principal Chief for the Nation being absent, we Sent him the Speech flag Medal & Some Clothess. after hering what they had to say Delivered a Medal of Second Grade to one for the Ottos & one for the Missourie and present 4 medals of a third Grade to the inferior chiefs two for each tribe.¹ (Those two parts of nations Ottos & Missouries now residing together is about 250 men the Ottoes composing 2/3 & Missouris 1/3 part)

¹ The customary mode of recognizing a chief, being to place a medal round his neck, which is considered among his tribe as a proof of his consideration abroad. — BIDDLE (5, p. 32).
The names of the Chiefs made [we acknowledged] this day are as follows viz.:  

<table>

Those Chiefs all Delivered a Speech, acknowledging their approbation to the Speech and promising two prose the advice & Directions given them that they were happy to find that they had fathers which might be depended on &c.

We gave them a Cannister of Powder and a Bottle of Whiskey and delivered a few presents to the whole, after giving a Br. Cth. [Breech Cloth] some Paint quartering & a Medall to those we made Chiefs, after Cap' Lewis's Shooting the air gun a few Shots (which astonished those natives) we Set out and proceeded on five miles on a Direct line passed a point on the S. S. & around a large Sand bar on the L. S. & Camped on the upper point, the Misquitors excessively troublesome this evening. Great appearance of wind and rain to the N. W. we prepare to rec' ve it. The man Liberty, whom we Sent for the Ottoes has not come up he left the Ottoes Town one Day before the Indians. This man has either tired his horse or, lost himself in the Plains Some Indians are to hunt for him.

The Situation of our last Camp Council Bluff[1] or Handsom Prairie, (25 Days from this to Santafee) appears to be a verry

---

1 The diacritical marks over these names were added by other hands. Biddle gives the first name as Weahrushah. He also states that these envoys asked the American officers to mediate between them and the Omaha, who were at war with them. — Ed.

2 This is the origin of the name now applied to a city in Iowa opposite Omaha, Nebr.; but Coues thinks (L. and C., i, p. 65) that the place of this council was higher up the river, on what was later the site of Fort Calhoun, in the present Washington Co., Nebr. He also calls attention to the well-known uncertainty and constant shifting of the Missouri's channels, rendering it difficult to identify historic points. — Ed.
proper place for a Tradeing establishment & fortification. The Soil of the Bluff well adapted for Brick, Great deal of timber above in the two Points—many other advantages of a small nature. and I am told Senteral to Several nations viz. one Days march from the Ottoe Town, one Day & a half from the great Pania village, 2 days from the Mahar Towns, two ¾ Days from the Loups village, & convenient to the Countrey thro: which Bands of the Soux [rove &?] hunt. perhaps no other Situation is as well Calculated for a Tradeing establishment.

The air is pure and helthy so far as we can judge.

Course of Aug 3rd

August 4th Saturday —

Set out early. (at 7 oClock last night we had a violent wind from the N. W. Some little rain succeedt, the wind lasted with violence for one hour after the wind it was clear screen and cool all night.) proceeded on passed thro between Snags which was quit across the River the Channel confined within 200 yards one side [S. S.] a Sand p: the other a Bend, the Banks washing away & trees falling in constantly for 1 mile, above this place is the remains of an old Tradeing establishment L. S. where Pet! Crusett one of our hands stayed two years & traded with the Mahars a Short distance above is a Creek (3) the out let of three Ponds, comunicateing with each other, those Ponds or rether Lakes are fed by Springs & Small runs from the hills. (2) a large Sand Island opposit this Creek, Makeing out from the L. Point, from the Camp of last night to this Creek, the river has latterly changed its bed incroaching on the L. Side, on this Sand bar I saw great nof wild gees passed a small creek on the L. S. about 3 miles above the last both of those Creek’s are out lets from the Small Lake which re[c]ive their water from the Small Streems running from the high land. great many Pumey stones on the Shore of various Sises the wind blew hard. Reed a man who went back to camp for his knife has not joined us. we camped at a Beaver house on the L. S. one Buck Killed to day.

[ 99 ]
Course Distance & ref. 4th August 1804

here the high Land is Some Distance from the river on both Sides, and at this place the High lands are at least 12 or 15 miles a part, the range of high land on the S. S. appear to contain Some timber. that on the L. S. appear to be entirely clear of any thing but what is common in an open Plain, Some Scattering timber or wood is to be Seen in the reveens, and where the Creeks pass into the Hill. the points and wet lands contain tall timber back of the willows which is generally situated back of a large Sand bar from the Points.

5th of August Sunday 1804. —

Set out early great appearance of wind and rain (I have observed that Thunder & lightning is not as common in this Countrey as it is in the Atlantic States) Snakes are not plenty, one was killed to day large and resembling the rattle Snake, only something lighter. I walked on Shore this evening S. S. in Pursueing Some turkeys I [s]truck the river twelve miles below within 370 yards, the high water passes thro' this Peninsula, and agreeable to the customary changes of the river, I concl. [should calculate] that in two years the main current of the river will pass through. In every bend the banks are falling in from the current being thrown against those bends by the Sand points which inlarges and the Soil I believe from unquestionable apparen' of the entire Bottom from one hill to the other being the Mud or Ooze of the river at Some former Period mixed with Sand and Clay easily
melts and Slips into the River, and the mud mixes with the water & the Sand is washed down and lodges on the points. Great quantities of Grapes on the banks, I observe three different kinds at this time ripe, one of the no. is large & has the flavor of the Purple grape, camped on the S. S. the Musquitoors verry troublesom. The man who went back after his knife has not yet come up, we have some reasons to believe he has Deserted.

8th August Wednesday 1804

Set out this morning at the useal time at two miles passed (1) a bend to L S choaked up with Snags our boat run on two in turning to pass through we got through with Safty the wind from N W. (2) passed the mouth of a River on the S Side called by the Sioux Indians Éa-neäh Wāu dë pōn (or Stone river) the French Call this river. Petite Rivere de Cuouex (riviere des sioux) it is about 80 yards wide and as (M Durion Says whos been on the heads of it and the Countrey ab) is navagable for Perogues Some Distance runs Parrel to the Missourie some Distance then falls down from N E tho a roleing Countrey open, the head of this river is 9 miles from the R Demoin [Desmoines] at which place the Demoin is 80 y' Wide, this Little Cuouex passes tho a lake called Despree [D'Esprits] which is within 5 Leagues of the Deemoin the Said Lake is about 20 Leagues in circumference and is divided into 2 by two rocks approaching very near each other, this Lake is of various wedth, containing many Islands. from this Lake to the Maha 4 days march, as [and?] is Said to be near the Dog Plains one principal branch of the Demoin is Called Cat River. The Demoin is Sholey.

[103]
Cap Lewis took Med altitude of the Sun made it 56° 9' 00" Lat: 41° 42' 34" and I took one man and went on Shore the man Killed an Elk I fired 4 times at one & did not kill him, My ball being Small I think was the reason, the Musquitoes so bad in the Praries that with the assistance of a bush I could not keep them out of my eyes, the boat turned Several times to day on Sand bars. in my absence the boat passed a Island 2 Miles above the little Scouix R on the upper point of this Isld Some hundreds of Pelicans were collected, they left 3 fish on the Sand which was very fine, Cap Lewis Killed one, & took his dimentions, I joined the boat and we Camped on the S. S. worthie of remark that Snakes are not plenty in this part of the Missourie.

LEWIS AND CLARK JOURNALS  [Aug. 15

of the Buffalow longer than others who has greater attachments to their native village. The ravages of the Small Pox (which Swept off [about 4 years ago] 400 men & Womin & children in perpopotion) has reduced this nation not exceeding 300 men and left them to the insults of their weaker neighbours, which before was glad to be on friendly turms with them. I am told when this fatal malady was among them they Carried their franzey to verry extraordinary length, not only of burning their Village, but they put their wives & children to Death with a view of their all going together to some better Countrey. they burry their Dead on the top of high hills and rais Mounds on the top of them. The cause or way those people took the Small Pox is uncertain, the most Probable, from Some other nation by means of a warparty.

August 15th, Wednesday, 1804.
Camp three Miles N. E. of the Mahar Village

I went with ten men to a Creek Damed by the Beavers about half way to the Village, with Some small Willows & Bark we made a Drag and hauled up the Creek, and Cought 318 fish of different kind i. e. Pike, Bass, Salmon, perch, red horse, small cat, and a kind of perch Called Silver fish, on the Ohio. I cought a Srimp prosisely of Shape Size & flavour of those about N. Orleans & the lower part of the Mississippi in this Creek which is only the pass or Streight from [one — Ed.] Beaver Pond to another, is Crouded with large Musstles very fat, Ducks, Plover of different kinds are on those Ponds as well as on the river.1 in my absence Cap' Lewis Sent Mr. Durione the Souix interpter & three men to examine a fire which threw up an emence Smoke from the Praries on the NE. Side of the River and at no great distance from Camp. the Object of this party was to find Some Bands of Seouex which the inpt' thought was near the Smoke and get them to come in. in the evening this Party returned and informed, that the fire arose from Some trees which had been

1 With this entry Codex B commences, continuing until Oct. 3, 1804. — Ed.
left burning by a small party of Seoux, who had passed \by that place\ Several Days. the wind Setting from that point, blew the Smoke from that p:\ over our Camp. our party all in health and Spirrits. The men Sent to the Ottoes & in pursue of the Deserter Reed has not yet returned or joined our party.

16\textsuperscript{th} August Thursday 18\textsuperscript{0}4.
Fishing Camp 3 M. N. E. of the Mahars.

a verry cool morning the wind as useal from the NW. Cap. Lewis took 12 men and went to the Pond & Creek between Camp and the old village and Cought upwards of 800 fine fish, 79 Pike, 8 salmon resembling Trout \[ 8 \text{ fish resembling } \text{Salmon Trout} \} 1 \text{ Rock, } 1 \text{ flat Back, } 127 \text{ Buffalow } \& \text{ red horse} 4 \text{ Bass } \& 490 \text{ Cats, with many Small Silver fish. (\& Srimp) I had a Mast made and fixed to the Boat to day, the Party Sent to the ottoes not yet joined us. the wind shifted around to the S. E. everry evening a Breeze rises which blows off the Musquitors & cools the atmispeere.

17\textsuperscript{th} August Friday 18\textsuperscript{0}4. —

a fine morning the wind from the S. E. I collected a grass much resembling Wheet in its grouth the grain like Rye, also Some resembling Rye \& Barly. a kind of Timothey, the Seed of which branches from the main Stalk \& is more like a flax Seed than that of Timothey.

at 6 oClock this evening \textit{Labieche} one of the Party sent to the Ottoes joined, and informed that the Party was behind with one of the Deserters M. B. Reed and the 3 principal Chiefs of the Nations. La Liberty they caught but he deceived them and got away. the object of those Chiefs coming forward is to make a peace with the Mahars thro: us. as the Mahars are not at home this great Object cannot be accomplished at this time. Set the Praries on fire to bring the Mahars \& Soues if any were near, this being the useal Signal.
a cool evening two Beaver caught to day.
18th August, Sat'day 1804.—

a fine morning. Wind from the S. E. in the after part of the Day the Party with the Indians arriv'd we meet them under a Shade near the Boat and after a Short talk we gave them Provisions to eat & proceeded to the trial of Reed, he confessed that he “Deserted & stold a public Rifle Shot-pouch Powder & Ball” and requested we would be as favourable with him as we Could consistantly with our Oathes — which we were and only Sentenced him to run the Gantlet four times through the Party & that each man with 9 Swichies Should punish him and for him not to be considered in future as one of the Party. The three principal Chiefs petitioned for Pardin for this man after we explained the injurey such men could doe them by false representations, & explan'g the Customs of our Countrey they were all Satisfied with the propriety of the Sentence & was Witness to the punishment. after which we had Some talk with the Chiefs about the orrigan of the war between them & the Mahars &c &c. it Commenced in this way in two of the Misouries Tribes resideing with the Ottoes went to the Mahars to steel horses, the Killed them both which was a cause of revenge on the part of the Missouri & Ottoes, they also brought war on themselves Nearly in the same way with the Pania Loups, and they are greatly in fear of a just revenge from the Panies for takeing their Corn from the Pania Towns in their absence hunting this Summer. Cap L. Birth day the evening was closed with an extra gill of whiskey and a Dance untill 11 oClock.

19th August Sunday 1804—

a fine morning wind from the S. E. prepared a Small Present for the Chiefs and Warriors present. the main chief Brackfast with us & beged for a Sun glass, those People are all naked, Covered only with Breech Clouts Blankets or Buffalo Roabes, the flesh Side Painted of Different colours and figures. At 10 oClock we assembled the Chiefs and warriors 9 in number under an owning, and Cap. Lewis [we] explaind the Speech Sent to the Nation from the Council Bluffs by M' Faufon. The 3 Chiefs and all the men or

[112]
warriors made short Speeches approving the advice & Council their great father had Sent them, and concluded by giving themselves some Credit for their acts.

We then brought out the presents and exchanged the Big horses Meadel and gave him one equal to the one Sent to the Little Thief & gave all Some Small articles & 8 Carrots of Tobacco, we gave one Small Meadel to one of the Chiefs and a Sertificate to the others of their good intentions.

one of those Indians after receiving his Certificate deliv4 it again to me the Big blue eyes the Chief petitioned for the Cftf. again,2 we would not give the Certf, but rebuked them verrey roughly for having in object goods and not peace with their neighbours. this language they did not like

1 In Biddle, "Big Ox." — Ed.
2 The captains carried with them a large number of "Indian commissions," or certificates, on printed blanks measuring 7 3/4 x 12 3/4 inches, which they would fill out with the chiefs' names. These read as follows:

THOMAS JEFFERSON, PRESIDENT OF THE UNITED STATES OF AMERICA.

From the powers vested in us and by the above authority: To all who shall see these presents, Greeting:

Know ye, that from the special confidence reposed by us in the sincere and unalterable attachment of chief of the Nation to the United States, as also from the abundant proofs given by him of his amicable disposition to cultivate peace, harmony, and good neighbourhood with the said States, and the citizens of the same; we do by the authority vested in us, require and charge, all citizens of the United States, all Indian Nations, in treaty with the same, and all other persons whomsoever, to acknowledge, and treat the said and his in the most friendly manner, declaring him to be the friend and ally of the said States: the government of which will at all times be extended to their protection, so long as they do acknowledge the authority of the same.

Having signed with our hands and affixed our seals this day of 180

American Journeys — www.americanjourneys.org
at first, but at length all petitioned for us to give back the Certificate to the Big blue eyes he came forward and made a plausible excuse, I then gave the Certificate [to] the Great Chief to bestow it to the most Worthy, they gave it to him, we then gave them a Dram and broke up the Council, the Chiefs requested we would not leave them this evening we determined to Set out early in the morning we Showed them many Curiosities and the air gun which they were much astonished at. those people beged much for Whiskey. Serjeant Floyd is taken verry bad all at once with a Biliose Chorlick we attempt to relieve him without success as yet, he gets worst and we are much allarmed at his Situation, all [give] attention to him.

20th August Monday 1804. —

Sergeant Floyd much weaker and no better. Made M’a Faufonn the interpter a few presents, and the Indians a Canister of Whiskey. We Set out under a gentle breeze from the S. E. and proceeded on verry well. Serjeant Floyd as bad as he can be no pulse & nothing will Stay a moment on his Stomach or bowels. Passed two Islands on the S. S. and at the first Bluff on the S. S. Serj. Floyd Died with a great deal of Composure, before his death he Said to me, “I am going away” I want you to write me a letter.” We buried him on the top of the bluff ½ Mile below a Small river to which we Gave his name, he was buried with the Honors of War much lamented, a Seeder post with the (1) Name Serg: C. Floyd died here 20th of August 1804 was fixed at the head of his grave.¹ This Man at all times gave us proofs of his firmness and Determined resolution to doe Service to his Countrey and honor to himself after paying all the honor to

¹ The journal kept by Sergeant Floyd (which will be published in full in the present work) ends abruptly on August 18. He was buried at a spot which is now in the southern part of Sioux City, la. The inroads of the Missouri River having partly washed away Floyd’s grave, his remains were reburied (May 28, 1857) in a safer place, some 200 yards back of the original grave: and on Aug. 20, 1895, the spot was marked with a slab. A monumental shaft to his memory was erected May 30, 1901. See Reports of Floyd Memorial Association (Sioux City, 1897, 1901). — Ed.
our Deceased brother we camped in the Mouth of floyd's River
about 30 yards wide,  a beautiful evening.

21st August Tuesday 1804. —

We Set out very early this morning and proceeded on under a gentle Breeze from the S. E. passed Willow Creek Small on the S. S. below a Bluff of about 170 feet high and one 1/2 M! above Floyds River  at 1 1/2 Miles higher & above the Bluff passed the Soutes River S. S. this River is about the Size of Grand river and as M! Durrien our Soutes intpt! says is navigable to the falls 70 or 80 Leagues and above these falls Still further, those falls are 20 feet or there abouts and has two principal pitches, and heads with the S! Peters [now Minnesota River—Ed.] passing the head of the Demoin, on the right below the falls a Creek coms in which passes thro Cliffs of red rock which the Indians make pipes of, and when the different “nations meet at those quarries all is peace.” [a sort of asylum for all nations, no fight there] passed a place in a Prarie on the L. S. where the Mahars had a Village formerly.  the Countrey above the Platt R. has a great Similarity.  Camp on the L. Side,  Clouds appear to rise in the West & threaten wind.  I found a very excellent fruit resembling the red Current, the Srub on which it grows resemles Privet & about the Common hight of a wild plum.

1 The celebrated “Red Pipestone Quarry,” in Pipestone County, S. W. Minnesota; it was first described by George Catlin, who visited it in 1836; the stone (a red quartzite) was named in honor of him, “catlinite.” See his N. Amer. Inds., ii, pp. 160, 164-177, 201-206; and Minn. Geol. Survey Rep., 1877, pp. 97-109. The stone is even yet worked, although in crude fashion, by the Sioux Indians. — Ed. [115]
Course Distance & ref. 21st Aug:

S. 82° E. 3 miles to the Upper part of a Bluff below the Soues river on S. S. passed Willow Creek at 1 ¼ M. S. S.

South 1 ¼ M. to Lower p. of a Willow Island in the Midle of the River one on S. S. ops.

S. 48. W. 1 ⅔ miles to the head of the Isl passed Several Sand bars dividing the Current, Wind hard

West 2 M. to a high wood on the L. S. pased a large Sand bar from the S. S. River Wide.

N. 36. W. 4 M. to a Beyau in a bend to the L. S. above where the Mahars once had a Village a Sand bar in the Middle & S. S.

N. 18. E. 2 M. to a p. of Willows on the L. S. wind hard from S. E.

N. 22° W. 3/4 M. on the L. S. ops to which the Soues River is within 2 miles on the S. S.

S. 50. W. ¼ M. on the L. S.

S. 28. W. 2 M. on a Willow p. on the S. S.

S. 78 W. 1 ½ miles on the Sand bar on S. S.

N. 12. W. 2 M. to a Willow p. on the L. S. passed a Sand bar.

S. 60. W. 1 ¼ M. on the Sand bar on the L. Side.

South 2 ½ miles to Some low Willows on the S. S.

The two men Sent with the horses has not joined us as yet.

22nd August Friday 1804. —

Set out early wind from the South at three miles we landed at a Bluff where the two men Sent with the horses were waiting with two Deer, by examination this (1) Bluff Contained Alum, Copperas, Cobalt, Pyrites; a Alum Rock Soft & Sand Stone. Capt. Lewis in proving the quality of those minerals was Near poisoning himself by the fumes & tast of the Cobalt which had the appearance of Soft Isonglass. Copperas & alum is very pisen, ¹ Above this Bluff a Small

¹ Biddle here says (I, p. 50): "The appearance of these mineral substances enabled us to account for disorders of the stomach with which the party had been affected since they left the river Sioux; the men had used the water of the Missouri, on which floated a scum proceeding from these rocks. By dipping from below, and avoiding this scum, they obtained pure water, and their maladies soon ceased. — Ed.
Creek comes in from the L. S. passing under the Clift for Several Miles, this Creek I Call Roloje a name I learned last night is M[ ]s (2) Seven Miles above is a Clift of Allom Stone of a Dark Brown Col! Containing also incrusted in the crevices & shelves of the rock great qt. of Cobalt, Semented Shels & a red earth. from this the (3) river bends to the East and is within 3 or 4 miles of the River Soues at the place where that river Comes from the high land into the Low Prairie & passes under the foot of those Hills to its Mouth.

Capt. Lewis took a Dost of Salts to work off the effects of the arsenic, we camped on the S. S.₁ Sailed the greater part of this day with a hard wind from the S. E. Great deel of Elk Sign, and great appearance of wind from the N. W.

ordered a Vote for a Serjeant to chuse one of three which may be the highest number. the highest numbers are P. Gass had 19 votes, Bratten² & Gibson.

₁ Near Elk Point, Union Co., S. Dakota. — Ed.
² For such information as can be obtained about William Bratton, see Wheeler, On the Trail of Lewis and Clark (N. Y., 1904), pp. 112-116. Bratton died in 1841; a monument over his grave at Waynetown, Ind., records his share in the Lewis and Clark expedition.

For biography of Sergeant Gass, see J. G. Jacob’s Life and Times of Patrick Gass (Wellsburg, Va., 1859); Coues’s compilation therefrom, in his Lewis and Clark, i, pp. xci-xvi; and a sketch in History of the Pan-Handle, West Va. (Wheeling, 1879), pp. 346-349. — Ed.
23rd August Thursday 1804 —

Set out this morning very early. The two men with the horses did not come up last night. I walked on shore & killed a fat buck. J. Fields sent out to hunt. Came to the boat and informed that he had killed a buffalo in the plain a head. Cap. Lewis took 12 men and had the buffalo brought to the boat in the next bend to the S. S. 2 Elk swam the river, and was fired at from the boat. R. Fields came up with the horses and brought two deer one deer killed from the boat. Several prairie wolves seen today. Saw Elk standing on the sand bar. The wind blew hard [west] and raised the sand off the bar in such clouds that we could scarcely [see] this sand being fine and very light stuck to everything it touched, and in the plain for a half a mile the distance I was out, every spire of grass was covered with the sand or durt.

We camped on the L. S. above a sand island, one beaver caught.

Course Distance & ref: Aug. 23rd

| West   | 4 M | to a small run between two bluffs of yellow & blue earth. [L. &]

24th August Friday 1804. —

Some rain last night, a continuation this morning. We set out at the usual time and proceeded on the course of last night, to the (1) commencement of a blue clay bluff of 180 or 190 feet high on the L. S. Those bluffs appear to have been laterly on fire, and at this time is too hot for a man to bear his hand in the earth at any depth, 1 Great appearance of

1 The heated bluffs here mentioned are ascribed by Coues (L. and C., i, p. 84) to volcanic action; they were called by the French voyageurs cotes brûlées, or burnt
Coal, an emence quantity of Cobalt or a Cristolised Substance which answers its description is on the face of the Bluff. Great quantities of a kind of berry resembling a current except double the Size and Grows on a bush like a Privet, and the Size of a Damsen deliciously flavoured and makes deliteful Tarts, this froot is now ripe, I took my Servent and a french boy and Walked on Shore, Killed Two Buck Elks and a fawn, and intercepted the Boat, and had all the Meat butchered and in by Sun Set at which time it began to rain and rained hard, Cap. Lewis & My self walk out & got very wet, a Cloudy rainey night In my absence the Boat Passed a Small (2.) River Called by the Indians White Stone River this river is about 30 yards wide and runs thro: a Plain or Praire in its whole Course In a northerly deirection from the Mouth of this Creek in an emence Plain a high Hill is Situated, and appears of a Conic form, and by the different nations of Indians in this quarter is Suppose to be the residence of Deavels. that they are in human form with remarkable large heads, and about 18 Inches high, that they are very watchfull and are arm'd with Sharp arrows with which they Can Kill at a great distance; they are Said to kill all persons who are So hardy as to attempt to approach the hill; they State that tradition informs them that many Indians have Suffered by those little people, and among others three Mahar Men fell a sacrefise to their murceless fury not many Years Sence. So Much do the Maha, Soues, Ottoes and other neighbouring nations believe this fable, that no Consideration is Suffecient to induce them to approach the hill.

Bluff's. Brackenridge, who was at this place in 1811, ascribes this phenomenon to the burning of coal (Louisiana, pp. 232, 233). — Ed.

At Ionia, Dixon County, is found the Nebraska "volcano" or "burning hill." Though declining in activity, this hill was once an object of considerable interest, especially after freshets in the Missouri River. Though not visited personally, the smoking or steaming seems to be due to the decomposition of pyrite in the damp shales. It seems that sufficient chemical heat is produced to make the hill-top steam and even to fuse some of the sand and clay. It bears no relation whatever to a volcano. — Erwin H. Barbour, geologist of University of Nebraska.

1 Buffalo-berry, or beef-suet tree (Fr. graisse de bœuf), Shepherdia argentea. — Ed.
Course Distance & ref. 24 Aug:

S. 48° W. 2 1/4 M. to the Commencement of a Blue Clay Bluff of 180 or 190 feet high on the L. S.
West 1 3/4 M. under the Bluff pass'd two Small runs from the Bluff, those Bluffs have been latterly on fire & is yet verry hot. (1)

West 1 1/4 M. to the upper point of a Sand bar Connected with the Island [passed the Creek. (2)]

S. 40° W. 2 1/2 M. to a Willow p. on the S. S.

[120]
Chapter III

From the Vermilion to Teton River

Clark’s Journal, August 25–September 24, 1804
Entries and Orders by Lewis, August 26, 28, and September 16, 17

[Clark:]

25th August Saturday 1804.—

A CLOUDY morning Cap’ Lewis & Myself concluded to go and See the Mound which was Viewed with Such terror by all the different Nations in this quarter, we Selected Shields; J. Fields, W. Bratten, Serg’ Ordway, J. Coller, Carr, and Corp’ Worthington & Frasure, also G. Drewyer and dropped down to the Mouth of White Stone River, where we left the Perogue with two men and at 200 yards we assended a rising ground of about Sixty feet, from the top of this High land the Country is level & open as far as can be Seen, except Some few rises at a great Distance, and the Mound which the Indians Call Mountain of little people or Spirits, this Mound appears of a conic form & is N. 20° W. from the mouth of the Creek,1 we left the river at 8 oClock, at 4 miles we Crossed the Creek 23 yards wide in an extensive Valley and Contin[ued] on at two miles further our Dog was so Heeted and fatigued we was obliged [to] Send him back to the Creek, at 12 oClock we arrived at the hill Cap’ Lewis much fatigued from heat the day it being very hot & he being in a debilitated State from the Precautions he was obliged to take to prevent the effects of the Cobalt, & Min’ Substance which had like to have poisoned him two days ago, his want of water, and Several of the men complaining of Great thirst, determined us to make for the first water which was the Creek

1 Known locally, and named on some maps, as Spirit Mound. For description of its more recent appearance, see Amer. Antiquarian, Sept. 1891, p. 289. — Ed.
in a bend N. E. from the Mound, about 3 miles. after a Delay of about 1 hour & a half to recrut our party we set out on our return down the Creek thro: the bottom of about 1 mile in width, crossed the creek 3 times to the place we first struck it, where we gathered some delisious froot such as Grapes, Plumbs, & Blue Currents after a Delay of an hour we set out on our back trail & arrived at the Perogue at Sun set. We proceeded on to the Place we Camp'd last night and Stayed all night.

This Mound is Situated on an elivated plain in a leavel and extensive prairie, bearing N. 20° W. from the Mouth of White Stone Creek nine miles, the base of the Mound is a regular parallelogram the long Side of which is about 300 yards in length the Shorter 60 or 70 yards. from the longer Side of the Base it rises from the North & South with a Steep assent to the hight of 65 or 70 feet, leaveing a leavel Plain on the top of 12 feet in width & 90 in length. The North & South part of this Mound is join[ed] by two regular rises, each in Oval forms of half its hight, forming three regular rises from the Plain the assent of each elivated part is as Suden as the principal mound at the narrower sides of its Base.

The reglar form of this hill would in Some measure justify a belief that it owed its orrigin to the hand of man; but as the earth and loos pebbles and other substances of which it was Composed, bore an exact resemblance to the Steep Ground which border on the Creek in its neighbourhood we concluded it was most probably the production of nature.

The only remarkable Characteristic of this hill admitting it to be a natural production is that it is insulated or Seperated a considerable distance from any other, which is verry unusial in the natural order or disposition of the hills.

The Surrounding Plains is open Void of Timber and leavel to a great extent, hence the wind from whatever quarter it may blow, drives with unusial force over the naked Plains and against this hill; the insects of various kinds are thus involuntary driven to the Mound by the force of the wind, or fly to its Leeward Side for Shelter; the Small Birds whoes food they are, Consequently resort in great numbers to this place in
Such of them; Particularly the Small brown Martin of which we saw a vast number hovering on the Leward Side of the hill, when we approached it in the act of catching those insects; they were so gentle that they did not quit the place until we had arrive within a few feet of them.

One evidence which the Ind give for believeing this place to be the residence of Some unusial Sperits is that they frequently discover a large assemblage of Birds about this Mound [this] is in my opinion a Sufficent proof to produce in the Savage Mind a Confident belief of all the properties which they ascribe [to] it.

from the top of this Mound we beheld a most butifull landscape; Numerous herds of buffalow were Seen feeding in various directions; the Plain to North N. W. & N. E. extends without interuption as far as Can be seen.

From the Mound to the Mouth of Stone River is S. 20° E. 9 Miles. to the woods near the mouth of River Jacque is West. to the Highland near the mouth of Soues River is S. 70° E. to the highland opposit side or near the Maha Town is S. 45° E.

Some high lands to be seen from the Mound at a Great distance to the N. E. some nearer to the N. W. No woods except on the Missourie Points.

if all the timber which is on the Stone Creek was on 100 acres it would not be thickly timbered, the Soil of those Plains are delightfull.

Great numbers of Birds are seen in those Plains, Such as black bird, ren, [wren] or Prarie burd, a kind of larke about the sise of a Partridge with a Short tail, &c., &c.,

25th Aug—

the Boat under the Com of Serj Pryor proceeded on in our absence, (after jurking the Elk I Killed yesterday) Six Miles and Camped on the Larboard Side R. Fields brought in five Deer, George Shannon Killed an Elk Buck Som rain this evening.

We Set the Praries on fire as a signal for the Soues to Come to the River.

[123]
Course Dist. & Ref. Aug 25th

S. 72° W. 1 M. on the p of S. S. ops a Bluff of Blue Clay which is on the L. S.

S. 86° W. 3/4 m. on the L. S. to a p of Willows the camp

26th August Sunday 1804.—

(Joined the Boat at 9 oClock A.M.) after jerking the meat Killed yesterday and preparing the Elk Skins for a Toe Roape, we Set out Leaveing Drewyer & Shannon to hunt the horses which was lost with directions to follow us keeping on the high lands.

proceeded on passed a clift of White and Blue or Dark Earth of 2 miles in extent on the L. S. and camped on a Sand bar opposed the old village Called Piticit Arc. a Small Creek falls into the river 15 yd wide below the Village on the Same Side L. S. this Village was built by a Indian Chief of the Maha nation by the name of Petite Arc (or little Bow) displeas with the Great Chief of that nation (Black Bird) Separated with 200 men and built a village at this place after his death the two Villages joined, ap Pat. Gass a Serg vice Floyd Deceased.

Great q of Grapes, Plumbs of three Kinds, 2 yellow and large one of which is long and a 3rd kind round & red all well flavored, particularly the yellow sort.

Course Distance & ref. Aug 26th

S. 66° W. 2 M. to a Sand bar Making out from the S. S.

N. 82° W. 7 M. to a p of Willows on the S. S. passed an Island on S. S. and large Sand bar on both Sides of the river and Camped opposit the mouth of Arc Creek — the river below wide.

1 Now Bow Creek, Cedar Co., Nebr. — Ed.
[Orderly Book; Lewis:]

Orders August 16th, 1804.

The commanding officers have thought proper to appoint Patric Gass, a Sergeant in the corps of volunteers for North Western Discovery; he is therefore to be obeyed and respected accordingly.

Serg' Gass is directed to take charge of the late Serg' Floyd's mess, and immediately to enter on the discharge of such other duties, as have by their previous orders been prescribed for the government of the Sergeants of this corps.

The Commanding officers have every reason to hope from the previous faithful services of Serg' Gass, that this expression of their approbation will be still further confirmed by his vigilant attention in future to his duties as a Sergeant. the Commanding officers are still further confirmed in the high opinion they had previously formed of the capacity, diligence and integrity of Serg' Gass, from the wish expressed by a large majority of his comrades for his appointment as Sergeant.

MERIWETHER LEWIS,

Cap' 1st U. S. Reg' Infty.

Wm. CLARK Cp' &c.

[Clark:]

27th August Monday 1804. —

This morning the Star call'd the morning Star much larger than Common, G. Drewyer came up and informed that he could neither find Shannon nor horses, we Sent Shields & J Fields, back to hunt Shannon & the horses, with directions to keep on the Hills to the Grand Calumet above on River Kacure (quecure)

We Set Sail under a gentle Breeze from the S. E. at 7 miles passed a White Clay Marl or Chalk Bluff under this Bluff [which] is extensive I discovered large Stone much like lime incrusted with a clear substance which I believe to be Cobalt, also Ore is embeded in the Dark earth, resembling Slate [but] much Softer. above this Bluff we had the Prairie

1 A corruption of Rivière qui Court, the French name of the Niobrara (or Rapid) River. — Ed.
LEWIS AND CLARK JOURNALS [Aug. 27

Set on fire to let the Soues See that we were on the river, and as a Signal for them to Come to it.

At 2 oClock passed the Mouth of River Jacque [or Yeankton,] ¹ one Indian at the mouth of this river Swam to the Perogue, we landed and two others Came to us, those Ind: informed that a large Camp of Soues, were on R. Jacque near the mouth. We sent Serj: Pryor & a Frenchman with M! Durion, the Soues interpeter to the Camp with directions to invite the principal Chiefs to Council with us at a Bluff above Called the Calumet. two of those Indians accompanied them and the third continued in the Boat Showing an inclination to Continue, this boy is a Mahar, and inform that his nation, were gone to the Parnies [Panies] to make a peace with that nation.

We proceeded on about one and a half miles and incamped on a bar makeing out from the S. S. the wind blew hard from the South. A cool and Pleasent evening, The river has fallen verry slowly and is now low.

Course Dist. & Refr: August 27.

N. 73° W. 7 Miles to the upper part of a Calx or Chalk Bluff on the L. S. haveing pass'd a large Sand bar on the L. S. and two on the S. S. also some Small Bars in the R.

North 3 M' to a tree in a bend to the S. S. pass 2 Sand bars in the river.

West 2½ M to the Mouth of River Jacque on the S. S. two large Sand bars on the L. S.

S. 80° W. 1½ M on the Side of a large Mud bar Makeing out above the River Jacque or Yeankton.

This river about 85 or 90 yds. Wide and is navigable for Perogues a Great distance, it heads with the S! Peters, of the Mississippi & the red River which runs into Lake Winipeck and Hudsons Bay.

---

¹ The James (or Dakota) River. — Ed.

[126]
VERMILION TO TETON

28th August Tuesday 1804. —

Set out under a Stiff Breeze from the South and proceeded on pass a Willow Island at 2 Miles several Sand bars, the [river] Wide & Shallow at 4 miles passed a Short White Bluff of about 70 or 80 feet high, below this Bluff the Prairie rises gradually from the water back to the Hight of the Bluff which is on the Starboard Side here the Indian who was in the boat returned to the Soues [Sieoue] Camp on the R Jacque. Cap! Lewis & my Self much indisposed owing to Some cause for which we cannot account one of the Perogues run a Snag thro her and was near Sinking in the opinions of the Crew. we came too below the Calumet Bluff and formed a Camp in a Butifull Plain near the foot of the high land which rises with a gradual assent near this Bluff. I observe more timber in the Valeys & on the Points than useal. The Perogue which was injured I had unloaded and the Loading put into the other Perogue which we intended to Send back & changed the Crew after examoning her & finding that She was unfit for service determined to Send her back by the party Some load which was in the Perogue much Injur’d.

The wind blew hard this afternoon from the South. J. Shields & J. Fields who was Sent back to look for Shannon and the Horses joined us and informed that Shannon had the horses ahead and that they Could not overtake him This man not being a first rate Hunter, we determind to Send one man in pursute of him with some Provisions.

S. 76. W. 4½ M to the lower part of a Bluff of a Brownish red on S. S. pass! Sev! Sand bars.
S. 60° W. 4 M to the lower part of the Calumet Bluff L. S. passed a p! on east Side and Several Sand bars.

1 In Knox Co., Nebr., opposite Lower Buffalo Island. — COUES (L. and C., i, p. 90). Nearly opposite Yankton, a little below. — E. E. BLACKMAN.
The commanding officers direct that the two messes who form the crews of the perogues shall select each one man from their mess for the purpose of cooking, and that these cooks as well as those previously appointed to the messes of the Barge crew, shall in future be exempted from mounting guard, or any detail for that duty; they are therefore no longer to be held on the royaster.

M. Lewis Cap
1st U. S. Reg' Infty
Wm Clark Cp' &c

Some rain last night & this morning, Sent on Colter with Provisions in pursuit of Shannon, had a Toe roap made of Elk Skin, I am much engaged riteing. at 4 oClock P. M. Serg' Pryor & M' Dorion with 5 Cheifs and about 70 men & boys arrived on the opposit Side we Sent over a Perogue & Mr. Dorrion & his Son who was tradeing with the Indians came over with Serj Pryor, and informed us that the Chiefs were there we sent Serj Pryor & young Mr. Dorion with Som Tobacco, Corn and a few Kittles for them to Cook in, with directions to inform the Chiefs that we would Speek to them tomorrow.

Those Indians brought with them for their own use 2 Elk & 6 Deer which the young men Killed on the way from their Camp 12 Miles distant.

Serj Pryor informs me that when [they] came near the Indian Camp they were met by men with a Buffalow roabe to carry them, M' Dorion informed they were not the owners of the Boats & did not wish to be carried” the Scioues Camps are handsom of a Conic form Covered with Buffalow Roabs Painted different colours and all compact & handsomly arranged, Covered all round an open part in the Centre for the fire, with Buffalow roabs, each Lodg has a place for

1 The younger Dorion was afterward slain on the headwaters of the Columbia, while trapping for the unfortunate Astoria expedition. — J. N. Basket.
Cooking detached, the lodges contain from 10 to 15 persons, a Fat Dog was presented as a mark of their Great respect for the party of which they partook heartily and thought it good and well flavored.

The River Jacque is Deep & is navigable for Perogues a long distance up at the Mouth it is Shallow & narrow but above it is 80 or 90 yards Wide passing thro: rich Prairies with but little timber this river passes the Souix River and heads with the St. Peters and a branch of Red river which falls into Lake Winepeck to the North.

30th of August Thursday 1804.

a verry thick fog this morning after Prepareing Some presents for the Cheifs which we intended [to] make by giving Meadels, and finishing a Speech which we intended to give them, we sent M. Dorion in a Perogue for the Cheifs and Warriers to a Council under an Oak Tree near where we had a flag flying on a high flagstaff at 12 oClock we met and Cap. L. Delivered the Speach & then made one great Chiff by giving him a Meadel & Some Cloathes, one 2d Chief & three Third Chiefs in the same way, they rec'd those things with the goods and tobacco with pleasure To the Grand Chief we gave a Flag and the parole (certificate) & Wampom with a hat & Chief's Coat, We Smoked out of the pipe of peace, & the Cheifs retired to a Bourey [Bowray] made of bushes by their young men to Divide their presents and Smoke eate and Council Capt. Lewis & My self retired to dinner and consult about other measures. M. Daurion is much displeased that we did not invite him to dine with us (which he was Sorry for afterwards). The Souex is a Stout bold looking

1 For excellent description and illustrations of these medals (first-grade), see Wheeler, On the Trail of Lewis and Clark (N. Y., 1904), i, pp. 139, 140. Three of the medals distributed by Lewis and Clark have since been found — at the mouth of Wallawalla River, at Fort Clatsop, and at the mouth of Potlatch River, respectively. — Ed.

2 Described by Biddle as "a richly laced uniform of the United States artillery corps, with a cocked hat and red feather." — Ed.
people, (the young men handsom) & well made, the greater part of them make use of Bows & arrows. Some few fusees I observe among them, not with standing they live by the Bow and arrow, they do not Shoot So Well as the Northern Indians. The Warriers are Verry much deckerated with Paint Porcupine quils & feathers, large leagins and mockersons, all with buffalow roabs of Different Colours. The Squars wore Peticots & a White Buffalow roabe with the black hare turned back over their necks and Sholders.

I will here remark a SOCIETY[^1] which I had never before this day heard was in any nation of Indians, four of which is at this time present and all who remain of this Band. Those who become Members of this Society must be brave active young men who take a Vow never to give back let the danger be what it may, in War Parties they always go forward without screening themselves behind trees or anything else to this Vow they Strictly adhier during their Lives. an instance which happened not long since, on a party in Crossing the R Missourie on the ice, a whole was in the ice immediately in their Course which might easily have been avoided by going around, the foremost man went on and was lost the others were draged around by the party. in a battle with the Crow[^2] Indians who inhabit the Coute Noir[^3] or black Mountain out of 22 of this Society 18 was Killed, the remaining four was draged off by their Party. Those men are likely fellows the[y] Set together Camp & Dance together. This Society is in imitation of the Societies of the de Curbo or Crow (De Corbeau, Kite) Indians, whom they imitate.

[^1]: The "society" of warriors here described was one of the branches of "the military and social organization which existed among the Blackfeet, Sioux, Cheyenne, Kiowa, and probably all the prairie tribes except the Comanche in the South," according to Mooney (U. S. Bur. Ethnol. Rep., 1892-93, pp. 986-989), who describes it as it existed among the Arapaho. — Ed.

[^2]: The Crows are a Hidatsa tribe, allied to the Minitaree, and originally located on the Yellowstone River; in later years, they have been gathered on the Crow reservation in Montana. — Ed.

[^3]: That is, Côte Noir. "Our authors use the term 'Black mountains' for any of the elevated country to the west of the Missouri in Northern Nebraska and both Dakotas." — COUES (L. and C., i, p. 171).
after the Indians got their Brackfast the Chiefs met and arranged themselves in a row with elligent pipes of peace all pointing to our Seets, we Came foward and took our Seets, the Great Cheif The Shake hand rose and Spoke to some length aproving what we had said and promising to pursue the advice. 

Mar to ree 2d Cheif (White Crain) [White Crane] rose and made a Short Speech and refured to the great Chief Par nar ne arpar be (struck by the Pania) 3d Chief rose and made a short speech Ar ea we char che (the half man) 3d Chief rose & Spoke at some length much to the [same] purpose. The other Cheif said but little One of the Warriers Spoke after all was don & promised to Support the Cheifs, the[y] promissed to go and See their Great father in the Spring with M: Dorion, and to do all things we had advised them to do and all concluded by telling the distresses of their nation by not haveing traders, & wished us to take pity on them, the[y] wanted Powder Ball, & a little Milk [rum; milk of great father means spirits.] last night the Indians Danced untill late in their Dances we gave them [throw into them as is usual] Som Knives Tobacco & bells & tape & Binding with which they wer Satisfied. We gave a Certificate to two Men of War, attendants on the Chief. gave to all the Chiefs a Carrot of Tobacco. had a talk with Mr. Dorion, who agreed to Stay and Collect the Chiefs from as Many Bands of Soux as he coud this fall & bring about a peace between the souex and their neighbours &c. &c. &c.

After Dinner we gave Mr. Peter Dorion, a Commission to act with a flag and some Cloathes & Provisions & instructions

1 The names of these chiefs are thus given by Biddle: Weucha (**Shake Hand;** called by the French Le Liberateur); Mahtoree (**White Crane**); Pawnawneh-pahbe (**Struck by the Pawnee**); and Aweawechache (**Half Man**) — explained as probably originating in its owner’s modesty, “who on being told of his exploits, would say, ‘I am no warrior: I am only half a man.’” These speeches are given by Biddle in more detail. — Ed.

2 The entry for Aug. 31 to this point is misplaced in the MS.; it is found on pp. 52–60 of Codex A, preceded by this memorandum: “omitted to put in the 31st of August in Place.” — Ed.
to bring about a peace with the Seioux, Mahars, Panies, Poncaries, [Poncas—Ed.] Ottoes & Missouries, and to employ any trader to take Some of the Cheifs of each or as many of those nations as he Could Particularly the Seuouex (down to Wash") I took a Vocabulary of the Suoux Language, and the Answer to a few queries such a[s] refured to their Situation, Trade, Number, War, &c. &c. This Nation is Divided into 20 Tribes, possessing Seperate interests. Collectively they are noumerous say from 2 to 3000 men, their interests are so unconnected that Some bands are at war with Nations [with] which other bands are on the most friendly terms. This Great Nation who the French has given the Nickname of Suouex, Call themselves Dar co tar [Dakota—Ed.] their language is not peculiarly their own, they Speak a great number of words, which is the Same in every respect with the Maha, Poncarer, Osarge & Kanzas. which clearly proves that those nations at some period not more that a century or two past are of the Same nation. Those Dar ca ter's or Suoux inhabit or rove over the Countruey on the Red river of Lake Winipeck, S' Peters & the West of the Missi[ss]-ippie, above Prairie De Cheen (Prairie de Chien) heads of River Demoin, and the Missouri and its waters on the N. Side for a great extent. they are only at peace with 8 nations, & agreeable to their Calculation at War with twenty odd. Their trade corns from the British, except this Band and one on Demoin who trade with the Traders of St' Louis. The[y] furnish Beaver, Martain, Loups, (Wolfs) Pekon, (pichou) Bear & Deer Skins, and have about 40 Traders among them. The Dar co tar or Suouez rove & follow the Buffalow raise no corn or any thing else the woods & praries affording a suff[i]cency, the[y] eat Meat, and Substitute the Ground potato which grow in the Plains for bread.

The Names of the Defferent Tribes or bands of the Sceoux, or Dar co tar Nation.

1st Che che ree Yankton (or bois ruley) (brule) now present inhabit the Suouex & Demoin Rivers and the Jacque. (200 men.)

2nd Ho in de bota (Poles) they live [rove] on the heads of Souex and Jacques Rivers.

[132]
VERMILION TO TETON

3rd. *Me Ma car jo* (Make fence on the river) rove on the Country near the big bend of the Missouries.

4th. *Sou on, Te ton* (People of the Prairie) the[y] rove in the Plains N. of the Riv Missourie above this.

5th. *Wau pa cos tar* (Leaf Beds) the[y] live near the Prairie de Chain Near the Mississippi.

6th. *Te Car ton* (or Village of Prairie) rove on the waters of the Mississippi above Prairie de Chain.

7th. *Ne Was tar ton* (big Waters Town) rove on the Mississippi above the St. Peters River.

9th. *Cat Carba* (White Man) live 35 Leagues up St. Peters river.

10th. *Mi ca cu op si ba* (Cut bank) rove on the head of St. Peters.

11th. *Sou on* (——) rove on St. Peters river in the Prairies.

12th. *Sou se toons* (——) live 40 Leages up the St. Peters river.

The names of the other bands neither of the Souex’s interpreters could inform me. in the evening late we gave M. Dourion a bottle of whiskey, & he with the Cheifs & his Son Crossed the river and Camped on the Opposit bank. Soon after night a violent wind from the N. W. with rain the rain Continud the greater part of the night. The river a rising a little.

*September 1st Saturday 1804 —*

M. Dourion lift his Kittle & Sent back for it &c. we Set out under a jentle Breeze from the S. (It rained half the last night) proceeded on pass the Bluffs comps of a yellowish red, & Brownish (&) White Clay which is a[s] hard as Chalk (and much resembling it) this Bluff is 170 or 180 feet high,

---

1 These tribes are enumerated very differently by Biddle, thus (i, pp. 61, 62): (1) Yanktons — 200 warriors; (2) Tetons of the burnt woods — 300 men; (3) Tetons Okandandas — 150 men; (4) Tetons Minnakenozzo — 250 men; (5) Tetons Saone — 300 men; (6) Yanktons of the Plains, or Big Devils — 500 men; (7) Wahpatone — 200 men; (8) Mindawarcarton — 300 men; (9) Wahpatoota, or Leaf Beds — 150 men; (10) Sistasoone — 200 men. Cf. Lewis’s “Statistical View of the Indian Nations Inhabiting the Territory of Louisiana,” accompanying Jefferson’s Message to Congress, Feb. 19, 1806 (Washington, 1806); the substance of this “View” will be republished in the appendix to the present work. For modern scientific classification, see Powell’s “Indian Linguistic Families,” in U. S. Bur. Ethnol. Rep., 1885–86, pp. 111-118. Cf. *Wis. Hist. Collections*, xvi, pp. 173, 194. — Ed.
here the High lands approach near the river on each Side, that on the S. S. not so high as that on the L. S. opposit the Bluffs is Situated a Large Island Covered with timber close under the L. S. above the Is! the high land approach & form a Clift to the river on the S. S. this Clift is Called White Bear Clift one of those animals haveing been kiled in a whole in it.

1st of September Saturday 1804 —

Some hard wind and rain, cloudy all day, the river Wide & hills on each Side near the river, pass a large (1) Island which appeared to be composed of Sand, Covered with Cotton wood close under the S. S. we landed at the lower point of a large Island on the S. S. Called bon homme or Good Man, here Cap. Lewis & my self went out a Short distance on the L. S. to See a Beaver house, which was Said to be of Great hite & Situated in a Pond. We could not find the house and returned after night Drewyer Killed an Elk, & a Beaver. numbers of Cat fish caught, those fish is so plenty that we catch them at any time and place in the river.

Course Dist. & ref! 1st Sept.  

N. 88 W. 4 M! to a high point of on the S. S. haveing pass a Is! (1) on the L. S. & Several Sand bars.

S. 75° W. 2 M! to the lower p! of a large Island on S. S. passed a p! on the L. S. and a Sand bar.

S. 68° W. 4 M! to a p! on L. S. pass the upper p! of the Isl! SS, and some land with bows [boughs — Ed.] and evident marks of being made 24 [feet — Ed.] above water.

S. 80. W. 5 M! to a tree at the lower p! of Bon homme Island on S. S. haveing ps! a p! on the S. S. a Deep bend of Sand and Willows on L. S.

2nd September Sunday 1804 —

Set out early and proceeded on passed the Island and Landed on the S. S. above under a Yellow Clay bluff of 110 feet high, the wind blew verry hard ahead from the N. W. with Some rain and verry cold, G. Drewnyer R. Fields, Newman & howard Killed four fine Elk we had the meat all jurked and

[134]
the Skins Dried to Cover the Perogue, on the Side of the Bluff I observed Bear Grass & Rhue, at Sun Set the wind luled and cleared up Cold, the high land on the L. S. is verry high, & uneven, that on the S. S. from 80 to 120 foot & is leavel back but few Small Streams falling into the river.

Course Distance & reffs 2d Sp!

N. 75° W. 3 M* to the lower part of an antient fortification (1) in a bend to the L. S. this Course passed over a p! of the Isd & Sand.

N. 45 W. 1 M! on the L. p! passd the head of the Island at ¼ of a mile ops! a yellow bank S. S.

I went out and made a Survey of the antient Works which is Situated in a level Plain about 3 Miles from the hills which are high.

A Discreption of the Fortification

(1) Commenceing on the river opsi'd the Good Mans Island, first Course from the river is

S. 76° W. 96 yards thence
S. 84° W. 53 yards (at this angle a kind of angle or horn work)
N. 69° W. 300 yards to a high part, passing the gateway Covered by two half Circler works one back of the other lower than the main work the Gate forms a right angle projecting inward.

N. 32° W. 56 yards
N. 20° W. 73 yards. This part of the work appears to have [been] either double, or a covered way. from this Some irregular works appear to have been on mounds between this and the river, with a Deep round whole in the center of a Gorge formed by another angle. This part of the work is from 10 to 15 feet 8 Inches — the Mounds of Various hights the base of the work is from 75 to 105 feet, Steep inward and forming a kind of Glassee [Glacis] outwards.

N. 32° W. 96 yards to the Commencement of a Wall from 8 to 10 feet high this Course not on the Wall but thro to the commencement of another detached

[135]
N. 81° W. 1830 yards to the river & above where this bank Strikes
the river is the remains of a Circular work.

in this Course at 533 yards a Deep Pond of 73 yards Diameter per­
factly round is in the Course of the bank which is about 8 feet high,
from this Pond the bank lowers gradually. a bank about the same
hight runs near the river, and must have joined the main work at a part
which is now washed into the river, this is also perfectly Stright and
widens from the main work, as the river above has washed in its banks
for a great distance I cannot form an Idear How those two long works
joined. where they Strike the river above, they are about 1100 yd. apart,

[Another Description.]

N° 1 a Wall of the Antient Work Commencing on the bank of the
River and running on a direct line S. 76° W. 96 yard, about
75 feet baice and 8 feet high.
2. Wall Continued. and Course S. 84° W. 53 yards from an
angle formed by a slopeing decent N° 13. has the appearance
of a hornwork of nearly the same hight of the former angle
N° 1.
3. the Wall Continued on a Course N. 69° W. for 300 yards in
which there is a low part of the wall which is Covered by two
Circular and lower Walls one back of the other. 8. 8. which
covers the gate way Completely, between those outer Walls
8. 8. there appears to have been a Covered way out of the
Main work into the vacancy between those two Walls N° 9.
This Wall No. 3 is 8 feet high and about 75 feet Bace.
4. a Wide part of the Wall which is about 12 feet high and 105
feet base on the Course N. 69° W. Continued from the gate
way.
5. The Wall about 15 feet high and about 90 feet bace on a
course N. 32° W. for 56 yds.
6. the Wall Continus on a Course N. 26° W. for 73 yards and
ends abruptly near a whole near Several Mounds prismaticus
in the Gorge of the Work between this and the river.
10. N. 32° W. 96 yards across a low place much lower than the
Common leavel of the plain to the Commencement of a wall of
8 feet high this is an open Space, from whence there is Some
appearance of a Covered way to the Water.

1 This matter is found in Codex N, pp. 81-85. — Ed.
is a large hollow place much lower than the plain

12. Several little Mounds in the gouge

7. the gateway to the Strong work.

14. a redoubt Situated on an Island which is making on the Side next to the Main Work, the wall forming this redoubt is 6 feet high

15. The river banks at the waters edge

16. a thick Wall of about 6 feet high passing from the Rivers edge at the gouge of the Work perfectly straight to the bend of the River above and there ends abruptly where the Missouri is under mining its banks on this Wall maney large Cotton Trees of two & 3 feet diameter, the Bank passes thro' a wood in its whole Course

N⁰ 17. a Streight wall of 1830 yard extending from the Gouge of the strong work on a Course N. 81° W. This wall is 8 feet high to a round pon (N⁰ 18) from then it becomes lower and strikes the Missouri at a place where that river has the appearance of having incroached on its banks for a great distance. this wall passes in it's whole course thro' a leavel plain.

18. a Deep pond of 73 yards diameter in the Wall, perfectly round

20. Thro from the extremity of one Wall to the other 1100 yards.

21. a Small redoubt on the bank of the river.

The Strong part of this work which must be about $\frac{3}{5}$ of it's original Size Contains Twenty acres.

The part Contained between the two Walls is about 500 acres, and it is Certain that those Walls have been longer and must have contained a much greater Space

I am informed by our french interpreters that a great number of those antient works are in Defferent parts of the Countrey, on the Plate River, Kansas, Jacque, Osarge, Mine river &c. A Small one is on [an] Island opposit the one I have Discibed, and two of our Party Saw two of those Antient f[o]tresses on the Petteet Arc Creek on the upper Side near the Mouth, each angle of which were 100 yards and about 8 feet high.¹

¹ The opinion now prevails, that these "fortifications." were only natural formations, made by the drifting sands. — Ed.
5th of September Monday 1804.

A very cold morning wind from N. W. we set out at sunrise, & proceeded on to a Bluff below the Mouth of Plumb Creek [12 yds] on the S. S. and took an observation of the Sun's altitude.

This Creek is Small it "abounds with plumbs of a Delicious flavour" the River is Wide and Crowded with Sand bars. it is rising a little but little timber in this Country all that is, is on the river in the Points. we came too on the L. S. in the edge of a Plain and Camped for the night. we Saw Some signs of the two men Shannon & Colter, Shannon appeared to be ahead of Colter. The White banks appear to continue on both sides of the river. Grapes plenty and finely flavored.

Course Dis! & refs. 3rd Sept!

West 3½ M! on the L. S. ops® a Bluff
S. 35 W. 3 M! to the Upper point of some wood at the foot of the high land on the L. S. in a bend of the river pass a large Sand bar 400 yds wide on the L. S. and a p° & Sand bar from the S. S.

West 5½ M! to a obj® in a Deep bend to the S. S. pass® a p° S. S. and a large Sand bar on the L. S.
S. 45. W. 1 M! to the Mouth of Plumb C: on the S. S. ps® and! White bank.
South 5 M!® to a p° on the S. S. pass® Several Sand bars & two p°® on the L. S.

4th September Tuesday 1804.

A very Cold Wind from the S. S. E. we Set out early and proceeded on [to] the Mouth of a Small Creek in a bend to the L. S. Called White lime, at 1½ Miles higher up passed a large Creek on the L. S. Called R. au Platte or White Paint between those two Creeks (the latter of which is ab! 30 yds! Wide) we passed under a Bluff of red Ceder, at 4 M® ½ passed the mouth of the River Que Courre (rapid R) on the L. S. and Came to a Short distance above. this River is 152

1 Now Bazile creek. — Ed.
yards Wide at the Mouth & 4 feet Deep Throwing out Sands like the Platt, (only Corser) forming bars in its mouth. I went up this river three Miles to a butifull Plain on the upper Side where the Panias once had a Village this River widens above its mouth and is divided by sands and Islands, the Current verry rapid, not navagable for evin Canoes without Great difficuelty owing to its Sands; the colour like that of the Plat is light, the heads of this river is not known [in the Black Mount' & waters a hilly country of indifferent soil] it comes into the Missourie from the S. W. by West, and I am told that i[t]s Gen' Course Some distance up is parrelel with the Missourie.

Course Dist' & ref: the 4th of Sept!

S. $5^\circ$ W. 1½ M! to the Mo. of a Creek on the L. S. below a Ceeder Cliff.
S. $35^\circ$ 1½ M* to the Mo. of White Paint River on the L. S.
Passing under a Ceeder Cliff.
West 3 M* to the Upper p' of Wood on the L. S. ops't a Bluff of bluish Clay, a S' bar L. S.
N. $72^\circ$ W. 1½ M* to a Mound on the L. S. a Bluff on the S. S.
several Sand bars in the river
West $3\frac{3}{4}$ M! to the Mouth of the river Que Courre on the L. S.
the hills leave the river on the S. S. river Crouded with Sand bars, & wind hard.

[At the end of Codex B, written on the inside of the cover, is the following memorandum:]

U S. Due 4° Sep' 1804

John Potts as p[er Duebill 20.5
Tho't P. Howard . . . . . . . . . 8.10
Alexander Willard . . . . . . . . . 13.55

* after this I will put the Course Distance & references of each day first and remk: after.

[139]
September 5th Wednesday 1804 —

Set out early the wind blew hard from the South, Goats, turkeys Seen today, passed a large Island (1) ops t this Island near the head the Poncarars River Coms into the Missourie from the West this river is about 30 yards wide. dispatched two men to the Poncaries Village Situated in a handsom Plain on the lower Side of this Creek about two miles from the Missourie the Poncarars Nations is Small ¹ and at this time out in the praries hunting the Buffalow, one of the men Sent to the Village Killed a Buffalow in the town, the other, a large Buck near it. Some Sign of the two men who is a head. above the Island on the S. S. we passed under a Bluff ² of Blue earth, under which Several Mineral Springs broke out the water of which had a taste like Salts, We Came too on the upper point of a large Island (which I call No preserves Island) here we made a Ceeider Mast, our hunters brought in three bucks, and two elks this evening which we had jurked.

One of the hunters Shields, informed that he Saw Several black tailed Deer, near the Poncarer Village

¹ The Biddle text states (i, p. 66) that this Ponca tribe, which had once numbered 400 men, was then reduced to about fifty, who had taken refuge with the Omaha. Both tribes had been sedentary, but were driven from their villages by war and pestilence. — Ed.
² Now called Chouteau Bluffs. — Ed.

[140]
1804] VERMILION TO TETON

Course Distance and references. — 6th Sep! 1804.

West 1\frac{1}{2} M\text{h} to a p! of Wood on the S. S. opposit a Bluff.
N. 85° W. 7\frac{1}{2} M\text{h} passed a p! on the S. S. at 1\frac{1}{2} M\text{h} above which is a large Sand bar on L. S. a high Clift of Blue & redish soft rock, Colter joined us.

Sept 6th Thursday 1804. —

a Storm this morning from the N. W. which lasted a few minits, we Set out and proceeded on passed the head of the Is! which is Separated from the L. S. by a narrow Channel, a hard wind from the N. W. a Verry Cold day. we camped on the S. S. at the upper point of Some timber, Sometime before Night, no timber, [being in reach.]

I saw Several goats\textsuperscript{1} on the hills on the S. S. also Buffalow in great numbers.

Course Distance & references. — 7th Sept. 1804.

N. 60° W. 3 M\text{h} to the p! of a Bluff on the S. S. opps! a p! on L. S.
West 2\frac{1}{2} Miles to a tree in a bend to the L. S. near the foot of a round mountain resembling a Cupola (1) passed 2 Small Is\textsuperscript{2} S. S.

Sept. 7th Friday —

a verry Cold morning wind S. E. Set out at day light we landed after proceeding 5\frac{1}{2} Miles, near the foot of a round Mounting, which I saw yesterday, resembling a dome.\textsuperscript{2} Cap. Lewis & Myself walked up to the top which forms a Cone and is about 70 feet higher than the high lands around it, the Base is about 300 foot in decending this Cupola, discovered a Village of Small animals that burrow in the grown (those animals are Called by the French Petite Chien) Killed one and Caught one a live by poreing a great quantity of Water in his hole\textsuperscript{3} we attempted to dig to the beds of one of those animals, after

\textsuperscript{1} These "goats" were antelopes (\textit{Antilocapra Americana}). This animal was new to science when discovered by Lewis and Clark in 1804, and was not technically named until 1815. — COUES (\textit{L. and C.}, i, p. 109).

\textsuperscript{2} A conspicuous landmark, now known as "the Tower." — ED.

\textsuperscript{3} Gass says (p. 51) regarding this attempt, that "all the party, except the guard, went to it; and took with them all the Kettles and other vessels for holding water; but though they worked at the business till night, they only caught one of them." — ED.

\[141\]
diging 6 feet, found by running a pole down that we were not half way to his Lodge, we found 2 frogs in the hole, and Killed a Dark rattle Snake near with a Ground rat (or prairie dog) in him, (those rats are numerous) the Village of those animals Cov 4 about 4 acres of Ground on a gradual decent of a hill and Contains great numbers of holes on the top of which those little animals Set erect make a Whistling noise and whin allarmed Step into their hole. we por’d into one of the holes 5 barrels of Water without filling it. Those Animals are about the Size of a Small Squ[ir]rel Shorter (or longer) & thicker, the head much resembling a Squirrel in every respect, except the ears which is Shorter, his tail like a ground squirel which they shake & whistle when allarm’d the toe nails long, they have fine fur & the longer hairs is gray, 1 it is Said that a kind of Lizard also a Snake reside with those animals. (did not find this correct.) Camped.

Course Destance & referrences. — 8th Sept

N. 35. W. 7 M 4 to a p’ on L. S. ops the house of M: Troodo where he wintered in 96 & Seven Called the Pania ho: in a woo[d] to the S. S. (1)

N. 88° W. 10 M 4 to a p’ of woods S. S. one mile above the commencement of this Course the Low’ p’ of a Willow Isl 1 this Isl is 1 3 M 2 in length, in the middle of the R. a Small Sand Isl at its upper extremity.

8th of September Satturday —

Set out early and proceeded on under a gentle Breeze from the S. E. at 3 M 2 passed the house of Troodo where he wintered in 96. Called the Pania house, above is high hills on the S. S. on the S. S. much higher hills than useal appear to the North distant 8 Miles recently burnt. pass 3 Small Islands at about 5 Miles on this Course on the S. S. here Cap. Lewis Killed a Buffalow in the river, and the Men one other Came to on the lower point of an Island in the middle of the river Called Boat Island 2 and incamped, jurked the meat Killed

1 The prairie-dog (Cynomys ludovicianus), then unknown to scientists; Coues thinks that Clark and Gass were the first to describe it. — Ed.
2 The present Chicot Island; a little above the present Fort Randall. — En.
to day Consisting of 2 buffalow, one large Buck Elk, one Small, 4 Deer 3 Turkeys & a Squirrel, I joined the boat at this Camp, the Country on the S. S. is pore & broken.

Course Distance & reference. — 9th Sept!

N. 34° W. 3 M' to a p' on an Island on the L. S. of an Is! passed Sand bars.
N. 40° W. 3 M' to an upper p' of a Wood in a bend S. S.
N. 83° W. 4½ M' to a p' on S. S.
N. 44° W 4 M' to the upper p' of a Wood L. S.

9th September Sunday 1804 —

Set out at Sunrise and proceeded on passed the head of the Island on which we Camped, passed three Sand & Willow Islands, the Sand bars So numerous, it is not worth mentioning them, the river Shoal or Shallow wind S. E. Came too and Camped on a Sand bar on the L. S. Capt. Lewis went out to kill a buffalow. I walked on Shore all this evening with a view to Kill a goat or Some Prairie Dogs in the evening after the boat landed, I Directed My Servent York with me to kill a Buffalow near the boat from a Numb' then Scattered in the Plains. I saw at one view near the river at least 500 Buffalow, those animals have been in View all day feeding in the Plains on the L. S. every Copse of timber appear to have Elk or Deer. D. Killed 3 Deer, I Kiled a Buffalow Y. 2, R. Fields one,

Course Distance & Reference — 10th Sept.

M:\ to a pt on the L. S. passed an Is:\ on the S. S. just above the one mentioned in the last Course.

A cloudy morning, Set out very early, the river wide & Shallow the bottom narrow, & the river crowded with Sand bars, passed the Island on which we lay at one mile, Passed three Islands one on the L. S. and 2 on the S. S. opposit the Island on the L. S. I saw a Village of Barking Squirrel [144]
[prairie-dog — Ed.] 970 yds long, and 800 yds wide. Situated on a gentle slope of a hill, these animals are numerous. I killed 4 with a view to have their skins stuffed.

Here the man who left us with the horses 22 (16) days ago George Shannon (He started 26 Aug.) and has been a head ever since joined us nearly Starved to Death, he had been 12 days without any thing to eat but Grapes & one Rabbit, which he killed by shooting a piece of hard stick in place of a ball. This man supposing the boat to be a head pushed on as long as he could, when he became weak and feeble determined to lay by and wait for a trading boat, which is expected, keeping one horse for the last resource, thus a man had like to have Starved to death in a land of Plenty for the want of Bulls or something to kill his meat. We camped on the L. S. above the mouth of a run a hard rain all the afternoon, & most of the night, with hard wind from the N. W. I walked on shore the forepart of this day over some broken country which continues about 3 miles back & then is level and rich all plains. I saw several foxes & killed an Elk & 2 Deer & Squirrels. The men with me killed an Elk, 2 Deer & a Pelican.

Course distance & ref #: Sept 12th.

N. 45° W. 4 Miles to a point of wood on the L. S. Passed an Island in the Center of the river and several sand bars (1) on which we found great difficulty in passing the water being very shallow.

Sept 12th Wednesday 1804 —

A Dark Cloudy Day the wind hard from the N. W. We passed (1) a Island in the middle of the river at the head of which we found great difficulty in passing between the sand bars the Water Swift and Shallow, it took ¾ of the day to make one mile, we camped on the L. S. ops a Village of Barking Prairie Squirrels.

I walked out in the morning and saw several Villages of those little animals, also a great number of Grouse & 3 Foxes, and observed Slate & Coal Mixed, Some very high hills on each side of the river. Rain a little all day.

[146]
walked on Shore with a view to find an old Vulcanoe, Said to be in this neighbourhood by M: J. McKey of S. Charles. I walked on Shore the whole day without Seeing any appearance of the Vulcanoe, in my walk I Killed a Buck Goat [antelope - ED.] of this Countrey, about the hight of the Grown Deer, its body Shorter the Horns which is not very hard and forks \( \frac{2}{3} \) up one prong Short the other round & Sharp arched, and is imediately above its Eyes the Colour is a light gray with black behind its ears down its neck, and its face white round its neck, its Sides and its rump round its tail which is Short & white: Verry actively made, has only a pair of hoofs to each foot, his brains on the back of his head, his Norstrals large, his eyes like a Sheep he is more like the Antelope or Gazella of Africa than any other Species of Goat. Shields killed a Hare like the mountain hare of Europe, weighing \( 6\frac{1}{2} \) pounds (altho pore) his head narrow, its ears large i. e. 6 Inches long & 3 Inches Wide one half of each White, the other & out part a lead Grey from the toe of the hind foot to toe of the for foot is 2 feet 11 Inches, the hith is 1 foot 1 Inch & \( \frac{3}{4} \), his tail long thick & white.\(^1\)

The rain Continued the Greater part of the day in My ramble I observed, that all those parts of the hills which was clear of Grass easily disolved and washed into the river and bottoms, and those hills under which the river runs, Sliped into it and disolves and mixes with the water of the river, the bottoms of the river was covered with the water and mud frome the hills about three Inches deep, those bottoms under the hils which is covered with Grass, also receives a great quantity of mud.

Passed 2 Small Creeks on the L. S. and Camped below the third, (the place that Shannon the man who went a head lived on grapes) Som heavy Showers of rain all wet, had the Goat & rabit Stufed rained all night.

\(^1\) The northern jackass-rabbit (*Lepus campestris*). — Ed.

North 2 Miles to the Mouth of a Creek on the L. S. a point of high land opposit under which we camped.

15th September Saturday 1804—

Set out early passed the mo. of the Creek, and the mouth of White river. (1) Cap. Lewis and my self went up this river a Short distance and crossed, found that this differed very much from the Plat or que courre, threw out but little Sand, about 300 yards wide, the water confin'd within 150 yards, the current regular & Swift much resembling the Missourie, with Sand bars from the Points, a Sand Island in the mouth, in the point is a butifull Situation for a Town 3 gradual assents, and a much greater quantity of timber about the mouth of this river than useal, we concluded to send Some distance up this river detached Sjt. Gass & R. Fields. We proceeded on passed a Small (2) Island Covered with Ceeders on [it] I saw great Numbers of Rabits & Grapes, this Island is Small & Seperated from a large Sand Is'd at its upper point by a narrow Channel; & is Situated Nearest the L. Side. Camped on the S. S. opposit the mouth of a large Creek on which there is more timber than is useal on Creeks of this Size, this Creek raised 14 feet the last rains. I killed a Buck Elk & Deer, this evening is verry Cold, Great Many Wolves of Diffrent sorts howling about us. the wind is hard from the NW. this evening.
16th Sep

N. 72° E. 1½ Miles to a p't on the L. S. and came too (1)

16th of September Sunday 1804 —

We set out very early & proceed'd on 1½ Miles between Sand bars and Came too on the L. S. (1) determind to dry our wet thing's & liten the boat which we found Could not proceed with the present load [as fast as we desired owing to Sand bars] for this purpose we concluded to detain the Perogue we had intended to send back & load her out of the boat & detain the Soldiers untill Spring & Send them from our Winter quarters. We put out those articles which was wet, Chan'd the boat & perogues, examined all the Lockers Bails &c &c &c.

This Camp is Situated in a butifull Plain Serounded with Timber to the extent of ¾ of a mile in which there is great quantities of fine Plumbs. The two men detach'd up the White river joined us here & informed that the [river] as far as they were up had much the appearance of the Missuorie Som Islands & Sands little Timber, [Elm] (much Signs of Beaver, Great many buffalow) & Continud its width, they Saw as well as my self Pine burs & Sticks of Birch in the Drift wood up this river, they Saw also Number of Goats, Such as I Killed, also Wolves near the Buffalow. falling [fallow] Deer, & the Barking Squirils Villages. Cap. Lewis went to hunt & See the Countrey near the Kamp he Killed a Buffalow & a Deer.

Cloudy all day I partly load the empty Perogues out of the Boat. I killed 2 Deer & the party 4 Deer & a Buffalow this we Kill for the Skins to Cover the Perogues, the meat too pore to eat. Cap. Lewis went on an Island above our Camp, this Island is ab! one mile long, with a great perpotion Ceder timber near the middle of it.

I gave out a flannel Shirt to each man, & powder to those who had expended theirs.
This morning set out at an early hour, and come too at \( \frac{1}{2} \) after 7 A. M. on the Lard. shore \( 1 \frac{1}{4} \) miles above the mouth of a small creek which we named Corvus,\(^2\) in consequence of having killed a beatiful bird of that genus near it. we concluded to ly by at this place the ballance of this day and the next, in order to dry our baggage which was wet by the heavy showers of rain which had fallen within the last three days, and also to lighten the boat by transfering a part of her lading to the red perogue, which we now determined to take on with us to our winter residence wherever that might be; while some of the men were employed in the necessary labour others were dressing of skins washing and mending their cloaths &c. Capt. Clark and myself killed each a buck immediately on landing near our encampment; the deer were very gentle and in great numbers in this bottom which had more timber on it than any part of the river we had seen for many days past, consisting of Cottonwood Elm, some indifferent Ash and a considerable quant[ti]ty of a small species of white oak which \([\text{was}]^{3}\) loaded with acorns of an excellent flavor \([\text{having}]^{3}\) very little of the bitter roughness of the nuts of most species of oak, the leaf of this oak is small pale green and deeply indented, (not copied for Dr. Barton) it seldom rises higher than thirty feet is much branched, the bark is rough and thick and of a light colour; the cup which contains the acorn is fringed on it's edges and imbraces the nut about one half; the acorns were now falling, and we concluded that the number of deer which we saw here had been induced thither by the acorns of which they are remarkably fond. almost every species of wild game is fond of the acorn, the Buffaloe Elk, Deer, bear, turkies, ducks, pigians and even the wolves feed on them; we sent three hunters out who soon added eight deer and two Buffalo to our strock of provisions; the Buffaloe

---

Vermillion to Teton

were so pour that we took only the tongues skins and marrow bones; the skins were particularly acceptable as we were in want of a covering for the large perogue to secure the baggage; the clouds during this day and night prevented my making any observations. Serg' Gass and Reubin Fields whom we had sent out yesterday to explore the White river return'd at four o'clock this day and reported that they had followed the meanders of that stream about 12 miles it's general course [is] West, the present or principal channel 150 yards wide; the coulour of the water and rapidity and manner of running resembled the Missouri precisely; the country broken on the border of the river about a mile, when the level planes commence and extend as far as the eye can reach on either side; as usual no timber appeared except such as from the steep declivities of hills, or their moist situations, were sheltered from the effects of the fire. these extensive planes had been lately birnt and the grass had sprung up and was about three inches high. vast herds of Buffaloe deer Elk and Antilopes were seen feeding in every direction as far as the eye of the observer could reach.

White River 17th Sep' Plomb Camp.
Course Distance & referrence
[Not given.—Ed.]

17th of September Monday 1804 —

Dried all our wet articles, this fine Day, Cap' Lewis went out with a View to See the Countrey and its productions, he was out all day he killed a Buffalow and a remarkable Bird (Magpy) of the Corvus Species long tail the upper part of the feathers & also the wings is of a purplish variated Green, the back & a part of the wing feathers are white edged with black, white belly, while from the root of the wings to Center of the back is White, the head nake [neck — Ed.] breast & other parts are black the Beeke like a Crow. ab! the Size of a large Pigion. a butifull thing.

[151]
I took equal altitudes and a meridian altitude. Cap: Lewis returned at Dark, Colter Killed a Goat like the one I killed and a curious kind of Deer (Mule Deer) of a Dark gray Col: more so than common, hair long & fine, the ears large & long, a Small reseptical under the eyes; like an Elk, the Taile about the length of Common Deer, round (like a Cow) a tuft of black hair about the end, this Spec[i]es of Deer jumps like a goat or Sheep

8 fallow Deer 5 Common & 3 Buffalow killed to day. Cap: Lewis saw a hare & killed a Rattle snake in a village of B.[arki— Ed.] Squarels the wind from S. W. Dryed our provisions, Some of which was much Damaged.

[Lewis :]

Monday September 17th. 1804.

Having for many days past confined myself to the boat, I determined to devote this day to amuse myself on shore with my gun and view the interior of the country lying between the river and the Corvus Creek. accordingly before sunrise I set out with six of my best hunters, two of whom I dispatched to the lower side of Corvus creek, two with orders to hunt the bottums and woodland on the river, while I retained two others to accompany me in the intermediate country. one quarter of a mile in rear of our camp which was situated in a fine open grove of cotton wood passed a grove of plumb trees loaded with fruit and now ripe, observed but little difference between this fruit and that of a similar kind common to the Atlantic States. the trees are smaller and more thickly set. this forrest of plumb trees garnish a plain about 20 feet more elivated than that on which we were encamped; this plain extends back about a mile to the foot of the hills one mile distant and to which it is gradually ascending this plane extends with the same bredth from the creek below to the distance of near three miles above parallel with the river, and it is intirely occupied by the burrows of the barking squiril herefore described; this anamal appears here in infinite numbers and the shortness and virdu[r]e of grass gave the
plain the appearance throughout its whole extent of beatifull bowling-green in fine order. it's aspect is S. E. a great number of wolves of the small kind, hawks [hawks — Ed.] and some pole-cats were to be seen. I presume that those anamals feed on this squirril. found the country in every direction for about three miles intersected with deep revenes and steep irregular hills of 100 to 200 feet high; at the tops of these hills the country breaks off as usual into a fine leavel plain extending as far as the eye can reach. from this plane I had an extensive view of the river below, and the irregular hills which border the opposite sides of the river and creek. the surrounding country had been burnt about a month before and young grass had now sprung up to hight of 4 Inches presenting the live green of the spring to the West a high range of hills, strech across the country from N. to S. and appeared distant about 20 miles; they are not very extensive as I could plainly observe their rise and termination no rock appeared on them and the sides were covered with virdu[]e similar to that of the plains this senery already rich pleasing and beatifful was still farther heightened by immence herds of Buffaloe, dear Elk and Antelopes which we saw in every direction feeding on the hills and plains. I do not think I exagerate when I estimate the number of Buffaloe which could be comprehend at one view to amount to 3000. my object was if possible to kill a female Antelope having already procured a male; I pursued my rout on this plain to the west flanked by my two hunters untill eight in the morning when I made the signal for them to come to me which they did shortly after. we rested our selves about half an hour, and regailed ourselves on half a biscuit each and some jirks of Elk which we had taken the precaution to put in our pouches in the morning before we set out, and drank of the water of a small pool which had collected on this plain from the rains which had fallen some days before. we had now after various windings in pursuit of several herds of antelopes which we had seen on our way made the distance of about eight miles from our camp. we found the Antelope extreemly shye and watchfull insomuch that we had been unable to get a shot at them; when at rest
they generally select the most elivated point in the neighbourhood, and as they are watchful and extremly quick of sight and their sense of smelling very acute it is almost impossible to approach them within gunshot; in short they will frequently discover and flee from you at the distance of three miles. I had this day an opportunity of witnessing the agility and the superior fleetness of this animal which was to me really astonishing. I had pursued and twice surprised a small herd of seven, in the first instance they did not discover me distinctly and therefore did not run at full speed, tho’ they took care before they rested to gain an elivated point where it was impossible to approach them under cover, except in one direction and that happened to be in the direction from which the wind blew towards them; bad as the chance to approach them was, I made the best of my way towards them, frequently peeping over the ridge with which I took care to conceal myself from their view the male of which there was but one, frequently incircled the summit of the hill on which the females stood in a group, as if to look out for the approach of danger. I got within about 200 paces of them when they smelt me and fled; I gained the top of the eminence on which they stood, as soon as possible from whence I had an extensive view of the country the antelopes which had disappeared in a steep revene now appeared at the distance of about three miles on the side of a ridge which passed obliquely across me and extended about four miles. so soon had these antelopes gained the distance at which they had again appeared to my view I doubted at first that they were the same that I had just surprised, but my doubts soon vanished when I beheld the rapidity of their flight along the ridge before me it appeared rather the rappid flight of birds than the motion of quadrupeds. I think I can safely venture the assertion that the speed of this animal is equal if not superior to that of the finest blooded courser. this morning I saw

September 18th. Tuesday 1804 —

Wind from the N W. we set out early the boat much lightened, the wind a head proceed on very Slowly (1) Passed an Island about the middle of the river at 1 Mile this Island is about a Mile long, and has a great perportion of red Cedar on it, a Small Creek comes in on the S. S. opposit the head of the Island, proceeded on passed many Sand bars and Camped on the L. S. before night the wind being very hard & a head all Day. the hunters Killed 10 Deer to day and a Prairie Wolf, had it all juarked & Skins Stretch'd after Camping.

I walked on Shore Saw Goats, Elk, Buffalow, Black tail Deer, & the Common Deer, I Killed a Prairie Wolf, about the Size of a gray fox bushey tail head & ears like a Wolf, Some fur Burrows in the ground and barks like a Small Dog.

What has been taken heretofore for the Fox was those Wolves, and no Foxes has been Seen; The large Wolves are very numerious, they are of a light co[l] large & has long hair with Coarse fur.

Some Goats of a Different Kind were seen yesterday great many Porcupin Rabits & Barking Squirils in this quarter. Plumbs & grapes.

1 On this island was the old site of Fort Recovery; on the west bank of the river was Fort Cedar (aux Cèdres), a post of the Missouri Fur Company. — Coques (L. and C., i, p. 122).

2 The prairie wolf, or coyote (Canis latrans), and the great gray Western wolf (C. lupus occidentalis); the latter was wont to prowl about buffalo herds. — Ed.

19th of September Wednesday 1804 —

Set out early, a cool morning verry clear the wind from the S. E. a Bluff on the L. S. here commences a Butifull Country on both Sides of the Missourie. (2) passed a large Island called Prospect Island opposit this Isd the 3 rivers Coms in, passing thro a butifull Plain, here I walked on Shore & Killed a fat Cow & Sent her to the boat and proceeded on to the first of the 3 rivers, this river is about 35 yards wide contains a good deel of water, I walked up this river 2 miles & cross, the bottom is high and rich Some timber, I crossed & returned to the mouth, & proceeded up one mile to the 2d river which is Small 12 yards wide, and on it but little timber, on this Creek the Sioux has frequently Camped, as appears by the Signs. the lands between those two Creeks is a purpendicular bluff of about 80 feet with a butifull Plain & gentle assent back. a Short distance above the 2nd a 3rd Creek Comes into the river in 3 places scattering its waters over the large timbered bottom, this Creek is near the Size of the Middle Creek Containing a greater quantity of water, those rivers is the place that all nations who meet are at peace with each other, called the Seoux pass of the 3 rivers.¹

¹ Thus named, "as the Sioux generally cross the Missouri at this place. These streams have the same right of asylum, though in a less degree than Pipestone Creek already mentioned."—Biddle (i, p 76)

The present names of these streams are (in ascending order) Crow, Wolf, and [156]
The boat proceeded on pass the Island (3) passed a Creek 15 yds. Wide on the L. Side (4) passed a Creek on the L. S. 20 yards wide which I call Elm Creek passing thro' a high Plain (5) passed a Creek on the L. S. 18 yds above which the boat Came too, I joined them late at night, and Call this Creek Night Creek the wind favourable all Day, I killed a fat buck Elk late and could only get his Skin and a Small part of his flesh to Camp. My Servent Killed a Buck, the Crew in the boat Killed 2 buffalow in the river. The Hunters on Shore Killed 4 Deer with black tails one of which was a Buck with two main Prongs on each Side forked equally, which I never before Seen. I saw Several large gangs of Buffalow 2 large Herds of Elk & goats &c. (6) pass a Small Island on the S. opposit to this Island on the L. S. a Creek of about 10 yards wide Coms in passing thro' a plain in which great quantites of the Prickley Pear grows, I call this Creek Prickley Pear Creek, this Isl is called the lower Island it is Situated at the Commencement of what is Called & Known by the Grand de Tortu [Detour] or Big Bend of the Missourie.

20th of September, Thursday 1804—

a fair morning wind from the S. E. detached 2 men to the 1st Creek above the big bend with the horse to hunt and wait our arrival proceeded on passed the lower Island opposit which the Sand bars are very thick & the water Shoal. I walked on Shore with a view of examening this bend crossed at the Narost part which is a high irregular hills of about 180 or 190 feet, this place the gouge of the bend is 1 Mile & a quarter (from river to river or across,) from this high land which is only in the Gouge, the bend is a Butifull Plain thro which I walked, Saw numbers of Buffalow & Goats, I saw a Hare & believe he run into a hole in the Side of a hill, he run up this hill which is Small & has several holes on the Side & I could not see him after, I joined the boat in the evening. passed a Small Island on the L. S. in the N. W. extremity of the bend Called Solitary Island, and Camped late on a Sand Bar near the S. S. R. Fields Killed 1 Deer & 2 Goats one of them a female She Differs from the Mail as to Size being Smaller, with Small Horns, Streght with a Small Prong without any black about the Neck. None of those Goats has any Beard, they are all Keenly made [delicately formed. — BIDDLE], and is butifull.

Course Distance and efft—21st Sep:

S. 70° W. 4½ Miles to the Upper part of a Ceder bottom on the L. S. passed Several Sand bars on both Sides.

N. 50° W. 2½ Miles to a tree on the S. S. passing over a Willow Island & a Creek on the L. S. (1)

West 4½ Miles to a point of Timber on the L. S. Passed Sand bars the river here is verry Shoal and about a Mile Wide. (2) Passed large hard Stone on the Shore on each Side, a Mock Island on the S. S.

21st of September Friday 1804—

at half past one o'clock this morning the Sand bar on which we Camped began to under mind and give way which allarmed the Serjeant on Guard, the motion of the boat awakened me; I got up & by the light of the moon observed that the Sand
had given away both above and below our Camp & was falling in fast. I ordered all hands on as quick as possible & pushed off, we had pushed off but a few minits before the bank under which the Boat & perogus lay give way, which would Certainly have Sunk both Perogues, by the time we made the ops! Shore our Camp fell in, we made a 2d Camp for the remainder of the night. & at Daylight proceeded on to the Gouge of this Great bend and Brackfast, we Sent a man to Measure (step off) the Distance across the gouge, he made it 2,000 yd!, The distance arround is 30 M#. The hills extend thro: the Gouge and is about 200 foot above the water. in the bend as also the opposit Sides both above and below the bend is a butifull inclined Plain, in which there is great numbers of Buffalow, Elk & Goats in view feeding & scipping on those Plains Grouse, Larks & the Prarie bird is Common in those Plains.

We proceeded on passed a (1) Willow Island below the mouth of a Small river called Tylors R about 35 Yd wide which Coms in on the L. S. 6 Miles above the Gouge of the bend, at the Mouth of this river the two hunters a head left a Deer & its Skin also the Skin of a White wolf. We observe an emence number of Plover of Different kind collecting and takeing their flight Southerly, also Brants, which appear to move in the Same Direction. The Cat fish is Small and not so plenty as below.

(2) The Shore on each Side is lined with hard rough Gulley Stone of different Sises, which has roled from the hills & out of Small brooks, Ceder is Common here, This day is warm, the wind which is not hard blows from the S. E., we Camped at the lower point of the Mock Island on the S. S. this now Connected with the main land, it has the appearance of once being an Island detached from the main land Covered with tall Cotton Wood. We Saw Some Camps and tracks of the Seaux which appears to be old, three or four weeks ago, one frenchman I fear has got an abscess on his they [thigh — Ed.], he Complains verrry much we are makeing every exertion to reliev him

The Praries in this quarter Contains great q* of Prickley Pear.
LEWIS AND CLARK JOURNALS  [Sept. 22.

Course Distance & references — 22 ¾

S. 72° W. 5 Miles to a point on the S. S. Passing under a high bluff on the L. Side (1)

West 1 Mile on the S. S. a bottom commencing on the L. S. at the end of this Course

N. 38° W. 4½ Miles to a piece of timber on the S. S. opposit the Lower piece of Ceder Island passed two Islands on the L. S. one ¾ a Mile & the other 3 Miles long called the 3 Sisters ops: a large Creek comes in (2)

N. 30° W. 3 Miles to a piece on S. S. passed Ceder Island Situated nearest the S. S. a trading house (3)

N. 22° E. 2 ¾ Miles to a timber opposit the Lower (L. S.) piece of a Small Island called Goat Island. (4)

22 ¾ of September Saturday 1804—

a thick fog this morning detained us untill 7 oClock passed a butifull inclined Praire on both Sides in which we See great numbers of Buffalow feeding. (1) took the Meridean altitude of the Suns Upper Limb 92°. 50′ 00′. [with] the Sextent the Lat produced from this Observation is 44° 11′ 33′′ 3/10 North.

(2) passed a Small Island on the L. S. imediately above passed a Island Situated nearest the L. S. ab! 3 Miles long, behind this Is on the L. S. a Creek Comes in about 15 yards wide, this Creek and Island are Called the 3 Sisters, a buti-full Plain on both Sides of the river.

(3) passed a Island Situated nearest the S. S. imediately above the last Called Ceder Island this Island is about ½ miles long & nearly as wide Covered with Ceder, on the South Side of this Island Mr. Louiselle a trader from S! Louis built a fort of Ceder & a good house to trade with the Seaux & Wintered last winter; about this Fort I observed a number of Indian Camps in a Conecal form. they fed their horses on Cotton limbs as appears. here our hunters us joined haveing

1 Gass (p. 58) thus describes this post: "The space picketed in is about 64 or 70 feet square, with sentry-boxes in two of the angles. The pickets are 13½ feet above ground. In this square he built a house 45½ by 32½ feet, and divided it into four equal parts, one for goods, one to trade in, one to be used as a common hall, and the other for a family-house." — Ed.
1804] VERMILION TO TETON

killed 2 Deer & a Beaver, they Complain much of the Mineral Substances in the barren hills over which they passed Distroying their mockessons.

(4) we proceeded on and Camp'd late on the S. Side below a Small Island in the bend S. S. Called Goat Island, The large Stones which lay on the Sides of the banks in Several places lay some distance in the river, under the water and is dangerous. &c.

I walked out this evening and killed a fine Deer the Musquitores is verry troublesom in the bottoms.

Course Distance & referencies. — 23rd Sep't

N. 46° W. 3½ Miles to the Mouth of a Creek in the bend to the S. S. passed an Isl' on the S. S. (1) & Sands.
S. 46° W. 1 3/4 Miles to a Coaps of Wood at a Spring in a bend to the L. S.

² Probably referring to a map cited by Coues (L. and C., i, p. xxiii), as made by one Evans in 1804, showing the Missouri River to the Mandans. See our atlas volume, for maps which Lewis and Clark both took with them and made upon the Expedition; one of the former was probably a copy of the Evans map. — Ed.

¹ Now East Medicine Knoll River (a translation of its Indian name); across the Missouri here was the site of old Fort George. — Coues (L. and C., i, p. 127).
Action in Case of necessity, our Perogus went to the Island for the Meet. Soon after the man on Shore run up the bank and reported that the Indians had Stolen the horse. We Soon after Met 5 Indi and ankered out Som distance & Spoke to them informed them we were friends, & Wished to Continue So but were not afraid of any Indians, Some of their young men had taken the horse Sent by their Great father for their Cheif and we would not Speek to them untill the horse was returned to us again.

passed (2) a Island on the S. S. on which we Saw Several Elk, about 1½ Miles long Called Good humered [humoured] Isl Came to about 1½ Miles above off the Mouth of a Small river about 70 yards wide Called by Mr. Evens the Little Mississou [Missouri] River, The Tribes of the Seauex Called the Teton, is Camped about 2 Miles up on the N. W. Side, and we Shall Call the River after that Nation, Teton. This river is 70 yards wide at the mouth of Water, and has a considerable Current we anchored off the mouth

the french Perogue Come up early in the day, the other did not Get up untill in the evening Soon after we had Come too. I went & Smoked with the Chiefs who came to See us here all well, we prepare to Speek with the Indians tomorrow at which time we are informed the Indians will be here, the French Man who had for Some time been Sick, began to bleed which alllarmed him ¾ of our party Camped on board the remainder with the Guard on Shore.

1 Also known as Bad River. Near its mouth was Fort Pierre (begun in 1831), named for Pierre Chouteau. — Ed.
A fair Morning the Wind from the S. E. all well, raised a Flag Staff & made a orning or Shade on a Sand bar in the mouth of Teton River, for the purpose of Speeking with the Indians under, the Boat Crew on board at 70 yards Distance from the bar The 5 Indians which we met last night Continued, about 11 OClock the 1st & 2nd Chief Came we gave them Some of our Provisions to eat, they gave us great Quantitis of Meet Some of which was Spoiled we feel much at a loss for the want of an interpeter the one we have can Speek but little.

Met in Council at 12 oClock and after Smokeing, agreeable to the usual Custom, Cap. Lewis proceeded to Deliver a Speech which we [were — Ed.] oblige[d] to Curtail for want of a good interpeter all our party paraded. gave a Medal to the Grand Chief Call'd in Indian Un ton gar Sar bar in French Beeffe nue [Beuffle noir] Black Buffalow. Said to be a good Man, 2nd Chief Torto hon gar or the Parti sin or Partizan bad the 3rd is the Beeffe De Medison [Beuffe de Medecine] his name is Tar ton gar Wa ker 1 Considerable Man, War zing go. 2 Considerable Man 2nd Bear — Mato co que par.

Envited those Cheifs on board to Show them our boat and such Curiosities as was Strange to them, we gave them ¼ a glass of whiskey which they appeared to be very fond of, Sucked the bottle after it was out & Soon began to be trouble-som, one the 2nd Cheif assumeing Drunkness, as a Cloake for his rascally intentions I went with those Cheifs (in one of the [164]
Perogues with 5 men — 3 & 2 Ind’s) (which left the boat with great reluctance) to Shore with a view of reconciling those men to us, as Soon as I landed the Perogue three of their young Men Seased the Cable of the Perogue, (in which we had presents &c) the Chiefs Sold! [each Chief has a soldier] Huged the mast, and the 2d Chief was very insolent both in words & justices (pretended Drunkenness & staggered up against me) declaring I should not go on, Stateing he had not receved presents sufficient from us, his justices were of Such a personal nature I felt My self Compeled to Draw my Sword (and Made a Signal to the boat to prepare for action) at this Motion Capt Lewis ordered all under arms in the boat, those with me also Showed a Disposition to Defend themselves and me, the grand Chief then took hold of the roap & ordered the young Warrers away, I felt My Self warm & Spoke in very positive terms. Most of the Warriers appeared to have ther Bows strung and took out their arrows from the quiver. as I (being surrounded) was not permited (by them) to return, I Sent all the men except 2 Inp! [Interpreters] to the boat, the perogue Soon returned with about 12 of our determined men ready for any event, this movement caused a no: of the Indians to withdraw at a distance, (leaving their chiefs & soldiers alone with me). Their treatment to me was very rough & I think justified roughness on my part, they all lift my Perogue, and Council with themselves the result I could not lern and nearly all went off after remaining in this Situation Some time I offered my hand to the 1. & 2. Chiefs who refus’d to receve it. I turned off & went with my men on board the perogue, I had not pros more the [than] 10 paces before the 1st Cheif 3d & 2 Brave Men Waded in after me. I took them in & went on board 1 We proceeded on about 1 Mile & anchored out off a Willow Island placed a guard on Shore to protect the Cooks & a guard in the boat, fastened the Perogues to the boat, I call this Island bad humered Island as we were in a bad humer.

1 This paragraph is misplaced in the MS; it is written on the next page after that containing the first part of this council with the Indians. We have placed it in proper position. — Ed.
Course Distance & Rererences — 26th Sept 1804 bad4 Is4

N. 28° W. 4½ Miles to a p' on the L. S. passing a Small Willow Island at 1½ Miles & Several Sand bars the Water Shallow came too (1)

26th of September Wednesday 1804 —

Set out early proceeded on and Came to by the Wish of the Chiefs for to let their Squars [sowas] & boys see the Boat and Suffer them to treat us well great numbers of men womin & children on the banks viewing us, these people Shew great anxiety, they appear Spritely, Generally ill looking & not well made their legs [arms] Small generally, [high cheek bones, prominent eyes] they Grese & Black [paint] themselves [with coal] when they dress [the disting. men] make use of a hawks feathers [Calumet feather adorned with porcupine quills & fastened to the top of the head & falls backwards] about their heads. the men [wear] a robe & each a polecats Skin, for to hold ther Bois roule [Bois roule] for Smoking,1 fond of Dress & Show badly armed with fuseses, &c. The Squaws are Chearfull fine look'g womin not hand­ some, High Cheeks Dressed in Skins a Peticoat and roab which foldes back over ther Sholder, with long wool, do all their laborious work & I may Say perfect Slaves to the Men, as all Squars of Nations much at War, or where the Womin are more noumerous than the men.2 after Comeing too Cap! Lewis & 5 men went on Shore with the Cheifs, who appeared disposed to make up & be friendly, after Captain Lewis had been on Shore about 3 hours I became uneasy for fear of Deception & Sent a Serjeant to See him and know his treat­ ment which he reported was friendly, & they were prepareing for a Dance this evening The[y] made frequent Solicitations for us to remain one night only and let them Show their good

1 Bois roule, literally “rolled wood,” — better known by its Algonkin name, Kinkinik (Kinnikinic), — a mixture of tobacco with scrapings or shavings from various woods, especially that of sumac, red osier, and other dogwoods, and bear­ berry. — Ed.

2 Biddle describes in much greater detail (i, pp. 84–90) the costumes and mode of life of these Teton Indians. — Ed.
disposition towards us, we determined to remain, after the return of Cap' Lewis, I went on Shore on landing I was received on a elegant painted B.[buffalo] Robe & taken to the Village by 6 Men & was not permitted to touch the ground until I was put down in the grand Conceill house on a White dressed Robe. I saw Several Maha Prissners and Spoke to the Chiefs [telling them that — E.D.] it was necessary to give those prisoners up & become good friends with the Mahas if they wished to follow the advice of their great father. I was in Several Lodges neatly formed as before mentioned as to the Baureily (Bois brulé — Yankton) Tribe. I was met (on landing from the boat) by about 10 Well Dress'd young Men who took me up in a roabe Highly adecrated and Set me Down by the Side of their Chief on a Dressed Robe in a large Council House, this house formed a 3/4 Circle of Skins Well Dressed and Sown together under this Shelter about 70 Men Set forming a Circle in front of the Chiefs a plac of 6 feet Diameter was Clear and the pipe of peace raised on (forked) Sticks (about 6 or 8 inches from the ground) under which there was swans down scattered, on each Side of this Circle two Pipes, the (two) flags of Spain 2 & the Flag we gave them in front of the Grand Chief a large fire was near in which provisions were Cooking, in the Center about 400 lbs of excellent Buffalo Beef as a present for us. Soon after they Set me Down, the Men went for Cap' Lewis brought him in the same way and placed him also by the Chief in a few minits an old man rose & Spoke approving what we had done & informing us of their situation requesting us to take pity on them & which was answered. The great Chief then rose with great State [speaking — E.D.] to the Same purpote as far as we Could learn & then with Great Solemnity took up the pipe of Peace & after pointing it to the heavins the 4 quarters of the Globe & the earth, he made Some dissertation, (then made a Speech) lit it and presented the Stem to us to Smoke, when the Principal Chief Spoke with the Pipe of Peace he took in one hand some of the most Delicate parts of the Dog which was prepared for the fiest & made a Sacrifice to the flag. [this sentence misplaced in MS., but properly placed by us. — E.D.]
after A Smoke had taken place, & a Short Harange to his people, we were requested to take the Meal (& then put before us the dog which they had been cooking, & Pemigion ¹ & ground potatoe in Several platters 'Pem' is Buff' meat dried or jerked pounded & mixed with grease raw. Dog Sioux think great dish used on festivals eat little of dog—pem: & pot' good.) We Smoked for an hour (till) Dark & all was Cleared away a large fire made in the Center, about 10 Musitions playing on tambereens (made of hoops & Skin stretched), long Sticks with Deer & Goats Hoofs tied so as to make a glingling noise, and many others of a Similer Kind, those Men began to Sing, & Beet on the Tamboren, the Women Came foward highly Deckerated in their Way, with the Scalps and Tropies of War of their fathers Husbands Brothers or near Connections & proceeded to Dance the War Dance (Women only dance jump up & down—five or six young men selected accompanied with songs the tamborin making the song extempore words & music every now & then one of the com' come out & repeat some exploit in a sort of song—this taken up by the young men and the women dance to it) which they done with great Cheerfullness untill about 12 oClock when we informed the Cheifs that they were [must be] fatigued [amusing us] &c. they then retired & we Accomp: by 4 Cheifs returned to our boat, they Stayed with us all night. Those people have Some brave men which they make use of as Soldiers those men attend to the police of the Village Correct all errors I saw one of them to day whip 2 Squars, who appeared to have fallen out, when he approach: all about appeared to flee with great turrow [terror]. at night they keep two 3, 4 5 men at different Distances walking around Camp Singing the accurrunces of the night All the Men on board 100 paces from Shore Wind from the S. E. moderate one man verry sick on board with a Dangerass Abscess on his Hip. All in Spirits this evening.

In this Tribe I saw 25 Squars and Boys taken 13 days ago in a battle with the Mahars in this battle they Destroy'd 40 Lodges, Killed 75 Men, & som boys & Children, & took 48

¹ Better known as "pemmican." — Ed.
Prisoners Womin & boys which they promis both Cap' Lewis and my self Shall be Delivered up to Mr. Durion at the Bous rulie (Bois brule) Tribe, those are a retched and Dejected looking people the Squars appear low & Corse but this is an unfavourable time to judge of them. We gave our Mahar intep. some fiew articles to give those Squars in his name Such as Alls, needles &c. &c.

I saw & eat Pemitigon the Dog, Grou. potatoe made into a Kind of homney, which I thought but little inferior. I also Saw a Spoon Made of a horn of an Animell of the Sheep Kind (the mountain ram of Argalia) the Spoon will hold 2 quarts.

27th of Sept. Thursday 1804 —

I rose early after a bad nights Sleep found the Chief[s] all up, and the bank as useal lined with Spectators we gave the 2 great Cheifs a Blanket a peace, or rether they took off agreeable to their Custom the one they lay on and each one Peck of corn after Brackfast Cap' Lewis & the Cheifs went on Shore, as a very large part of their nation was coming in, the Disposition of whome I did not know one of us being sufficient on Shore, I wrote a letter to Mr. P. Durion & prepared a meadel & Some Coms'. (Certificates) & Sent to Cap Lewis at 2 oClock Cap' Lewis Returned with 4 Chiefs & a Brave Man (Consid' Man) named War cha pa or on his Guard when the friends of those people [the Síoux] die they run arrows through their flesh above and below their elbows as a testimony of their Grief.

after Staying about half an hour, I went with them on Shore, Those men left the boat with reluctience, I went first to the 2d Cheifs Lodge, where a crowd came around after Speeking on various Subjects I went to a principal mans lodge from them to the grand Chiefs lodge, after a few minits he invited me to a Lodge within the Circle in which I Stayed with all their principal Men untill the Dance began, which was Similer to the one of last night performed by their women with poles.

LEWIS AND CLARK JOURNALS [Sept. 27]

(in their hands) on which Scalps of their enemies were hung, Some with the Guns Spears & War empliments of (taken by) their husbands [&c.] in their hands.

Cap' Lewis Came on Shore and we Continued untill we were Sleepy & returned to our boat, the 2nd Chief & one principal Man accompanied us, Those two Indians accompanied me on board in the Small Perogue; Cap' Lewis with a guard Still on Shore the man who Steered not being much acustomed to Steer, passed the bow of the boat & the perege Came broad Side against the Cable & broke it which obliged me to order in a loud voice all hands up & at their ores, my preemptry order to the men and the bustle of their getting to their ores allarm'd the Cheifs, together with the appearance of the Men on Shore, as the boat turn'd The Cheif hollowaed & allarmed the Camp or Town informing them that the Mahars was about attacking us (them). In about 10 minits the bank was lined with men armed the 1st Cheif at their head, about 200 men appeared and after about ½ hour returned all but about 60 men who continued on the bank all night, the Cheifs Cont'd all night with us. This allarm I as well as Cap' Lewis Considered as the Signal of their intentions (which was to Stop our proceeding on our journey and if Possible rob us) we were on our Guard all night, the misfortune of the loss of our Anchor obliged us to Lay under a falling bank much expos'd to the accomplishment of their hostile intentions. P. C. our Bowman who c'd Speek Mahar informed us in the night that the Maha Prisoners informed him we were to be Stoped. we Shew as little Sighns of a Knowledge of their intentions as possible all prepared on board for any thing which might hapen, we kept a Strong guard all night in the boat, no Sleep

23rd of September 1804 Friday—

Made many attemps in different ways to find our anchor, but Could not, the Sand had Covered it, from the Misfortune of last night our boat was laying at Shore in a verry unfavourable Situation, after finding that the anchor Could not be found we determinded to proceed on, with great difficuelty got
the Chiefs out of our boat, and when we was about Setting out the Class Called the Soldiers took possession of the Cable the 1st Chief which was Still on board, & intended to go a Short distance up with us. I told him the men of his nation Set on the Cable, he went out & told Cap' Lewis who was at the bow the men Who Set on the rope was Soldiers, and wanted Tobacco Cap' L. [said] would not agree to be forced into any thing, the 2d Chief Demanded a flag & Tobacco which we refus'd to Give Stating proper reasons to them for it after much Difficulty— which had nearly reduced us to necessity to hostilites I threw a Carrot of Tobacco to is' Chief took the port fire from the gunner. Spoke so as to touch his pride The Chief gave the Tobacco to his Soldiers & he jerked the rope from them and handed it to the bowsman we then Set out under a Breeze from the S. E. about 2 miles up we observed the 3rd Chief on Shore beckining to us we took him on board he informed us the rope was held by the order of the 2d Chief who was a Double Spoken man, Soon after we Saw a man Coming full Speed, thro' the plains left his horse & proceeded across a Sand bar near the Shore we took him on board & observed that he was the Son of the Chief we had on board we Sent by him a talk to the nation Stating the cause of our hoisting the red flag & the white, if they were for peace Stay at home & do as we had Directed them, if the[y] were for war or were Deturmined to stop us we were ready to defend our Selves, we halted one hour & 1/2 on the S. S. & made a Substitute of Stones for a anchor, refreshed our men and proceeded on about 2 Miles higher up & Came to a verry Small Sand bar in the middle of the river & Stayed all night, I am verry unwell for want of Sleep Deturmined to Sleep to night if possible, the Men Cooked & we rested well.

Course Distance & ref'd

N. 33 W. 3 Miles to the extmt of a Sand bar on the L. S. passed a Willow Isl on the L. S. at the Comt of the Course.
S. 805 W. 3 Mls to an object on the bank in a bend to the S. S. at 6 Some woods, ops the High land on the L. S. Camped.
Set out early. Some bad sand bars. Proceeded on at 9 o’clock. We observed the 2d Chief & 2 principal men. One man & a squaw on shore, they wished to go up with us as far as the other part of their band, which they said was on the river a head not far distant. We refused stating very sufficient reasons and was plain with them on the subject. They were not pleased observed that they would walk on shore to the place we intended to camp to night. We observed it was not our wish that they should for if they did we could not take them or any other Tetons on board except the one we had now with us who might go on shore whenever he pleased. They proceeded on, the Chief on board asking for a twist of tobacco for those men we gave him $\frac{1}{2}$ of a twist, and sent one by them for that part of their band which we did not see, & continued on. Saw great numbers of elk at the mouth of a small creek called No timber C—as no timber appeared to be on it. Above the mouth of this creek (a Ricara band of) the Panies had a village 5 years ago, (no remains but the mound which surrounded the town.) The 2d Chief came on the sand bar & requested we would put him across the river, I sent a perogue & crossed him & one man to the S. S. and proceeded on & came too on a sand bar on about $\frac{3}{4}$ mile from the main shore & put on it 2 sentinals. Continued all night at anchor. (We substitute large stones for anchors in place of the one we lost all in high spirits &c.)

30th of Sep! Sunday 1804 —

Set out this morning early had not proceeded on far before we discovered an Ind? running after us, he came up with us at 7 oClock & requested to come on bord and go up to the Recorees 2 we refused to take any of that band on board if he chose to proceed on Shore it was verry Well Soon after I discovered on the hills at a great distance great numbers of Indians which appeared to be makeing to the river above us, we proceeded on under a Double reefed Sail, & some rain at 9 oClock observed a large band of Indians the Same which I had before seen on the hills incamping on the bank the L. S. we Came too on a Sand bar Brackfast & proceeded on & Cast the anchor opposit their Lodge at about 100 yards distant, and informed the Indians which we found to be a part of the Band we had before Seen, that (we) took them by the hand and Sent to each Chief a Carrot of tobacco, as we had been treated badly by some of the band below, after Staying 2 days for them, we Could not delay any time, & referred them to Mr. Durion for a full account of us and to here our Talk Sent by him to the Tetons, those were verry selicitious for us to land and eate with them, that they were friendly &c. &c. we ap-

1 Now Cheyenne. — Ed.
2 Otherwise called Ricaree, Ree, or, more correctly, Arikara; Lewis says ("Statistical View," p. 23) that they are "the remains of ten large tribes of Panias (Pawnees);" and estimates that they then (1806) numbered 500 warriors, or 2,000 souls. Cf. Biddle's account of their migrations (5, 104). — Ed.
poligised & proceeded on,¹ Sent the Peroge to Shore above with the Tobacco & Deliv'ed it to a Sold'r of the Chief with us Several of them ran up the river, the Chf on board threw them out a Small twist of Tobacco & told them to go back & open ther ears. they rec[e]ved the Tobacco & returned to their lodges. we saw great numbers of white Guls This day is Cloudy & rainy. refresh the men with a glass of whisky after Brackfast.

We Saw about 6 Miles above 2 Indians who Came to the bank and looked at us about 1/2 an hour & went over the hills to the S. W. we proceeded on under a verry Stiff Breeze from the S. E., the Stern of the boat got fast on a log and the boat turned & was verry near filling before we got her righted, the waves being verry high, The Chief on board was So frighten at the Motion of the boat which in its rocking Caused Several loose articles to fall on the Deck from the lockers, he ran off and hid himself, we landed, he got his gun and informed us he wished to return, that all things were cleare for us to go on, we would not see any more Tetons &c. we repeated to him what had been Said before, and advised him to keep his men away, gave him a blanket a Knife & some Tobacco, Smok'd a pipe & he Set out. We also Set Sale and Came to at a Sand bar, & Camped, a verry Cold evening, all on guard.

Course Distance & reference — 1st October

¹ Passed 60 Lodges of Tetons, the remainder of the band. — Clark (memorandum on p. 225 of Codex C).
² In MS., these figures are misplaced. — Ed.
³ Erroneously thus named, from the resemblance of the French word chien (dog) to the tribal name Cheyenne. — Ed.

[ 174 ]
Sand bars are so numerous, that it is impossible to describe them, & think it unnecessary to mention them.

The wind blew hard all last night from the S. E. very cold. Set out early the wind still hard, passed a large Island in the middle of the river (1) opposite the lower point of this Island the Recreces formerly lived in a large Town on the L. S. (remains only a mound circular walls 3 or 4 feet high) above the head of the Island about 2 miles we passed the (2) River Chien (or Dog River) (Chayenne) L. S. this river comes in from the S. W. and is about 400 yards wide, the Current appears gentle, throwing out but little Sands, and appears to throw out but little water the heads of this River is not known (in the second range of the Côte Noir its course generally about East. So called from the Chayenne Indians who live on the heads of it) a part of the nation of Dog Indians live some distance up this river, the precise distance I can't learn, above the mouth of this river the Sand bars are thick and the water Shoal the river Still very wide and falling a little we are obliged to haul the boat over a Sand bar, after making several attempts to pass the wind so hard we came too & stayed 3 hours after it slackened a little we proceeded on round a bend, the wind in the after part of the Day a head. (2) passed a Creek on the L. S. which we call the Sentinal, this part of the river has but little timber, the hills not so high, the Sand bars more numerous, & river more than one mile wide including the Sand bars. (2) pass a small Creek above the latter which we call lookout C. Continued on with the wind immediately a head, and came too on a large Sand bar in the middle of the river, we saw a man opposite to our Camp on the L. S. which we discover to be a Frenchman, a little of[f] (from Shore among) the Willows we observed a house, we call to them to come over, a boy came in a canoe & informed that 2 Frenchmen were at the house with good[s] to trade with the Seauex which he expected down from the rickerrees every day, several large parties of Seauex Set out from the trees for this place to trade with those men.
LEWIS AND CLARK JOURNALS  [Oct. 1

This M. Jon Vallie\(^1\) informs us that he wintered last winter 300 Leagues up the Chien River under the Black mountains, he informs that this river is very rapid and difficult even for Perogues [Canooes] to ascend and when rising the Swells is very high, one hundred Leagues up it forks one fork comes from the S. the other at 40 Leagues above the forks enters the black Mountain. The Countrey from the Missourie to the black mountains is much like the County on the Missourie, less timber. & a great perpotion of Ceder.

The black mountains he says is very high, and Some parts of it has Snow on it in the Summer great quantities of Pine Grow on the Mountains, a great Noise is heard frequently on those Mountains\(^2\). No beever on Dog river, on the Mountains great numbers of goat, and a kind of anamale with large circular horns, this anamale is nearly the Size of an [Small] Elk. [Argalea] White bears is also plenty. The Chien (Chayenne) Inds are about 300 Lodges\(^2\) they inhabit this river principally, and Steel horses from the Spanish Settlements, to the S W. this excursion they make in one month the bottoms & Sides of R Chien is corse gravel. This frenchman gives an account of a white booted turkey an inhabitant of the Cout Noir (Prairie Cock)

1st of October Monday 1804 at the Mouth of River Chien or Dog R\(^8\) —

We proceeded now from the mouth of this river 11 miles and camped on a Sand bar in the river opposit to a Trading house very windy & cold. 11 miles above — Chien R\(^8\) —

\(^1\) Evidently meant for Jean Vallé — probably a relative of the François Vallé who was commandant at Ste. Genevieve at the time when that post was delivered by the Spaniards to the United States authorities. — Ed.

\(^2\) The Cheyenne tribe is (like the Arapaho) of Algonquian stock. Powell thinks that these savages, having early separated from their kindred at the North, forced their way through hostile tribes, across the Missouri, into the Black Hills country — thus locating between the Siouan and the Shoshonean tribes. See Mooney's account of this tribe, in U. S. Bur. Ethnol. Rep., 1892-93, pp. 1023-1027. — Ed.

\(^8\) This paragraph is found on p. 2 of Codex C. — Ed.

[ 180 ]
6th October Saturday 1804. —

A cool morning wind from the North. Set out early passed a willow Island (1) Situated near the S. Shore at the upper point of Som timber on the S. S. many large round stones near the middle of the river, those stones appear to have been washed from the hills (2) passed a Village of about 80 neet Lodges covered with earth and picketed around, those loges are Spacious [spacious — Ed.] of an Octagon form as close together as they can possibly be placed and appear to have been inhabited last Spring, from the Canoes of Skins Mats buckits &c. found in the lodges, we are of oppinion they were the recceries We found Squashes of 3 Different Kinds growing in the Village, one of our men Killed an Elk close by this Village, I saw 2 wolves in persute of another which appeared to be wounded and nearly tired, we proceeded on found the river Shole we made Several attempts to find the main Channel between the Sand bars, and was obliged at length to Drag the boat over to Save a league which we must return to get into the deepest Channel, we have been obg4 to hunt a Chanl for Some time past the river being devided in many places in a great number of Chanels, Saw Gees, Swan, Brants, & Ducks of Different Kinds on the Sand bars to day, Cap' Lewis walked on Shore Saw great numbers of Praire hens, I observe but fiew Gulls or Pleover in this part of the river, The Corves or Magpye is verry Common in this quarter.

We camped on a large Sand bar off the mouth of Beaver or Otter Creek, on the S.S. this creek is about 22 yards wide at the mouth and contains a greater perpotion of Water than common for creeks of its Sise1

Orders October the 8th 1804.

Robert Frazer being regularly inlisted and haveing become one of the Corps of Vollenteers for North-Western Discovery, he is therefore to be viewed & respected accordingly; and will be anexed to Sergeant Gass's mess.

W'n CLARK Cpl &c.
MERIWETHER LEWIS
Cap: 1st U.S. Reg't Infty

1 Joseph Gravelines, a trader residing among the Arickara tribe, in company with Antoine Tabeau (Tabo), who is mentioned below. — Ed.

[184]
[Clark:

River Maropa 9th of October 1804. Tuesday—

A windey rainey night, and cold, So much so we could not speek with the Indians to day the three great Chiefs and many others came to see us to day, we gave them some tobacco and informed them we would speek on tomorrow, the day continued Cold & windey some rain. Sorry Canoos of Skins passed down from the 2 Villages a short distance above, and many came to view us all day, much astonished at my black Servent, who did not lose the opportunity of [displaying — Ed.] his powers Strength &c. &c. this nation never saw a black man before.

Several hunters came in with loades of meat, I observed several Canoos made of a Single Buffalow Skin with 3 thre squares Cross the river to day in waves as high as I ever saw them on this river, quite uncomposed I have a Slite Plursie this evening very cold &c. &c.

1st Chiefs name Ka kauissassa (lighting Crow)
2d do do Pocasse (or Hay)
3d do do piaketa (or Eagles feather)

10th of October Wednesday 1804.

A fine morning wind from the S.E. at about 11 o’Clock the wind shifted, to the N. W. we prepare all things ready to speek to the Indians, Mr. Tabo & Mr. Gravolin came to brack-

1 By way of amusement he told them that he had once been a wild animal, and caught and tamed by his master; and to convince them showed them feats of strength which added to his looks made him more terrible than we wished him to be. — Biddle (i, p. 101).

In a rare pamphlet entitled Adventures of Zenas Leonard (Clearfield, Pa., 1839) — for information regarding which see Chittenden’s Amer. Fur Trade, i, p. 397 — is an account of a negro residing (1832-34) in the Crow village at the junction of Bighorn and Stinking rivers, who apparently was Clark’s servant York. He told Leonard that he first went to that country with Lewis and Clark, with whom he returned to Missouri; that he afterward accompanied a trader up the Missouri, and had remained with the Indians ever since (about ten or twelve years). He had, when Leonard saw him, four Indian wives, and possessed much reputation and influence among the Crows, from whom he secured the return of some horses which they had stolen from Leonard’s party. — Walter B. Douglas (St. Louis).

2 Wind blew hard this morning drove the boat from her anker, to shore. — Clark (memorandum on p. 224 of Codex C).
fast with us the Cheefs &c. came from the lower Town, but none from the 2 upper Towns, which is the largest, we Continue to delay & wait for them at 12 oClock Despatchd Gravelin to envite them to come down, we have every reason to believe that a gellousy exists between the Villages for fear of our makeing the 1st Cheif from the lower Village, at one oClock the Cheifs all assembled & after Some little Cerremony the council Commenced, we inform'd them what we had told the others before i.e. Ottoes & Seaux. made 3 Cheif 1 for each Village; gave them presents. after the Council was over we Shot the air guns which astonished them much, the[y] then Departed and we rested Secure all night, Those Indians wer much astonished at my Servent, they never Saw a black man before, all flocked around him & examind him from top to toe, he Carried on the joke and made himself more turribal than we wished him to doe. Those Indians are not fond of Spirt' Licuer. of any kind

11th October Thursday 1804 —

a fine morning the wind from the S.E. at 11 oClock we met the Grand Cheif in Council and he made a Short Speech thanking us for what we had given him & his nation promissing to attend to the Council we had given him & informed us the road was open & no one dare Shut it, & we might Departe at pleasure, at 1 oClock we Set out for the upper Villages 3 miles distant, the Grand Cheif & nephew on board, proceeded on at 1 mile took in the 2d Cheif & Came too off the first [second] Village Separated from the 3d by a Creek after arrangeing all matters we walked up with the 2d Cheif to his Village, and Set talking on Various Subjects untill late we also visited the upper or 3d Village each of which gave us Something to eate in their way, and a few bushels of Corn Beens &c. &c. after being treated by every civility by those people who are both pore & Durtey we returned to our boat

1 Much pleased, the french Chief lost his presents by his Skin Canoe oversetting, shot the air gun, the men traded some few articles for Robes had the Corn mill set up & shewed the Ind its operation after Speaking to them &c. — CLARK (at supra).
at about 10 oClk. P M. informing them before we Departed that we would Speek to them tomorrow at there Seperate Villages, Those people gave us to eate bread made of Corn & Beens, also Corn & Beans boil a large Been (of) which they rob the mice of the Prairie (who collect & discover it) which is rich & verry nurishing also [squashes &c. all Tranquillity.

10th October Fri 1804 —

I rose early after breckfast we joined the Indians who were waiting on the bank for us to come out and go and council, we accordingly joined them and went to the house of the 2nd Chief Lassel where there was many Cheif and Warriers & [they made us a present of — BIDDLE] about 7 bushels of Corn, a pr. of Leagins, a twist of their Tobacco, & Seeds of 2 Kind of Tobacco¹ we Set Some time before the Councill Commenced this man Spoke at Some length declaring his dis­tion to believe and prosee our Councill, his intention of going to Visit his great father acknowledged the Satisfaction in receiving the presents &c. rais'g a Doubt as to the Safty in passing the Nations below particularly the Souex. requested us to take a Chief of their nation and make a good peace with Mandins & nations above. after answering those parts of the 2^st Cheifs Speech which required it, which appeared to give general Satisfation we went to the Village of the 3^rd Chief and as usial Some Serimony took place before he Could Speek to us on the Great Subject. This Chief Spoke verry much in the [same] Stile on nearly the Same Subjects of the other Chief

¹ Their tobacco is different from any I had before seen; it answers for smoking, but not for chewing. — GASp (p. 73).
who Set by his Side, more Sincere & pleasantly, he presented us with about 10 bushels of Corn\(^1\) Some beans & [s]quashes all of which we accepted with much pleasure, after we had ans\(^4\) his Speech & give them Some account of the Magnitude & power of our Countrey which pleased and astonished them verry much we returned to our boat, the Chiefs accompanied us on board, we gave them Some Sugar a little Salt and a Sun Glass, & Set 2 on Shore & the third proceeded on with us to the Mandens by name [blank space in MS.] at 2 oClock we Set out the inhabitants of the two Villages Viewing us from the banks, we proceeded on about 9\(\frac{3}{4}\) miles and Camped on the S.S. at Some woods passed, the evening Clear & pleasant Cool.

The Nation of the Rickeries (Rickaras) is about 600 men (M: Taboe says, I think 500 men) (M: T‘abat is right) able to bear arms a Great perportion of them have fusees they appear to be peacefull, their men tall and perpotiend,\(^2\) woman Small and industerous, raise great quantities of Corn Beens Simmins\(^3\) &c. also Tobacco for the men to Smoke they collect all the wood and do the drugery as Common amongst Savages.

This nation is (two villages are) made up of 10 (nine) Different Tribes of the Pania (Panies), who had formerly been Separate, but by Commotion and war with their neighbours have Come reduced and compelled to come together for protection. The currupption of the language of those different Tribes has So reduced the language that the Different Villages do not understand all the words of the others. Those people are Durtey, Kind, pore, & extravigent. pursessing national pride, not beggarley recive what is given with great pleasure, Live in warm houses, large and built in an oxigon [octagon] form forming a cone at top which is left open for the smoke

---

\(^1\) Recive Some Corn from the 2\(^e\) & 3\(^d\) Chf. about 20 bushels. — Clark (memorandum on p. 224 of Codex C).

\(^2\) Gass says of the Arikara (pp. 73, 74) that “they are the best-looking, most cleanly, most friendly and industrious Indians I have ever seen on the voyage.” — Ed.

\(^3\) A form of “simlin” or “simnel,” a name used in the Southern States for summer squashes. — Ed.
to pass, those houses are Generally 30 or 40 foot Diamiter, Cov'd with earth on poles willows & grass to prevent the earths passing thro'.¹ Those people express an inclination to be at peace with all nations. The Seaux who trade the goods which they get of the British Traders for their Corn,² and [have] great influence over the Rickeres, poison their minds and keep them in perpetual dread.

I saw Some of the Chien (Chyenne) or Dog Indians, also a man of a nation under the Court Nue. This nation is at war with the Crow Indians & have 3 children prisoners.

a curious custom with the Souix as well as the rickeres is to give handsom squars to those whome they wish to Show some acknowledgements to. The Seauex we got clare of without taking their squars, they followed us with Squars two days. The Rickores we put off during the time we were at the Towns but 2 [handsom young] Squars were Sent by a man to follow us, they came up this evening, and pursisted in their civilities.³

Dress of the men of this nation is Simply a p' mockerson, Leagin, flap in front & a Buffalow robe, with ther hair arms & ears Deckorated.

The womin, wore Mockersons leagins fringed and a Shirt of Goat Skins, Some with Sleaves this garment is longe & Gen'l! white & fringed, tied at the waste[,] with a roabe, in Summer without hair.

¹ Cf. the more detailed descriptions of these huts given by Biddle (i, p. 106), Gass (p. 72), and Brackenridge (Louisiana, p. 248). — Ed.

² The English traders not only traffic with the Indians about the shining [Rocky] mountains, but they have extended it to the Mandans on the Missouri, and to several other tribes both above and below them. The Spaniards also from Santa Fé occasionally traffic with the Indians about the waters of the Kansas, as likewise with those on the river Platte. — Stoddard (Louisiana, pp. 453, 454).

³ Brackenridge says (Louisiana, p. 247) : "It is part of their hospitality, to offer the guest their wife, sister, or maid servant, according to the estimation in which the guest is held, and to refuse, is considered as treating the host with contempt." This was a custom widely prevalent among Indian tribes, especially those of the Far West. Biddle says (i, p. 105) that Arikara regarded such intercourse with strangers as disgraceful, when occurring without the husband's or brother's consent.— Ed.
Names of the nations who come to the Ricares to trafick and bring Horses & robes

1 Kun. na-nar-Web — (Gens des vach)\(^1\) Blue beeds.
2 Noo-tar-wau — Hill Climbers
3 Au-ner-hoo — the people who pen Buffaloes to catch them
4 To-cho-wab-coo — Fox Indians
5 To-pob-cass — white hair's
6 Cat-tar-kab — Paducar.
7 Ki-e-wah — Tiding Indians
8 Too-war-sar — Skin pricks
9 Sher ba (chien) — The village on the other side
10 We bee sken (chien) — The villagers on this side

Those nations all live on the praries from S W by S to West of the Ricares — all speak different languages and are numerous, all follow the Buffalow and winter near the mountains.

13\(^{rd}\) of October Saturday 1804 —

One man J. Newmon confined for mutinous expression. Set out early proceeded on, passed a camp of Seaux on the S.S. those people only viewed us & did not speak one word. The visitors of last evening all except one returned which is the Brother of the Chief we have on board passed (1) a Creek 13 yds on the S.S. at 18 m: above the Town heading in some Ponds a Short Dist\(^4\) to the N.E. we call Stone Idol C. (well to observe here that the Yankton or R. Jacque heads at about 2 Days March of this place Easterly, the R. de Seaux one Day further, the Chien (Chayenne the Chay' formerly there) a branch of R. Rouche (Rouge) Still beyond, and the River S' Peters 4 Days March from this place on the Same Drection (Inform\(^b\) of the Rickores). Passed a large willow (2) & Sand Islands above the mouth of the last Creek. at 21 Miles

\(^1\) A French nickname, meaning "cow-people" — that is, Buffalo tribe. The Indian name here given — written by Biddle (1, p. 34) Kaninaviesch — is only an Chippewa appellation of that tribe, now known as the Arapaho, one of the westernmost Algonquian tribes (see Mooney's sketch of this people, in U. S. Bur. Ethnol. Rep., 1892-93, pp. 953-957). Lewis, however, in his "Statistical View" (p. 18) applies the name Ar-räh'-pâ-hoo' to a branch of the Pawnee. — En.

[ 190 ]
above the Village passed a (3) Creek about 15 yards wide on the L.S. we call after 2\(^{e}\) Chief Pocasse (or Hay). nearly opposit this Creek a few miles from the river on the S.S. 2 Stones resembling humane persons & one resembling a Dog is Situated in the open Prarie, to those Stones the Rickores pay Great reverence make offerings (votive Dress \&c.) whenever they pass (Informt\( \text{c}\) of the Chief \& Intepeter) those People have a curious Tredition of those Stones, one was a man in Love, one a Girl whose parents would not let [them] marry (The man as is customary went off to mourn, the female followed.), the Dog went to morn with them all turned to Stone gradually, commenceing at the feet. Those people fed on grapes untill they turned, \& the woman has a bunch of grapes yet in her hand, on the river near the place those are Said to be Situated, we obs\(t\) a greater quantity of fine grapes than I ever Saw at one place.

The river above the Island on which the Lower Reckores Village is Situated is narrow and cont\(a\) great\(\text{er}\) proption of Timber than below, the bottoms on both Sides is covered with timber the up lands naked the current jentle and Sand bars confined to the points Generally.

We proceed on under a fine Breeze from the S.E. and camped late at the upper part of Some wood on the Starboard Side. Cold \& Some rain this evening. we Sent out hunters killed one Deer.

we Tried the Prisoner Newmon last night by 9 of his Peers they did "Centence him 75 Lashes \& Disbanded [from] the party."

A Court Martial to Consist of nine members will set to day at 12 oClock for the trial of John Newman now under Con­finement. Cap: Clark will attend to the forms & rules of a president without giveing his opinion.

Detail for the Court Martial

Serg: John Ordaway
Sergeant Pat: Gass
Jo: Shields
H: Hall
Jo. Collins

Wm Werner
Wm Bratten
Geo: Shannon
Silas Goodrich

MERIWETHER LEWIS Cap:  
1st U'S. Regt Infty  
Wm CLARK Cap:

or E. N W D [Engineer North Western Discovery. —Ed.]

In conformity to the above order the Court martial convened this day for the trial of John Newman, charged with “having uttered repeated expressions of a highly criminal and mutinous nature; the same having a tendency not only to destroy every principle of military discipline, but also to alienate the affections of the individuals composing this detachment to their officers, and disaffect them to the service for which they have been so sacr'dly and solemnly engaged.” The Prisonar plead not guilty to the charge exhibited against him. The court after having duly considered the evidence aduced, as well as the defence of the said prisoner, are unanimously of opinion that the prisoner John Newman is guilty of every part of the charge exhibited against him, and do sentence him agreeably to the rules and articles of war, to receive seventy five lashes on his bear back, and to be henceforth discarded from the perminent party engaged for North Western discovery; two thirds of the Court concurring
in the sum and nature of the punishment awarded. the commanding officers approve and confirm the sentence of the court, and direct the punishment take place tomorrow between the hours of one and two P.M. The commanding officers further direct that John Newman in future be attached to the mess and crew of the red Perogue as a labouring hand on board the same, and that he be deprived of his arms and accoutrements, and not be permitted the honor of mounting guard until further orders; the commanding officers further direct that in lieu of the guard duty from which Newman has been exempted by virtue of this order, that he shall be exposed to such drudgeries as they may think proper to direct from time to time with a view to the general relief of the detachment.

[Clark:] 10th of October Sunday 1804.

Some rain last night all wet & cold, we Set [out] early the rain contin'd all Day, at [blank in MS.] miles we passed a (1) Creek on the L.S. 15 yards wide this Creek we call after the 3rd Chief Piaheto (or Eagles feather) at 1 oClock we halted on a Sand bar & after Dinner executed the Sentence of the Court Martial so far as giving the Corporal punishment, & proceeded on a few Miles, the wind a head from N.E. Camped in a Cove of the bank on the S.S. immediately opposit our Camp on the L.S. I observe an antient fortification the Walls of which appear to be 8 or 10 feet high, (most of it washed in) the evening wet and disagreeable, the river Something wider more timber on the banks.

The punishment of this day alarm'd the Indian Chief very much, he cried aloud (or effected to cry) I explained the Cause of the punishment and the necessity (of it) which he (also) thought examples were also necessary, & he himself had made them by Death, his nation never whip'd even their Children, from their burth.

1 In North Dakota, close to 46°, at a creek now called Thunder-hawk. Piaheto is now Blackfoot Creek. — COVES (L. & C., 1, p. 168).

[ 196 ]
TETON TO MANDANS

17th of October Wednesday 1804.

Set out early a fine morning the wind from the N.W. after breakfast I walked on Shore with the Indian Chief & Interpreters, Saw Buffalo, Elk and Great numbers of Goats in large gangues (I am told by M' G. that those animals winter in the Black Mountains to feed on timber &c.) and this is about the Season they cross from the East of the Missouries to go to that Mountain, they return in the Spring and pass the Missouries in great numbers (to the plains). This Chief tells me of a number of their Traditions about Turtles, Snakes, &c. and the power of a particular rock or Cove on the next river which informs of every thing none of those I think worth while mentioning. The wind so hard a head the [boat] could not move after 10 oClock. Cap' Louis took the altitude of the Sun Lat. 46° 23' 57" I killed 3 Deer, and the hunters with me killed 3 also, the Indian Shot one but could not get it, I scaffolded up the Deer & returned & met the boat after night on the L.S. about 6 miles above the place we camped last night, one of the men saw a number of Snakes, Cap' Lewis Saw a large Beaver house S.S. I caught a whippoorwill Small & not common. the leaves are falling fast, the river wide and full of Sand bars. Great numbers of very large Stone on the Sides of the hills & some rock of a brownish Colour in the L. Bend below this.

Great numbers of Goats are flocking down to the S. Side of the river, on their way to the Black mountains where they winter Those animals return in the Spring in the Same way & scatter in different directions.

18th of October Thursday 1804.

Set out early proceeded on at 6 m. passed the mouth of (1) la [Lé] Boulet (or Cannon Ball River) about 140 yards wide on the L.S. this river heads in the Court Noi or Black

---

1 That is, scaffolded, to be above the reach of wolves. — Ed.
2 Nuttall's whippoorwill (Phalaenoptilus Nutalli). — Ed.
Mountains (a fine Day) above the mouth of the river. Great numbers of Stone perfectly round with fine Grit are in the Bluff and on the Shore, the river takes its name from those Stones which resemble Cannon Balls. The water of this river is confined within 40 yards. We met 2 Frenchmen in a perogue Decending from hunting, & complained of the Mandans robing them of 4 Traps their furs & Several other articles. Those men were in the employ of our Ricaree interpreter M. Gravelin the[y] turned & followed us.

Saw Great numbers of Goats on the S.S. coming to the river our hunters Killed 4 of them. Some run back and others crossed & proceeded on their journey to the Court Nou at (3) passed a Small River called Che wah or fish river 1 on the S.S. this river is about 28 yards wide and heads to the N.E. passed a small creek on the L.S. 1 mile above the last, and camped on a Sand bar on the L.S. opposit to us we Saw a Gangue of Buffalow bulls which we did not think worth while to kill. our hunters killed 4 Goats 6 Deer 4 Elk & a pelican & informs that they Saw in one gang: 248 Elk, (I walked on Shore in the evening with a view to see Some of those remarkable places mentioned by evins [Evans — Ed.], none of which I could find). The Countrey in this Quarter is Generally leavel & fine Some high Short hills, and some rigid ranges of Hills at a Distance

Course Distance & References — 18th Oct

[ 198 ]
The recaree Indians inform us that they find no black tail Deer as high up as this place, those we find are of the fallow Deer kind.

The recarees are not fond of Spiritous liquers, nor do they apper to be fond of Receiving any or thankfull for it. [they say we are no friends or we would not give them what makes them fools].

19th October Friday 1804. —

a fine morning wind from the S.E. we Set out early under a gentle Breeze and proceeded on verry well, more timber than common on the banks on this part of the river. passed a large Pond on the S.S. I walked out on the Hills & observed Great numbers of Buffalow feeding on both Sides of the river I counted 52 Gangues of Buffalow & 3 of Elk at one View, all the runs which come from the high hills which is Generally about one or 2 miles from the water is brackish and near the Hills (the Salts are) and the Sides of the Hills & edges of the Streems, [the mineral salts appear] I saw Some remarkable round hills forming a cone at top one about 90 foot one 60 & several others Smaller, the Indian Chief say that the Callemet bird1 live in the holes of those hills, the holes form by the water washing [away] this Some parts in its passage Down from the top — near one of those noles [Knolls], on a point of a hill 90 feet above the lower plane I observed the remains of an old village, (high, strong, watchtower &c.) which had been fortified, the Indian Chief with us tels me, a party of Mandins lived there, [Here first saw ruins of Mandan nation] we proceeded on &c camped on the S. S. opposit the upper of those conocal hills. our hunters killed 4 Elk 6 Deer & a pelican, I saw Swans in a Pond & killed a fat Deer in my walk, Saw about 10 wolves. This day is pleasant

1 The golden eagle (Aquila chrysaetos) — thus named because its tail-feathers are used to decorate the calumet-pipes of the Indians, who attach great value to these ornaments. — Ed.

20th of October Saturday 1804 —

Set out early this morning and proceeded on the wind from the S.E. after breakfast I walked out on the L Side to see those remarkable places pointed out by Evins. I saw an old remains of a village (covering 6 or 8 acres) on the Side of a hill which the Chief with Too né tells me that nation lived in 2 [a number] villages 1 on each Side of the river and the Troublesom Seaux caused them to move about 40 miles higher up where they remained a few years & moved to the place they now live, (2) passed a small Creek on the S.S. (3) and one on the L.S. passed (4) an Island covered with willows laying in the middle of the river no current on the L.S. Camped on the L.S. above a Bluff containing coal (5) of an inferior quality, this bank is immediately above the old Village of the Mandans. The Countrey is fine, the high hills at a Distance with gradual

[200]
assents, 1 kitá Deer The Timber confined to the bottoms as useal which is much larger than below. Great numbers of Buffalow Elk & Deer, Goats. our hunters killed 10 Deer & a Goat to day and wounded a white Bear; I saw several fresh tracks of those animals which is 3 times as large as a mans track. The wind hard all Day from the N.E. & East, great numbers of buffalow Swimming the river I observe near all large gangues of Buffalow wolves and when the buffalow move those animals follow, and feed on those that are killed by accident or those that are too pore or fat to keep up with the gangue.

21st October Sunday 1804 —

a verry Cold night wind hard from the N.E. Some rain in the night which froosed as it fell at Day light it began to Snow and continued all the fore part of the Day passed just above our camp (1) a Small river on the L. S. called by the Indians Chiss-che-tar [Chisshetaw — Biddle] this river is about 38 yards wide containing a good Deel of water (2) Some distance up this River is Situated a Stone which the Indians have great faith in & say they See painted on the Stone, all the Calemtes & good fortune to hapin the nation & parties who visit it. a tree [an oak] which Stands [alone] near this place [about 2 miles off] in the open prarie which has withstood the fire they pay Great respect to make Holes and tie Strings thro [the skins of their] their necks and around this tree to make them brave [Capt. Clarke saw this tree] (all this is the information of Too ne [is a whipperwill] the Cheif of the Ricares who accompanied us to the Mandins, at 2 miles (2) passed the 2nd Village of the Mandins which was in existance at the same time with the 1st this Village is at the foot of a hill on the S.S. in a butifull & extensive plain, (nearly opposite is another

25th of October Thursday 1804. —

a cold morning. Set out early under a gentle Breeze from the S. E. by E. proceeded on, passed (1) the 3rd old Village of the Mandans which has been Des'd for many years, This village was situated on an eminance of about 40 foot above the water on the L. S. back for Several miles is a butifull Plain (2) at a Short distance above this old Village on a Continuation of the same eminance was Situated the Ricares Village (two old villages of Ricares one on top of high hill the 2d below in the bottom.) which has been avacuated only Six (five) years, (about 3 or 4

1 Near Washburn, N. D. — Ed.  
[ 204 ]
miles above Ricaras villages are 3 old villages of Mandans near together here they lived when the R's came for protection — afterwards moved where they now live.) above this Village a large and extensive bottom for Several miles in which the Squars raised ther Corn, but little timber near the Villages, on the S. S. below is a point of excellent timber, and in the point Several miles above is fine timber, Several parties of Mandins rode to the river on the S. S. to view us indeed they are continually in Sight Satisfying their Curiossities as to our apperance &c. We are told that the Seaux has latterly fallen in with & Stole the horses of the Big bellies,¹ on their way home they fell in with the Ossiniboim who killed them and took the horses. a frenchman has latterly been killed by the Indians on the Track to the tradeing establishment on the Ossinebine R. in the North of this place (or British fort) This frenchman has lived many years with the Mandins. we were frequently called on to land & talk to parties of the Mandins on the Shore; wind Shifted to the S. W at about 11 oClock and blew hard untill 3 oClk. clouded up river full of Sand bars & we are at a great loss to find the channel of the river, frequently run on the Sand bars which Delais us much passed a very bad riffle of rocks in the evening by takeing the L. S. of a sand bar² and camped on a Sand point on the S. S. opposit a high hill on the L. S. Several Indians came to see us this evening, amongst others the Sun of the late Great Chief of the Mandins (mourning for his father), this man has his two little fingers off; on inquiring the cause, was told it was customary for this nation to Show their grief by some testmony of pain, and that it was not uncommon for them to take off 2 Smaller fingers of the hand (at the 2d joints) and some times more with other marks of Savage effection

¹ A common but somewhat erroneous translation of Gros Ventres, the French appellation of a tribe who form a division of the Arapaho people. The name Gros Ventres is also applied, as here, to the Siouan Minitaree (more correctly known as Hidatsa). See Mooney's Sketch of the Arapaho, U. S. Bur. Ethnol. Rep., 1892-93, pp. 954, 955. The Assiniboim are a division of the Siouan family; most of them dwell in British territory. — Ed.

² All obliged to get out and haul the boat over. — CLARK (memorandum on p. 223 of Codex C).
The wind blew very hard this evening from the S.W. very cold. R. Fields with the Rhumitism in his neck, P. Crusat with the Same complaint in his legs— the party other wise is well, as to myself I feel but slight symptoms of that disorder at this time.

26th of October Friday 1804 —

Set out early wind from the S.W. proceeded on saw numbers of the Mandins on Shore, we set the Ricare Chief on Shore, and we proceeded on to the Camp of two of their Grand Chiefs where we delayed a few minutes, with the Chiefs and proceeded on taking two of their Chiefs on board & Some of the heavy articles of his house hold, Such as earthen pots & Corn, proceeded on, at this Camp Saw a (M) R. McCracken Englishman from the N.W. (Hudson Bay) Company¹ this man came nine Days ago to trade for horses & Buffalo robes,— one other man came with him. The Indians continued on the banks all day. But little wood on this part of the river, many Sand bars and bad places, water much divided between them.

We came too and camped on the L. S. about ½ a mile below the 1st. Mandin Town on the L. S.² soon after our arrival many men womin & children flocked down to See us, Cap! Lewis walked to the village with the principal Chiefs and our interpters, my Rhumatic complaint increasing I could not go. If I was well only one would have left the Boat & party untill we knew the Disposition of the Inds. I Smoked with the Chiefs who came after. Those people appeared much pleased with the Corn Mill which we were obliged to use, & was fixed in the boat.

¹ Early explorations by French and English navigators and traders led to the establishment (May 2, 1670) of the Hudson’s Bay Company, with headquarters in London, who long held a monopoly of the fur trade in the great Northwest. In 1783–84 some of the leading Montreal merchants organized a rival association, known as the North West Company; but after a long and fierce competition for supremacy in the fur trade, the Hudson’s Bay Company finally absorbed its rival (March 26, 1821). Hugh McCracken was an Irish “free trader,” usually employed by the North West Company, who had accompanied David Thompson and Alexander Henry in their journeys through the Upper Missouri region. — Ed.

Chapter V

Among the Mandans

Clark's Journal, October 17—December 27, 1804.

[Clark:]

W

E Set out arly came too at the Village on the L.S. this village is situated on an eminence of about 50 feet above the Water in a handsom plain it contains [blank space in MS.] houses in a kind of Picket work, the houses are round and verry large containing sev­

eral families, as also their horses which is tied on one Side of the enterance, a Description of those houses will be given hereafter, I walked up & Smoked a pipe with the Chiefs of the Village they were anxious that I would stay and eat with them, my indisposition provented my eating which dis­

pleased them, until a full explenation took place, I returned to the boat and Sent 2 Carrots of Tobacco for them to smoke, and proceeded on, passed the 2 Village and camped ops the Village of the 

Weter soon [or Ah wah har ways] which is Situated on an eminence in a plain on the L.S. this Village is Small and Contains but few inhabitents above this Village also above the Knife river on the Same Side of the Missouri the Big bellies Towns are Situated a further De-

1 This village contains 40 or 50 lodges, built in the manner of those of the Rickarees. — Gass (p. 83).

2 A division of the Hidatsa, called by the French Gens de Soulier. They were kindred to the Minitaree but maintained a separate tribal organization until about 1836. See Washington Matthews's Ethnography and Philology of the Hidatsa Indians (Washington, 1877); McGee's account of this tribe in U. S. Bur. Ethnol. Rep., 1893-94, pp. 197, 198. — Ed.

3 These Indians have better complexions than most other Indians, and some of the children have fair hair. . . . These people do not bury their dead, but place the body on a scaffold, wrapped in a buffalo robe, where it lies exposed. — Gass (p. 83).
AT FORT MANDAN

scription will be given hereafter as also of the Town of Mandans on this side of the river i.e. S. Side.

a fine warm Day we met with a frenchman by the name of Jessomme\(^1\) which we imploy as an interpeter. This man has a wife & Children in the village. Great numbers on both Sides flocked down to the bank to view us as we passed. Capt. Lewis with the Interpreter walked down to the village below our camp. After delaying one hour he returned and informed me the Indians had returned to their village &c. &c., we sent three twists [carrots] of Tobacco\(^2\) by three young men, to the three villages above inviting them to come Down & Council with us tomorrow. Many Indians came to view us. Some stayed all night in the Camp of our party. We procured some information of M. Jessomme of the Chiefs of the Different Nations

Course Distance 27\(^{th}\)

West 2 Miles to a bend on the L. S. passing a Cole Bank
N. 10° W. 2 miles to a Wood on the S. S. pass\(^4\) the 2 village on S. S.

Sunday. 28\(^{th}\) of October 1804 —

a Windcy Day, fair and clear many of the Grosvaintres (or Big Bellies) and Watersones Came to See us and hear the Council the wind being so violently hard from the S.W. prevented our going into Council, (indeed the Chiefs of the Mandans from the lower village could not Cross, we made up the presents and entertained Several of the Curious Chiefs whome, wished to see the Boat which was very curious to them viewing it as great medicine, (whatever is mysterious or unintelligible is called great medicine) as they also viewed my black Servent The Black Cat Grand Chief of the Mandans, Capt. Lewis & myself with an Interpreter walked up the river

\(^1\) René Jessaume was originally a "free trader" (one to whom certain quantities of goods would be advanced by a trading company), and had spent many years among the Mandan. — En.

\(^2\) An article indispensable in those cases. — Clark (memorandum on p. 223 of Codex C).

VOL. I. — 14

[209]
about 1½ miles, our views were to examine the Situation & Timber for a fort, we found the Situation good but the Timber scarce, or at least Small timber such as would (not) answer us. We consulted the Grand Chief in respect to the other Chiefs of the Different Villages he gave the names of 12. George Drewyer caught 2 Beaver above our Camp last night, we had Several presents from the woman of Corn boil’d homney, Soft Corn &c. &c. I present a jar (earthern jar glazed) to the Chiefs wife who receved it with much pleasure. our men very cheerful this evening. We Sent the Chiefs of the Gross Vantres to Smoke a a pipe with the Grand Chief of the Mandans in his Village, & told them we would Speek tomorrow.

29th October Monday 1804. —

a fair fine morning after Brackfast we were visited by the old Chief of the Big bellies or [blank space in MS.] this man was old and had transfired his power to his Sun, who was then out at War against the Snake Indians who inhabit the Rocky Mountains. at 10 oClock the S.W. wind rose very high, we Collected the Chiefs and Commenced a Council under a morning, and our Sales stretched around to keep out as much wind as possible, we delivered a long Speech the Substance of which [was] similar to what we had Delivered to the nations below. the old Chief of the Grossvantes was very restless before the Speech was half ended observed that he Could not wait long that his Camp was exposed to the hostile Indians, &c. &c. he was rebuked by one of the Chiefs for his uneasiness at Such a time as the present, we at the end of the Speech mentioned the Recare who accompanied us to make a firm Peace, they all Smoked with him (I gave this Chief a Dollar of the American Coin as a Meade! with which he was much pleased) In Council we presented him

1 The Shoshoni, commonly called Snake Indians; the principal tribes of the Shoshonean family. They originally occupied the region now included in southern Montana and Idaho and western Wyoming; but were later forced across the Rocky Mountains by hostile prairie tribes. — Ed.

[210]
with a certificate of his sincerity and good Conduct &c. We also Spoke about the fur which was taken from 2 Frenchmen by a Mandan, and inform'd of our intentions of Sending back the French hands. After the Council we gave the presents with much serimoney, and put the Medals on the Chiefs we intended to make viz. one for each Town to whom we gave coats hats & flags, one Grand Chief to each nation to whom we gave Medals with the Presidents likeness in Council we requested them to give us an answer tomorrow or as Soon as possible to Some Points which required their Deliberation. After the Council was over we Shot the air gun which appeared to astonish the Natives much, the greater part then retired Soon after.

The Recare Cheaf Ar-ke-tar-na-shar came to me this evening and tells me that he wishes to return to his Village & nation, I put him off Saying tomorrow we would have an answer to our talk to the Satisfaction & send by him a String of Wompos informing what had passed here. a Iron or Steel Corn Mill which we gave to the Mandins, was very thankfully received. The Prairie was Set on fire (or caught by accident) by a young man of the Mandins, the fire went with such velocity that it burnt to death a man & woman, who Could not get to any place of Safety, one man a woman & Child much burnt and Several narrowly escaped the flame. a boy half white was saved unhurt in the midst of the flame, Those ignerent people say this boy was Saved by the Great Medison Speret because he was white. The course of his being Saved was a Green buffalow Skin was thrown over him by his mother who perhaps had more fore Sight for the perfection of her Son, and [1]ess for herself than those who escaped the flame, the Fire did not burn under the Skin leaving the grass round the boy. This fire passed our Camp last [night] about 8 oClock P.M. it went with great rapidity and looked Tremendous

---

1 I saw [1805] the remains of an excellent large corn mill, which the foolish fellows had demolished to barb their arrows; the largest piece of it, which they could not break or work up into any weapon, was fixed to a wooden handle, and used to pound marrow-bones to make grease. — Henry (Journal, Coues ed., i, p. 329).

[211]
The following Chiefs were made in Council to day

Ma-toe-ton-ba or Lower Village of the Mandans

1st Chief Sha-ba-ka — or Big White
2nd Chief Ka-gob-ba-mi. or Little Raven

Roop-tar-bee or Second Village of the Mandans.

1st and Grand Chief, Pose-cop-sa-he. or black cat
2nd Chief Car-gar-no-mok-she raven man Cheaf

Mab-bar-ba 3rd Village

1st Cheaf Ta-tuck-co-pin-re-ha white Buffalow robe unfolded

Me-ne-tar-re  Me-te-bar-tan

1st Cheif — Omp-se-ba-ra. Black Mockerson
2nd Cheif — Ob-barb or Little fox

We Sent the presents intended for the Grand Chief of the Mi-ne-tar-re or Big Belley, and the presents flag and Wompom by the old Chief and those intended for the Chief of the Lower Village by a young Chief.

The following Chiefs were recommended in addition to those viz. —

1st Village

Ob-bee-nar Big Man a Chien (a Cheyenne prisoner adopted by them)
Sho-ta-bar-ro-ra 3rd Chief [or Coal — BIDDLE]

2nd Village

Taw-nuh-e-o Bel-lar-sara
Ar-rat-tana-mock-she — Wolf man Chief

3rd Village

Min-nis-sur-ra-ree — Neighing horse
Le-Cong-gar-ti-bar — old woman at a distance

1 Brackenridge, who saw this chief in 1811, thus describes him (Louisiana, p. 261): "She-he-ke is a fat man, not much distinguished as a warrior, and extremely talkative, a fault much despised amongst the Indians." — Ed.
2 Biddle does not include this chief in his list. — Ed.

[ 212 ]
4th Village

Mar-neb-tab. the big Steeler out at war (who was then out at war & was killed aft)

Mar-se-rus-se — tale of Callumet bird

Ea pa no pa — Two taled Calumet bird young Chief

War ke raz sa The red Shield young Chief of Big belley — big town

5th Village

Shà-baks bo pin nes — Little Wolfs Medison

Ar-rat-to-wa-mook-ge — man wolf Chief (at war)

Cal-tar-co ta — cherry (grows (growing) on a bush) old Chief and father to the above ment chieft

Mau-pabl-pir-re-ct-sa too — This chief is near this hunting and a very considerable man

To the 1st Chiefs we gave a Medal with the Imp of the President of the U. S.

To the 2nd Chiefs a Medal of weaving & Domestic animals.

To the 3rd Chiefs a Medal with the impression of a man Sowing Wheat.

30th October Tuesday 1804 —

Two chiefs came to have Some talk one the principal of the lower Village the other the one who thought himself the principal man, & requested to hear Some of the Speech that was Delivered yesterday they were gratified, and we put the medal on the neck of the Big white to whom we had Sent Clothes yesterday & a flag, those men did not return from hunting in time to join the Council, they were well pleased (2nd of those is a Chien) I took 8 men in a Small perogue and went up the river as far as the 1st Island about 7 miles to see if a Situation could be got on it for our Winter quarters, found the wood on the Is's as also on the p: above so Distant from the water that, I did not think that we could get a good wintering ground there, and as all the white men here informed us that wood was scarce, as well as game above, we Determined to drop down a few miles near wood and game

1 Biddle does not include this chief in his list. — Ed.

[213]
Course to the Island

on my return found maney Ind! at our Camp, gave the party a dram, they Danced as is verry Com! in the evening which pleased the Savages much. Wind S. E.

31st of October Wednesday 1804 —

a fine morning, the Chief of the Mandans Sent a 2 ½ Chief to invite us to his Lodge to receive Som corn & here what he had to say I walked down, and with great ceremoney was Seeted on a roabe by the Side of the Chief, he threw a handsome Roabe over me and after smokeing the pipe with Several old men around, the Chief spoke

Said he believed what we had told them, and that peace would be general, which not only gave him Satisfaction but all his people, they now could hunt without fear, & ther womin could work in the fields without looking every moment for the enemey, and put off their mockersons at night, (sign of peace undress) as to the Rif[c]ares we will Show you that we wish peace with all, and do not make War on any without cause, that Chief — pointing to the 2 ½ and Some brave men will accomp! the ricare Chief now with you to his village & nation, to Smoke with that people, when you came up the Indians in the neighbouring Villages, as well as those out hunting when they heard of you had great expectations of receiving presents those hunting immediatly on hearing returned to the Village and all was Disapointed, and Some Dis-satisfied, as to himself he was not much So but his village was. he would go and see his great father &c. &c.

he had put before me 2 of the Steel traps which was robed from the french a Short time ago, [and] about 12 bushels of [214]
Corn which was brought and put before me by the womin of the Village after the Chief finish'd & Smoked in great cer­rimony, I answered the Speech which Satisfied them very much, and returned to the boat. met the princapal Chief of the 3d Village and the Little Crow both of which I invited into the Cabin and Smoked & talked with for about one hour. Soon after those Chiefs left us, the Grand Chief of the Mandans came Dressed in the Clothes we had given with his 2 small Suns, and requested to See the men Dance which they very readily gratified him in. the wind blew hard all the after part of the day from the N. E. and continud all night to blow hard from that point, in the morning it Shifted NW. Capt Lewis wrote to the N. W. Companys agent on the Orsiniboin River (fort &c. there about 150 miles hence) abt 9 Days march North of this place.

the Wind hard from the NW. M't Crackin a Trader Set out at 7 oClock to the Fort on the Ossiniboin by him Send a letter, (inclosing a Copy of the British Ministers pro­tection) to the principal agent of the Company.1 at about 10 oClock the Chiefs of the Lower Village came and after a Short time informed us they wished they would us to [i. e., that we would — E. d.] call at their Village & take Some corn, [They said] that they would make peace with the Ricares they never made war against them but after the Rees killed their Chiefs they killed them like the birds, and were tired (of killing them) and would Send a Chief and Some brave men to the Ricares to Smoke with that people in the evening we Set out and fell down to the lower Village where Cap't Lewis got out and continud at the village untill after night. I proceeded on & landed on the S. S. at the upper point of the 1st Timber on the Starboard Side after landing & continuing all night droped

1 Coues reprints (i. pp. 187, 188) this letter, which he found in Biddle's literary magazine, *The Portfolio* (Philadelphia), vol. vii (1812), pp. 448, 449. The agent's name was Charles Chaboillez, representing the North West Company; Lewis and Clark wrote to him explaining the nature of their mission, and enclosing a copy of the passport granted them by Mr. Edward Thornton, of the British legation at Wash­ington. — Eo.
down to a proper place to build. Cap! Lewis came down after night, and informed me he intended to return the next morning by the particular request of the Chiefs.

We passed the Villages on our Decent in View of Great numbers of the inhabitants.

2nd November Friday 1804 —

This Morning at Daylight I went down the river with 4 men to look for a proper place to winter. proceeded down the river three miles & found a place well Supplied with wood, & returned, Cap! Lewis went to the Village to here what they had to Say & I fell down, and formed a Camp, near where a Small Camp of Indians were hunting. cut down the Trees around our Camp, in the evening Cap! Lewis returned with a present of 11 bushels of Corn, our ricaree Chief Set out accompanied by one Chief (of Mandans) and Several Brave men (of Minitarees and Mandans), he called for Some small article which we had given (promised) but as I could not understand him he could not get [it] (af't he did get it) the wind from the S. E. a fine day, maney Indians to view us to day

3rd of November Saturday 1804 —

A fine morning wind hard from the West we commence building our Cabins,1 Send down in a perogue 6 men to hunt engaged one man (a Canadian Frenchman who had been with the Chayenne Ind. on the Côte noir & last summer descended thence the Little Missouri — he was of our permanent.)2 Set the french who intend to return to build a perogue, many Indians pass to hunt, M: Jessomme (Jesseaume) with his Squar & children come down to live, as Interpter, we receved (hired) a hors for our Service, in the evening the Ka goh ha me or little ravin came & brought us on his Squar (who carried it on of Meal &c. they Delayed all night we gave his Squar [an her back] about 60 W! of Dried Buffalow meat a roabe, & Pot

1 A description of the manner in which the huts and fort were built is given by Gass (pp. 85, 86). — Ed.
2 This was Baptiste Le Page, enlisted to take the place of John Newman, discharged. — Ed.
at Fort Mandan

4th November Sunday 1804—

A fine morning we continued to cut down trees and raise our houses, a M. Chaubonie (Chaboneau), interpreter for the Gross Ventre nation, came to see us, and informed that the came down with several Indians from a hunting expedition up the river, to here [hear] what we had told the Indians in Council; this man wished to hire as an interpreter, the wind rose this evening from the East & clouded up. Great numbers of Indians pass hunting and some on the Return.

5th November Monday 1804—

I rose very early and commenced raising the 2 range of huts, the timber large and heavy all to carry on on hand sticks, cotton wood & elm some ash small, our situation sandy, great numbers of Indians pass to and from hunting a camp of Mandans, a few miles below us. Caught within two days 100 goats, by driving them in a strong pen, directed by a bush fence widening from the pen &c. &c. the greater part of this day cloudy, wind moderate from the N.W. I have the Rhinitis very bad, Cap. Lewis writing all day. We are told by our interpreter that 4 Ossiniboins Indians, have arrived at the camps of the Gross Venters, & 50 lodges are coming.

1 Fort Mandan, the wintering-place of the expedition, was located on the left bank of the Missouri, seven or eight miles below the mouth of Knife River; it was nearly opposite the site of the later Fort Clark. The latter post, "one of the most important on the river," was on the right bank; Chittenden says (Amer. Fur Trade, p. 957) that its area was 132 x 147 feet. On its site a fortified trading post was built in 1822; the later structure, which was named Fort Clark, was erected in 1831, as a post of the American Fur Company. See description and history of this locality, in Prince Maximilian's Voyage (Paris, 1841), ii, pp. 331-344.

2 Drew M's Gravelens instructions & discharged 2 French hands.—Clark (memorandum on p. 222 of Codex C).
last night late we wer awoke by the Sergeant of the Guard to See a Nothern light, which was light, (but) not red, and appeared to Darken and Some times nearly obscured, and open, (divided about 20 degrees above horizon — various shapes — considerable space) many times appeared in light Streeks, and at other times a great Space light & containing floating columns which appeared to approach each other & retreat leaving the lighter space at no time of the Same appearance.

This Morning I rose [t] Day light the Clouds to the North appeared black at 8 oClock the [wind] began to blow hard from the N. W. and Cold, and Continued all Day. M' Jo Gravelin our ricare interpeter Paul premor, Lagueness, [Lajeunesse] & 2 french Boys, who Came with us, Set out in a Small perogue, on their return to the recare nation & the Illinois, M' Gravelin has instructions to take on the recares in the Spring &c. Continue to build the huts, out of Cotton Timber, &c. this being the only timber we have,

7th November Wednesday 1804 —

a termperate day we continued to building our hut, cloudy and foggey all day

8th Nov. Thursday 1804 —

a cloudy morning Jussome our (Mandan) inturpeter went to the Village, on his return he informed us that three English men had arrived from the Hudson Bay Company, and would be here tomorrow, we cont to build our huts, many Indians come to See us and bring their horses to Grass near us.

9th Nov. Friday 1804 —

a verry hard frost this morning we continue to build our Cabens, under many Disadvantages, Day cloudy wind from the NW. Several Indians pass with flying news (reports), we got a white weasel, (Taile excepted which was black at the end) of an Indian Cap! Lewis walked to the hill ab ¾ of a mile. we are Situated in a point of the Missouri North Side in a Cotton wood Timber, this Timber is tall and heavy containing

[218]
AT FORT MANDAN

an immense quantity of water Britle (brittle) & Soft fine food for Horses to winter (as is said by the Indians) The Mandans Graze their horses in the Day on Grass, and at night give them a Stick (an arm full) of Cotton wood (boughs) to eate, Horses Dogs & people all pass the night in the Same Lodge or round House, Cov'd with earth with a fire in the middle great number of wild gees pass to the South, flew very high.

10th November Saturday 1804 —

rose early continued to build our fort numbers of Indians came to See us a Chief Half Pania came & brought a Side of a Buffalow, in return We Gave Some few small things to himself & wife & Son, he crossed the river in the Buffalow Skin Canoo & and, the Squar took the Boat (on her back) and proceeded on to the Town 3 miles the Day raw and cold wind from the NW., the Gees Continue to pass in ganges as also brant to the South, Some Ducks also pass

11th November Sunday 1804. Fort Mandan

a cold Day continued at work at the Fort Two men cut themselves with an ax, The large Ducks pass to the South an Indian gave me several roles of parched meat two Squars of the Rock mountains, purchased from the Indians by a frenchmen (Chaboneau) came down The Mandans out hunting the Buffalow

12th November Monday 1804 —

a very Cold night early this morning the Big White principal Chief of the lower Village of the Mandans came Down, he pack'd about 100 lb of fine meat on his squar for us, we made Some Small presents to the Squar, & child gave a Small ax [with] which She was much pleased 3 men Sick with the

1 These earth lodges of the Mandan differentiated them from the other Indians of the plains, and are described by all early travellers. See Maximilian, Prince of Weid's Voyage in the Interior of North America (London, 1843); Catlin's North American Indians (London, 1841); and Washington Matthews's "Earth Lodge in Art," in American Anthropologist, 1901, pp. 1-12. This lodge is the prototype of the settler's sod-house, but is seldom used now by the Mandan. For their present condition see Wheeler's Wonderland, 1903, pp. 19-36. — Ed.
[blank in MS.], Several, Wind Changeable very cold evening, freezing all day some ice on the edges of the river.

Swans passing to the South, the Hunters we Sent down the river to hunt has not returned.

"The interpreter says that the Mandan nation as they (old men) Say came out of a Small lake (subterraneous Village & a lake) where they had Gardins, many years ago they lived in Several Villages on the Missourie low down, the Small pox destroyed the greater part of the nation and reduced them to one large village and Some Small ones, all the nations before this malady was aff' (afraid) of them, after they were reduced the Seaux and other Indians waged war, and killed a great maney, and they moved up the Missourie, those Indians Still continued to wage war, and they moved Still higher, until got in the Country of the Parias, whith this N° they lived in friendship many years, inhabiting the Same neibourhood untill that people waged war, they moved up near the Watersoons & Winataras where they now live in peace with those nations, the Mandans Speake a language peculial to themselves very much [blank in MS.] they can rase about 350 men the Winataries about 80 (the Wittassoons or Maharha 80) and the Big bellies (or Minitarees) about 600 or 650 men. the Mandans and Seaux have the Same word for water. The Big bellies or Winetaries & ravin (Wattassoon as also the Crow or Raven) Indians Speake nearly the Same language and the pre­sumption is they were originally the Same nation. The Ravin Indians "have 400 Lodges & about 1200 men, & follow the Buffalow, or hunt for their Subsistance in the plains & on the Court Noi & Rock Mountains, & are at war with the Siaux [and] Snake Indians.

The Big bellies & Watersoons are at war with the Snake Indians & Seaux and were at war with the Ricares untill we made peace a few days pass'. The Mandans are at war with all who make war [on them, at present with the Seaux] only, and wish to be at peace with all nations, Seldom the ogressors

---

1 See Maximilian's detailed account of the Mandan myths of the creation, their tribal origin, and their migrations, with their religious beliefs, superstitions, and customs, in his Voyage, ii, pp. 369-484. — Ed.
The Ice began to run in the river ½ past 10 oClock P.M. we rose early & unloaded the boat before breakfast except, the Cabin, & stored away in a Store house at 10 oClock A.M. the Black Cat the Mandin Chief and Lagree (Fr. name) Che Chank a Chief & 7 men of note visited us at Fort Mandan, I gave him a twist of Tobacco to Smoke with his people & a Gold Cord, with a view to know him again, This nation consists (This chief was one of 3 bands of Ass" who rove between the Missouri & Ass" river. The 3 consist) of about 600 men, hunt in the Plains & winter and trade on the Ossiniboin River, (here describe all Ass") they are the Decendants of the Seaux and Speake their language, they come to the nations in this quarter to trade or (make presents) for horses the Method of this Kind of Trafick by adoption Shall be explained hereafter etc., Snow'd all day, the Ice ran thick and air Cold.

14th of November Wednesday 1804. Fort Mandan —

a cloudy morning, ice running very thick, river rose ½ Inch last night Some snow falling, only two Indians visit us to day owing to a Dance at the Village last night in Con-

1 La Vérendrye, who visited the Mandan in 1738, thus speaks of their relations with their northern neighbors: "The Assiliboille [Assiniboin], although numerous, and strong and robust men, are not brave; they are in great fear of the Sioux, whom they regard as braver. The Mantannes [Mandan] know their weakness, and profit by it on occasion. . . . Public notice was given throughout the village, warning every one to be ready to march on the second day after, the 30th of the month; this made some further delay among the Mantannes, who knew well how to profit thereby in trading their grain, tobacco, peltries, and painted feathers, which they know the Assiliboille highly value. The latter had brought, and were now giving in exchange, muskets, axes, kettles, powder, bullets, knives, and bodkins. The Mantannes are far more crafty in trade, and in all other relations, than are the Assiliboille, who are constantly duped by them. . . . The Assiliboille had purchased everything which their means permitted, such as painted buffalo-robe; skins of deer and antelope well dressed, and ornamented with fur; bunches of painted feathers; peltries; wrought garters, head-dresses, and girdles. These people [the Mandan] dress leather better than do any other tribes, and do very fine work on furs and feathers, which the Assiliboille are not capable of doing. They are cunning traders, despoiling the Assiliboille of all that they may possess." — See his " Journal," in Canad. Archives Rep., 1889, p. 14. — Ed.
including a ceremony of adoption, and interchange of property, between the Ossinboins, Christinoes (Kristenaux) and the nations of this neighbourhood. We sent one man by land on horseback to know the reason of the Delay of our hunters, this evening 2 Frenchmen who were trapping below came up with 20 beaver. We are compelled to use our Pork, which we do Spearingly for fear of some failure in procuring a Sufficiency from the woods.

Our Interpreter informs that 70 Lodges one of 3 bands of Assiniboins & Some Crestinoes, are at the Mandan Village. The Crestinoes are ab' 300 men speak the Chipaway Language, the[y] live near Fort De prair (on Assinboin & Assakashawan [Saskatchewan — Ed.] They are bands of the Chippeway)

15th of November Thursday 1804 —

A cloudy morning, the ice run much thicker than yesterday. At 10 oClock G Drewyer & the Frenchman we dispatched yesterday came up from the Hunters, who are incamped about 30 miles below. After about one hour we dispatched a man with orders to the hunters to proceed on without Delay thro the floating ice, we sent by the man Tin, to put on the parts of the Perogue exposed to the ice & a toe roape. The wind Changeable all hands work at their huts until 1 oClock at night. Swans passing to the South — but few fowls (water) to be Seen not one Indian came to our fort to day

1 The ceremony of adoption into a tribe or family is one which has always prevailed among the North American aborigines, and is extended to any persons (red or white) to whom they wish to show special friendship or honor. See Henry's description of the ceremony (Journal, i, pp. 388-390). — Ed.

2 The savages now known as Cree, the appellation of various nomadic tribes who range the region north of Lake Superior and west toward the Assiniboine River; they are of Algonquian stock. — Ed.

3 George Drouillard (Drewyer) was son of Pierre Drouillard, an interpreter for the British at Detroit in the latter part of the eighteenth century. The father is said to have rescued Simon Kenton from death at the stake (about 1779). George was slain (May, 1810) in a fight with the Blackfeet. — Ed.

[222]
1804] AT FORT MANDAN

16th November Friday 1804 —

...a verry white frost all the trees all covered with ice, cloudy, all the men move into the huts which is not finish. Several Indians come to camp to day. The Ossiniboins is at the Big bellie Camp, some trouble like to take place between them from the loss of horses &c. as is Said by an old Indian who visited us with 4 Buffalow robes & corn to trade for a Pistol which we did not let him have, men imployd untill late in doing their huts, Some horses Sent down to Stay in the woods near the fort, to prevent the Ossniboins Steeling them.

17th November Saturday 1804 —

...a fine morning; last night was Cold, the ice thicker than yesterday, Several Indians visit us, one Chief Stayed all day we are much engaged about our huts.

18th Nov. Sunday 1804 —

...a cold morning Some wind the Black Cat, Chief of the Mandans came to see us, he made great inquiries respecting our fashions, he also Stated the Situation of their nation, he mentioned that a Council had been held the day before and it was thought advisable to put up with the resent insults of the Ossiniboins & Christinoes untill they were convinced that what had been told them by us [was true — Ed.], M' Evins had deceived them & we might also, he promised to return & furnish them with guns & amunition, we advised them to remain at peace & that they might depend upon Getting Supplies through the Channel of the Missourie, but it required time to put the trade in opperation. The Ossiniboins &c. have the trade of those nations in their power and treat them badly, as the Soux does the Ricarees, and they cannot resent, for fear of loseing their trade.

1 That is, "daubing" with clay. — Ed.
2 Biddle adds: "By their vicinity to the British [at Hudson Bay] they get all the supplies, which they withhold or give at pleasure to the remoter Indians." — Ed.
19th Nov. Monday —

A Cold day the ice continue to run our Perogue of Hunters arrive with 32 Deer, 12 Elk & a Buffalow, all of this meat we had hung up in a Smoke house, a timeley supply. Several Indians here all day. the wind blew hard from the N.W. by W. our men move into their huts, Several little Indian anecdotes [anecdotes] told me to day.

20th November Tuesday 1804 —

Cap Lewis & my Self move into our hut, a very hard wind from the W. all the after part of the day a temperate day Several Indians came Down to Eat fresh meat, three Chiefs from the 2d Mandan Village Stay all Day, they are very curious in examining our works. Those Chiefs informs us that the Souex settled on the Missourie above Dog (Chayenne) River, threaten to attacked them this winter, and have treated 2 Ricas who carried the pipe of peace to them very roughly, whiped & took their horses from them &c. &c. & is much displeased with the Ricas for making a peace with the Mandans &c. &c. through us, we gave them a Sattisfactory answer. &c. &c.

21st Nov. Wednesday —

A fine Day despatched a perogue and collected stone for our Chimneys, Some wind from the S.W. arrange our different articles. Maney Indians visit us to day, G D hird his hand very bad all the party in high Spirits. The river Clear of ice, & rising a little.

---

1 Biddle here describes (i, pp. 128, 129) the fort, much as Gass does. — Ed.
2 At this point Biddle describes (i, pp. 129-132) the location, history, and mutual relations of the tribes about Fort Mandan. There are five villages, "the residence of three distinct nations: the Mandans, the Ahnahaways, and the Minnetarees." The Mandan may number about 350 warriors. The Ahnahaway ("people whose village is on a hill") live at the mouth of Knife River, in a village called Mahaha; "they are called by the French, Soulier Noir or Shoe Indians, by the Mandans Wattasoons; and their whole force is about fifty men." Half a mile above Mahaha on the Knife River is a village of the Minitaree surnamed Metaharta ("of the willows"), numbering 150 warriors; and farther up that stream is another, of the Minitaree proper, who have 450 men. "These Minnetarees are part of the great
a fine morning Dispatched a perogue and 5 men under the direction of Sergeant Pryor to the 2nd Village for 100 bushels of Corn in ears which M: Jessomme, let us have [did not get more than 30 bushels]. I was allarmed about 10 oClock by the Sentinal, who informed that an Indian was about to kill his wife in the interpeters fire about 60 yards below the works, I went down and Spoke to the fellow about the rash act which he was like to commit and forbid any act of the kind near the fort. Some misunderstanding took place between this man & his wife [wife] about 8 days ago, and she came to this place, & continued with the Squars of the interpeters, (he might lawfully have killed her for running away) 2 days ago She returned to the vill'ge. in the evening of the Same day She came to the interpeters fire apparently much beat, & Stabed in 3 places. We Directed that no man of this party have any intercourse with this woman under the penalty of Punishment. he the Husband observed that one of our Serjeants Slept with his wife & if he wanted her he would give her to him, We directed the Serjeant (Odway) to give the man Some articles, at which time I told the Indian that I believed not one man of the party had touched his wife except the one he had given the use of her for a nite, in his own bed, no man of the party Should touch his squar, or the wife of any Indian, nor did I believe they touch a woman if they knew her to be the wife of another man, and advised him to take his squar home and live hapily together in future, at this time the Grand Chief of the nation arrived, & lectured him, and they both went off apparently dis (dissatisfied)

nation called Fall Indians, who occupy the intermediate country between the Missouri and the Saskaskawan. The name of Grosventres, or Bigbellies, is given to these Minnetarces, as well as to all the Fall Indians." Mooney says (U. S. Bur. Ethnol. Rep., 1892-93, p. 955) that Grosventres signifies "belly-people" (i. e., grasping and selfish, "spongers"); that the Arapaho division of that name are the "Gros Ventres of the Prairie"; while the Hidatsa or Minitaree with whom Lewis and Clark wintered, are sometimes called "Gros Ventres of the Missouri." See McGee's interpretation of the term Grosventres (ut supra, 1893-94, p. 197). Valuable information regarding all these tribes is given by Washington Matthews, in his Ethnography and Philology of the Hidatsa Indians. — Ed.
The Grand Chief continued (with us) all day, a warm Day fair afternoon many Indian anecdotes our Chief & his family stay all night.

a fair warm Day, wind from the S.E. Send after Stone several men with bad colds, one man Shields with the Rhumtism the river on a Stand having rose 4 inches in all.

24th of November Saturday 1804—
a warm Day Several men with bad colds we continued to cover our Huts with hewed Punchins,\(^1\) finish a Cord to draw our boat out on the bank, this is made of 9 strans of Elk Skin, the wind from the S.E.

25th of Nov. Sunday 1804—
a fine day warm & pleasent Cap' Lewis 2 Interpeters & 6 men Set out to see the Indians in the different Towns & camps in this neighbourhood, we Continu to cover & dob our huts, two Chiefs came to See me to day one named Wau-ke-res-sa-ra, a Big belley, and the first of that Nation who has Visited us Since we have been here, I gave him a handkerchef Paint & a lace band, and the other Some fiew articles, and paid a perticular attention which pleased them verry much, the interpeters being all with Cap' Lewis I could not talk to them. We Compleated our huts. Several men with bad Colds, river falls 1\(\frac{1}{2}\) inch

[Memorandum on p. 221 of this Codex:] Capt. Lewis with Chabono & Jessomme set out to visit the Indian hunting camps, Spent the evening with the black mockerson, the principal Chief of the little village of Big billies.

26th of Nov. 1804 Monday Fort Mandan—
a little before day light the wind shifted to the N.W. and blew hard and the air keen & cold all day, Cloudy and much the appearance of Snow; but little work done to day it being cold &c.

\(^1\) The "puncheons" used in pioneer architecture were simply logs hewn on one side, so as to form a tolerably level surface for floor or ceiling. — Ed.
Visited the upper camps of the big bellies and returned to the lower Camp & passed a second night.

27th of November Tuesday 1804 —

A cloudy morning after a very cold night, the River crowded with floating ice. Wind from the NW. Dobing Cap! Lewis returned from the Villages with two Chiefs Mar-noh-toh & Man-ness-sur ree & a considerable man with the party who accompanied him, The Menetaries, (or Big bellies) were alarmed at the tales told them by the Mandans viz: that we intended to join the Seaux to Cut off them in the Course of the Winter, many Circumstances Combin'd to give force to those reports i. e. the movements of the interpreters & their families to the Fort, the strength of our work &c. &c. all those reports was contradicted by Cap! Lewis with a conviction on the minds of the Indians of the falsity of those reports. The Indians in all the towns & Camps treated Cap! Lewis & the party with Great respect, except one of the principal Chiefs Mar-par-pa-parra-pas-a-too or (Horned Weasel) who did not choose to be Seen by the Cap! & left word that he was not at home &c. Seven Traders arrived from the fort on the Ossinoboin from the NW. Company one of which Lafrance took upon himself to speak unfavourably of our intentions &c. the principal M: La Rock (& M: M: Kensey) was informed of the Conduct of their interpreter & the Consequences if they did not put a Stop to unfavourable & ill founded assurances &c. &c.¹

¹ The names of these traders were: François Antoine Larocque (in charge of this trading expedition), Charles McKenzie, Baptiste Lafrance, and four voyageurs. The journals of both Larocque and McKenzie have been published by L. R. Masson, in his Bourgeois de la Compagnie du Nord-Ouest (Quebec, 1889), i, pp. 299–393; they mention their relations with Lewis and Clark, near whom they remained during that winter. Larocque describes the objects and policy of the Americans, and says: “During the time I was there a very grand plan was schemed, but its being realized is more than I can tell, although the Captains say they are well assured it will . . . . The fort is made so strong as to be almost cannon-ball proof. . . . They have a very expert smith who is always employed making different things, and working for the Indians, who are grown very fond of them, although they disliked them at first.” But McKenzie says: “The Indians accepted of clothing, but, notwithstanding, they could not be reconciled to like these ‘strangers,’ as they called them.” — Ez.
The two Chiefs much pleased with their treatment & the Cherefullness of the party, who Danced to amuse them &c. &c.

The river fall 2 Inches very Cold and began to Snow at 8 oClock PM and continued all night. Some miss understanding with Jussomme¹ & his woman at Day the Snow seased

28th Nov. Wednesday 1804 —

A cold morning wind from the N.W. river full of floating ice, began to Snow at 7 oClock a.m. and continued all day. at 8 oClock the Poss-coss-so-he or Black Cat Grand Chief of the Mandans Came to See us, after Showing those Chiefs many thing[s] which was Curiosities to them, and Giveing a few presents of Curious Handkerchiefs arm band[s] & paint with a twist of Tobacco they departed at 1 oClock much pleased, at parting we had some little talk on the Subject of the British Trader M. Le rock Giveing meadels & Flags, and told those Chiefs to impress it on the minds of their nations that those simbiles were not to be receved by any from them, without they wished [to] incur the displeasure of their Great American Father. a very disagreeable day no work done to day river fall 1 Inch to day

29th November Thursday 1804 —

A very cold windey day wind from the N.W. by W. Some snow last night the depth of the Snow is various in the wood about 13 inches, The river Closed at the Village above and fell last night two feet, M: La Rock and one of his men Came to visit us, we informed him what we had herd of his intentions of making Chiefs &c. and forbid him to give Meadels or flags to the Indians, he Denied having any Such intention, we agreed that one of our interpreters Should

¹ Alexander Henry thus characterizes Jusseaume (Journal, Coues ed., N. Y., 1897, i, p. 401): "that old sneaking cheat, whose character is more despicable than the worst among the natives." — Ed.
Speak for him on Conditions he did not say any thing more than what tended to trade alone. he gave fair promises &c.¹

Sergeant Pryor in taking down the mast put his Shoulder out of Place, we made four trials before we replaced it a cold afternoon wind as usual N W. river begin to rise a little.

This morning at 8 oClock an Indian called from the other Side and informed that he had Something of Consequence to Communicate, we sent a perogue for him & he informed us as follows. Viz: "five men of the Mandan nation out hunting in a S.W. direction about Eight Leagues, was Suprised by a large party of Seeoux & Panies, one man was Killed and two wounded with arrows & 9 Horses taken, 4 of the We ter soon nation was missing, and they expected to be attacked by the Souex &c &c. we thought it well to Show a Disposition to aide and assist them against their enemies, particularly those who Came in oppersition to our Councels; and I Determined to go to the town with Some men, and if the Seeoux were coming to attact the Nation to Collect the worriers from each Village and meet them, those Ideas were also those of Cap't Lewis, I crossed the river in about an hour after the arrival of the Indian express with 23 men including the interpreters and flank'd the Town & came up on the back part. The Indians not expecting to receive Such Strong aide in So Short a time was much supprised, and a littled allarmed at the formadable appearence of my party. The principal Chiefs met me Some Distance from the town (say 200 yards) and invited me in to town. I ord[ered] my p't into dif: lodges

¹ Larocque gives the same account (Masson's Bourg. Nord-Ouest, i, p. 304), and adds: "As I had neither flags nor medals, I ran no risk of disobeying those orders, of which I assured them." The interpreter lent to the British was Charboneau. McKenzie thus describes (ut supra, p. 316) the method of Lewis and Clark's communications with the Indians: "A mulatto, who spoke bad French and worse English, served as interpreter to the Captains, so that a single word to be understood by the party required to pass from the Natives to the woman [Sacajawea, Indian wife of Charboneau, who could not speak English], from the woman to the husband, from the husband to the mulatto, from the mulatto to the captains." — Ed.
&c. I explained to the nation the cause of my coming in this formidable manner to their Town, was to assist and Chastise the enemies of our Dutiful Children. I requested the Grand Cheif to repeat the Circumstances as they hapined, which he did as was mentioned by the express in the morning. I then informed them that if they would assemble their warriors and those of the Different Towns, I would [go] to meet the Army of Souex &c. chastise them for taking the blood of our Dutiful Children &c. After a conversation of a few minutes amongst themselves, one Chief, the Big Man (Cien) (a Cheyenne). Said they now saw that what we had told them was the truth, when we expected the enemies of their Nation was coming to attack them, or had Spilt their blood [we] were ready to protect them, and kill those who would not listen to our Good talk. His people had listened to what we had told them and carelessly went out to hunt in Small parties believing themselves to be Safe from the other nations, and have been killed by the Panies & Seauex, "I knew Said he that the Panies were liers, and told the old Chief who Came with you (to Confirm a piece with us) that his people were liers and bad men and that we killed them like the Buffalow, when we pleased, we had made peace several times and you Nation have always commenced the war, we do not want to kill you, and will not suffer you to kill us or steal our horses, we will make peace with you as our two fathers have directed, and they Shall See that we will not be the Ogressors, but we fear the Ricaries will not be at peace long. "My father those are the words I spoke to the Ricare in your presents. you See they have not opened their ears to your good Counsels but have Spuilt our blood." two Ricaries whom we sent home this day for fear of our peoples killing them in their great, informed us when they came here Several days ago, that two Towns of the Ricaries were making their Mockersons, and that we had best take care of our horses &c." numbers "of Seauex were in their Towns, and they believed not well disposed towards us. four of the Wetersons are now absent they were to have been back in 16 days, they have been out 24 we fear they have fallen. My father the Snow is deep
and it is cold our horses Cannot travel thro the plains, those people who have Spilt our blood have gone back? if you will go with us in the Spring after the Snow goes off we will raise the warriers of all the Towns & Nations around about us, and go with you."

I told this nation that we should be always willing and ready to defend them from the insults of any nation who would dare to Come to doe them injury dureing the time we would remain in their neighbourhood, and request that they would inform us of any party who may at any time be discovered by their Patrodes or Scouts; I was sorry that the snow in the Plains had fallen so Deep Sence the Murder of the young Chief by the Sieoux as prevented their horses from traveling. I wished to meet those Seeoux & all others who will not open their ears, but make war on our dutifull Children, and let you see that the Wariers of your Great father will chastize the enemies of his dutifull Children the Mandans, Wetersoons & Winetarees, who have open' their ears to his advice. you say that the Panies or Ricares were with the Seeaux, some bad men may have been with the Seeaux you know there is bad men in all nations, do not get mad with the recarees untill we know if those bad men are Counternan't by their nation, and we are convs't those people do not intend to follow our Councils. You know that the Seeaux have great influence over the ricarees, and perhaps have led Some of them astry you know that the Ricarees, are Dependant on the Seeaux for their guns, powder, & Ball, and it was policy in them to keep on as good tirms as possible with the Seeaux untill they had Some other means of getting those articles &c. &c. You know yourselves that you are compelled to put up with little insults from the Christinoes & Ossinaboins (or Stone Indt) because if you go to war with those people, they will provent the traders in the North from bringing you Guns, Powder & Ball and by that means distress you verry much, but whin you will have certain Supplies from your Great American father of all those articles you will not Suffer any nation to insult you &c. after about two hours conversation on various Subjects all of which tended towards their
Situation &c. I informed them I should return to the fort, the Chief said they all thanked me very much for the fatherly protection which I shewed towards them, that the village had been crying all the night and day for the death of the brave young man, who fell but now they would wipe away their tears, and rejoice in their father's protection, and cry no more.

I then Paraded & Crossed the river on the ice and Came down on the N. Side, the Snow So Deep, it was very fatiguing arrived at the fort after night, gave a little Tafée¹ (dram to my party), a cold night the river rise to its former hite. The Chief frequently thanked me for coming to protect them — and the whole village appeared thankful for that measure

¹ of December Saturday 1804 —

Wind from the NW. all hands ingaged in getting pickets &c. at 10 oClock the half brother of the man who was killed came & inform'd us that after my departure last night Six Chiens so called by the french or Shar ha Indians had arrived with a pipe and said that their nation was at one days march and intended to come & trade &c. three Panies had also arrived from the nation, (their nation was then within 3 days march & were coming on to trade with us Three Pawnees accomp'd these Chayennes The mandans call all ricaras Pawnees don't use the name of ric but the ric call themselves Ric) The Mandans apprehended danger from the Shar has as they were at peace with the Seaux; and wished to Kill them and the Ricaries (or panies) but the Chiefs informed the nation it was our wish that they Should not be hurt, and forbid their being killed &c.” We gave a little Tobacco &c. & this man Departed well satisfied with our Councils and advice to him.

in the evening a M' G Henderson [arrived — Ed.] in the imploy of the hudsons bay Company sent to trade with the Gros ventre, or Big bellies so called by the french traders

¹ A corruption of “tafia,” defined as “an inferior kind of rum, distilled from sugar refuse or from coarse molasses.” Coues (L. and C., p. 215) asserts that this is “a Malay word which we get from the French by way of the West Indies. We call this liquor Jamaica.” — Ed.
The latter part of last night was very warm and continued to thaw until [blank in MS.] o'clock when the wind shifted to the North at 11 o'clock the Chiefs of the Lower Village of the Mandans [came] with many of their young men and 4 of the Shar-ha's who had come to Smoke with the pipe of Peace with the Mandans, we explained to them our intentions our views and advised them to be at peace. Gave them a flag for their nation, some Tobacco with a Speech to Deliver to their nation on their return, also sent by them a letter to Mr. Tabbo & Gravoline, at the Ricares Village, to intercede in preventing Hostilities, and if they could not effect those measures to send & inform us of what was going on, stating to the Indians the part we intend to take if the Rickores & Seaux did not follow our Directions and be at peace with the nations which we had adopted. We made some new presents to those Shar-ha's and also some to the Mandans & at 3 o'clock they all departed well pleased, having seen many curiosities, which we showed them.

3rd December Monday 1804 —

A fine morning the after part of the day cold & windly the wind from the NW. The Father of the Mandan who was killed came and made us a present of some dried Simnins (Pumpkins) & a little pimecon, (pemitegon) we made him some small presents for which he was much pleased.

4th December Tuesday 1804 —

A cloudy raw day wind from the N.W. the Black Cat and two young Chiefs visit us and as usual stay all day. the river rise one inch finish[ed] the main bastion, our interpreter (Fessoum) we discover to be assuming and discontented.

[233]
5th December Wednesday — 1804

A cold raw morning wind from the S.E. Some Snow, two of the NW. Company came to see us, to let us know they intended to set out for the establishment on the ossiniboin River in two days, & their party would consist of 5 men, several Indians also visited us one brought Pumpkins or Simnins as a present, a little Snow fell in the evening at which time the wind shifted round to N.E.

6th of December Thursday 1804  Fort Mandan —

The wind blew violently hard from the N.N.W. with some snow the air keen and cold. The Thermometer at 8 oClock A.M. stood at 10 deg above 0. at 9 oClock a man & his squaw came down with some meat for the interpreter his dress was a par mockersons of Buffalow skin & pl. legs of goat skin & a Buffalow robe. 14 ring of Brass on his fingers, this Metal (ornament) the Mandans are very fond off. cold after noon river rise 1½ Inch to day.

[Memorandum, p. 220:] Cap' Clark set out with a hunting party killed 8 Buffalow & returned next day

7th of December Friday 1804 —

A very cold day wind from the NW. the Big White Grand Chief of the 1st Village, came and informed us that a large drove of Buffalow was near and his people was waiting for us to join them in a chase Cap' Lewis took 15 men & went out joined the Indians, who were at the time he got up, killing the Buffalow on Horseback with arrows which they done with great dexterity, his party killed 10 Buffalow, five of which we got to the fort by the assistance of a horse in addition to what the men packed on their backs. one cow was killed on the ice after drawing her out of a vacancy in the ice in which she had fallen, and butchered her at the fort. those we did

1 Biddle gives (i, p. 140) a more detailed account of the Indians' buffalo hunt. Gass says (p. 89) that Lewis took eleven men with him, who killed 11 buffalo, while the Indians killed 30 or 40. — Ed.

[234]
not get in was taken by the indians under a Custom which is established amongst them i.e. any person seeing a buffalow lying without an arrow sticking in him, or some particular mark takes possession, many times (as I am told) a hunter who kills many Buffalo in a chase only gets a part of one, all meat which is left out all night falls to the Wolves which are in great numbers, always in [the neighborhood of—Ed.] the Buffalows. the river Closed opposit the fort last night 1½ inches thick, The Thermometer Stood this Morning at 1 d. below 0. three men frost bit badly to day.

8th. December Saturday 1804 —

a very Cold morning, the Thermometer Stood at 12⁴ below 0 which is 42⁴ below the freezing point, wind from the NW. I with 15 men turned out (Indians joined us on horseback shot with arrows rode along side of buffaloe) and killed 8 buffalo & one Deer, one Cow and calf was brought in, two Cows which I killed at 7 miles Ds I left 2 men to Skin & keep off the Wolves, and brought in one Cow & a calf, in the evening on my return to the fort Saw great numbers of Buffalo coming into the Bottom on both Sides of the river this day being Cold Several men returned a little frost bit, one of [the] men with his feet badly frost bit my Servents feet also frosted & his P——s a little, I felt a little fatigued having run after the Buffalo all day in Snow many Places 18 inches Deep, generally 6 or 8, two men hurt their hips very much in slipping down. The Indians kill great numbers of Buffalo to day. 2 reflectings Suns to day.

9th. December Sunday 1804 —

The Thermometer Stood this morning at 7⁰ above 0, wind from the E. Cap't Lewis took 18 men & 4 horses (3 hired I bought) and went out [to] Send in the meet killed yesterday and kill more, the Sun Shown to day Clear, both interpreters went to the Villages to day at 12 oClock two Cheifs came loaded with meat, one with a dog & Slay also loaded with meat, Cap't Lewis Sent 4 Hors's loaded with meat, he continued at the hunting Camp near which they killed 9 buffalo.
Monday Dec. 18, 1804

Fort Mandan—one
day the thermometer to day at 10 & 11 degrees below 0. Cap't Lewis returned, to day at 12 o'clock leaving 6 men at the camp to prepare the meat for to pack 4 horse loads came in, Cap't Lewis had a cold disagreeable night last in the snow on a cold point with one small blanket, the buffalo crossed the river below in immense herds without breaking in. only 2 buffalo killed to day one of which was too poor to skin. The men which were frost bit is getting better. the [river] rise 1 1/2 inch wind north.

Tuesday Dec. 19, 1804

A very cold morning wind from the north. The thermometer at 4 o'clock A.M. at 21° [sunrise at 21°. see list] below 0 which is 53° below the freezing point and getting colder, the sun shows and reflects two images, the ice floating in the atmosphere being so thick that the appearance is like a fog despurring.

Sent out three horses for meat & with directions for all the hunters to return to the fort as soon as possible at 1 o'clock the horses returned loaded, at night all the hunters returned, several a little frost. The black cat chief of the Mandans paid us a visit to day, continue cold all day river at a stand.

Wednesday Dec. 20, 1804

A clear cold morning wind from the north. The thermometer at sun rise stood at 38° below 0., moderated untill 6 o'clock at which time it began to get colder. I line my gloves and have a cap made of the skin of the louservia (Lynx) (or wild cat of the north) the fur near 3 inches long, a indian of the shoe (Maharha or Mocassin) nation came with the half

---

1. An experiment was made with proof spirits, which in fifteen minutes froze into hard ice. — Gass (p. 90).
2. A corruption of the French loup-cervier, the common name of the Canada lynx (Lynx canadensis). — Ed.
3. Merely an Anglicized form of the French appellation Gens de Soulier, applied to the Ahnahaway (see p. 208, note 2, ante). — Ed.
of a *Cabra ko kà* or Antelope which he killed near the Fort. Great numbers of those animals are near our fort (so that they do not all return to rock mountain Goat) but the weather is So Cold that we do not think it prudent to turn out to hunt in Such Cold weather, or at least until our Const are prepared to under go this Climate. I measure the river from bank to bank on the ice and make it 500 yards

13th December Thursday 1804—

The last night was very Clear & the frost which fell covered the ice old Snow & those parts which was naked 1⁄6 of an inch, The Thermometer Stands this morning at 20° below 0, a fine day, find it impossible to make an Observation with an artificial Horrison. Joseph Fields kill a Cow and Calf to day, one mile from the Fort. River fall.

14th December Friday 1804—

a fine Morning, wind from the S. E. the Murckerey Stood at 0 this morning I went with a party of men down the river 18 miles1 to hunt Buffalow, Saw two Bulls too pore to kill, the Cows and large gangues haveing left the River, we only killed two Deer & Camped all night with Some expectation of Seeing the Buffalow in the morning, a very Cold night, Snowed.

15th of December 1804 Saturday—

a Cold Clear morning, Saw no buffalow, I concluded to return to the fort & hunt on each Side of the river on our return which we did without Success. the Snow fell 1 1⁄2 inches deep last night. Wind North. on my return to the fort found Several Chiefs there.

16th December Sunday 1804—

a clear Cold morning, the Thermt at Sun rise Stood at 22° below 0, a very singaler appearance of the Moon last night, as She appeared thro: the frosty atmisper. Mr. Henny from the Establishment on River Ossinniboin, with a letter from,

1 "On the ice with Slays," according to a memorandum on p. 220 of this Codex. — Ed.

[237]
M. Charles Chaboillez one of the C° arrived in 6 Days, Mr. C. in his letter expressed a great anxiety to Serve us in any thing in his power.3

a root Discribed by M. Henny for the Cure of a Mad Dog [blank in MS. —Ed.]

M. LeRock a clerk, of the NW. Company and M. George Bunch a Clerk of the Hudsons beey Compy accompanied M' Henry from the village.

17th December Monday 1804 —

a very Cold morning the Thmt. Stood a[c] 45° below o. We found Mr. Henny a Verry intelligent Man from whom we obtained Some Scetches of the Countrey between the Mississippi & Missouri, and Some Sketches from him, which he had obtained from the Indin' to the West of this place also the names and charactors of the Seeaux &c. about 8 oClock P M. the thermometer fell to 74° below the freezing pointe. the Indian Chiefs Sent word that Buffalow was in our Neighbourhood, and if we would join them, in the morning they would go and kill them.

18th December Tuesday 1804 —

The Themometer the Same as last night Mr' Haney & La Rocke left us for the Grossventre Camp, Sent out 7 men to hunt for the Buffalow they found the weather too cold & returned, Several Indians Came, who had Set out with a View to Kill buffalow, The river rise a little I impoy my Self makeing a Small Map of Connextion &c. Sent Jessomme to the Main Chief of the mandans to know the Cause of his

1 This post, according to Coues (Henry's Journal, i, p. 298) was called Fort Montagne à la Bosse, situated on the Assiniboïn about 50 miles above Mouse River. The messenger's name appears in the L. and C. MSS. as Henny, Henry and Haney. His real name was Hugh Henney, a trader for the Hudson's Bay Company. Larocque mentions his arrival (Masson's Bourg. Nord-Ouest, i, p. 307). Mrs. E. E. Dye cites to the Editor from a MS. journal of a Hudson's Bay Company trader (1812-16) the additional fact that he was head of the Pembina and Red River (of the North) district as late as 1812, when he was superseded by Peter Fidler, with whose earlier exploration Lewis and Clark were acquainted. — Ed.

2 The object of the visits we received from the N. W. Company, was to ascertain our motives for visiting that country, and to gain information with respect to the change of government. — Gass (p. 92).
detaining or takeing a horse of Chabonoe our big belly inter­
peter, which we found was thro: the rascallity of one Lafrance
a trader from the NW. Company, who told this Chief that
Chabonat owd him a horse to go and take him he done So
agreeable to an indian Custom. he gave up the horse

19th December Wednesday 1804 —

The Wind from the S.W. the weather moderated a little, I
engage my Self in Connecting the countrey from information.
river rise a little¹

20th December Thursday 1804 —

The wind from the NW a moderate day, the Therm­
ometer 37° (24°) above o, which gives an opportunity of
putting up our pickets next the river, nothing remarkable
took place to Day river fall a little

21st December Friday 1804 —

a fine Day warm and wind from the NW by W, the
Indian whome I stoped from Commiting Murder on his wife,
thro jelosy of one of our interpeters, Came & brought his
two wives and Shewed great anxiety to make up with the man
with whome his joulussey Sprung. a Womon brought a
Child with an abcess on the lower part of the back, and offered
as much Corn as she Could Carry for some Medison, Cap! Lewis administered &c.

22nd December Saturday 1804 —

worm. a number of Squars & men Dressed in Squars
Clothes² Came with Corn to Sell to the men for little things,
We precured two horns of the animale the french Call the

¹ Biddle here describes a game played by the Mandan with flat rings and sticks
on a level surface. — Ed.
² Reference is here made to a singular class of men who have been found by
travellers and explorers among most of the Southern and Western tribes; they are
commonly called "berdashes" (a corruption of Fr. bardache). They assumed femi­
nine garb and occupations, for the entire span of life, and were regarded with the
utmost contempt by their tribesmen. For accounts of this strange custom, see
Laftau’s Moeurs des sauvages, i, pp. 53, 53; Long’s Expedition, i, p. 129; Carr’s
Mounds of Miss. Valley, p. 33; Catlin’s N. Amer. Indians, ii, pp. 214, 215; Henry’s
Journal, i, pp. 53, 163-165; and Jes. Relations, ix, p. 129. — Ed.
rock Mountain Sheep those horns are not of the largest kind
The Mandans Indians Call this Sheep *Ar-Sar-ta* it is about
the Size of a large Deer, or Small Elk, its Horns Come out
and wind around the head like the horn of a Ram and the
tecture (*texture*) not unlike it much larger and thicker,
particularly that part with which they but[†] or outer part which
is [blank in MS.] inches thick, the length of those horns,
which we have is [blank in MS.]

23rd December Sunday 1804—
a fine Day great numbers of indians of all discriptions
Come to the fort many of them bringing Corn to trade, the
Lewis gave him a few presents as also his wife, She made a
kettle of boiled Cimmins, beens, Corn & Choke Cheries with
the Stones, which was palitable This Desh is Considered, as
a treat among those people, the Chiefs of the Mandans are
fond of stayin’ & Sleeping in the fort

24th December Monday 1804—
Several Chiefs and numbers of Men Womin and Children
at the fort to Day, Some for trade, the most as lookers on,
we gave a fellet of Sheep Skin (which we brought for Spung­
ing) to 3 Chiefs one to each of 2 inches wide, [on] which they
lay Great value (priseing those felets equal to a fine horse), a
fine Day we finished the pickengen (*picketing*) around our
works.

25th December Christmas Tuesday—
I was awakened before Day by a discharge of 3 platoons
from the Party and the french, the men merrily Disposed, I
give them all a little Taffia and permited 3 Cannon fired, at
raising Our flag, Some Men Went out to hunt & the others
to Danceing and Continued untill 9 oClock P.M. when the
frollick ended &c.

1 Biddle says: “We had told the Indians not to visit us, as it was one of our
great medicine days.” Gass says: “Flour, dried apples, pepper, and other articles
were distributed in the different messes to enable them to celebrate Christmas in a
proper and social manner.” Three rations of brandy were served during the day,
which was mainly spent in dancing; no women were present save Charboneau’s three
wives, who were only spectators. — Ed.
a temperate day no Indians to day or yesterday. A man from the NW. Company Came Down from the Gross Ventres to get one of our interepeters to assist them in trade. This man informed that the Party of Gross Ventres who persued the Assiniboins that Stold their horses, had all returned in their useal way by Small parties, the last of the party bringing 8 horses which they Stole from a Camp of Assiniboins which they found on Mouse River.

27^a December 1804 Thursday —

a little fine Snow weather Something Colder than yesterday Several Indians here to Day, much Suprised at the Bellos (Bellows) \(^1\) & method of makeing Sundery articles of Iron Wind hard from the NW.\(^2\)

\(^1\) Which they considered as a very great medicine. — BIDDLE (L. and C., i, p. 145).

\(^2\) Here follows, in Biddle, a sketch of the Siouan tribes, mainly the same information which we have thus far obtained from the MS. text. — Ed.
Chapter VI

Among the Mandans

Clark's Journal, December 28, 1804—February 2, 1805; February 13—March 21, 1805
Entries by Lewis, February 3–13 and March 16

[Clark:]

28th of December Friday 1804—

Blew very hard last night, the frost fell like a Shower of Snow, nothing remarkable to day, the Snow Drifting from one bottom to another and from the leavel plains into the hollows &c.

29th December Saturday 1804—

The frost fell last night nearly a ¼ of an inch Deep and Continud to fall untill the Sun was of Some hite the Mercury Stood this Morning at 9° below o which is not considered Cold, as the Changes take place gradually without long inter­misions a number of Indians here

30th December Sunday 1804—

Cold the Term at 20° below o a number of Indians here to day they are much Supprised at the Bellows one Deer Killed

31st of December Monday 1804 Fort Mandan—

a fine Day Some wind last night which Mixed the Snow and Sand in the bead of the river, which has the appearance of hillocks of Sand on the ice, which is also Covered with Sand & Snow, the frost which falls in the night, Continues on the earth & old Snow &c. &c. a number of indians here every Day our blakSmith Mending their axes hoes &c. &c. for which the Squars bring Corn for payment.¹

¹ Biddle here adds: "In their general conduct during these visits they are honest, but will occasionally pilfer any small article." Mackenzie says (Masson's Bourg. [242]
Fort Mandan on the NE bank of the Missouri 1600 Miles up. Tuesday, January the 1st, 1805.

The Day was ushered in by the discharge of two Cannon, we Suffered 16 men with their Musick to visit the 1st Village for the purpose of Dancing, by as they Said the particular request of the Chiefs of that Village, about 11 oClock I with an inturpreter & two men walked up to the Village, (my views were to alay Some little Miss understanding which had taken place thro jelloucy and mortification as to our treatment towards them. I found them much pleased at the Dancing of our men, I ordered my black Servent to Dance which amused the Croud Verry much, and Somewhat astonished them, that So large a man should be active &c. &c. I went into the lodges of all the men of note. except two, whom I heard had made Some expressions not favourable towards us, in Compareing us with the traders from the north,—those Chiefs observed (to us that) what they Sayed was in just (in jest) & laftur. just as I was about to return, the 2d Chief a(nd) the Black man, also a Chief return'd from a Mission on which they had been Sent to meet a large party (150) of Gross Ventres who were on their way down from their Camps 10 Miles above to revenge on the Shoe tribe an injury which they had received by a Shoe man Stealing a Gross Ventres Girl, those Chiefs gave the pipe [and] turned the party back, after Delivering up the Girl, which the Shoe Chief had taken and given to them for that purpose.” I returned in the evening,

Nord-Ouest, i, p. 350), of the Indian opinion regarding Lewis and Clark: “The Indians admired the air gun, as it could discharge forty shots out of one load, but they dreaded the magic of the owners. ‘Had I these white warriors in the upper plains,’ said the Gross Ventres chief, ‘my young men on horseback would soon do for them, as they would do for so many wolves, for,’ continued he, ‘there are only two sensible men among them, the worker of iron and the mender of guns.’ — Ed.

1 “Particularly with the movements of one of the Frenchmen who danced on his head” (Biddle). Coues here asserts (i, p. 219) that Clark explained to Biddle that the Frenchman danced on his hands, head downward. — Ed.

2 Biddle here adds “or wandering Minnetarees,” an epithet often used by Lewis and Clark to designate an Arapaho band, who are still known as “Gros Ventres of the Prairie,” in distinction from the “Gros Ventres of the Missouri,” the term commonly applied to the Minnetaree (now settled at Fort Berthold, N. D.). See p. 225, note, ante. — Ed.
at night the party except 6 returned, with 3 robes, an[d] 13 Strings of Corn which the indians had given them. The Day was warm, Themt 34° above o, Some few Drops of rain about Sunset, at Dark it began to Snow, and Snowed the greater part of the night, (the temp for Snow is about o) The Black Cat with his family visited us to day and brought a little meet

2\textsuperscript{nd} of January Wednesday 1805 —

a Snowey morning, a party of Men go to Dance at the 2\textsuperscript{nd} Village to Dance, Cap' Lewis & the interpret' Visit the 2\textsuperscript{nd} Village, and return in the evening, Some Snow to Day Verry cold in the evening\textsuperscript{1}

3\textsuperscript{rd} of January Thursday 1805 —

Some Snow to day, 8 men go to hunt the buffalow, killed a hare & wolf. Several Indians visit us to day & a Gross Ventre came after his wife, who had been much abused, & came here for Protection.

4\textsuperscript{th} of January Friday 1805 Fort Mandan —

a worm Snowey Morning, the Themt at 28\textdegree; above o, Cloudy, Sent out 3 Men to hunt down the river, Several Indians Came to day, the little Crow, who has proved friendly Came, we gave him a handkerchf & 2 files, in the evening the weather became cold and windey, wind from the NW. I am Verry unwell the after part of the Daye

5\textsuperscript{th} of January Saturday 1805 —

a cold day Some Snow, Several Indians visit us with their axes to get them mended, I impoy my Self Drawing a Connection of the Countrey\textsuperscript{2} from what information I have re-

\textsuperscript{1} This day I discovered how the Indians keep their horses during the winter. In the day-time they are permitted to run out and gather what they can; and at night are brought into the lodges, with the natives themselves, and fed upon cottonwood branches; and in this way are kept in tolerable case. — Gass (p. 56).

\textsuperscript{2} This map was sent to President Jefferson, April 7, 1805, and preserved in the archives of the War Department. As drafted by Nicholas King, 1806, it is cited herein as "Lewis's map of 1806." — Cooes (L. and C., i. p. 221).

An atlas volume contains this and others of Clark's maps.
a Buffalow Dance (or Medeson) (Medecine) for 3 nights passed in the 1st Village, a curious Custom the old men arrange themselves in a circle & after Smoke[ing] a pipe which is handed them by a young man, Dress[ed] up for the purpose, the young men who have their wives back of the Circle go [each] to one of the old men with a whining tone and request the old man to take his wife (who presents [herself] necked except a robe) and — (or Sleep with her) the Girl then takes the Old Man (who very often can scarcely walk) and leads him to a convenient place for the business, after which they return to the lodge; if the old man (or a white man) returns to the lodge without gratifying the Man & his wife, he offers her again and again; it is often the Case that after the 2nd time without Kissing the Husband throws a new robe over the old man &c. and begs him not to despise him & his wife. We Sent a man to this Medisian Dance last night, they gave him 4 Girls) all this is to cause the buffalow to Come near So that they may Kill them

6th of January Sunday 1805 —

a Cold day but few Indians to day I am ingaved [engaged] as yesterday

7th of January Monday 1805 —

a very cold Clear Day. The Them't: Stood at 22° below o Wind NW., the river fell 1 inch Several Indians returned from hunting, one of them the Big White Chief of the Lower Mandan Village, Dined with us, and gave me a Sketch of the Countrey as far as the high Mountains, & on the South Side of the River Rejone,2 he says that the river rejone receves (receives) 6 Small rivers on the S. Side, & that the Countrey is very hilly and the greater part Covered with timber Great numbers of beaver &c. the 3 men returned from hunting, they kill'd, 4 Deer & 2 Wolves, Saw Buffalow a long ways off. I continue to Draw a connected plot from the

1 This ceremony is described much more fully by Biddle (i, pp. 150, 151), and by Prince Maximilian (Peyage, ii, pp. 453, 454, and iii, pp. 56-60). — Ed.
2 An imperfect phonetic rendering of the French name Roche-Jaune, meaning "Yellowstone," still applied to the river here described. — Ed.
information of Traders, Indians & my own observation & ideas. from the best information, the Great falls is about (800) miles nearly West,

8th of January Tuesday 1805 —

a cold Day but few Indians at the fort to day wind from the N.W. one man at the Village

9th of January Wednesday 1805

a Cold Day Thermometer at 21° below 0, great numbers of Indians go to kill Cows, (Clark acc. them with 3 or 4 men killed a number of cows near the fort.) the little Crow Brackf with us. Several Indians Call at the Fort nearly froze, one man reported that he had Sent his Son a Small boy to the fort about 3 oClock, & was much distressed at not finding him here, the after part of this day very Cold, and wind keen

10th of January Thursday 1805

last night was excessively Cold the Murkery this morning Stood at 40° below 0 which is 72° below the freezing point, we had one man out last night, who returned about 8 oClock this morning. The Indians of the lower Village turned out to hunt for a man & a boy who had not returned from the hunt of yesterday, and borrow'd a Slay to bring them in expecting to find them froze to death about 10 oClock the boy about

1 Larocque says (Masson’s Bourgeois, pp. 310, 311) that Lewis and Clark found all the longitudes estimated by David Thompson to be inaccurate. He gives interesting details as to the territorial claims of the United States, saying: “They include in their territory as far north as River appelée, for, as it was impossible for a line drawn west from the west end of Lac des Bois to strike the Mississippi, they make it run till it strikes its tributary waters, that is, the north branches of the Missouri and from thence to the Pacific.” — En.

2 Biddle here describes another licentious ceremony, called “the medicine-dance.” — Ed.

3 The buffaloes were usually called by the French hunters “wild cows” or “wild cattle,” a term often adopted by the English. — En.

4 In Biddle’s account are found some additional details, especially interesting as showing a humane and generous nature in these Indians: “The boy had been a prisoner and adopted from charity, yet the distress of the father proved that he felt for him the tenderest affection. The man was a person of no distinction, yet the whole village was full of anxiety for his safety.” — Ed.
13 years of age. Came to the fort with his feet frosted and had layed out last night without fire with only a Buffalo robe to cover him. The dress which he wore was a pr. of Cabra (antelope) leggings, which is very thin and mockersons. We had his feet put in cold water and they are coming too. Soon after the arrival of the boy, a man came in who had also stayed out without fire, and very thinly clothed, this man was not the least injured. Customs & the habits of those people has anured them to bare more cold than I thought it possible for man to endure. Sent out 3 men to hunt Elk below about 7 miles.

11th January Friday 1805

Verry cold, send out 3 men to join 3 now below & hunt, Pose-cop se ha or black cat came to see us and stay all night. Sho ta har ro ra or coal also stay all night. The inturpiter oldst wife sick. Some of our Men go to see a war Medeson made at the Village on the opposite side of the river, this is a [blank in MS.]

12th of January Saturday 1805

A verry cold day three of our hunters J & R Fields withe 2 Elk on a Slay. Sent one more hunter out.

13th of January Sunday 1805

A cold clear day (great number of Indians move down the river to hunt) those people kill a number of Buffalo near their Villages and save a great perpotion of the Meat, theer custom of making this article of life general (see note) common leaves them more than half of their time without meat. Their Corn & Beans &c they keep for the Summer, and as a reserve in case of an attack from the Soues, [of] which they are always in dread, and Sildom go far to hunt except in large parties, about 3/4 the Mandans nation passed this to day to hunt on.

1 Referring to the custom of dividing their game equally among all the families of the tribe, whether or not these have sent out men to the hunt, and to their improvidence and carelessness (see Biddle, i, pp. 153, 159). — En.
the river below, they will Stay out some Days, M: Chabonee (our inturpeter) and one man that accompanied him to some loges of the Menatarrees near the Turtle Hill ¹ returned, both frosted in their faces. Chaboneu informs that the Clerk of the Hudson Bay Co. with the Me ne tar res has been Speaking some few express unfavourable towards us, and that it is Said the NW Co: intends building a fort at the Mene tar rés. he Saw the grand Chief of the Big bellies who Spoke Slightly of the Americans, Saying if we would give our great flag to him he would Come to See us.

14th of January 1805 Monday

This morning early a number of indians men women children Dogs &c. &c. passed down on the ice to joine those that passed yesterday, we Sent Serg' Pryor and five men with those indians to hunt (Several men with the Venereal caught from the Mandan women) one of our hunters Sent out Several days [ago] arived & informs that one Man (Whitehouse) is frost bit and Can’t walk home.

15th January Tuesday 1805 Fort Mandan

between 12 & 3 oClock this Morning we had a total eclips of the Moon, a part of the observations necessary for our purpose in this eclips we got which is

\[
\text{at 12 h-57 m-54 s Total Darkness of the Moon}
\]
\[
\text{at -1 -44 -00 End of total Darkness of The moon}
\]
\[
\text{at 2 -39 -10 End of the eclips.}
\]

This morning not so Cold as yesterday Wind from the S.E. wind choped around to the N.W. Still temperate four Considerate [considerable — Ed.] men of the Menetarre Came to See us We Smoked in the pipe, many Mand: present also, we Showed (attentions) to those men who had been impressed with an unfavourable oppinion of us (which satisfied them).

¹ On the Little Missouri River. — Ed.

[ 248 ]
about thirty Mandans came to the fort to day, 6 chiefs, those Me-ne-ta-rees told them they were liars, had told them if they Came to the fort the whites men would kill them, they had been with them all night, Smoked in the pipe and have been treated well and the whites had danced for them, observing the Mandans were bad and ought to hide themselves. one of the 1st War Chiefs of the big bell[ies] nation Came to see us to day with one man and his Squaw to wate on him (requested that she might be used for the night) (his wife handsome) We Shot the Air gun, and gave two Shots with the Cannon which pleased them very much, the little Crow 2d Chf of the lower Village Came & brought us Corn &c. 4 men of ours who had been hunting returned one frost’d

This War Chief gave us a Chart in his Way of the Missourie, he informed us of his intentions of going to War in the Spring against the Snake Indians we advised him to look back at the number of Nations who had been destroyed by War, and reflect upon what he was about to do, observing if he wished the happiness of his nation, he would be at peace with all, by that by being at peace and having plenty of goods amongst them & a free intercourse with those defenceless nations, they would get on easy terms a greater Number of horses, and that Nation would increas, if he went to War against those Defenceless people, he would displease his great father, and he would not receive that perfection & care from him as other Nations who listened to his word. This Chief who is a young man 26 y’ld replied that if his going to war against the Snake Indians would be displeasing to us he would not go, he had horses enough.

We observed that what we had said was the words of his great father, and what we had Spoken to all the Nations which we Saw on our passage up, they all promis to open their ears, and we do not know as yet if any of them has Shut them (we are doubtfull of the Soues) if they do not attend to what we have told them their great father will open their ears. This Chief Said that he would advise all his nation to stay at home untill we Saw the Snake Indians & Knew if they would be friendly, he himself would attend to what we had told him.

[249]
a verry Windey morning hard from the North Thermomiter at o, Several Indians here to day

a fine worm morning, M: La Rock a[nd] M:Kinzey Came down to See us with them Several of the Grosse Ventres.

a fine Day Mess:

Sent three horses down to our hunting Camp for the meet they had killed, Jussomes Squar, left him and went to the Village

a Cold fair day Several Indians at the fort to day a Missunderstanding took place between the two inturpers on account of their squars, one of the Squars of Shabowner Squars being Sick, I ordered my Servent to give her Some froot Stewed and tee at dif times which was the cause of the missundst.1

a number of Indians here to day a fine day nothing remarkable one ban [man] verry bad with the pox.

a find warm Day attempted to Cut the Boat & perogues out of the Ice, found water at about 8 inches under the t. Ice, the next thickness about 3 feet

A Cold Day Snow fell 4 Inches deep, the accuracies (accuracies) of this day is as is common

1 I went up with one of the men to the villages. They treated us friendly and gave us victuals. After we were done eating they presented a bowfiful to a buffaloe head, saying, "eat that." Their superstitious credulity is so great, that they believe by using the head well, the living buffaloe will come, and that they will get a supply of meat.—Gass (pp. 98, 99).
24th January Thursday 1805

a fine day, our interpreters appear to understand each other better than a few days past. Sent out several hunters, they returned without killing anything. Cut Coal wood.¹

25th of January 1805 Friday

we are informed of the arrival of a band of Assiniboins at the villages with the Grand Chief of those tribes called (Fee de petite veau) (Fils de Petit veau) to trade, one of our interpreters & one man set out to the Big Belley Camp opposite the Island, men employ'd in cutting the boat out of the ice, and collecting Coal wood.

26th of January Saturday 1805

a very fine warm day. Several Indians dine with us and are much pleased. One man taken violently bad with the Plurisy, bleed & apply those remedies common to that disorder.

27th of January Sunday 1805

a fine day, attempt to cut out our boat and canoes out of the ice, a difficult task I fear as we find water between the ice. Bleed the man with the Plurisy to day & sweet him, Cap' Lewis took off the toes of one foot of the boy who got frost bit some time ago, Shabonee our interpreter returned, & informed that the Assiniboins had returned to their camps, & brought 3 horses of M' Larock's to stay here for fear of their being stolen by the Assiniboins who are great rogues.² cut off the boy's toes.

28th January Monday 1805

attempt to cut through the ice to get our boat and canoos out without success, several Indians here wishing to get war hatchets made the man sick yesterday is getting well. M' Jessome our interpreter was taken very unwell this evening. warm day

¹ Wood to make charcoal. — Biddle (i, p. 156).
² Larocque says that he sent his horses to the fort in accordance with Captain Clark's offer to care for them with his own animals. — Ed.

[251]
Gave Jassome a Dost of Salts. We Send & Collect Stones and put them on a large log heap to heat them with a view of worming water in the boat and by that means, separate her from the Ice, our attempt appears to be defeated by the stones all breaking & flying to pieces in the fire, a fine warm Day, we are now burning a large Coal pit, to mend the Indians hatchets, & make them war axes, the only means by which we procure Corn from them.

a fine morning, clouded up at 9 oClock, M' La Rocke paid us a Visit, & we gave him an answer respecting the request he made when last here of accompanying us on our Journey &c. (refused)

Snowed last night, wind high from the NW. Sawed off the boys toes. Sent 5 men down the river to hunt with 2 horses, our interpreter something better, George Drewyer taken with the Pleurisy last evening Bled & gave him Some Sage tea, this morning he is much better. Cold disagreeable Day

a cold windey Day our hunters return'd having killed only one Deer, a War Chief of the Me ne tar ras came with some Corn requested to have a War hatchet made, & requested to be allowed to go to War against the Soues & Recarres who had Killed a mandan Some time past. We refused, and gave reasons, which he very readily assented to, and promised to open his ears to all we Said this Man is young and named (Seeing Snake)-Mar-book, She-ah-O-ke-ah. this mans Woman Set out & he prosued her, in the evening.

a fine Day, one Deer killed our interpeter Still unwell, one of the wives of the Big belley interpeter Sick. M' Larocke leave us to day (this man is a Clerk to the NW. Company, & verry anxious to accompany us)
a fine day; the blacksmith again commences his operations. we were visited by but few of the natives today. the situation of our boat and perogues is now alarming, they are firmly inclosed in the Ice and almost covered with snow — the ice which incloses them lyes in several stratas of unequal thicknesses which are seperated by streams of water. this peculiarly unfortunate because so soon as we cut through the first strata of ice the water rushes up and rises as high as the upper surface of the ice and thus creates such a depth of water as renders it impracticable to cut away the lower strata which appears firmly attached to, and confining the bottom of the vessels. the instruments we have hitherto used has been the ax only, with which, we have made several attempts that proved unsuccessful from the cause above mentioned. we then determined to attempt freeing them from the ice by means of boiling water which we purposed heating in the vessels by means of hot stones, but this expedient proved also fruitless, as every species of stone which we could procure in the neighbourhood partook so much of the calcarius genus that they burst into small particles on being exposed to the heat of the fire. we now determined as the dernier resort to prepare a parcel of Iron spikes and attach them to the end of small poles of convenient length and endeavour by means of them to free the vessels from the ice. we have already prepared a large rope of Elk-skin and a windless by means of which we have no doubt of being able to draw the boat on the bank provided we can free it from the ice.

4th February, Monday 1805.

This morning fair tho' could the thermometer stood at 18° below Naught, wind from N.W. Capt Clark set out with a hunting party consisting of sixteen of our command

---

1 From this point to the 13th of February, the journal is written by Lewis, during Clark's absence on a hunting expedition (Feb. 4-13). This is the only hiatus in Clark's regular journalizing, throughout the entire expedition; but under date of February 13th, pp. 259-260, post, after his return, he gives a brief summary of the events of each day during his trip, so that his record is practically complete. — Ed.
and two Frenchmen who together with two others, have established a small hut and resided this winter within the vicinity of Fort Mandan under our protection. visited by many of the natives today. our stock of meat which we had procured in the Months of November & December is now nearly exhausted; a supply of this articles is at this moment peculiarly interesting as well for our immediate consumption, as that we may have time before the approach of the warm season to prepare the meat for our voyage in the spring of the year. Capt. Clark therefore determined to continue his rout down the river even as far as the River bullet\(^1\) unless he should find a plenty of game nearer. the men transported their baggage on a couple of small wooden Slays drawn by themselves, and took with them 3 pack horses which we had agreed should be returned with a load of meat to fort mandan as soon as they could procure it. no buffaloe have made their appearance in our neighbourhood for some weeks (time shorter); and I am informed that our Indian neighbours suffer extremely at this moment for the article of flesh. Shields killed two deer this evening, both very lean—one a large buck, he had shed his horns.

5\(^{th}\) February Tuesday 1805.—

Pleasant morning wind from N.W. fair; visited by many of the natives who brought a considerable quanity of corn in payment for the work which the blacksmith had done for them they are pecu[1]larly attatched to a battle ax formed in a very inconvenient manner in my opinion. it is fabricated of iron only, the blade is extremely thin, from 7 to nine inches in length and from 4 3/4, to 6 Inches on it's edge, from whence the sides proceed nearly in a straight line to the eye where it's width is generally not more than an inch. the eye is round & about one inch in diameter, the handle seldom more than fourteen inches in length, the whole weighing about one pound the great length of the blade of this ax, added to the small size of the handle renders a stroke uncertain and

---

\(^{1}\) The Cannon-ball River, which empties into the Missouri near Fort Rice, N. D. The expedition had reached the mouth of this stream on Oct. 18. — Ed.

[254]
easily avoided, while the shortness of the handle must render a blow much less forceable if even well directed, and still more inconvenient as they uniformly use this instrument in action on horseback. The calder fashion is still more inconvenient, it is somewhat in the form of the blade of an Espantoon⁴ but is attacht⁴ to a helve of the dementions before discribed the blade is sometimes by way of ornament pur- forated with two three or more small circular holes the following is the general figure it is from 12 to 15 inces in length

6th February Wednesday 1805.

Fair morning Wind from N.W. had a sley prepared against the return of the horses which Capt Clark had promised to send back as soon as he should be able to procure a load of meat. visited by many of the natives among others the Big white, the Coal, big-man, hairy horn and the black man, I smoked with them, after which they retired, a deportment not common, for they usually pester us with their good company the ballance of the day after once being introduced to our apartment. Shields killed three antelopes this evening. the blacksmiths take a considerable quantity of corn today in payment for their labour. the blacksmith's have proved a happy reso[r]ce to us in our present situation as I believe it would have been difficult to have devised any other method to have procured corn from the natives. the Indians are extravegantly fond of sheet iron of which they form arrow-points and manu­ facter into instruments for scraping and dressing their buffaloe robes. I permited the blacksmith to dispose of a part of a sheet iron callaboos (camboose,² stove) which had been nearly biirnt out on our passage up the river, and for each piece about four inches square he obtained from seven to eight gallons of corn from the natives who appeared extreemly pleased with the exchange

¹ A rare and practically obsolete form of spontoon, a word itself now little used. The implement meant is the half-pike, a sort of halberd formerly used by certain officers of the British army. — Coues (L. and C., i, p. 230).
² This is an unusual form of caboose, from the Dutch mariners' name of the cook's galley. — Ed.
7th February Thursday 1805.

This morning was fair Thermometer at 18° above naught much warmer than it has been for some days; wind S.E. continue to be visited by the natives. The Serg: of the guard reported that the Indian women (wives to our interpreters) were in the habit of unbearing the fort gate at any time of night and admitting their Indian visitors, I therefore directed a lock to be put to the gate and ordered that no Indian but those attatched to the garrison should be permitted to remain all night within the fort or admitted during the period which the gate had been previously ordered to be kept shut, which was from sunset untill sunrise.

8th February Friday 1805.

This morning was fair wind S.E. the weather still warm and pleasant, visited by the black-Cat the principal chief of the Roop-tar-he, or upper mandane village, this man possesses more integrety, firmness, intelligence and perspicuity of mind than any indian I have met with in this quarter, and I think with a little management he may be made a usefull agent in furthering the views of our government. The black Cat presented me with a bow and apologized for not having completed the shield he had promised alledging that the weather had been too could to permit his making it, I gave him som small shot 6 fishing-hooks and 2 yards of ribbon his squaw also presented me with 2 pair of mockersons for which in return I gave a small lookingglass and a couple of nedles, the chief dined with me and left me in the evening. he informed me that his people suffered very much for the article of meat, and that he had not himself tasted any for several days.

9th February Saturday 1805.

The morning fair and pleasant, wind from S.E. visited by M: M'Kinzeey one of the N.W. Company's clerks, this evening a man by the name of Howard whom I had given permission to go [to] the Mandane vilage returned after the gate was shut and rather than call to the guard to have it opened scaled the works an indian who was looking on shortly after
followed his example. I convinced the Indian of the impropriety of his conduct, and explained to him the risk he had run of being severely treated, the fellow appeared much allarmed, I gave him a small piece of tobacco and sent him away Howard I had comitted to the care of the guard with a determineation to have him tryed by a Court-martial for this offence. this man is an old soldier which still heightens this offince.

10th February Sunday 1805.

This Morning was Cloudy after a slight Snow which fell in the course of the night the wind blue very hard from N.W. altho' the thermometer stood at 18° above naught the violence of the wind caused a degree of could that was much more un­pleasent than that of yesterday when thermometer stood at 10° only above the same point. M' M'Kinzey left me this morn­ing. Charbono returned with one of the Frenchmen, and informed me that he had left the three Horses and two men with the meat which Cap' Clark had sent at some distance below on the river he told me that the horses were heavy loaded and that not being shod it was impossible for horses to travel on the ice. I determined to send down some men with two small slays for the meat and accordingly I gave orders that they should set out early the next morning. two men were also sent to conduct the horses by way of the plain.

11th February Monday 1805.

The party that were ordered last evening set out early this morning, the weather was fair and cold wind N.W. about five Oc­lock this evening one of the wives of Charbono was delivered of a fine boy.1 it is worthy of remark that this was the first child which this woman had boarn, and as is common in such cases her labour was tedious and the pain violent; M' Jessome informed me that he had freequently adminis­tered a small portion of the rattle of the rattle-snake, which he

1 This was Sacajawea, the Shoshone captive purchased by Charboneau, who had two other wives among the Mandan. Sacajawea was the only woman taken upon the Expedition. — Ed.
assured me had never failed to produce the desired effect, that of hastening the birth of the child; having the rattle of a snake by me I gave it to him and he administered two rings of it to the woman broken in small pieces with the fingers and added to a small quantity of water. Whether this medicine was truly the cause or not I shall not undertake to determine, but I was informed that she had not taken it more than ten minutes before she brought forth perhaps this remedy may be worthy of future experiments, but I must confess that I want faith as to it's efficacy.

12th February Tuesday 1805.

The morning was fair tho' cold, thermometer at 14° below naught wind S.E. ordered the Blacksmith to shoe the horses and some others to prepare some gears in order to send them down with three slays to join the hunting party and transport the meat which they may have procured to this place the men whom I had sent for the meat left by Charbono did not return untill 4 OClock this evening. Drewyer arrived with the horses about the same time, the horses appeared much fatiged I directed some meal brands [bran] given them moistened with a little water but to my astonishment found that they would not eat it but prefered the bark of the cotton wood which forms the principall article of food usually given them by their Indian masters in the winter season; for this purpose they cause the tree to be felled by their women and the horses feed on the boughs and bark of their tender branches. the Indians in our neighbourhood are frequently pilfered of their horses by the Recares, Souixs and Assiniboins and therefore make it an invariable rule to put their horses in their lodges at night. in this situation the only food of the horse consists of a few sticks of the cottonwood from the size of a man's finger to that of his arm. the Indians are invariably severe riders, and frequently have occasion for many days together through the whole course of the day to employ their horses in pursuing the Buffaloe or transporting meat to their vilages during which time they are seldom suffered to tast food; at night the Horse returned to his stall where his
food is what seems to me a scanty allowance of wood. under these circumstances it would seem that their horses could not long exist or at least could not retain their flesh and strength, but the contrary is the fact, this valuable animal under all those disadvantages is seldom seen meager or unfit for service. A little after dark this evening Cap' Clark arrived with the hunting party since they set out they have killed forty Deer, three buffaloe bulls, & sixteen Elk, most of them were so meager that they were unfit for use, particularly the Buffaloe and male Elk the wolves also which are here extremely numerous helped themselves to a considerable proportion of the hunt. if an animal is killed and lies only one night exposed to the wolves it is almost invariably devoured by them.

15th February Wednesday 1805.

The morning cloudy thermometer 2° below naught wind from S.E. visited by the Black-Cat gave him a battle axe with which he appeared much gratified.

[Clark:] 1 returned last Night from a hunting party much fatigued, having walked 30 miles on the ice and through Points of wood land in which the Snow was nearly Knee Deep.

The 1st day [Feb 4] I left the fort proceeded on the ice to new Mandan Island, 22 miles & camped, killed nothing, & nothing to eat.

The 2d day — the morning verry Cold & Windey. I broke thro the ice and got my feet and legs wet. Sent out 4 hunters thro' a point to kill a Deer & cook it by the time the party should get up, those hunters killed a Deer & 2 Buffalow Bulls the Buffalow too Meagur to eat, we eate the Deer & proceeded on to an old Indian Lodge, Sent out the hunters & they brought in three lean Deer, which we made use of for food, walking on uneaven ice has blistered the bottoms of my feet, and walking is painfull to me.

1 Clark here resumes the record, and the remainder of the journal in Codex C is (with the exception of one entry) in his handwriting. — Ed.

[259]
3rd day — cold morning the after part of the Day worm, Camped on a Sand point near the mouth of a Creek on the SW. Side We Call hunting Creek, I turned out with the hunters I killed 2 Deer the hunters killed an Elk, Buffalow Bull, & 5 Deer. all Meager

4th Day — hunted the two bottoms near the Camp Killed 9 Elk, 18 Deer, brought to camp all the meat fit to eate, & had the bones taken out. every man ingaged either in hunting or Collecting & packing the meat to Camp

5th Day — Despatched one of the party our interpreter & 2 french men with the 3 horses loaded with the best of the meat to the fort 44 miles Distant, the remaining meat I had packed on the 2 Slays & drawn down to the next point about 3 miles below, at this place I had all the meat collected which was killed yesterday & had escaped the Wolves, Ravin & Magpie; (which are very numerous about this place) and put into a close pen made of logs to secure it from the wolves & birds & proceeded on to a large bottom nearly opposit the Chisscheter (heart) River, in this bottom we found but little game, Great No. of Wolves, on the hills Saw Several parsels of Buffalow. Camped. I killed a Buck

6th Day — The Buffalow Seen last night provd to be Bulls. lean & unfit for to make use of as food, the Distance from Camp being nearly 60 miles and the packing of meat that distance attended with much difficulty Deturmined me to return and hunt the points above, we Set out on our return and halted at an old Indian lodge 40 miles below Fort Mandan, Killed 3 Elk, & 2 Deer.

7th Day — a cold Day wind blew hard from the N.W. J. Fields got one of his ears frosed deturmined to lay by and hunt to day Killed an Elk & 6 deer, all that was fit for use of this meat I had Boned and put into a Close pen made of logs.

8th Day — the air keen halted at the old Camp we stayed in on the 2d night after we left the Fort, expecting to meat the horses at this Place, killed 3 Deer, Several men being nearly out of Mockersons, & the horses not returning deturmined me to return to the Fort on tomorrow.

[260]
9th day. — Set out early, Saw great numbers of Grouse feeding on the young Willows, on the Sand bars, one man I sent in persute of a gangue of Elk Killed three near the old Ricara Village, and joined at the fort, Sent him back to secure the meat, one man with him. The ice on the Parts of the river which was very rough, as I went down, was Smothe on my return. This is owing to the rise and fall of the water, which takes place every day or two, and Caused by partial thaws, and obstructions in the passage of the water thro the Ice, which frequently attaches itself to the bottom, the water when rising forces its way thro the cracks & air holes above the old ice, & in one night becomes a Smothe Surface of ice 4 to 6 Inches thick, the River falls & the ice Sink in places with the water and attaches itself to the bottom, and when it again rises to its former hite, frequently leaves a Valley of Several feet to Supply with water to bring it on a leavel Surfice. The water of the Missouri at this time is Clear with little tinge.

I saw Several old Villages near the Chisscheter River on enquiry found they were Mandan Villages destroyed by the Sous & Small Pox, they [were] numerous and lived in 6 (9) Villages near that place.

14th of February Thursday 1805.

The Snow fell 3 inches Deep last Night, a fine morning, Despatched George Drewyer & 3 men, with two Slays drawn by 3 horses for the Meat left below.

15th of February Friday 1805

at 10 oClock P M. last night the men that [were] despatched yesterday for the Meat, returned and informed us that as they were on their march down at the distance of about 24 miles below the Fort (G. Drewyer Frasure, S Gutterage, & Newman with a broken Gun), about 105 Indians which they took to be Sous rushed on them and cut their horses from the Slays, two of which they carried off in great hast, the 3rd horse was given up to the party by the intersetion of an Indian who assum'd.

1 These men were George Drouillard, Robert Frazier, Silas Goodrich, and John Newman. — Ed.
Some authority on the occasion, probably more thro fear of himself or Some of the Indians being killed by our men who were not disposed to be Robed of all they had tamely, they also forced 2 of the mens knives & a tamahauk, the man obliged them to return the tamahawk [, but] the knives they ran off with.

We dispatched two men to inform the Mandans, and if any of them chose to pursue those robbers, to come down in the morning, and join Cap' Lewis who intended to Set out with a party of men Verry early, by 12 oClock the Chief of the 2nd Village Big White came down, and Soon after one other Chief and Several men. The Chief observed that all the young men of the 2 Villages were out hunting, and but verry few guns were left, Cap' Lewis Set out at Sunrise with 24 men, to meet those Soues &c. Several Indians accompanied him Some with Bows & arrows Some with Spears & Battle axes, 2 with fuzees (fusils). the morning fine The Thermometer Stood at 16° below 0, Nought, visited by 2 of the Big Bellies this evening, one Chief of the Mandans returned from Cap' Lewises Party nearly blind, this Complaint is as I am inform'd Common at this Season of the year and caused by the reflection of the Sun on the ice & Snow, it is cured by “jentilley sweet­ting the part affected, by throwing Snow on a hot Stone.”

a Verry Cold part of the night one man Killed a verry large Red Fox to day.

16th of February Saturday 1805

a fine morning, visited by but few Indians to day, at Dusk two of the Indians who wint down with Cap' Lewis returned, Soon after two others and one man (Howard) with his feet frosted, and informed that the Ind' who Committed the robery of the 2 horses was So far a head that they could not be overtaken, they left a number of pars of Mockersons which, the Mandans knew to be Soues Mockersons, This war party camped verry near the last Camp I made when on my hunting party, where they left Some Corn, as a deception, with a view to induce a belief that they were Ricarras.

1 Flint-lock muskets. — Ed.
Cap' Lewis & party proceeded on down the meat I left at my last Camp was taken.

17th of February Sunday 1805
this morning worm & a little Cloudy, the Coal & his Son visited me to day with a about 30lb of dri[e]d Buffalow meat, & Some Tallow M: M: Kinsey one of the NW. Comp.* Clerks visited me (one of the ho[r]ses the Sous robed a few Days past. belonged to this man) The after part of the day fair.

18th of February Monday 1805
a cloudy morning Some Snow, Several Indians here to day M: M: Kinsey leave me, the after part of the day fine I am much engaged makeing a descriptive List of the Rivers from Information 1 our Store of Meat is out to day.

19th of February Tuesday 1805
a fine Day visited by Several of the Mandans to day, our Smiths are much engaged mending and makeing Axes for the Indians for which we get Corn

20th February Wednesday 1805
a Butifull Day, visited by the Little raven verry early this morning I am informed of the Death of an old man whom I saw in the Mandan Village this man, informed me that he was 120 winters old, he requested his grand Children to Dress him after Death & Set him on a Stone on a hill with his face towards his old Village or Down the river, that he might go Streight to his brother at their old village under ground 3 I observed Several Mandans verry old chiefly men 3

1 See "Scientific Data: Summary Statement of Rivers"—Clark's draft; especially the information collected during winter of 1804-05 of streams above Fort Mandan flowing into the Missouri. — Ed.
2 Referring to the myth of their tribal origin, as having come from an under-ground region. For a minute account of this belief, written from the recital made by a prominent Mandan, see Prince Maximilian's Voyage, ii, pp. 431-436. — Ed.
3 Whose robust exercises fortify the body, while the laborious occupations of the women shorten their existence. — BIDDLE (i, p. 163).
21st February Thursday 1805

A Delightfull Day put out our Clothes to Sun. Visited by the big White & Big Man they informed me that Several men of their nation was gone to Consult their Medison Stone about 3 day march to the South West to know what was to be the result of the ensuing year. They have great confidence in this stone, and say that it informs them of every thing which is to happen, & visit it every Spring & Sometimes in the Summer. "They haveing arrived at the Stone give it smoke and proceed to the Wood at Some distance to Sleep the next morning return to the Stone, and find marks white & raised on the stone representing the pceee or War which they are to meet with, and other changes, which they are to meet." This Stone has a leavel Surface of about 20 feet in Surcumfrance, thick and porus," and no doubt has Some mineral quallites effected by the Sun.¹

The Big Bellies have a Stone to which they ascribe nearly the Same Virtues

Capt Lewis returned with 2 Slays loaded with meat, after finding that he could not overtake the Soues War party, (who had in their way distroyed all the meat at one Deposit which I had made & Burnt the Lodges) deturmined to proceed on to the lower Deposit which he found had not been observed by the Soues he hunted two day Killed 36 Deer & 14 Elk, Several of them so meager, that they were unfit for use, the meet which he killed and that in the lower Deposit amounting to about 3000 lb was brought up on two Slays one Drawn by 16 men had about 2400 lb on it

22nd of February Friday 1805.

A Cloudy morning, about 12 oClock it began to rain, and Continud for a few minite, and turned to Snow, and Con-

¹ See descriptions of this "medicine stone," and of the ceremonies with which the Indians invoked the spirit supposed to dwell there, in Long's Expedition, i, pp. 273, 274; and Maximilian's Voyage, ii, pp. 459, 460. Both the Mandan and Miniteer were accustomed to consult these oracles; Matthews says of the latter (Ethnog. Hidatsa, p. 51) : "The Hidatsa now seldom refer to it, and I do not think they ever visit it." — Ed.

[264]
atinud Snowing for about one hour, and Cleared away fair.
The two hunters left below arrived, they killed two Elk, and hung them up out of reach of the Wolves. The Coal a Ricara who is a considerable Chief of the Mandans Visited us to day, and maney others of the three nations in our neighbourhood.

23rd of February 1805 Saturday

All hands employed in Cutting the Perogues Loose from the ice, which was nearly even with their top; we found great difficulty in effecting this work owing to the Different divisions of Ice & water. after Cutting as much as we Could with axes, we had all the Iron we Could get, & some axes put on long poles and picked through the ice, under the first water, which was not more the [than] 6 or 8 inches Deep, we disengaged one Perogue, and nearly disengaged the 2nd in Course of this day which has been worm & pleasant vis'ed by a No of Indians, Jessomme & familey went to the Shoe Indians Villag to day

The father of the Boy whose feet were frozed near this place, and nearly Cured by us, took him home in a Slay.

24th February Sunday 1805

The Day fine, we Commenced very early to day the Cutting loose the boat which was more difficile than the Perogus with great exertions and with the assistance of Great prises we lousened her, and turned the Second perogue upon the ice, ready to Draw out, in lousening the boat from the ice Some of the Corking drew out which Caused her to Leake for a few minits untill we Discovered the Leake & Stoped it. Jessomme our interpeter & familey returned from the Villages Several Indians visit us to day

25th of February Monday 1805

We fixed a Windlass and Drew up the two Perogues on the upper bank, and attempted the Boat, but the Roap, which we hade made of Elk skins proved too, weak & broke Several times. night Comeing on obliged us to leave her in a Situation
LEWIS AND CLARK JOURNALS [Feb. 26

but little advanced. We were visited by the Black mockerson Chief of the little Village of the Big Bellies, the Chief of the Shoe Ind! and a number of others those Chiefs gave us Some meat which they packed on their wives, and one requested a ax to be made for his Sun, M! (Root) Bunch, one of the under traders for the hudsons Bay Company. one of the Big Bellies asked leave for himself & his two wives to Stay all night, which was granted, also two Boys Stayed all night, one the Sun of the Black Cat.

The Day has been exceedingly pleasent

26th February Tuesday 1805

a fine Day Commenced verry early in making preparations for drawing up the Boat on the bank, at Sunset by Repeated exertions the whole day, we accomplished this troublesom task, just as we were fixed for hauling the Boat, the ice gave way near us for about 100 yd' in length. a number of Indians here to day to See the Boat rise on the Bank.

27th of February Wednesday 1805

a find day, preparing the Tools to make perogues all day. a few Indians Visit us to day, one the largest Indian I ever Saw, & as large a man as ever I saw, I commence a Map of the Countrey on the Missouries & its water &c. &c.

28th of February Thursday 1805

a fine morning two men of the NW Comp' arrive with letters and Sackacomah,¹ also a Root and top of a plant, presented by M' Haney, for the Cure of Mad Dogs Snakes &c. and to be found & used as follows viz: "this root is found on the high lands and asent of hills, the way of useing it is to scarify the part when bitten to chu or pound an inch or more if the root is Small, and applying it to the bitten part renewing it twice a

¹ Probably a corrupt form of sacacommis, a name applied to the bear-berry (Arctostaphylos), of which the Indians eat the berry, and often use the bark in preparing the smoking-mixture called kinnikinick. — Ed.
Day. the bitten person is not to chaw nor Swallow any of the Root for it might have contrary effect." 1

Sent out 16 men to make four Perogus those men returned in the evening and informed that they found trees they thought would answer.

M' Gravelin two frenchmen & two Ind: arrive from the Ricara Nation with Letters from M' Anty Tabeaux, informing us of the peaceable dispositions of that nation towards the Mandans & Me ne ta rees & their avowed intentions of pursuing our councils & advice, they express a wish to visit the Mandans, & [to] know if it will be agreeable to them to admit the Recaras to Settle near them and join them against their Common Enemey the Soues We mentioned this to the Mandans, who observed they had always wished to be at peace and good neighbours with the Ricaras, and it is also the Sentiments of all the Big bellies, & Shoe nations.

Mr. Gravelen informs that the Sisetoons and the 3 upper bands of the Tetons, with the Yanktons of the North intend to come to war in a Short time against the nations in this quarter, & will kill every white man they See. M' T. also informs that M' Cameron 2 of S' Peters has put arms into the hands of the Soues to revenge the death of 3 of his men killed by the Chipaways latterly, and that the Band of tetons which we Saw is despoed to doe as we have advised them, thro the influence of their Chief the Black Buffalow.

M' Gravelen further informs that the Party which Robed us of the 2 horses laterly were all Souix 106 in number, they Called at the Recaras on their return, the Recares being displeased at their Conduct would not give them anything to eate, that being the greatest insult they Could peaceably offer them, and upbraded them.

1 Cf. Marquette's account of a similar remedy (Jes. Relations, lix, p. 101) and note thereon (p. 308). Coues mentions (L. and C., i, pp. 238, 239), several plants which have in frontier tradition the reputation of curing snake-bites, but he adds, "Everybody knows the plant, except the botanists." Although unable to identify it, he thinks that there is some basis of fact for so universal a belief. See fuller description of this plant, post, in "Scientific Data : Botany." — Ed.

2 Murdoch Cameron, a trader whose headquarters were on St. Peter's (now Minnesota) River; he was accused of selling liquor to the Indians. He became wealthy in the Indian trade, and died in 1831. See Coues's Exped. Pike, i, p. 66. — Ed.
March 1st Friday 1805

a fine Day I am ingaged in Copying a Map, men building perogus, makeing Ropes, Burning Coal, Hanging up meat & makeing battle axes for Corn

2nd of March 1805 Saturday —

a fine Day the river brake up in places all engaged about Something M: LaRocque a Clerk of the NW Company visit us, he has latterly returned from the Establishments on the Assinniboin River, with Merchindize to tarade with Indians. M: L informs us the N.W. & XY Companies have joined, & the head of the N.W, C: is Dead M: Tavish of Montreal, visited by the Coal & Several Indians.

3rd of March ,Sunday 1805

a fine Day Wind from the NW, a large flock of Ducks pass up the River visited by the black Cat, Chief of the Mandans 2! Chief and a Big Belley, they Stayed but a Short time we informed those Chiefs of the news receiv'd from the Recaras, all hands employd.

4th March Monday 1805 Fort Mandan

a cloudy morning wind from the NW the after part of the day Clear, visited by the Black Cat & Big white, who brought a Small present of meat, an Engage of the NW Co: Came for a horse, and requested in the name of the woman of the principal of his Department some Silk of three Colours, which we furnished. The Assinniboins who visited the Mandans a few days ago, returned and attempted to take horses of the Minetarees & were fired on by them.

1 The several maps made by Clark during the expedition will be found either in the various text volumes of this series, or in the accompanying atlas. — Ed.
2 Regarding the North West Company, see p. 206, note 1, ante. The XY Company (also known as New Northwest Company) was formed in 1795, by Montreal merchants who seceded from the North West Company, mainly on account of the arbitrary acts of its chief, Simon McTavish; his death (July, 1804) led to the union of the two companies, on the 5th of November following. See Bryce's Hist. H. E. Co. pp. 147-153. The agreement of Nov. 5 is given by Masson (Bourg. N.-O., ii, pp. 482-499). — Ed.

[268]
5th March Tuesday 1805

A fine Day, Thermometer at 40° above o. Several Indians Visit us to day one frenchman Cross to join a Indian, the two to pass through by Land to the Ricaras with a Letter to M: Tabbow

6th of March Wednesday 1805

a cloudy morning & Smokey all Day from the burning of the plains, which was set on fire by the Minetarries for an early crop of Grass, as an endurance for the Buffalow to feed on, the horses which was Stolen Some time ago by the Assinibois from the Minetarries were returned yesterday. Visited by Oh-harh or the Little fox 2⁴ Chief of the lower Village of the Me ne tar rees. one man Shannon Cut his foot with the ads [adze] in working at the perogue, George & Gravelene go to the Village, the river rise a little to day.

7th of March Thursday 1805

a little cloudy and windey, NE. the Coal Visited us with a Sick child, to whome I gave Some of rushes¹ pills. Shabounar returned this evening from the Gross Ventres & informed that all the nation had returned from the hunting—he (our Minetarre interperet) had received a present from M: Chaboillez of the N.W. Company of the following articles 3 Brace² of Cloth 1 Brace of Scarlet a par Corduroy overalls 1 Vests 1 Brace Blu Cloth, 1 Brace red or Scorlet with 3 bars, 200 balls & Powder, 2 brac[e]s Tobacco, 3 Knives.

8th of March Friday 1805

a fair Morning cold and windey, wind from the East, visited by the Greesey head & a Ricara to day, those men gave Some account of the Indians near the rockey Mountains a young Indian (Minetarre) same nation & different village,

¹ Probably referring to Dr. Benjamin Rush, of Philadelphia, one of the most noted physicians of his day (1745-1813). — Ed.
² A phonetic rendering of “brasse,” a French measure commonly used in Canada, and equivalent to 5.318 English feet. Scarlet cloth was especially valued by the Indians. — Ed.
LEWIS AND CLARK JOURNALS  [March 9

Stole the Doughter of the Black man (Mandan), he went to his village took his horse & returned & took away his daughter

9th of March Saturday 1805

a Cloudy Cold and windey morning wind from the North. I walked up to See the Party that is makeing Perogues, about 5 miles above this, the wind hard and Cold on my way up I met the (The Borgne) Main Chief of the Mane tar res, with four Indians on their way to see us, (see note of 9 March after 10th Mar 1805), I requested him to proceed on to the fort, where he would find Cap' Lewis I should be there myself in corse of a few hours, Sent the interpiter back with him and proceeded on myself to the Canoes found them nearly fin[i]shed, the timber verry bad (qu x), after visiting all the perogues where I found a number of Indians, I wind [went] to the upper mandan Village & Smoked a pipe (the greatest mark of friendship and attention) with the Chief and returned. on my return found the Manetarree Chief about Setting out on his return to his Village, having recived of Captain M. Lewis a Medel Gorget armban[d]s, a Flag Shirt, scarlet &c. &c. &c. for which he was much pleased, those things were given in place of Sundery articles Sent to him which he Sais he did not receive, 2 guns were fired for this Great man.

10th of March Sunday 1805.

a cold winday Day, we are visited by the Black Mocker-sons, Chief of the 2d Minetarre Village and the Chief of the Shoeman Village (Shoe or Mocassin Tr:) or Mah hà ha V. (Wattassoans) those Chiefs Stayed all day and the latter all night, and gave us man[y] Strange accounts of his nation &c.

1 More clearly worded by Biddle (i, p. 169), thus: "The father went to the village and found his daughter, whom he brought home, and took with him a horse belonging to the offender" — this last by way of reprisal, according to Indian custom, which is practically law among them. — Ed.

2 This chief had lost an eye, hence his nickname of Le Borgne ("the one-eyed"). Biddle inserts several curious incidents illustrating the character of this chief, who was unusually ferocious and unscrupulous. See Brackenridge, Journal of a Voyage up the River Missouri (Baltimore, 1816), p. 261, for an account of Le Borgne. — Ed.
this Little tribe or band of Me ne tar rees (call themselves Ahnah-hâ-way or people whose Village is on the Hill. (*Insert this Ahnahaway is the nation Mahhaha the village*) this little nation formerley lived about 30 miles below this, but being oppressed by the Assinniboins & Sous were Compelled to move near (5 miles) the Menetarees, where, the Assinniboins killed the most of them, those remaining built a village verry near to the Menetaries at the mouth of Knife R where they now live, and Can raise about 50 men, they are intermixed with the Mandans & Menatarries. the Mandans formerly lived in 6 (nine) large Villages at and above the mouth of Chischeter or Heart River four (Six) Villages on the West Side (of the Missouri) & two (three) on the East one of those Villages on the East Side of the Missouri & the largest was entirely Cut off by the Seaux & the greater part of the other and the Small Pox reduced the others.

11th of March Monday 1805

A Cloudy Cold windey day, Some Snow in the latter part of the day, we deturmin to have two other Perogus made for to transport our Provisions &c.

We have every reason to believe that our Menetarrre interpreter (whome we intended to take with his wife, as an interpreter through his wife to the Snake Indians of which nation She is) has been Corrupted by the [blank in MS] Company &c. Some explanation has taken place which Clearly proves to us the fact, we give him to night to reflect and deturmin whether or not he intends to go with us under the regulations Stated.

a fine day Some Snow last night our Interpreter Shabonah, deturmins on not proceeding with us as an interpreter under the terms mentioned yesterday, he will not agree to work let our Situation be what it may nor Stand a guard, and if miffed with any man he wishes to return when he pleases, also have the disposal of as much provisions as he Chuses to Carry in admissable and we Suffer him to be off the engagement which was only virbal Wind NW
13th of March Wednesday 1805

a fine day visited by M: M: Kinzey one of the Clerks of the NW. Company, the river rising a little. Many Inds here today all anxiety for war axes the Smiths have not an hour of Idle time to Spear wind SW.

14th March Thursday 1805.

a fine day Set all hands to Shelling Corn &c. M: M: Kinzey leave us today Many Indians as usual wind west river Still rising.

15th of March Friday 1805.

a fine day I put out all the goods, & Parch[ed] meal Clothing &c to Sun, a number of Indians here today they make many remarks respecting our goods &c. Set Some men about Hulling Corn &c.

16th of March Saturday 1805.

a cloudy day wind from the S.E. one Indian much displeased with white-house for striking his hand when eating, with a Spoon for behaving badly. M: Garrow show's us the way the recaras made their large Beeds.

[Lewis:] M: Garrow a Frenchman who has lived many years with the Ricares & Mandans shewed us the process used by those Indians to make beads. the discovery of this art these nations are said to have derived from the Snake Indians who have been taken prisoners by the Ricaras. the art is kept a secret by the Indians among themselves and is yet known to but few of them. the Process is as follows. — Take glass of as many different colours as you think proper, then pound it as fine as possible, putting each colour in a separate vessel. wash the pounded Glass in several waters throwing off the water at

1 This entry, written by Lewis under date of March 16, is in the MS. inserted after the entry for March 21. — Ed.
each washing, continue this operation as long as the pounded glass stains or colours the water which is poured off and the residuum is then prepared for use. you then provide an earthen pot of convenient size say of three gallons which will stand the fire; a platter also of the same material sufficiently small to be admitted in the mouth of the pot or jar. the pot has a notch in it's edge through which to watch the beads when in blast. You then provide some well seasoned clay with a proportion of sand sufficient to prevent it's becoming very hard when exposed to the heat. this clay must be tempered with water until it is about the consistency of common doe. of this clay you then prepare, a sufficient number of little sticks of the size you wish the hole through the bead, which you do by rolling the clay on the palm of the hand with your finger. this done put those sticks of clay on the platter and expose them to a red heat for a few minutes when you take them off and suffer them to cool. the pot is also heated to cleanse [cleanse] it perfectly of any filth it may contain. small balls of clay are also made of about an ounce weight which serve each as a pedestal for a bead. these while soft are distributed over the face of the platter at such distance from each other as to prevent the beads from touching. some little wooden paddles are now provided from three to four inches in length sharpened or brought to a point at the extremity of the handle. with this paddle you place in the palm of the hand as much of the wet pounded glass as is necessary to make the bead of the size you wish it. it is then arranged with the paddle in an oblong from [form], laying one of those little sticks of clay crosswise over it; the pounded glass by means of the paddle is then roped in cylindrical form around the stick of clay and gently rolled by motion of the hand backwards and forwards until you get it as regular and smooth as you conveniently can. if you wish to introduce any other colour you now perforate the surface of the bead with the pointed end of your little paddle and fill up the cavity with other pounded glass of the colour you wish forming the whole as regular as you can. a hole is now made in the center of the little pedestals of clay with the handle of your shovel sufficiently large
to admit the end of the stick of clay around which the bead is formed. The beads are then arranged perpendicularly on their pedestals and little distance above them supported by the little sticks of clay to which they are attached in the manner before mentioned. Thus arranged the platter is deposited on burning coals or hot embers and the pot reversed with the apparatus in its edge turned towards covers the whole. Dry wood pretty much doated (doughted) is then placed around the pot in such manner as completely to cover it. Then is set on fire and the operator must shortly after begin to watch his beads through the apparatus of the pot lest they should be destroyed by being over heated. He suffers the beads to acquire a deep red heat from which when it passes in a small degree to a paler or whitish red, or he discovers that the beads begin to become pointed at their upper extremities he removes the fire from about the pot and suffers the whole to cool gradually. The pot is then removed and the beads taken out. The clay which fills the hollow of the beads is picked out with an awl or needle. The bead is then fit for use. The Indians are extremely fond of the large beads formed by this process. They use them as pendants to their years, or hair and sometimes wear them about their necks.  

[Clark:]

17th of March Sunday—

A windy Day attempted to air our goods &c. M' Chabonah sent a Frenchman of our party [to say] that he was sorry for the foolish part he had acted and if we pleased he would accompany us agreeably to the terms we had proposed and do every thing we wished him to do &c. &c. He

---

1 A variant of "doted," which Century Dictionary regards as an English provincialism; it means "decayed," or "rotted." Coues states that he had heard this word in North Carolina, applied to trees dead at the top, also to lumber prepared from unsound trees. — Ed.

2 Catlin also mentions this manufacture of glass beads by the Mandans, and their exclusive possession of the art (N. Amer. Inds., ii, p. 261). But Matthews says that the Arikara women also have it; he thinks that these peoples made "glazed earthen ornaments before the whites came among them" (Hidatsa, pp. 22, 23). — Ed.
had requested me some thro our French inturpreter two days ago to excuse his Simplicity and take him into the cirvice, after he had taken his things across the River we called him in and Spoke to him on the Subject, he agreed to our tirms and we agreed that he might go on with us &c. &c. but few Indians here to day, the river rising a little and Severall places open.

18th of March 1805 —

A cold cloudy Day wind from the N. I pack up all the Merchendize into 8 packs equally divided so as to have something of every thing in each Canoe & perogue I am informed of a Party of Christianoes & Assinniboins being killed by the Sioux, 50 in Number near the Establishments on the Assiniboin R. a few days ago (the effect of M' Cammerons revenge on the Chipaways for killing 3 of his men) M' Tousent Chabono [Toussaint Charboneau], Enlisted as Interpreter this evening, I am not well to day,

19th of March 1805 —

Cold windey Day cloudy Some little Snow last night visited to Day by the big white & Little Crow, also a man & his wife with a Sick Child, I administer for the child We are told that two parties are gone to war from the Big bellies and one other party going to war Shortly.

20th March Wednesday 1805.

I with all the men which could be Speared from the Fort went to Canoes, there I found a number of Indians, the men carried 4 to the River about 1½ miles thro' the Bottom, I visited the Chief of the Mandans in the Course of the Day and Smoked a pipe with himself and Several old men. Cloudy wind hard from N.

[ 275 ]
a Cloudy Day Some Snow, the men Carried the remaining Canoes to the River, and all except 3 left to take care & complete the Canoes returned to the fort with their baggage, on my return to day to the Fort I came on the points of the high hills, Saw an emence quantity of Pumice Stone on the Sides & foot of the hills and emence beds of Pumice Stone near the Tops of the[m], with evident marks of the Hills haveing once been on fire, I Collected Some [of] the different [sorts] i.e. Stone Pumice Stone & a hard earth, and put them into a furnace, the hard earth melted and glazed the others two and the hard Clay became a pumice Stone Glazed. I collected Some plants &c.

FROM FORT MANDAN TO THE YELLOWSTONE

Clark's Journal, March 22—April 27, 1805
Lewis's Journal, April 7–27

[Clark:] 23 (22 mistake) of March Friday, 1805

A CLOUDY Day visited by M. La[ro]ck, M. Kinsey and the 2d Chief of the Big bellies, the white wolf and many other Minataries, we gave a Medal Some Clothes and wampom to the 2[nd] Chief and Delivered a Speach, which they all appeared well pleased with in the evening, the men Danced M. Jessomme displeased.

24th (23) of March Saturday, 1805 —

after Brackfast M. La Rocke and M. M'Kinsey and the Cheifs & men of the Minetarras leave us. Soon after we were visited by a Brother of the Burnia (of the Borgne, or one eyed chief of the Menitarees) who gave us a Vocabulary of his Language. the Coal & many other Mandans also visit us today a find Day in the fore part in the evening a little rain & the first this winter.

1 Mr. La Rocque and I . . . became intimate with the gentlemen of the American expedition, who on all occasions seemed happy to see us, and always treated us with civility and kindness. It is true, Captain Lewis could not make himself agreeable to us. He could speak fluently and learnedly on all subjects, but his inveterate disposition against the British stained, at least in our eyes, all his eloquence. Captain Clarke was equally well informed, but his conversation was always pleasant, for he seemed to dislike giving offence unnecessarily. — MACKENZIE (Masson's Bourg. N.-O., i, p. 356).

2 As the Indians could not well comprehend the intention of recording their words, they concluded that the Americans had a wicked design upon their country. — MACKENZIE (at supra, p. 337).
a Cloudy morning wind from the NE the after part of the Day fair, Several Indians visit us to day, preparing to Set out on our journey, Saw Swans & Wild Gees flying N.E. this evening.

a fine Day wind S.W. but few Ind: Visit us to day the Ice haveing broken up in Several places, The ice began to brake away this evening and was near destroying our Canoes as they were dec[e]iding to the fort, river rose only 9 Inches to day preparing to Depart.

The river choked up with ice opposit to us and broke away in the evening raised only ½ Inch all employed preparing to Set out.

a windey Blustering Day Wind S W ice running the [ice] Blocked up in view for the Space of 4 hours and gave way leaveing great quantity of ice on the Shallow Sand bars. had all the Canoes corked [calked] pitched & tined in and on the cracks and windshake which is universally in the Cotton wood.

The ice has stoped running owing to Som obstickle above, repare the Boat & Perogues, and preparing to Set out but few Indians visit us to day they are now attending on the river bank to Catch the floating Buffalow

The obstickle broke away above & the ice came down in great quantities the river rose 13 inches the last 24 hours I observed extrdanary dexterity of the Indians in jumping from one cake of ice to another, for the purpose of Catching the
buffalow as they float down many of the cakes of ice which they pass over are not two feet square. The Plains are on fire in View of the fort on both Sides of the River, it is Said to be common for the Indians to burn the Plains near their Villages every Spring for the benefit of their hors[e]s, (Qu) and to induce the Buffalow to come near to them.

31st (30th) Saturday of March Monday (Saturday) (Sunday) 1805 —

(Ser. Ordway now here) Cloudy Day Sever[al] Gangs of Gees and Ducks pass up the river. but a Small portion of ice floating down to day, but few Ind! Visit us to day all the party in high Sperits they pass but few nights without amuseing themselves dancing possessing perfect harmony and good understanding towards each other, Generally helthy except Venerials Complaints which is very Common amongst the natives (Qu,) and the men Catch it from them

April the 1st Tuesday (Monday) 1805 —

The fore part of to day haile rain with Thunder & light­ning, the rain continued by intimitions all day, it is worthy of remark that this is the 1st rain which has fallen Sence we have been here or Sence the 15 of October last, except a few drops at two or three defferent times. had the Boat Perogues & Canoes all put into the Water.

April the 2nd Friday (Tuesday) 1805 —

a cloudy day, rained all the last night we are preparing to Set out all thing nearly ready. The 2nd Chief of the 2nd Mandan Village took a miff at our not attending to him particularly after being here about ten days and moved back to his village. The Mandans Killed twenty one elk yesterday 15 miles below this, they were So Meager that they [were] Scercely fit for use.

1 Biddle describes the manner in which the Indians capture buffaloes which, trying to cross the river, have become isolated on ice-floes. Mackenzie (ut supra, p. 337) states that the Indians on the Missouri also search eagerly for the carcasses of buffaloes and other drowned animals that float down the river in the spring season; these, although rotten and of intolerable stench, “are preferred by the Natives to any other kind of food. ... So fond are the Mandanes of putrid meat that they bury animals whole in the winter for the consumption of the spring.” — Ed.

Mr. La Rocke & Mr. Kinsey Clerk to the N.W. Comp'y Visit us. Mr. M'Kinsey wishes to Get pay for his horse lost in our Service this Winter and one of which our men were robed this winter by the Tetons, we Shall pay this man for his horse. we are all day engaged packing up Sundery articles to be sent to the President of the U.S.¹

Box No. 1, contains the following articles i.e.

In package No. 3 & 4 Male & female antelope, with their Skelitons.

¹ Some of the articles were long on exhibition at Monticello. Others passed to Peale's museum in Philadelphia, and there some of the specimens are still to be found. See note by Witmer Stone, on "Zoology of the Lewis and Clark Expedition," in "Scientific Data: Zoology," Vol. vi of the present work. — Ed.
MANDAN TO YELLOWSTONE

No. 7 & 9 the horns of two mule or Black tailed deer. a Mandan bow and quiver of arrows — with some Recara's tobacco seed.

No. 11 a Martin Skin, Containing the tail of a Mule Deer, a weasel and three Squirrels from the Rockey mountains.

No. 12, The bones & Skeleton of a Small burrowing wolf of the Praries the Skin being lost by accident.

No. 99. The Skeliton of the white and Grey hare.

Box No. 2, Contains 4 Buffalow Robes, and a ear of Mandan Corn.

The large Trunk Contains a male & female Burro or burrowing dog of the Praire and the female's Skeliton.

a carrote of Ricaras Tobacco

a red fox Skin Containing a Magpie

No. 14 Minitarras Buffalow robe Containing Some articles of Indian dress.

No. 15 a mandan robe containing two burrowing Squirrels, a white weasel and the Skin of a Loucivria. also

13 red fox Skins.

1 white Hare Skin &c.

4 horns of the mountain ram

1 Robe representing a battle between the Sioux & Ricaras against the Minetares and Mandans.

In Box No. 3.

No. 1 & 2 the Skins of the Male & female Antelope with their Skel- etons. & the Skin of a Yellow Bear which I obtained from the Sioux

No. 4. Box. Specimens of plants numbered from 1. to 67.

Specimens of Plants numbered from 1 to 60.

1 Earthen pot Such as the Mandans manufacture and use for culinary purposes.¹

1 Tin box containing insects mice &c.

a Specimine of the fur of the antelope.

a Specimine of a plant, and a parcel of its roots high prized by the natives as an efficacious remedy in cases of the bite of the rattle Snake or Mad Dog.

¹ Catlin says (N. Amer. Inds., pp. 260, 261) that specimens of the pottery taken from the burial mounds in Ohio were to be seen in great numbers in the use of the Mandans; and scarcely a day in the summer, when the visitor to their village would not see the women at work with their hands and fingers, moulding them from black clay, into vases, cups, pitchers, and pots, and baking them in their little kilns in the sides of the hill, or under the bank of the river.” — Ed.

2 Gass here mentions the prevalence of licentiousness among the Indians on the Missouri. — Ed.

[ 282 ]
a fine day visited by a number of Mandans, we are informed of the arrival of the whole of the recarra nation on the other Side of the river near their old village, we Sent an interpreter to see with orders to return immediately and let us know if their Chiefs ment to go down to See their great father.

Fort Mandan April 7th. 1805.¹

Having on this day at 4. P.M. completed every arrangement necessary for our departure, we dismissed the barge and crew with orders to return without loss of time to St. Louis, a small canoe with two French hunters accompanyed the barge; these men had ascended the missouri with us the last year as engages.² The barge crew consisted of six soldiers and two blank space in MS.] Frenchmen; two Frenchmen and a Ricara Indian also take their passage in her as far as the Ricara Vilages, at which place we expect Mr. Tiebeau [Tabeau] to embark with his peltry who in that case will make an addition of two, perhaps four men to the crew of the barge. We gave Richard Warlington, a discharged Corp', the charge of the Barge and crew, and confided to his care likewise our dispatches to the government, letters to our private friends, and a number of articles to the President the United States.³ One of the Frenchmen by the Name of (Joseph) Gravline an honest discrete man and an excellent boat-man is imployed to conduct the barge as a pilot; we have therefore every hope that the barge and with her our dispatches will arrive safe at St... Louis. Mr. Gravlin

¹ At this point begins Codex D, which is entirely in Lewis's handwriting, and continues the journal of the expedition until May 23, 1805. — Ed.
² These were François Rivet and Philippe Degie, whom the explorers met on their return journey Aug. 21, 1806. Mrs. E. E. Dye writes to us that they afterwards went to Oregon and settled in Champoeg, and were locally celebrated as being men who had been with Lewis and Clark. — Ed.
³ Coues (L. and C., i, pp. 253-260) gives in his notes on this entry all the information he could gather regarding the personnel of the party which left Fort Mandan to continue the transcontinental explorations; he also cites a letter by Lewis, which explains how Corporal Warlington came to be retained on the muster-roll after his term of service had expired. He was the only one of the party returning to St. Louis whom Lewis could entrust with his despatches to the government, and his commander praises his fidelity. — Ed.
who speaks the Ricara language extremely well, has been employed to conduct a few of the Recara Chiefs to the seat of government who have promised us to descend in the barge to St. Lewis with that view.

At same moment that the Barge departed from Fort Mandan, Capt. Clark embarked with our party and proceeded up the River. As I had used no exercise for several weeks, I determined to walk on shore as far as our encampment of this evening; accordingly I continued my walk on the N. side of the River about six miles, to the upper Village of the Mandans, and called on the Black Cat or Pose-cop'-se-ha', the great chief of the Mandans; he was not at home; I rested myself a [few] minutes, and finding that the party had not arrived I returned about 2 miles and joined them at their encampment on the N. side of the river opposite the lower Mandan village. Our party now consisted of the following Individuals. Sergt. John Ordway, Nathaniel Prior, & Patrie Gass; Privates, William Bratton, John Colter, Reubin, and Joseph Fields, John Shields, George Gibson, George Shannon, John Potts, John Collins, Joseph Whitehouse, Richard Windsor, Alexander Willard, Hugh Hall, Silas Goodrich, Robert Frazier, Peter Crouzatt, John Baptiest la Page, Francis Labiech, Hue McNeal, William Warner, Thomas P. Howard, Peter Wiser, and John B. Thompson. Interpreters, George Drewyer and Tausant Charbono also a Black man by the name of York, servant to Capt. Clark, an Indian Woman wife to Charbono with a young child, and a Mandan man who had promised us to accompany us as far as the Snake Indians with a view to bring about a good understanding and friendly intercourse between that nation and his own, the Minetares and Ahwahharways.

Our vessels consisted of six small canoes, and two large perogues. This little fleet altho' not quite so respectable as those of Columbus or Capt. Cook, were still viewed by us with as much pleasure as those deservedly famed adventurers ever beheld theirs; and I dare say with quite as much anxiety for their safety and preservation. we were now about to penetrate a country at least two thousand miles in width, on which the foot of civilized man had never trodden; the good or evil
it had in store for us was for experiment yet to determine, and these little vessells contained every article by which we were to expect to subsist or defend ourselves. however, as the state of mind in which we are, generally gives the colouring to events, when the immagination is suffered to wander into futurity, the picture which now presented itself to me was a most pleasing one. enterta[in]ing as I do, the most confident hope of succeeding in a voyage which had formed a da[r]ling project of mine for the last ten years, I could but esteem this moment of my departure as among the most happy of my life. The party are in excellent health and spereits, zealously attached to the enterprise, and anxious to proceed; not a whisper of murmure or discontent to be heard among them, but all act in unison, and with the most perfect harmony. I took an early supper this evening and went to bed. Capt. Clark himself the two Interpretters and the woman and child sleep in a tent of dressed skins. this tent is in the Indian stile, formed of a number of dressed Buffaloe skins sewed together with sinues. it is cut in such manner that when foalded double it forms the quarter of a circle, and is left open at one side here it may be attatched or loosened at pleasure (2u) by strings which are sewed to its sides for the purpose. to erect this tent, a parsel of ten or twelve poles are provided, fore or five of which are attatched together at one end, they are then elivated and their lower extremities are spread in a circular manner to a width proportionate to the demention of the lodge; in the same position ortherpoles are leant against those, and the leather is then thrown over them forming a conic figure.

[Clark:] 7th of April Saturday [Sunday] 1805 [2]
a windey day, The Interpreter we Sent to the Villages re­turned with Chief of the Ricara's & 3 men of that nation,

1 Catlin enumerates (N. Amer. Inds., i, p. 262) the many uses made by the Indians of the buffao in their domestic economy — for food, clothing, implements, weapons, etc. — Eo.
2 We obtain Clark's journal from April 7-July 3, 1805 (except where otherwise noted) from Clark-Voorhis note-book No. 1; save that the first Clark entry of April 7 is from Codex C of the Philadelphia collection. — Eo.
this Chief informed us that he was Sent by his nation to know the despositions of the nations in this neighbourhood in respect to the recara’s Settleing near them, that he had not yet made those arrangements, he request that we would speek to the Assinniboin, & Crow Ind; in their favour, that they wished to follow our directions and be at peace with all, he viewed all nations in this quarter well disposed except the Sioux. The wish of those recaras appears to be a junction with the Mandans & Minetarras in a Defensive war with the Sioux who rob them of every Spece [species] of property in Such a manner that they cannot live near them any longer. I told this Chief we were glad to See him, and we viewed his nation as the Dutifull Children of a Great father who would extend his protection to all those who would open their ears to his good advice, we had already Spoken to the Assinniboins, and should Speeke to the Crow Indians if we should see them &c. as to the Sioux their Great father would not let them have any more good Guns &c. would take care to prosu Such measurs as would prevent those Sioux from Murd[er]ing and taking the property from his dutyfull red Children &c. we gave him a certificate of his good Conduct & a Small Medal, a Carrot of Tobacco and a String of Wompom. he requested that one of his men who was lame might decend in the boat to their nation and returned to the Mandans well Satisfied. The name of this Chief of War is Kah-kah, We-to Raven brave. This Cheif delivered us a letter from M’t Taboe. informing us of the wish of the Grand Chiefs of the Recerras to visit their Great father and requesting the privolage of put’g on board the boat 3000b of Skins &c. & adding 4 hands and himself to the party. this preposeal we Shall agree to, as that addition will make the party in the boat 15 Strong and more able to defend themselves from the Seoux &c.1

1 Here ends the daily record kept by Clark, as contained in Codex C. The rest of the codex is occupied with matter outside of that record, which will be found in “Scientific Data.” Towards the close of the codex is Clark’s sketch map of the Red and St. Peter’s Rivers, herewith reproduced. — Ed.
Red and St. Peter's Rivers,
sketch plan by Clark.
Sunday, at 4 oClock PM, the Boat, in which was 6 Soldiers 2 frenchmen & an Indian, all under the command of a corporal who had the charge of dispatches, &c. — and a canoe with 2 french men, Set out down the river for St Louis. at the same time we Sout out on our voyage up the river in 2 perogues and 6 canoes, and proceeded on to the 1st villag. of Mandans & camped on the S.S. our party consisting of Serg' Nathaniel Pryor, Serg' John Ordway, Serg' Pat: Gass, William Bratten, John Colter, Joseph & Reuben Fields. John Shields George Gibson George Shannon, John Potts, John Collens, Jos: Whitehouse, Richard Windser, Alexander Willard, Hugh Hall, Silas Gutrich, Robert Frazure, Peter Crouzat, John Baptiest la page, Francis Labich, Hugh M: Neal, William Warner, Thomas P. Howard, Peter Wiser, J. B. Thompson and my servent york, George Drew yer who acts as a hunter & interpreter, Shabonah and his Indian Squar to act as an Interpreter & interpretress for the snake Indians — one Mandan & Shabonahs infant. Sah-kab-gar we a.

Set out early this morning, the wind blew hard against us, from the N.W. we therefore traveled very slowly. I walked on shore, and visited the black Cat, took leave of him after smoking a pipe as is their custom, and then proceeded on slowly by land about four miles where I wated the arrival of the party, at 12 Oclock they came up and informed me that one of the small canoes was behind in distress. Cap'. Clark returned fou[n]d she had filled with water and all her loading wet. we lost half a bag of bisquit, and about thirty pounds of powder by this accedent; the powder we regard as a serious loss, but we spread it to dry immediately and hope we shall still be enabled to restore the greater part of it. this was the only powder we had which was not perfectly secure from getting wet. we took dinner at this place, and then proceed on to oure encampment, which was on the N. side opposite to a high bluff.1 the Mandan man came up after we had en-

Camped on the S.S. ops'd a high bluff. an Indian Joined us, also an Indian woman with a view to accompany us, the woman was Sent back the man being acquainted with the countrey we allowed him to accompanie us

[Lewis :]

Tuesday April 9th

Set out as early as it was possible to see this morning and proceed about five miles where we halted and took beakfas the Indian man who had promised us to accompany us as far as the Snake Indians, now informed us of his intention to relinquish the journey, and accordingly returned to his village. we saw a great number of brant passing up the river, some

[288]
of them were white, except the large feathers in the first and second joint of the wing which are black. There is no other difference between them and the common gray brant but that of their colour — their note and habits are the same, and they are frequently seen to associate together. I have not yet positively determined whether they are the same, or a different species. Capt Clark walked on shore to-day¹ and informed me on his return, that passing through the prairie he had seen an animal that precisely resembled the burrowing squirrel, except in point of size, it being only about one third as large as the squirrel, and that it also burrows. I have observed in many parts of the plains and prairies, the work of an animal of which I could never obtain a view. Their work resembles that of the salamander common to the sand hills of the States of South Carolina and Georgia, and like that animal also it never appears above the ground. The little hillocks which are thrown up by these animals have much the appearance of ten or twelve pounds of loose earth poured out of a vessel on the surface of the plain. In the state they leave them you can discover no whole through which they throw out this earth; but by removing the loose earth gently you may discover that the soil has been broken in a circle manner for about an inch and a half in diameter; where it appears looser than the adjacent surface, and is certainly the place through which the earth has been thrown out, tho' the operation is performed without leaving any visible aperture. The Bluffs of the river which we passed today were upwards of a hundred feet high, formed of a mixture of yellow clay and sand — many horizontal strata of carbonated wood, having every appearance of pitcoal at a distance; were seen in the the face of these bluffs. These strata are of unequal thicknesses from 1 to 5 feet, and appear at different elevations above the water some of them as much as eighty feet.² The hills of the river are very broken, and many of them have the appearance of having been

¹ That Lewis occupied himself with writing his journal is evidenced by the entry in his weather diary for this date (Codex Fe, p. 4): "The perogue is so unsteady that I can scarcely write." — Ed.

² The so-called "coal" near Fort Mandan was lignite, extensive beds of which exist in that region. — Ed.

[289]
on fire at some former period. Considerable quantities of pumice stone and lava appear in many parts of these hills where they are broken and washed down by the rain and melting snow. When we halted for dinner the squaw busied herself in searching for the wild artichokes which the mice collect and deposit in large hoards. This operation she performed by penetrating the earth with a sharp stick about some small collections of drift wood. Her labor soon proved successful, and she procured a good quantity of these roots. The flavor of this root resembles that of the Jerusalem Artichoke, and the stalk of the weed which produces it is also similar, tho' both the root and stalk are much smaller than the Jerusalem Artichoke. The root is white and of an ovate form, from one to three inches in length and usually about the size of a man's finger. One stalk produces from two to four, and sometimes six of these roots.

At the distance of 6 miles passed a large wintering or hunting camp of the Minetares on the Star side. These lodges about thirty in number are built of earth and timber in their usual stile. 2½ miles higher we passed the entrance of Miry Creek, which discharges itself on the Star side. This creek is but small, takes its rise in some small lakes near the Mouse river and passes in its course to the Missouri, through beautiful, level, and fertile plains, entirely destitute of timber. Three miles above the mouth of this creek we passed a hunting camp of Minetares who had prepared a park and were waiting the return of the Antelope; which usually pass the Missouri at this season of the year from the Black hills on the South side, to the open plains on the north side of the river; in like manner the Antelope repasses the Missouri from N. to S. in the latter end of Autumn, and winter in the black hills, where there is considerable bodies of woodland. We proceed on 11½ miles further and encamped on the N. side in a most beatiful high extensive open bottom. ¹

¹ Probably gophers; Coues thinks that the burrowing animal just described by Lewis is the pouched rat or pocket-gopher (either Geomyis or Thomomys). — Ed.
² Not far above the present Fort Stevenson. — Ed.

[Clark:]

9th of April Tuesday 1805. —

Set out this morning verry early under a gentle breeze from the S.E. at Brackfast the Indian determinded to return to his nation. I saw a Musquetor to day great numbers of Brant flying up the river, the Maple, & Elm has buded & cotton and arrow wood beginning to bud. I saw in the prarie an animal resembling the Prarie dog or Barking Squirel & burrow in the same way, this animal was about 1/3 as large as the barking Squirrel. But fiew resident birds or water fowls which I have Seen as yet at 6 miles passed an old hunting camp of Menitarres on the S. S. 2½ miles higher passed the mouth of Miry Creek on the S.S. passed a hunting camp of Menetarees on the S.S. waiting the return of the Antilope, Saw Great numbers of Gees feedin in the Praries on the young grass, I saw flowers in the praries to day, juniper grows on the Sides of the hills, & runs on the ground all the hills have more or Less inderferent coal in stratas at different hites from the waters edge to 80 feet. those stratais from 1 inch to 5 feet thick we camped on the S.S. above some rocks maeking out in the river in a butifull ellivated plain.

[Lewis:] Wednesday April 10th 1805.

Set out at an early hour this morning, at the distance of three miles passed some Minetarres who had assembled themselves on the Larboard shore to take a view of our little fleet. Capt Clark walked on shore to-day, for several hours, when he returned he informed me that he had seen a gang of Antelopes in the plains but was unable to get a shoot at them, he also saw some geese and swan. the geese are now feeding in considerable numbers on the young grass which has sprung up in the bottom praries. the Musquetoes were very troublesome to us to-day. The country on both sides of the Missouri from the tops of the river hills, is one continued level fertile plain as far as the eye can reach, in which there is not even a solitary tree or shrub to be seen, except such as from their moist situations or the steep declivities of hills are sheltered from the ravages of the fire. at the distance of 12 miles from our encampment of last night we arrived at the lower point of a bluff on the Larboard side; about 1½ miles down this bluff from this point, the bluff is now on fire and throws out considerable quantities of smoke which has a strong sul-
MANDAN TO YELLOWSTONE

Phurious smell. the appearance of the coal in the bluffs continues as yesterday. at 1 P.M. we overtook three French hunters who had set out a few days before us with a view of trapping beaver; they had taken 12 since they left Fort Mandan. these people avail themselves of the protection which our numbers will enable us to give them against the Assiniboins who sometimes hunt on the Missouri; and intend ascending with us as far as the mouth of the Yellowstone river and continue there hunt up that river. this is the first essay of a beaver hunter of any description on this river. the beaver these people have already taken is by far the best I have ever seen. the river bottoms we have passed to-day are wider and possess more timber than usual. the current of the Missouri is but moderate, at least not greater than that of the Ohio in high tide; it's banks are falling in but little; the navigation is therefore comparatively with it's lower portion easy and safe. we encamped this evening on a willow point, Star! side just above a remarkable bend in the river to the S.W. which we called the little basin.

Courses and distances of this day.

1 This region **is the fringe of the well-known mauvaises terres [*Bad Lands*] to the south, through the heart of which the Little Missouri flows. . . . The country is underlaid with vast beds of lignite coal, which has burned out over wide areas. . . . Coal veins form lines plainly distinguishable in the hills bordering the river, and . . . some of these veins are [even now] burning, and emit sulphurous odors.**

— Olin D. Wheeler.

2 Not far from the site of Fort Berthold, built by the American Fur Company in 1845. The name was transferred (1862) to another post, built in the Indian village. Both structures were finally destroyed by fire—the former in 1862, the latter in 1874. — Ed.
Set out very early. the morning cool and no wind proceeded on passed a camp of Inds on the L.S. this day proved to be very warm, the Misquetors troublesom. I saw Several antilope on the S.S. also gees & swan, we over took 3 french men Trappers The country to day as usual except that the points of Timber is larger than below, the coal continue to day, one man saw a hill on fire at no great distance from the river, we camped on the S.S. just above a remarkable bend in the river to the S.W. which We call the little bason.

Set out at an early hour; I proceeded with the party and Capt. Clark with George Drewyer walked on shore in order to procure some fresh meat if possible. we proceeded on about five miles, and halted for breakfast, when Capt. Clark and Drewyer joined us; the latter had killed, and brought with him a deer, which was at this moment exceptable, as we had had no fresh meat for several days. the country from fort Mandan to this place is so constantly hunted by the Minetaries that there is but little game. we halted at two P.M. and made a comfortable dinner on a venison stake and beavers tales with the bisquit which got wet on the 8th ins: by the accident of the canoe filling with water before mentioned. the powder which got wet by the same accident, and which we had spread to dry on the baggage of the large perogue, was now examined and put up; it appears to be almost restored, and
our loss is therefore not so great as we had at first appre­hended. the country much the same as yesterday. on the sides of the hills and even the banks of the rivers and sand­bars, there is a white substance t[h]at appears in considerable quantities on the surface of the earth, which tastes like a mixture of common salt and glauber salts. many of the springs which flow from the base of the river hills are so strongly impregnated with this substance that the water is extremely unpleasant to the taste and has a purgative effect. saw some large white cranes pass up the river — these are the largest bird of that genus common to the country through which the Missouri and Mississippi pass. they are perfectly white except the large feathers of the two first joints of the wing which are black. we encamped this evening on the Star4 shore just above the point of woodland which formed to extremity of the last course of this day. there is a high bluff opposite to us, under which we saw some Indians, but the river is here so wide that we could not speake to them; suppose them to be a hunting party of Minetares. we killed two gees to-day.

1 The famous "alkali" of the West, often rendering the water undrinkable, and covering great areas like snow. It consists largely or mainly of sulphate of soda. — Ed.
Set out very early. I walked on Shore, saw fresh bear
tracks, one deer & 2 beaver killed this morning in the after
part of the day killed two gees, saw great numbers of Gees
Brant & Mallard Some White Cranes Swan & guls, the
plains begin to have a green appearance, the hills on either
side are from 5 to 7 miles asunder and in many places have
been burnt, appearing at a distance of a redish brown choler,
containing Pumice Stone & lava, some of which roll down to
the base of those hills. In many of those hills forming bluffs
to the river we prosieve Several Stratums of bituminious sub­
stance which resembles coal; though Some of the pieces
appear to be excellent coal, it resists the fire for some time,
and consumes without emitting much flame.

The plains are high and rich some of them are sandy con­
taining small pebbles, and on some of the hill Sides large
Stones are to be seen. In the evening late we observed a
party of Menetarras on the L.S. with horses and dogs loaded
going down, those are a part of the Minitarras who camped
a little above this with the Ossinniboins at the mouth of the
little Missouri all the latter part of the winter. we camped on
the S.S. below a falling in bank. the river raise a little.

West 1 mile on the S. point.

[Clark:] 11th of April Thursday 1805.

[Lewis:] Friday April the 12th 1805.

Set out at an early hour. our peroge and the Canoes
passed over to the Lard side, in order to avoid a bank which
was raptidly falling in on the Star'd. the red peroge contrary
MANDAN TO YELLOWSTONE

to my expectation or wish passed under this bank by means of her toe line; where I expected to have seen her carried under every instant. I did not discover that she was about to make this attempt until it was too late for the men to re-embark, and retreating is more dangerous than proceeding in such cases; they therefore continued their passage up this bank, and much to my satisfaction arrived safe above it. This cost me some moments of uneasiness, her cargo was of much importance to us in our present advanced situation. We proceeded on six miles and came too on the lower side of the entrance of the little Missouri on the Lard shore in a fine plain where we determined to spend the day for the purpose of celestial observation. We sent out 10 hunters to procure some fresh meat. At this place made the following observations.

Point of Observation No. 1.
Observed Ø’s Magnetic Azimuth with Circumferentor S. 88° E.

Observed equal altitudes of the Ø with Sextant.

A.M. h m s. 8° 30° 11”. P.M. the P.M. observation was lost in consequence of the Clouds.

Altitude by Sextant at the time of observation 55° 28° 45”.

Observed Meridian altitude of the Ø U. L.

with Octant by the back observation 81° 25° 15”.

Latitude deduced from this observation [blank space in MS.]

Remarks.

The artificial Horizon recommended by Mr. A. Ellicott, in which water forms the reflecting surface, is used in all observations which require the use of an Artificial horizon, except when expressly mentioned to the contrary.

The altitude of any object in the fore observation as here entered is [297]
that deduced immediately from the graduated limb of the instrument, and is of course the double altitudes of the object observed.

The altitudes of objects observed by the back observation, with Octant as here entered, is that shewn by the graduated limb of the Instrument at the time of observation, and is the compliment of 180° of the double altitude of the object observed.

Error of Sextant — Subtractive 2° 8' 45".
Error of Octant fore observation — 2° 4' 11".
Error of d° in back observation add 2° 40' 13".

The night proved so cloudy that I could make no further observations.

George Drewyer shot a Beaver this morning, which we found swimming in the river a small distance below the entrance of the little Missouri. the beaver being seen in the day, is a proof that they have been but little hunted, as they always keep themselves closely concealed during the day where they are so. found a great quantity of small onions in the plain where we encamped; had some of them collected and cooked, found them agreeable. the bulb grows single, is of an oval form, white, and about the size of a small bullet; the leaf resembling that of the shive, and the hunters returned this evening with one deer only. the country about the mouth of this river had been recently hunted by the Minetares, and the little game which they had not killed and frightened away, was so extremely shy that the hunters could not get in shot of them.

The little Missouri disembogues on the S. side of the Missouri 1693 miles from the confluence of the latter with the Mississippi, it is 134 yards wide at its mouth, and sets in with a bold current but its greatest depth is not more than 3½ feet. its navigation is extremely difficult, owing to its rapidity, shoals and sand bars it may however be navigated with small canoes a considerable distance. this river passes through the Northern extremity of the black hills where it is very narrow and rapid and its banks high and perpendicular. it takes its rise in a broken country West of the Black hills with the waters of the yellow stone river, and a considerable distance S.W. of the point at which it passes the black hills. the country through which it passes is generally broken and the highlands possess but little timber. there is some timber in its bottom lands,
which consists of Cottonwood red Elm, with a small proportion of small Ash and box alder. the under brush is willow, red wood, (sometimes called red or swamp willow) the red burry, and Choke cherry the country is extremly broken about the mouth of this river, and as far up on both sides, as we could observe it from the tops of some elivated hills, which stand between these two rivers, about 3 miles from their junction. the soil appears fertile and deep, it consists generally of a dark rich loam intermixed with a small proportion of fine sand. this river in its course passes near the N.W. side of the turtle mountain, which is said to be no more than 4 or 5 leagues distant from its entrance in a straight direction, a little to the S. of West. this mountain and the knife river have therefore been laid down too far S.W. the colour of the water, the bed of the river, and its appearance in every respect, resembles the Missouri; I am therefore induced to believe that the texture of the soil of the country in which it takes its rise, and that through which it passes, is similar to the country through which the Missouri passes after leaving the woody country, or such as we are now in. on the side of a hill not distant from our camp I found some of the dwarf cedar of which I preserved a specimen (See N° 2.) this plant spreads its limbs along the surface of the earth, where they are sometimes covered, and always put forth a number of roots on the under side, while on the upper there are a great number of small shoots which with their leaves seldom rise higher than 6 or eight inches. they grow so close as perfectly to conceal the earth. it is an evergreen; the leaf is much more delicate than the common Cedar, and its taste and smell the same. I have often thought that this plant would make very handsome edgings to the borders and walks of a garden; it is quite as handsome as box, and would be much more easily propagated. the appearance of the glauber salts and Carbonated wood still continue.

Course and distance of this day was.

N. 80° W. to the entrance of the little Missouri — 4 3/2

---

1 This is not a willow, but a cornel (Cornus stolonifera); its bark is used in the preparation of kinnikinick. — Ed.

[299]
a fine morning. Set out very early. the mercury stood 56° above 0°. proceeded on to the mouth of the Little Missouri river and formed a camp in a butiful elevated plain on the lower side for the purpose of taking some observations to fix the Latitude & Longitude of this river. this river falls in on the L. Side and is 134 yards wide and 2 feet 6 Inches deep at the mouth; it takes its rise in the N W extremity of the black mountains, and [runs] through a broken country in its whole course washing the N W base of the Turtle Mountain which is Situated about 6 Leagues S W of its mouth, one of our men Baptiest who came down this river in a canoe informs me that it is not navigable, he was 45 days descending.

One of our men Shot a beaver swimming below the mouth of this river.

I walked out on the lower Side of this river and found the country hilly the soil composed of black mole & a small portion of sand containing great quantity of Small pebble some limestone, black flint, & sand stone.

I killed a Hare changeing its colour some parts retaining its long white fur & other parts assumeing the short grey, I saw the Magpie in pars, flocks of Grouse. the old field lark & crows, & observed the leaf of the wild cherry half grown, many flowers are to be seen in the plains, remains of Mina-tarra & Ossinneboin hunting camps are to be seen on each side of the two Missouris.

The wind blew very hard from the S. all the after part of the day, at 3 oClock PM. it became violent & blowey accompanied with thunder and a little rain. We examined our canoes &c found Several men which had already commenced cutting our bags of corn & parched meal, the water of the little Missouri is of the same texture colour & quality of that of the Big Missouri the after part of the day so cloudy that we lost the evening observation.

Course & Distance of the 12th
N. 80° W. 4½ miles to the mouth of the Little Missouri River on the S.S.

[300]
MANDAN TO YELLOWSTONE

[Saturday April 13th]

Being disappointed in my observations of yesterday for Longitude, I was unwilling to remain at the entrance of the river another day for that purpose, and therefore determined to set out early this morning; which we did accordingly; the wind was in our favour after 9 A.M. and continued favourable untill three P. M. we therefore hoisted both the sails in the White Perogue, consisting of a small squar sail, and spritsail, which carried her at a pretty good gate, untill about 2 in the afternoon when a suddon squall of wind struck us and turned the perogue so much on the side as to allarm Sharbono who was steering at the time, in this state of alarm he threw the perogue with her side to the wind, when the spritsail gibing was as near overseting the perogue as it was possible to have missed. the wind however abating for an instant I ordered Drewyer to the helm and the sails to be taken in, which was instant[ly] executed and the perogue being steered before the wind was agin plased in a state of security. this accedent was very near costing us dearly. beleiving this vessell to be the most steady and safe, we had embarked on board of it our instruments, Papers, medicine and the most valuable part of the merchandize which we had still in reserve as presents for the Indians. we had also embarked on board ourselves, with three men who could not swim and the squaw with the young child, all of whom, had the perogue overset, would most prob­ably have perished, as the waves were high, and the perogue upwards of 200 yards from the nearest shore; however we fortunately escaped and pursued our journey under the square sail, which shortly after the accident I directed to be again hoisted. our party caught three beaver last evening; and the French hunters 7. as there was much appearance of beaver just above the entrance of the little Missouri these hunters concluded to remain some days, we therefore left them without the expectation of seeing them again. just above the entrance of the little Missouri the great Missouri is upwards of a mile in width, tho’ immediately at the entrance of the former it is not more than 200 yards wide and so shallow that the canoes passed it with seting poles. at the distance of nine miles passed...
the mouth of a creek on the Star's side which we called onion creek from the quantity of wild onions which grow in the plains on it's borders. Capt. Clark who was on shore informed me that this creek was 16 yards wide a mile & a half above it's entrance, discharges more water than creeks of it's size usually do in this open country, and that there was not a stick of timber of any discription to be seen on it's borders, or the level plain country through which it passes. at the distance of 10 Miles further we passed the mouth of a large creek, discharging itself in the center of a deep bend. of this creek and the neighbouring country, Capt. Clark who was on shore gave me the following discription. "This creek I took to be a small river from it's size, and the quantity of water which it discharged; I ascended it 1 1/2 miles, and found it the discharge of a pond or small lake, which had the appearance of having formerly been the bed of the Missouri. several small streams discharge themselves into this lake. the country on both sides consists of beautifull level and elivated plains; asscending as they recede from the Missouri; there were a great number of Swan and gees in this lake and near it's borders I saw the remains of 43, temperary Indian lodges, which I presume were those of the Assinniboins who are now in the neighbourhood of the British establishments on the Assinniboin river.” This lake and it's discharge we call goos Egg from the circumstance of Capt. Clark shooting a goose while on her nest in the top of a lofty cotton wood tree, from which we afterwards took one egg. the wild gees frequently build their nests in this manner, at least we have already found several in trees, nor have we as yet seen any on the ground, or sand-bars where I had supposed from previous information that they most commonly deposited their eggs. saw some Buffaloe and Elk at a distance to-day but killed none of them. we found a number of carcasses of the Buffaloe lying along shore, which had been drowned by falling through the ice in winter and lodged on shore by the high water when the river broke up about the first of this month. we saw also many tracks of the white bear of enormous size, along the river shore and about the carcasses of the Buffaloe, on which I presume they feed. we have not
as yet seen one of these animals, tho' their tracks are so abundant and recent. the men as well as ourselves are anxious to meet with some of these bear. the Indians give a very formidable account of the strength and ferocity of this animal, which they never dare to attack but in parties of six eight or ten persons; and are even then frequently defeated with the loss of one or more of their party. the savages attack this animal with their bows and arrows and the indifferent guns with which the traders furnish them, with these they shoot with such uncertainty and at so short a distance, that (unless shot thro' head or heart wound not mortal) they frequently mis their aim & fall a sacrifice to the bear. two Minetaries were killed during the last winter in an attack on a white bear. this animal is said more frequently to attack a man on meeting with him, than to flee from him. When the Indians are about to go in quest of the white bear, previous to their departure, they paint themselves and perform all those superstitious rights commonly observed when they are about to make war upon a neighbouring nation. O[but]served more bald eagles on this part of the Missouri than we have previously seen. saw the small hawk, frequently called the sparrow hawk, which is common to most parts of the U. States. great quantities of geese are seen feeding in the praries. saw a large flock of white brant or geese with black wings pass up the river; there were a number of gray brant with them; from their flight I presume they proceed much further still to the N.W. we have never been enabled yet to shoot one of these birds, and cannot therefore determine whether the gray brant found with the white, are their brude of the last year or whether they are the same with the grey brant common to the Mississippi and lower part of the Missouri. we killed 2 antelopes to-day which we found swimming from the S. to the N. side of the river; they were very poor. We encamped this evening on the Star's shore in a beautifull plain, elivated about 30 feet above the river.
The courses and distances of this day are as follow.

N. 18° W. to a point of wood on the L. side, point on the Lar\(\dagger\) side, at 1\(\frac{1}{2}\) miles

N. 10. W. to the upper point of a Low bluff on the Sta\(\dagger\) side pass a creek on Star\(\dagger\) side.

N. 45. W. to a point of Woodland on Lar\(\dagger\) side

N. 28. W. to a point of Woodland Star\(\dagger\) side

S. 35. W. to a point of Woodland on Star\(\dagger\) side, passed a creek on Star\(\dagger\) side near the commencement of this course also, two points on the Lar\(\dagger\) side, the one at a mile, and the other \(\frac{1}{2}\) a mile further, also a large sand bar in the river above the entrance of the creek

\[23\frac{3}{4}\]

Note our encampment was one mile short of the extremity of the last course.

[Clark:]

13th of April Saturday 1805

Set out this morning at 6oClock, the Missouri above the mouth of Little Missouri widens to nearly a mile containing a number of Sand bars this width &c. of the River continues Generally as high as the Rochejhone River. Cought 3 beaver this morning, at 9 miles passed the mouth of a Creek on the S.S. on the banks of which there is an imense quantity of wild onions or garlick, I was up this Creek \(\frac{1}{2}\) a m[ile] and could not See one Stick of timber of any kind on its borders, this creek is 16 yds wide \(\frac{1}{2}\) a mile up it and discharges more water than is common for Creeks of its Size. at about 10 miles higher we pass a creek about 30 yards wide in a deep bend to the N W. This creek I took to be a Small river from its size & the quantity of water which it discharged, I assended it 1\(\frac{1}{2}\) miles and found it the discharge of a pond or Small Lake which has appearance of haveing been once the bead of the river. Some small streams discharge themselves into this Lake. the countery on both sides is butifull elevated plains assending in Some parts to a great distance near the aforesaid Lake (what we call Goose egg L from a circumstance of my shooting a goose on her neast on some sticks in the top of a [304]
high cotton wood tree in which there was one egg) We saw 8 buffalow at a distance which were very wild, I saw near the Lake the remains of 43 lodges, which has latterly been abandoned I suppose them to have been Ossinniboins and now near the british establishments on the Ossinniboin River tradeing. we camped on the S.S. in a butifull Plain. I observe more bald Eagles on this part of the Missouri than usial also a small Hawk. Killed 2 Antelopes in the river to day.

Course distance & the 13th of April 1805

N. 18° W 7 1/2 miles to a point of wood on the L.S. passed a point on the L.S. at 1 1/2 miles

N. 10° W. 5 miles to the upper point of a low bluff on the S.S. passed a creek on the S.S. (1)

N. 45° W. 4 miles to a point of woodland on L.S.

N. 28° W. 3 miles to a point of woodland on S.S. the river making a Deep bend to the N.W.

S. 35° W. 4 miles to a point of wood on the S.S. passed a creek (2) on the S.S. near the commencement of this course, also two points on the L.S one at a mile & the other 1/2 a mile further, also a large sand bar in the middle of the river above the mouth of the creek

emence numbers of Geese to be seen pared & a Gange of brant pass one half of the gange white with black wings or the large feathers of the 1st & 2nd joint the remd' of the com[no]n col[o]r. a voice much like that of a goos & finer &c.

[Lewis:] Sunday April 14th 1805.

One of the hunters saw an Otter last evening and shot at it, but missed it. a dog came to us this morning, which we supposed to have been lost by the Indians who were recently encamped near the lake that we passed yesterday. the mineral appearances of salts, coal and sulphur, together with birnt hills & pumice stone still continue. while we remained at the entrance of the little Missouri, we saw several pieces of pumice stone floating down that stream, a considerable quant[ity] of
which had lodged against a point of drift wood a little above its entrance. Capt. Clark walked on shore this morning, and on his return informed me that he had passed through the timbered bottoms on the N. side of the river, and had extended his walk several miles back on the hills; in the bottom lands he had met with several uninhabited Indian lodges built with the boughs of the Elm, and in the plains he met with the remains of two large encampments of a recent date, which from the appearance of some hoops of small kegs, seen near them we concluded that they must have been the camps of the Assinniboins, as no other nation who visit this part of the Missouri ever indulge themselves with spirituous liquor. of this article the Assinniboins are pationately fond, and we are informed that it, forms their principal inducement to furnish the British establishments on the Assinniboin river with the dried and pounded meat and grease which they do, they also supply those establishments with a small quantity of fur, consisting principally of the large and small wolves and the small fox skins. these they barter for small kegs of rum which they generally transport to their camps at a distance from the establishments, where they revel with their friends and relations as long as they possess the means of intoxication, their women and children are equally indulged on those occasions and are all seen drunk together. so far is a state of intoxication from being a cause of reproach among them, that with the men, it is a matter of exultation that their skill and industry as hunters has enabled them to get drunk frequently. in their customs, habits and dispositions these people very much resemble the Siouxs from whom they have descended. The principal inducement with the British fur companies, for continuing their establishments on the Assinniboin river, is the Buffaloe meat and grease they procure from the Assinniboins, and Christianites, by means of which, they are enabled to supply provision to their engages on their return from rainy Lake to the English river and the Athabaskey country where they winter; without such resource those voyagers

1 The kit fox (*Vulpes velox*). — Ed.
would frequently be straitened for provision, as the country through which they pass is but scantily supplied with game, and the rapidity with which they are compelled to travel in order to reach their winter stations, would leave them but little leisure to surch for food while on their voyage.

The Assinniboins have so recently left this neighbourhood, that the game is scarce and very shy. the river continues wide, and not more rapid than the Ohio in an average state of its current. the bottoms are wide and low, the moister parts containing some timber; the upland is extremely broken, consisting of high gaunched nobs as far as the eye can reach on either side, and entirely destitute of timber. on these hills many aromatic herbs are seen; resembling in taste, smell and appearance, the sage, hyssop, wormwood, southernwood, and two other herbs which are strangers to me; the one resembling the camphor in taste and smell, rising to the height of 2 or 3 feet; the other about the same size, has a long, narrow, smooth leaf of an agreeable smell and flavor; of this last the Antelope is very fond; they feed on it, and perfume the hair of their foreheads and necks with it by rubbing against it. the dwarf cedar and juniper is also found in great abundance on the sides of these hills. where the land is level, it is uniformly fertile consisting of a dark loam intermixed with a proportion of fine sand. it is generally covered with a short grass resembling very much the blue grass. the mineral appearances still continue; considerable quantities of bituminous water, about the colour of strong lye trickles down the sides of the hills; this water partakes of the taste of glauber salts and slightly of allum. while the party halted to take dinner today Capt. Clark killed a buffaloe bull; it was meagre, and we therefore took the marrow bones and a small proportion of the meat only. near the place we dined, on the Lard. side, there was a large village of burrowing squirrels. I have remarked that these animals generally select a South Easterly exposure for their residence, tho' they are sometimes found in

1 Probably the common sage-brush (Artemisia tridentata), which Lewis is comparing to all these garden herbs which he names. The identity of the two other plants is not plain. — Ed.
the level plains. passed an Island, above which two small creeks fall in on Lar’s side; the upper creek largest, which we called Sharbono’s Creek, after our interpreter who encamped several weeks on it with a hunting party of Indians. this was the highest point to which any whiteman had ever ascended, except two Frenchmen (one of whom Lapage was now with us. See at Mandan) who having lost their way had straggled a few miles further, tho’ to what place precisely I could not learn. I walked on shore above this creek and killed an Elk, which was so poor that it was unfit for use; I therefore left it, and joined the party at their encampment on the Star shore a little after dark. on my arrival Capt. Clark informed me that he had seen two white bear pass over the hills shortly after I fired, and that they appeared to run nearly from the place where I shot. the lar shore on which I walked was very broken, and the hills in many places had the appearance of having slipped down in masses of several acres of land in surface. we saw many gees feeding on the tender grass in the praries and several of their nests in the trees; we have not in a single instance found the nest of this bird on or near the ground. we saw a number of Magpies their nests and eggs. their nests are built in trees and composed of small sticks leaves and grass, open at top, and much in the stile of the large blackbird comm to the U. States. the egg is of a bluish brown colour, freckled with reddish brown spots. one of the party killed a large hooting owl; I observed no difference between this bird and those of the same family common to the U. States, except that this appeared to be more booted and more thickly clad with feathers.

1 Lewis and Clark here distinctly state that they have now passed beyond the highest point on the Missouri heretofore explored by white men. Chaboneau had been as far as the creek named for him (probably Indian Creek of to-day), and Lepage, another recruit from the Mandan towns, had, with one other Frenchman, gone a few miles farther; but beyond that they were entering virgin territory. This is important, for it shows that the quest for furs had not yet been pushed appreciably west of the Mandan villages by the British fur companies. — O. D. Wheeler.
The courses and distances of the 14th April.

Miles

S. 45. W. to the mouth of a small creek at the upper part of a timbered bottom 2 1/2

W. - to a point of Woodland on the Lar side 3 1/2

</table>
a fine morning, a dog came to us this morning we sup­pose him to be left by the Indi wi had their camps near the Lake we passed yesterday not long sence, I observed several single Lodges built of stiks of otten timber in different parts of the bottoms. in my walk of this [day] which was through the wooded bottoms and on the hills for several miles back from the river on the S.S. I saw the remains of two Indian incampmints with wide beeten tracks leading to them. those were no doubt the camps of the Ossinnaboin Indians (a Strong evidence is hoops of Small Kgs were found in the incampments) no other nation on the river above the Sioux make use of Spiritious licquer. The Ossinniboins is said to be passionately fond of Licquer, and is the principal inducement to their putting themselves to the trouble of catching the few wolves and foxes which they furnish, and receive their [liquor] always in small Kgs. The Ossinniboins make use of the Same kind of Lodges which the Sioux and other Indians on this river make use of. Those lodges or tents are made of a number of dressed buffalow Skins sowed together with sinews & deckerated with the tales, & Porcupine quils, when open it forms a half circle with a part about 4 Inches wide projecting about 8 or 9 Inches from the center of the Streight Side for the purpose of attaching it to a pole to it the hight they wish to raise the tent, when the[y] erect this tent four poles of equal length are tied near one end, those poles are elevated and 8, 10 or 12 other poles are anexed forming a circle at the ground and lodging in the forks of the four attached poles, the tents are then raised, by at­taching the projecting part to a pole and incumpassing the poles with the tent by bringing the two ends together and attached with a cord, on land as high as is necessary, leaving the lower part open for about 4 feet for to pass in & out, and the top is generally left open to admit the smoke to pass. The Borders of the river has been so much hunted by those Indians who must have left it about 8 or 10 days past and I presume are now in the neighbourhood of British establish­ments on the Ossinniboin; the game is scerce and verry wild. [310]
1805] MANDAN TO YELLOWSTONE

The River continues wide and the current gentle not more rapid than the current of the Ohio in middle State. The bottoms are wide and low and the moist parts of them contain some wood such as cotton Elm & small ash, willow rose bushes &c. & next to the hills Great quantity of wild Isoop, [hyssop] the hills are high broken in every direction, and the mineral appearance of Salts continue to appear in a greater perportion, also Sulpher, coal & bitumous water in a smaller quantity, I have observed but five burnt hills, about the little Missouri, and I have not seen any Pumey stone above that River I saw Buffalow on the L.S. crossed and during the time of dinner killed a Bull, which was poor, we made use of the best of it, I saw a village of Burrowing dogs on the L.S. passed a Island above which two small creeks falls in on the L.S. the upper of which is the largest and we call Shabonas Creek after our interpreter who incamped several weeks on this creek and is the highest point on the Missouri to which a white man has been previous to this time. Capt. Lewis walked out above this creek and killed an Elk which he found so meager that it was not fit for use, and joined the boat at Dusk at our camp on the S.S. opposit a high hill several parts of which had slided down. on the side of those hills we saw two white bear running from the report of Capt. Lewis Shot, those animals assended those Steep hills with surprising ease & velocitity, they were too far to discover their prosise colour & size. Saw several gees nests on trees, also the nests & egs of the Magpies, a large grey owl killed, booted & with ears &c.

Course distance &c; the 14th of April

S. 45° W. 2 1/2 miles to the mouth of a small creek at the upper part of a wood bottom in a bend to L.S.

[311]
LEWIS AND CLARK JOURNALS [April 15

[Lewis:]

Monday April 15th 1805.

Set out at an early hour this morning. I walked on shore, and Capt. Clark continued with the party it being an invariable rule with us not to be both absent from our vessels at the same time. I passed through the bottoms of the river on the Star'd side. they were partially covered with timber, were extensive, level and beatifull. in my walk which was about 6 miles I passed a small rivulet of clear water making down from the hills, which on tasting, I discovered to be in a small degree brackish. it possessed less of the glauber salt, or alumn, than those little streams from the hills usually do. in a little pond of water fromed by this rivulet where it entered the bottom, I heard the frogs crying for the first time this season; their note was the same with that of the small frogs which are common to the lagoons and swam[p]s of the U. States. I saw great quantities of gees feeding in the bottoms, of which I shot one. saw some deer and Elk, but they were remarkably shy. I also met with great numbers of Grouse or prarie hens as they are called by the English traders of the N.W. these birds appeared to be mating; the note of the male, is kuck, kuck, kuck, coo, coo, coo. the first part of the note both male and female use when flying. the male also dubbs (drums with his wings) something like the pheasant, but by no means as loud. After breakfast Capt. Clark walked on the St' shore, and on his return in the evening gave me the following account of his ramble. “I assended to the high country, about 9 miles distant from the Missouri. the country consists of beatifull, level and fertile plains, destitute of timber. I saw many little dranes, which took their rise in the river hills, from whence as far as I could see they run to the N. E.” these streams we suppose to be the waters of Mous river a branch of the Assin-niboin which the Indians informed us approaches the Missouri very nearly, about this point. “I passed,” continued he, a Creek about 20 yards wide, which falls into the Missouri; the bottoms of this creek are wide level and extremely fertile, but almost entirely destitute of timber. the water of this creek as well as all those creeks and rivulets which we have passed since we left Fort Mandan was so strongly impregnated with

[312]
salts and other mineral substances that I was incapable of drinking it. I saw the remains of several camps of the Assiniboins; near one of which in a small ravene, there was a park which they had formed of timber and brush, for the purpose of taking the cabrie or Antelope. It was constructed in the following manner. A strong pound was first made of timbers, on one side of which there was a small appature, sufficiently large to admit an Antelope; from each side of this appature, a curtain was extended to a considerable distance, widening as they receded from the pound. We passed a rock this evening standing in the middle of the river, and the bed of the river was formed principally of gravel. We encamped this evening on a sand point on Lar side. A little above our encampment the river was confined to a channel of 80 yards in width.

Chronometer to fast at the time of observation on mean time.

1 A common name for the American antelope; 'corrupted from Spanish cabra, "goat." — Ed.
Set out at an early hour, Cap! Lewis walked on shore and Killed a goose, passed an Island in a bend to the L.S. the wind hard from the S.E. after brackfast I walked on Shore and asended to the high Countrey on the S. S. and off from the Missouri about three miles the countrey is butifull open fertile plain the drains [drens] take there rise near the cliffs of the river and run from the river in a N E drection as far as I could See, this is the part of the River which Mouse river the waters of Lake Winnipec approaches within a few miles of Missouri, and I believe those drains lead into that river, we passed a creek about 20 yd: wide on the S.S. the bottoms of this creek is extensive & fertile, the water of this as also, all the Streams which head a few miles in the hills discharge water which is black & unfit for use (and can safely say that I have not seen one drop of water fit for use above fort Mandan except Knife and the little Missouris Rivers and the Missouri, the other Streams being so much impregnated with mineral as to be verry disagreeable in its present state. I saw the remains of Several camps of ossinniboons, near one of those camps & at no great distance from the mouth of the aforesaid creek, in a hollow, I saw a large Strong pen made for the purpose of catching the antelope, with wings projecting from it widining from the pen.

Saw several gangs of Buffalow and som elk at a distance, a black bear seen from the Perogues to day. passed a rock in the Middle of the river, some smaller rocks from that to the L. Shore, the dog that came to us yesterday morning continues to follow us, we camped on a sand point to the L.S.

MANDAN TO YELLOWSTONE

N. 15° W. ¼ of a mile on the L. p' here the waters of Mouse river is near
N. 12° W. 1½ miles to the lower part of a Bluff on the S' Side passing a creek on the S. Side. Goat pen creek
N. 52° W. 2 miles to a high Bluff on the S' Side
N. 75° W. 3 miles to a p' of woodland on the S. Side
N. 16° W. 3 miles to a point of woods on the L. S.

[Lewis:] Tuesday April 16th 1805.

Set out very early this morning. Capt. Clark walked on shore this morning, and killed an Antelope, rejoined us at ½ after eight A.M. he informed me that he had seen many Buffaloe Elk and deer in his absence, and that he had met with a great number of old hornets nests in the woody bottoms through which he had passed. the hills of the river still continue extremel broken for a few miles back, when it becomes a fine level country of open fertile lands. immediately on the river there are many fine leavel extensive and extremel fertile high plains and meadows. I think the quantity of timbered land on the river is increasing. the mineral appearances still continue. I met with several stones today that had the appearance of wood first carbonated and then petrefyed by the water of the river, which I have discovered has that effect on many vegitable substances when exposed to it's influence for a length of time. I believe it to be the stratas of coal seen in those hills which causes the fire and birnt appearances frequently met with in this quarter. where those birnt appearances are to be seen in the face of the river bluffs, the coal is seldom seen, and when you meet with it in the neighbourhood of the stratas of birnt earth, the coal appears to be presisely at the same hight, and is nearly of the same thickness, togeter with the sand and a sulphurious substance which usually accompany's it. there was a remarkable large beaver caught by one of the party last night. these anamals are now very abundant. I have met with several trees which have been felled by them 20 Inches in diameter. bark is their only food; and they appear to prefer that of the Cotton wood and willow;

[315]
LEWIS AND CLARK JOURNALS [April 16

as we have never met with any other species of timber on the Missouri which had the appearance of being cut by them. we passed three small creeks on the Star\(^1\) side. they take their rise in the river hills at no great distance. we saw a great number of geese today, both in the plains and on the river I have observed but few ducks, those we have met with are the Mallard and blue winged Teal.

Courses and distances of 16\(^{th}\) April.

S. 80. W. to a point of woodland on the Star\(^4\) side 3.
N. 36. W. to a point of woodland on the Lar\(^4\) side. 2 3/2

S. 70° W. 6 miles to a point of wood land on the L. Side, passing a bluff, and a large Sand bar.
S. 65° W. ½ a mile along the L. Point of wood.

[Lewis:]

Wednesday April 17th 1805.

A delightfull morning, set out at an erly hour. the country through which we passed to day was much the same as that describec of yesterday; there wase more appearance of birnt hills, furnishing large quanties of lava and pumice stone; of the latter some pieces were seen floating down the river. Capt. Clark walked on shore this morning on the Star° side, and did not join us untility half after six in the evening. he informed me that he had seen the remains of the Assinniboin encampments in every point of woodland through which he had passed. we saw immence quantities of game in every direction around us as we passed up the river; consisting of herds of Buffaloe, Elk, and Antelopes with some deer and woloves. tho' we continue to see many tracks of the bear we have seen but very few of them, and those are at a great dis­tance generally runing from us; I the[re]fore presume that they are extreemly wary and shy; the Indian account of them dose not corrispond with our experience so far. one black bear passed near the perogues on the 16th and was seen by myself and the party but he so quickly disappeared that we did not shoot at him. at the place we halted to dine on the Lar° side we met with a herd of buffaloe of which I killed the fatest as I concieved among them, however on examining it I found it so poor that I thought it unfit for uce and only took the tongue; the party killed another which was still more lean. just before we encamped this evening we saw
some tracks of Indians who had passed about 24 hours; they left four rafts of timber on the Star\(^{\dagger}\) side, on which they had passed. we supposed them to have been a party of the Assinniboins who had been to war against the rocky Mountain Indians, and then on their return. Capt. Clark saw a Curlou to-day. there were three beaver taken this morning by the party. the men prefer the flesh of this animal, to that of any other which we have, or are able to procure at this moment. I eat very heartily of the beaver myself, and think it excellent; particularly the tale, and liver we had a fair wind today which enabled us to sail the greater part of the distance we have traveled, encamped on the Lar\(^{\dagger}\) shore the extremity of the last course.

Note The distance we are obliged to go round sand bars & is much greater than those called for in the courses from point to point &

[319]
Thursday April 18th, 1805.

A fine morning, set out at an early hour. one Beaver caught this morning by two traps, having a foot in each; the traps belonged to different individuals, between whom, a contest ensued, which would have terminated, most probably, in a serious rencontre had not our timely arrival at the place prevented it. after breakfast this morning, Capt. Clark walked on Sta\textsuperscript{3} shore; while the party were ascending by means of their toe lines, I walked with them on the bank; found a species of pea bearing a yellow flower, and now in blume; it seldom rises more than 6 inches high, the leaf & stalk resembles that of the common garden pea, the root is perennial. (see specimen of vegetables N\textsuperscript{3} 3.) I also saw several parsel of buffaloe's hair hanging on the rose bushes, which had been bleached by exposure to the weather and became perfectly white. it \textsuperscript{1} every appearance of the wool of the sheep, tho' much finer and more silkey and soft. I am confident that an excellent cloth may be made of the wool of the Buffaloe. the Buffaloe I killed yesterday had cast his long hare, and the poil which remained was very thick, fine, and about 2 inches in length. I think this animal would have furnished about five pounds of wool\textsuperscript{1} we were detained to-day from one to five P. M. in consequence of the wind which blew so violently from N. that it was with difficulty we could keep the canoes from filling with water altho' they were along shore; I had them secured by placing the perogues on the out side of them in such manner as to break the waves off them. at 5 we proceed, and shortly after met with Capt. Clark, who had killed an Elk and a deer and was waiting our arrival. we took the meat on board and continued our march untill nearly dark when we came too on the Star\textsuperscript{4} side under a boald well-timbered bank which sheltered us from the wind.

\textsuperscript{1} When Jolliet first encountered the buffalo, he observed the possibility of using its wool - "with the wool of these oxen he could make cloth, much finer than most of that which we bring from France." Marest says that the Illinois made from this hair various articles, as leggings, girdles, and pouches. See Jes. Relations, lviii, p. 107; lvii, p. 231. Catlin recommends (N. Amer. Inds., i, p. 261) the utilization of the buffalo's hair for woollen manufactures. - Ed.

18th of April Thursday 1805

Set out at an early hour one Beaver & a Musrat caught this morning, the beaver caught in two traps, which like to have brought about a misunderstanding between two of the party &c. after breakfast I ascended a hill and observed that the river made a great bend to the South, I concluded to walk thro' the point about 2 miles and take Shabono, with me, he had taken a dost of Salts &c. his squar followed on with her child, when I struck the next bend of the [river] could see nothing of the Party, left this man & his wife & child on the river bank and went out to hunt, Killed a young Buck Elk, & a Deer, the Elk was tolerable meat, the Deer very poor, Butchered the meat and continued untill near Sunset before Cap't Lewis and the party came up, they were detained by the wind, which rose soon after I left the boat from the N W. & blew very hard untill very late in the evening. We camped...
on the S.S. in an excellent harbor, Soon after we came too, two men went up the river to set their beaver traps they met with a Bear and being without their arms thought prudent to return &c. The wild cheries are in bloom, Great appearance of Burnt hills Pumice Stone &c the coal & salt appearance continues, the water in the small runs much better than below. Saw several old Indian camps, the game, such as Buffalow Elk, antelopes & Deer very plenty

[Lewis:

Friday April 19th. 1805.

The wind blew so hard this morning from N.W. that we dared not to venture our canoes on the river. Observed considerable quantities of dwarf Juniper on the hill sides (see specimen N. 4)¹ it seldom rises higher then 3 feet. the wind detained us through the couse of this day, tho' we were fortunate in having placed ourselves in a safe harbour. the party killed one Elk and a beaver today. The beaver of this part of the Missouri are larger, fatter, more abundant and better clad with fur than those of any other part of the country that I have yet seen; I have remarked also that their fur is much darker.

[Clark:

19th of April Friday 1805

a blustering windey day the wind so hard from the N.W. that we were fearfull of ventering our Canoes in the river, lay by all day on the S. Side in a good harbuer, the Praries appear

¹ This should be No. 104. See "Scientific Data: Botany," in vol. vi, post. — Ed.
to Green, the cotton trees begin to leave. Saw some plum bushes in full bloom, those were the plum bushes which I have seen for some time. Killed an Elk and a Beaver today. The beaver of this river is much larger than usual. Great deal of sign of the large Bear,

[Lewis:]

Saturday April 20th 1805.

The wind continued to blow tolerably hard this morning but by no means as violently as it did yesterday; we determined to set out and accordingly departed a little before seven. I walked on shore on the N. side of the river, and Capt. Clark proceeded with the party. The river bottoms through which I passed about seven miles were fertile and well covered with Cottonwood, some Boxalder, ash and red Elm. The under brush, willow, rose bushes, Honeyuckle, red willow, goosberry, currant and serviceberry & in the open grounds along the foot of the river hills immense quantities of the hisop.¹ in the course of my walk I killed two deer, wounded an Elk and a deer; saw the remains of some Indian hunting camps, near which stood a small scaffold of about 7 feet high on which were deposited two dog slays with their harnis. Underneath this scaffold a human body was lying, well rolled in several dressed buffalo skins and near it a bag of the same materials containing sundry articles belonging to the deceased; consisting of a pair of mockersons, some red and blue earth, beaver's nails, instruments for dressing the Buffalo skin, some dried roots, several platters of the sweet grass, and a small quantity of Mandan tobacco. I presume that the body, as well as the bag containing these articles, had formerly been placed on the scaffold as is the custom of these people, but had fallen down by accident. Near the scaffold I saw the carcase of a large dog.

¹ In the MS. occurs here a red-ink interlineation (cancelled, however, by another pen), "copy this for Dr. Barton." As previously explained, in Biddle's text most of the natural history notes are omitted, because he had intended that this material should be worked up by Dr. Benjamin Smith Barton. The latter failed to do this; and the often elaborate observations of Lewis and Clark on the fauna, flora, and silva of the Great West have therefore been hitherto practically lost to the scientific world. — Ed.
not yet decayed, which I supposed had been killed at the time
the human body was left on the scaffold; this was no doubt the
reward, which the poor doog had met with for performing
the [blank space in MS.] friendly office to his mistres of trans­
porting her corps to the place of deposit. it is customary with
the Assinniboins, Mandans, Minetares &c who scaffold their
dead, to sacrefice the favorite horses and doggs of their dis­
ceased relations, with a view of their being servicable to them
in the land of sperits. I have never heard of any instances of
human sacrefices on those occasions among them.

The wind blew so hard that I concluded it was impossible
for the perogues and canoes to proceed and therefore returned
and joined them about three in the evening. Capt. Clark
informed me that soon after seting out, a part of the bank of
the river fell in near one of the canoes and had very nearly
filled her with water. that the wind became so hard and the
waves so high that it was with infinite risk he had been able
to get as far as his present station. the white perogue and
several of the canoes had shiped water several times but happily
our stores were but little injured; those which were wet we
put out to dry and determined to remain untill the next morn­
ing. we sent out four hunters who soon added 3 Elk 4 gees
and 2 deer to our stock of provisions. the party caught six
beaver today which were large and in fine order. the Buffaloe,
Elk and deer are poor at this season, and of cours are not very
palitable, however our good health and apetites make up
every necessary deficiency, and we eat very heartily of them.
encamped on Stard side; under a high well timbered bank.

Wind a head from the N W. we set out at 7 oClock proceeded on, soon after we set out a Bank fell in near one of the canoes which like to have filled her with water, the wind became hard and waves so rough that we proceeded with our little canoes with much risque, our situation was such after setting out that we were obliged to pass round the 1st Point or lay exposed to the blustering winds & waves, in passing round the Point several canoes took in water as also our large Perogue but without injuring our stores & much I proceeded on to the upper part of the 1st bend and came too at a butifull Glade on the S.S. about 1 mile below Cap' Lewis who had walked thro' the point, left his Coat & a Deer on the bank which we took on board, a short distance below our Camp I saw some rafts on the S. S. near which, an Indian woman was saffeled in the Indian form of Deposing their Dead and fallen down She was or had been raised about 6 feet, inclosed in Several robes tightly laced around her, with her dog Slays, her bag of Different coloured earths paint small bones of animals beaver nales and Several other little trinkets, also a blue jay, her dog was killed and lay near her. Cap' Lewis joined me soon after I landed & informed me he had walked several miles higher, & in his walk killed 2 Deer & wounded an Elk & a Deer, our party shot in the river four beaver & caught two, which were verry fat and much admired by the men, after we landed they killed 3 Elk 4 Gees & 2 Deer we had some of our Provisions & which got a little wet aired, the wind continued so hard that we were compelled to delay all day. Saw several buffalow lodged in the drift wood which had been drowned in the winter in passing the river; saw the remains of 2 which had lodged on the side of the bank & eat by the bears.

from flying clouds, Some frost this morning & the mud at
the edge of the water was frosed

[Lewis :]

Sunday April 21\textsuperscript{st} 1805.

Set out at an early hour this morning. Capt Clark walked
on shore; the wind tho' a head was not violent. the country
through which we passed is very simelar in every respect to
that through which we have passed for several days. We saw
immence herds of buffaloe Elk deer & Antelopes. Capt.
Clark killed a buffaloe and 4 deer in the course of his walk
today; and the party with me killed 3 deer, 2 beaver, and 4
buffaloe calves. the latter we found very delicious. I think
it equal to any veal I ever tasted. the Elk now begin to shed
their horns. passed one large and two small creeks on the
Lar\textsuperscript{a} side, tho' neither of them discharge any water at present.
the wind blew so hard this evening that we were obliged to
halt several hours. we reached the place of incampment after
dark, which was on the Lar\textsuperscript{a} side a little above White earth
river which discharges itself on the Sta\textsuperscript{d} side. immediately at
the mouth of this river it is not more then 10 yards wide being
choked up by the mud of the Missouri; tho' after leaving the
bottom lands of this river, or even sooner, it becomes a boald
stream of sixty yards wide and is deep and navigable. the
course of this river as far as I could see from the top of Cut
bluff, was due North. it passes through a beatifull level and

[ 326 ]
fertile valley about five miles in width. I think I saw about 25 miles up this river, and did not discover one tree or bush of any description on its borders. the valley was covered with Elk and buffaloe. saw a great number of geese today as usual, also some swan and ducks.

[Lewis:]

Monday April 22nd 1805.

Set out at an early hour this morning; proceeded pretty well until breakfast, when the wind became so hard a head that we proceeded with difficulty even with the assistance of our toe lines. the party halted and Cp! Clark and myself walked to the white earth river which approaches the Missouri very near at this place, being about 4 miles above it's entrance. we found that it contained more water than streams of it's size generally do at this season. the water is much clearer than that of the Missouri. the banks of the river are steep and not more than ten or twelve feet high; the bed seems to be composed of mud altogether. the salts which have been before mentioned as common on the Missouri, appears in great quantities along the banks of this river, which are in many places so thickly covered with it that they appear perfectly white. perhaps it has been from this white appearance of it's banks that the river has derived it's name. this river is said to be navigable nearly to it's source, which is at no great distance from the Saskashawun, and I think from it's size the direction which it seems to take, and the latitude of it's mouth, that there is very good ground to believe that it

[328]
extends as far North as latitude 50°.\(^1\) This stream passes through an open country generally. The broken hills of the Missouri about this place exhibit large irregular and broken masses of rocks and stones; some of which tho' 200 feet above the level of the water seem at some former period to have felt its influence, for they appear smooth as if worn by the agitation of the water. This collection consists of white & grey gannite, a brittle black rock, flint, limestone, freestone, some small specimens of an excellent pebble and occasionally broken stratas of a stone which appears to be petrified wood; it is of a black colour, and makes excellent whetstones. Coal or carbonated wood pumice stone lava and other mineral appearances still continue. The coal appears to be of better quality; I exposed a specimen of it to the fire and found that it burnt tolerably well, it afforded but little flame or smoke, but produced a hot and lasting fire. I ascended to the top of the cutt bluff this morning, from whence I had a most delightful view of the country, the whole of which except the valley formed by the Missouri is void of timber or underbrush, exposing to the first glance of the spectator immense herds of Buffaloe, Elk, deer, & Antelopes feeding in one common and boundless pasture. We saw a number of bever feeding on the bark of the trees alonge the verge of the river, several of which we shot, found them large and fat. Walking on shore this evening I met with a buffaloe calf which attatched itself to me and continued to follow close at my heels untill I embarked and left it.\(^2\) It appeared allarmed at my dog which was probably the cause of it's so readily attatching itself to me. Capt Clark informed me that he saw a large drove of buffaloe pursued by wolves today, that they at length caught a calf which was unable to keep up with the herd. The cows only defend their young so long as they are able to keep up with the herd, and seldom return any distance in surch of them.

\(^1\) White Earth River rises in the Coteau du Missouri, near the 49th parallel. — Ed.

\(^2\) Catlin mentions (N. Amer. Inds., i, 255, 256) the docile and affectionate disposition of the buffalo calf; he was able to lure to his camp a dozen of them, who were successfully fed on the milk of a domestic cow. He succeeded in transporting one of these to the Chouteau farm near St. Louis, where it threw well. — Ed.

[Clark:] 22\textsuperscript{nd} of April Monday 1805

A verry cold morning. Some frost, we set out at an early hour and proceeded on verry well untill brackfast at which time the wind began to blow verry hard ahead, and continued

American Journeys — www.americanjourneys.org
hard all day we proceeded on with much difficulty with the assistance of the toe Ropes. Cap' Lewis & my self walked to the River which is near the Missouri four miles above its mouth, this river is 60 yards wide and contains a greater perportion of water at this time than is common for Rivers of its size it appears navigable as far as any of the party was, and I am told to near its source in morasses in the open Plains, it passes (as far as we can see which is 6 or 7 Leagues) thro' a butifull extensive vallee, rich & fertile and at this time covered with Buffalow, Elk & antelopes, which may be Seen also in any other direction in this quarter. this river must take its rise at no great distance East of the Saskashawan, and no doubt as far N. as Lat. 50°

Some of the high plains on the broken rivers [banks] of the river contains great quantity of Pebble Stones of various sizes, The Stratum of coal is much richer than below, the appearances of Mineral & burnt hills still continue the river rising a little, Saw an emense number of beaver feeding on the waters edge & swimming killed several, Cap' Lewis ascended a hill from the top of which he had a most enchanting prospect of the Countrey around & the meanderings of the two rivers, which is remarkable crooked. a buffalow calf which was on the shore alone followed Cap Lewis some distance, I observed a large drove of buffalow prosued by wolves caught one of their calves in my view, those animals defend their young as long as they can keep up with the drove

LEWIS AND CLARK JOURNALS [April 23]

[**Lewis:**]

*Tuesday April 23rd*

Set out at an early hour this morning about nine A.M. the wind arose, and shortly after became so violent that we were unable to proceed, in short it was with much difficulty and some risk that I was enabled to get the canoes and per­"ogues into a place of tolerable safety, there being no timber on either side of the river at this place. some of the canoes shiped water, and wet several parcels of their lading, which I directed to be opened and aired. we remained until five in the evening when the wind abating in some measure, we reloaded, and proceeded. shortly after we were joined by Capt. Clark who had walked on shore this morning, and passing through the bottom lands had fallen on the river some miles above, and concluding that the wind had detained us, came down the river in such of us. he had killed three black-tailed, or mule deer, and a buffaloe Calf, in the course of his ramble. these hard winds, being so frequently repeated, become a serious source of detention to us. incamped on the Star\(^t\) side.\(^1\)

[**Clark:**]

*23\(^{rd}\) of April 1805*

A cold morning at about 9 oClock the wind as usual rose from the N W and continued to blow very hard until late in the evening. I walked on Shore after breakfast in my walk on the S Side passed through extensive bottoms of timber intersperced with glades & low open plains. I killed 3 mule or black tail Deer, which was in tolerable order, Saw several others, I also killed a Buffalow calf which was very fine, I struck the river above the Perogus which had come too in a

---

\(^1\) This was above Painted Wood Creek. — Ed.

[332]
bend to the L.S. to shelter from the wind which had become violently hard, I joined Capt Lewis in the evening & after the winds falling which was late in the evening we proceeded on & encamped on the S.S. The winds of this country which blow with some violence almost every day, has become a serious obstruction in our progression onward, as we can’t move when the wind is high without great risk, and if there was no risk the wind is generally a head and often too violent to proceed.

[Lewis:] Wednesday April 24\textsuperscript{d}

The wind blew so hard during the whole of this day, that we were unable to move. notwithstanding that we were sheltered by high timber from the effects of the wind, such was its violence that it caused the waves to rise in such manner as to wet many articles in the small canoes before they could be unloaded. we sent out some hunters who killed 4 deer & 2 Elk, and caught some young wolves of the small kind. Soar eyes is a common complaint among the party. I believe it originates from the immense quantities of sand which is driven by the wind from the sandbars of the river in such clouds that you are unable to discover the opposite bank of the river in many instances. the particles of this sand are so fine and light that they are easily supported by the air, and are carried by the wind for many miles, and at a distance exhibiting every appearance of a column of thick smoke. so penetrating is this sand that we cannot keep any article free from it; in short we are compelled to eat, drink, and breath it very freely. my
pocket watch, is out of order, she will run only a few minutes without stopping. I can discover no radical defect in her works, and must therefore attribute it to the sand, with which, she seems plentifully charged, notwithstanding her cases are double and tight.

[Clark:] 24th of April Wednesday 1805

The wind rose last night and continued blowing from the N. & N W. and sometimes with great violence, until 7 oClock P.M. Several articles wet in the Perogues by their taking water &c: as the wind was a head we could not move to day. Sent out hunters, they killed 4 Deer 2 Elk & caught some young wolves of the small kind. The party complain much of the Sand in their eyes. The sand is very fine and rises in clouds from the Points and bars of the river. I may say that during those winds we eat, Drink & breathe a proportion of sand.

[Lewis:] Thursday April 25th 1805.

The wind was more moderate this morning, tho' still hard; we set out at an early hour.¹ the water froze on the oars this morning as the men rowed. About 10 oClock A.M. the wind began to blow so violently that we were obliged to lye too. my dog had been absent during the last night, and I was fearfull we had lost him altogether; however, much to my satisfaction he joined us at 8 oClock this morning. The wind had been so unfavorable to our progress for several days past, and seeing but little prospect of a favourable chang; knowing that the river was crooked, from the report of the hunters who were out yesterday, and believing that we were at no very great distance from the Yellow stone River; I determined, in order as much as possible to avoid detention, to proceed by land with a few men to the entrance of that river and make the necessary observations to determine it's position, which I hoped to effect by the time that Capt. Clark could arrive with the party;

¹ I remarked, as a singular circumstance, that there is no dew in this country, and very little rain. Can it be owing to the want of timber? — GASS (p. 114).
accordingly I set out at 11 O'clock on the Lar² side, accompanied by four men. We proceeded about four miles, when falling in with some buffaloe I killed a yearling calf, which was in good order; we soon cooked and made a hearty meal of a part of it, and renewed our march. Our rout lay along the foot of the river hills. When we had proceeded about four miles, I ascended the hills from whence I had a most pleasing view of the country, particularly of the wide and fertile vallies formed by the Missouri and the Yellowstone rivers, which occasionally unmasked by the wood on their borders disclose their meanderings for many miles in their passage through these delightfull tracts of country. I could not discover the junction of the rivers immediately, they being concealed by the wood; however, sensible that it could not be distant I determined to encamp on the bank of the Yellowstone river which made its appearance about 2 miles South of me. The whole face of the country was covered with herds of Buffaloe, Elk & Antelopes; deer are also abundant, but keep themselves more concealed in the woodland. The buffaloe Elk and Antelope are so gentle that we pass near them while feeding, without appearing to excite any alarm among them; and when we attract their attention, they frequently approach us more nearly to discover what we are, and in some instances pursue us a considerable distance apparently with that view. In our way to the place I had determined to encamp, we met with two large herds of buffaloe, of which we killed three cows and a calf. Two of the former were but lean, we therefore took their tongues and a part of their marrow-bones only. I then proceeded to the place of our encampment with two of the men, taking with us the calf and marrowbones, while the other two remained, with orders to dress the cow that was in tolerable order, and hang the meat out of the reach of the wolves, a precaution indispensable to its safe keeping, even for a night. We encamped on the bank of the yellow stone river, 2 miles South of it's confluence with the Missouri. On rejoining Cap' Clark, the 26th in the evening, he informed me, that at 5 P.M. after I left him the wind abated in some measure and he proceeded a few miles further and encamped.

[335]

[Clark:] 25th of April Thursday 1805

The wind was moderate & ahead this morning, we set out at an early hour. The morning cold, some flying clouds to be seen, the wind from the N: ice collected on the ores this morning, the wind increased and became so violent about 1 oClock we were obliged to lay by our canoes having taken in some water, the Dog which was lost yesterday, joined us this morning.

finding that the winds retarded our pregression for many days past, and no app[e]arance of an alteration, and the river being [so] crooked that we could never have 3 miles fair wind, Cap: Lewis concluded to go by land as far as the Rochejhone or yellow Stone river, which we expect is at no great distance by land and make Some Selestial observations to find the situation of its mouth, and by that measure not detain the Perogues at that place any time for the purpose of making those necessary observations he took 4 men & proceeded on up the Missouri on the L. Side, at 5 oClock the wind lulled and we proceeded on and incamped.

S. 72° W. 13/4 mile to the lower part of some timber in a bend to the S't

[Friday April 26th, 1805.]

This morning I dispatched Joseph Fields up the yellowstone river with orders to examine it as far as he could conveniently and return the same evening; two others were directed to bring in the meat we had killed last evening, while I proceeded down the river with one man in order to take a view of the confluence of this great river with the Missouri, which we found to be two miles distant on a direct line N.W. from our encampment. The bottom land on the lower side of the yellowstone river near it's mouth, for about one mile in width appears to be subject to inundation; while that on the opposite side of the Missouri and the point formed by the junction of these rivers is of the common elivation, say from twelve to 18 feet above the level of the water, and of course not liable to be overflowed except in extreem high water, which dose not appear to be very frequent. there is more timber in the neighbourhood of the junction of these rivers, and on the Missouri as far below as the White-earth river, than there is on any part of the Missouri above the entrance of the Chyenne river to this place. the timber consists principally of Cottonwood, with some small elm, ash and boxalder. the under growth on the sandbars and verge of the river is the small leafed willow; the low bottoms, rose bushes which rise to three or four feet high, the redburry, servicebury, and the
redwood; the high bottoms are of two discriptions, either timbered or open; the first lies next to the river and it's under brush is the same with that of the low timbered bottoms with the addition of the broad leafed willow, Goosbury, choke cherry, purple currant, and honeysuckle bushes; the open bottoms border on the hills, and are covered in many parts by the wild hyssop which rises to the hight of two feet. I observe that the Antelope, Buffaloe Elk and deer feed on this herb; the willow of the sandbars also furnish a favorite winter food to these anamals as well as the growse, the porcupine, hare, and rabbit. about 12 O'clock I heard the discharge of several guns at the junction of the rivers, which announced to me the arrival of the pa[ry]ty with Capt Clark; I afterwards learnt that they had fired on some buffaloe which they met with at that place, and of which they killed a cow and several Calves; the latter are now fine veal. I dispatched one of the men to Capt Clark requesting him to send up a canoe to take down the meat we had killed and our baggage to his encampnt, which was accordingly complyed with. after I had completed my observations in the evening I walked down and joined the party at their encampment on the point of land formed by the junction of the rivers; found them all in good health, and much pleased at having arrived at this long wished for spot, and in order to add in some measure to the general pleasure which seemed to pervade our little community, we ordered a dram to be issued to each person; this soon produced the fiddle, and they spent the evening with much hilarity, singing & dancing, and seemed as perfectly to forget their past toils, as they appeared regardless of those to come. in the evening, the man I had sent up the river this morning returned, and reported that he had ascended it about eight miles on a streight line; that he found it crooked, meandering from side to side of the valley formed by it; which is from four to five miles wide. the corrent of the river gentle, and it's bed much interrupted and broken by sandbars; at the distance of five miles he passed a large Island well covered with timber, and three miles higher a large creek falls in on the S.E. side above a high bluff in which there are several stratas of coal. the
country bordering on this river as far as he could perceive, like that of the Missouri, consisted of open plains. He saw several of the bighorned animals in the course of his walk; but they were so shy that he could not get a shot at them; he found a large horn of one of these animals which he brought with him. The bed of the Yellowstone river is entirely composed of sand and mud, not a stone of any kind to be seen in it near its entrance. Capt Clark measured these rivers just above their confluence; found the bed of the Missouri 520 yards wide, the water occupying 330. It's channel was 858 yards deep. The Yellowstone river including its sandbar, 858 yards of which, the water occupied 297 yards; the deepest part 12 feet; it was falling at this time & appeared to be nearly at its summer tide. The Indians inform that the Yellowstone river is navigable for perogues and canoes nearly to its source in the Rocky Mountains, and that in its course near these mountains it passes within less than half a day's march of a navigable part of the Missouri. Its extreme sources are adjacent to those of the Missouri, river platte, and I think probably with some of the South branch of the Columbia river. The first part of its course lies through a mountainous rocky country tho' well timbered and in many parts fertile; the middle, and much the most extensive portion of the river lies through a delightful rich and fertile country, well covered with timber, interspersed with plains and meadows, and well watered; it is some what broken in many parts. The lower portion consists of fertile open plains and meadows almost entirely, tho' it possesses a considerable proportion of timber on its borders. The current of the upper portion is extremely rapid, that of the middle and lower portions much more gentle than the Missouri. The water of this river is turbid, tho' dose not possess as much sediment as that of the Missouri. This river...
in its course receives the waters of many large tributary streams principally from the S.E. of which the most considerable are the Tongue and bighorn rivers (Clark's fork) the former is much the largest, (rather the smallest — next in size Clark's fork, and the Big horn the largest by much.) and heads with the river Platte and Bighorn river, as dose the latter with the Tongue river and the river Platte. a sufficient quantity of limestone may be readily procured for building near the junction of the Missouri and yellowstone rivers. I could observe no regular stratas of it, tho' it lies on the sides of the river hills in large irregular masses, in considerable quantities; it is of a light colour, and appears to be of an excellent quality.

The courses and distances of the 26th as the party ascended the Missouri, are as follow

the clouds this morning prevented my observing the moon with a. Aquilæ; and as the moon was not again observeable until the 1st of May, I determined not to wait, but rather to relinquish for the present the obtaining the necessary data to fix the longitude of this place. Observed Meridian altitude of \( \odot \) L. L. with Octant by the back observation

\[ 73^\circ 47' \]

Latitude deduced from this observation. [blank space in MS.]

[340]
last night was very cold. the Thermometer stood at 32 abov o this morning. I set out at an early hour, as it was cold I walked on the bank, & in my walk Shot a beaver & 2 Deer, one of the Deer in tolerable order, the low bottom of the river is generally covered with wood[,] willows & rose bushes, red berry, wild cherry & red or arrow wood interspersed with glades The timber is Cottonwood principally, Elm small ash also furnish a portion of the timber. The clay of the bluffs appear much whiter than below, and contain several Strata of coal, on the hill sides I observe pebbles of different size & colour. The river has been rising for several days, & raised 3 inches last night, at 12 oClock arrived at the forks of the Roche Johne & Missouri and formed a camp on the point. Soon after George Drewyer came from Cap' Lewis & informed me that he was a little way up the Rochejohne and would join me this evening, I sent a canoe up to Cap' Lewis and proceeded [to] measure the width of the [river], and find the depth. The Missouri is 520 yards wide above the point of Yellow Stone and the water covers 330 yards, the Yellowstone River is 858 yards wide including its sand bar, the water covers 297 yards and the deepest part is 12 feet water, it is at this time falling, the Missouri rising The Indians inform that the Yellow Stone River is navigable for Perogues to near its source in the Rocky Mountains, it has many tributary streams, principally on the S.E. side, and heads at no great distance from the Missouri, the largest rivers which fall into it is Tongue river which heads with the waters of River Platt, and Bighorn river which also heads with Platt & Tongue R the current of this river is said to be rapid near its mouth it is very jentle, and its water is of a whitish colour much clearer of Sediment than the Missouri, the Countrie on this river is said to be broken in its whole course & contains a great deal of wood, the countray about its mouth is very fine, the bottoms on either side is wooded with Cotton wood, ash, Elm, & near the banks of the river back is higher bottoms and covered with red berry, Goose berry & rose bushes & interspersed with
LEWIS AND CLARK JOURNALS [April 26]

small open Glades, and near the high land is Generally open rich bottoms. at our arrival at the forks I observed a Drove of Buffalow Cows & Calves on a sand bar in the point, I directed the men to kill the fattest Cox, and 3 or 4 calves, which they did and let the others pass, the cows are poor, calves fine veele.

Capt Lewis joined me in the evening after taking equal altitudes a little way up the Yellowstone river the countrey in every direction is plains except the mou[d] bottoms of the river, which are covered with some indifferent timber such as Cotton wood, Elm & small ash, with different kind of S[h]rubs & bushes on the forks about 1 mile from the point at which place the 2 rivers are near each other a butifull low leavel plain commences, and extends up the Missouri & back, this plain is narrow at its commencement and widens as the Missouri bends north, and is bordered by an extencive wood land for many miles up the Yellow Stone river, this low plain is not Subject to over flow, appear to be a few inches above high water mark and affords a butifull commanding situation for a fort near the commencement of the Prarie, about [blank space in MS.] miles from the Point & [blank space in MS.] yards from the Missouri a small lake is Situated, from this lake the plain rises gradually to a high butifull countrey, the low Plain continues for some distance up both rivers on the Yellow Stone it is wide & butifull ops the point on the S. Side is some high timbered land, about 1 1/2 miles below on the same side a little distance from the water is an elivated plain. Several of the party was up the Yellow Stone R several miles, & informed that it meandered through a butifull coun-

[342]
trey Joseph Fields discovered a large creek falling into the Yellowstone River on the S E. Side 8 miles up near which he saw a big horned animal, he found in the Prairie the horn of one of those animals which was large and appeared to have laid several years. I saw many buffalo dead on the banks of the river in different places, some of them eaten by the white bears & wolves all except the skin & bones, others entire, those animals either drowned in attempting to cross on the ice during the winter or swimming across to bluff banks where they could not get out & too weak to return. We saw several in this situation. Abundance of antelopes in the forks of the river, Buffalo, Elk & Deer is also plenty. Beaver is in every bend. I observe that the Magpie Goose duck & Eagle all have their nests in the same neighborhood, and it is not uncommon for the Magpie to build in a few rods of the eagle, the nests of this bird is built very strong with sticks covered very thickly with one or more places through which they enter or escape, the Goose I make no doubt falls a prey to those vicious eagles.

[Lewis:] Saturday April 27th 1805

Previous to our setting out this morning I made the following observations.

Point of observation No. 8.

| Sun's magnetic azimuth by Circumferentor | N. 81° E. |
| Altitude by Sextant | 44° 58′ 30″ |

| Sun's magnetic azimuth by Circumferentor | N. 82° E. |
| Time by Chronometer A.M. | 9: 34: 29. |
| Altitude by Sextant | 47° 22′ |

| Sun's Magnetic azimuth by Circumferentor | N. 83° E. |
| Altitude by Sextant | 49° 56′ 30″ |
This morning I walked through the point formed by the junction of the rivers; the woodland extends about a mile, when the rivers approach each other within less than half a mile; here a beatifull level low plain commences and extends up both rivers for many miles, widening as the rivers recede from each other, and extending back half a mile to a plain about 12 feet higher than itself; the low plain appears to be a few inches higher than high water mark and of course will not be liable to be overflown; tho' where it joins the high plain a part of the Missouri when at it's greatest hight, passes through a channel of 60 or 70 yards wide and falls into the yellowstone river. on the Missouri about 2½ miles from the entrance of the yellowstone river, and between this high and low plain, a small lake is situated about 200 yards wide extending along the edge of the high plain parallel with the Missouri about one mile. on the point of the high plain at the lower extremity of this lake I think would be the most eligible site for an establishment between this low plain and the Yellow stone river their is an extensive body of timbered land extending up the river for many miles. this site recommended is about 400 yards distant from the Missouri and about double that distance from the river yellow stone; from it the high plain, rising very gradually, extends back about three miles to the hills, and continues with the same width between these hills and the timbered land on the yellowstone river, up that stream, for seven or eight miles; and is one of the ha[n]dsomest plains I ever beheld. on the Missouri side the hills sircumscribe it's width, & at the distance of three miles up that river from this cite, it is not more than 400 yards wide. Capt Clark thinks that the lower extremity of the low plane would be most eligible for this establishment; it is true that it is much nearer both rivers, and might answer very well, but I think it reather too low to venture a permanent establishment, particularly if built of brick or other durable materials, at any considerable expence; for so capricious, and versatile are these rivers, that it is difficult to say how long it will be, untill they direct the force of their currents against this narrow part of the low plain, which when they do, must shortly yeald to their influence; in

[344]
such case a few years only would be necessary, for the annihi-
lation of the plain, and with it the fortification. ¹ I continued
my walk on shore; at 11 A. M. the wind became very hard
from N. W. insomuch that the perogues and canoes were unable
either to procede or pass the river to me; I was under the
necessity therefore of shooting a goose and cooking it for my
dinner. the wind abated about 4. P.M. and the party pro-
ceeded tho' I could not conveniently join them untill night.
altho' game is very abundant and gentle, we only kill as
much as is necessary for food. I believe that two good hunters
could conveniently supply a regiment with provisions. for
several days past we have observed a great number of buffaloe
lying dead on the shore, some of them entire and others partly
devoured by the wolves and bear. those animals either
drownded during the winter in attempting to pass the river on
the ice during the winter or by swining acr[0]ss at present to
bluff banks which they are unable to ascend, and feeling them-
selves too weak to return remain and perish for the want of
food; in this situation we met with several little parties of
them. beaver are very abundant, the party kill several of them
every day. The Eagles, Magpies, and gees have their nests
in trees adjacent to each other; the magpy particularly appears
fond of building near the Eagle, as we scarcely see an Eagle's
nest unaccompanyed with two or three Magpies nests within a
short distance. The bald Eagle are more abundant here than
I ever observed them in any part of the country.

Courses and distances 27th April 1805.

[347]
CHAPTER VIII

PART I

FROM THE YELLOWSTONE TO THE MUSSELSHELL

Lewis's Journal, April 28—May 5, 1805
Clark's Journal, April 28—May 5

Sunday April 28th 1805.

Set out this morning at an early hour; the wind was favourable and we employed our sails to advantage. Capt Clark walked on shore this morning, and I proceeded with the party. The country through which we passed today is open as usual and very broken on both sides near the river hills, the bottoms are level fertile and partially covered with timber. The hills and bluffs exhibit their usual mineral appearances, some burnt hills but no appearance of Pumice-Stone; coal is in great abundance and the salts still increase in quantity; the banks of the river and sandbars are incrusted with it in many places and appear perfectly white as if covered with snow or frost. The woods are now green, tho' the plains and meadows appear to abate of the verdure those below exhibited some days past. We past three small runs today, two falling in on the Star't and one on the Lar't side, they are but small afford but little water and head a few miles back in the hills. We saw great quantities of game today; consisting of the common and mule deer, Elk, Buffaloe, and Antelopes; also four brown bear, one of which was fired on and wounded by one of the party but we did not get it; the beaver have cut great quantities of timber; saw a tree nearly 3 feet in diameter that had been felled by them. Capt. Clark in the course of his walk killed a deer and a goose; & saw three black bear; he thinks the bottoms are not so wide as they have been for some days past.

[Clark:] 28th of April Sunday 1805

A fine day, river falling, wind favourable from the S.E. and moderate, I walked on shore to view the country, from the top of the high hills, I beheld a broken & open country on both sides, near the river some very handsome low plains, I kill'd a deer & a goose, saw three black bears, great numbers of elk antelopes & 2 gangs of buffalo. The hills & bluffs show the strata of coal, and burnt appearances in many places, and about them I could find no appearance of pumice stone, the woodland have a green appearance, the plains do not look so green as below. The bottoms are not so wide this afternoon as below. Saw four bears this evening, one of the men shot at one of them. The antelopes are nearly red, on that part which is subject to change i.e. the sides & 2/3 of the back from the head, the other part as white as snow, 2 small runs fall in on the S. Side and one this evening on the Lar's Side, those runs head at a few miles in the hills and discharge but little water, the bluffs in this part
as also below Shew different stratum of coal or carbonated wood, and coloured earths, such as dark brown, yellow a lightish brown, & a dark red &c.

Monday April 29\textsuperscript{th} 1805.

Set out this morning at the usual hour; the wind was moderate; I walked on shore with one man. about 8. A.M. we fell in with two brown or yellow \textit{[white]} bear; both of which we wounded; one of them made his escape, the other after my firing on him pursued me seventy or eighty yards, but fortunately had been so badly wounded that he was unable to pursue so closely as to prevent my charging my gun; we again repeated our fir\textsuperscript{e} and killed him. it was a male not fully grown, we estimated his weight at 300 lb! not having the means of ascertaining it precisely. The legs of this bear are somewhat longer than those of the black, as are it's tallons and tusks incomparably larger and longer. the testicles, which in the black bear are placed pretty well back between the thyes and contained in one pouch like those of the dog and most quadrupeds, are in the yellow or brown bear placed much
further forward, and are suspended in separate pouches from two to four inches asunder; it’s colour is yellowish brown, the eyes small, black, and piercing; the front of the fore legs near the feet is usually black; the fur is finer thicker and deeper than that of the black bear. these are all the particulars in which this animal appeared to me to differ from the black bear; it is a much more furious and formidable animal, and will frequently pursue the hunter when wounded. it is astonishing to see the wounds they will bear before they can be put to death. the Indians may well fear this animal equipped as they generally are with their bows and arrows or indifferent fuzees, but in the hands of skillfull riflemen they are by no means as formidable or dangerous as they have been represented. game is still very abundant we can scarcely cast our eyes in any direction without perceiving deer Elk Buffaloe or Antelopes. The quantity of wolves appear to increase in the same proportion; they generally hunt in parties of six eight or ten; they kill a great number of the Antelopes at this season; the Antelopes are yet meagre and the females are big with young; the wolves take them most generally in attempting to swim the river; in this manner my dog caught one drowned it and brought it on shore; they are but clumsy swimmers, tho’ on land when in good order, they are extremly fleet and durable. we have frequently seen the wolves in pursuit of the Antelope in the plains; they appear to decoy a single one from a flock, and then pursue it, alterately relieving each other untill they take it. on joining Capt Clark he informed me that he had seen a female and faun of the bighorned animal; that they ran for some distance with great apparent ease along the side of the river bluff where it was almost per-

---

1 By “white bear,” here and elsewhere in Lewis and Clark’s journals, must not be understood the white or polar bear of Arctic regions, but the animal now known as “grizzly bear” (Ursus horribilis), first adequately described by our explorers. It was technically named in 1815. — Ed.

2 As no wound except through the head or heart is mortal, they frequently fall a sacrifice if they miss their aim. He rather attacks than avoids a man, and such is the terror which he has inspired, that the Indians who go in quest of him paint themselves and perform all the superstitious rites customary when they make war on a neighboring nation. — BIDDLE (i, p. 200).
perpendicular; two of the party fired on them while in motion without effect. we took the flesh of the bear on board and proceeded. Capt. Clark walked on shore this evening, killed a deer, and saw several of the bighorned animals. there is more appearance of coal today than we have yet seen, the stratas are 6 feet thick in some instances; the earth has been burnt in many places, and always appears in stratas on the same level with the stratas of coal. we came too this evening in the mouth of a little river, which falls in on the Star\(\ddagger\) side. this stream is about 50 yards wide from bank to bank; the water occupies about 15 yards. the banks are of earth only, abrupt, tho' not high—the bed, is of mud principally. Capt Clark, who was up this stream about three miles, informed me that it continued about the same width, that it's current was gentle and it appeared navigable for perogues it meanders through an extensive, fertile, and beautifull vally as far as could bee seen about N. 30° W. there was but one solitary tree to be seen on the banks of this river after it left the bottom of the Missouri. the water of this river is clear, with a brownish yellow tint. here the highlands receede from the Missouri, leaving the vally formed by the river from seven to eight miles wide, and rather lower then usual. This stream my friend Capt. C. named Marthas river.¹

[Clark:] 29\textsuperscript{th} of April Monday 1805

Set out this morning at the usual hour. the wind is moderate &
from the N.E. had not proceeded far eer we Saw a female &
her faun of the Bighorn animal on the top of a Bluff lying,
the noise we made allarmed them and they came down on the
side of the bluff which had but little slope being nearly pur-
pindicular, I directed two men to kill those animals, one
went on the top and the other man near the water they had
two shots at the doe while in motion without effect, Those
animals run & Skiped about with great ease on this declivity &
appeared to prefur it to the leavel bottom or plain. Cap:\nLewis & one man walk\textsuperscript{4} on shore and he killed a yellow Bear &
the man with him wounded one other, after getting the
flesh of the bear on bord which was not far from the place we
brackfast, we proceeded on Saw 4 gangus of buffalow and great
numbers of antelopes in every direction also saw Elk and
several wolves, I walked on Shore in the evening & killed a
Deer which was so meager as to be unfit for use. The hills
contain more coal, and has a greater appearance of being burnt
that [than] below, the burnt parts appear on a parrrel with
the stratiums of coal, we came too in the mouth of a Little
river on the S.S. which is about 50 or 60 yards from banks to
bank, I was up this Stream 3 miles it continues its width and
glides with a gentle current, its water is about 15 yards wide
at this time, and appears to be navagable for canoes & it
meanders through a butifull & extencive vallie as far as can be
Seen about N 30° W. I saw only a single tree in this fertile

vol. 1. — 23

[353]
vallie The water of the River is clear of a yellowish colour, we call this river Martheys river in honor to the Celebrated M.F. Here the high land widen from five to Eight miles and much lower than below. Saw several of the big horn animals this evening. The Wolves destroy great numbers of the antelopes by decoying those animals singularly out in the plains and prosueing them alternetly, those antelopes are curious and will approach any thing which appears in motion near them &c

[Lewis:]

Tuesday April 30th 1805.

Set out at sunrise. the wind blew hard all last night, and continued to blow pretty hard all day, but not so much, as to compel us to ly by. the country as usual is bare of timber; the river bottoms are level and fertile and extensive, but possess but little timber and that of an indifferent quality even of it's kind; principally low cottonwood, either too small for build-

[354]
ing, or for plank, or broken and dead at top and unsound in the center of the trunk. saw great quantities of game as usual. Cap' Clark walked on shore the greater part of the day, the Interpreter, Charbono and his Indian woman attended him. past some old Indian lodges built of drift wood; they appear to be of antient date and not recently inhabited. I walked on shore this evening and killed a buck Elk, in tolerable order; it appeared to me to be the largest I had seen, and was therefore induced to measure it; found it five feet three inches from the point of the hoof, to the top of the shoulders; the leg and hoof being placed as nearly as possible in the same position they would have been had the animal been standing.

[ 355 ]
The wind blew hard from the N.E. all last night, we set out at Sunrise the wind blew hard the greater part of the day and part of the time favourable, we did not lie by to day on account of the wind. I walked on Shore to day our interpreter & his squar followed, in my walk the squar found & brought me a bush something like the currunt, which she said bore a delicious froot and that great quantitis grew on the Rocky Mountains. This shrub was in bloom has a yellow flower with a deep cup, the froot when ripe is yellow and hangs in bunches like cherries, Some of those berries yet remained on the bushes. The bottoms above the mouth of the last river is extensive level & fertile and covered with indifferent timber in the points, the upland appear to rise gradually, I saw Great numbers of antelopes, also scattering Buffalow, Elk, Deer, wolves, Gees, ducks & Crows. I Killed 2 Gees which we dined on to day. Capt Lewis walked on Shore and killed an elk this evening, and we came too & camped on the S.S. the country on both sides have a butifull appearance.

| S. 40° W. | 3 1/2 to a point of wood land on St Side opposit to a Bluff on the L Side the [river] makeing a considerable bend L.S. |
| N. 70° W. | 3 to a point of wood land on the Lard Side passing at the commencement of this course a large sand Island in the Lard bend. |
Set out this morning at an early [hour], the wind being favourable we used our sales which carried us on at a good pace untill about 12 OCl when the wind became so high that the small canoes were unable to proceed one of them which seperated from us just befor the wind became so violent, is now lying on the opposite side of the river, being unable to rejoin us in consequence of the waves, which during those gusts run several feet high. we came too on the Lar4 shore in a handsome bottom well stocked with cottonwood timber; here the wind compelled us to spend the ballance of the day. we sent out some hunters who killed a buffaloe, an Elk, a goat and two beaver. game is now abundant. the country appears much more pleasant and fertile than that we have passed for several days; the hills are lower, the bottoms wider, and better stocked with timber, which consists principally of cottonwood, not however of large size; the under-growth willow on the verge of the river and sandbars, rose bushes, red willow and the broad leafed willow in the bottom lands; the high country on either side of the river is one vast plain, intirely destitute of timber, but is apparently fertile, consisting of a dark rich mellow looking lome. John Shields sick today with the rheumatism. Shannon killed a bird of the plover kind. weight one pound. it measured from the tip of the toe, to the extremity of the beak, 1. foot 10. Inches; from tip to tip of wings when extended 2 F. 5 I.; Beak 3 3⁄4 inches; tale 3 3⁄4 inches; leg and toe 10 In. the eye black, piercing, prominent and moderately large. the legs are flat thin, slightly imbricated and of a pale sky blue colour, being covered with feathers as far as the mustle extends down it, which is about half of it's
length. it has four toes on each foot, three of which, are connected by a web, the fourth is small and placed at the heel about the ⅘ of an inch up the leg. the nails are black and short, that of the middle toe is extremely singular, consisting of two nails the one laping on or overlaying the other, the upper one somewhat the longest and sharpest. the tale contains eleven feathers of equal length, & of a bluish white colour. the body and underside of the wings, except the large feathers of the 1st & 2nd joints of the same, are white, as are also the feathers of the upper part of the 4th joint of the wing and part of those of the 3rd adjacent thereto. the large feathers of the 1st or pinion and the 2nd joint are black; a part of the larger feathers of the 3rd joint on the upper side and all the small feathers which cover the upper part of the wings are black, as are also the tuft of long feathers on each side of the body above the joining of the wing, leaving however a stripe of white between them on the back. the head and neck are shaped much like the grey plover, and are of a light brickdust brown; the beak is black and flat, largest where it joins the head, and from thence becoming thinner and tapering to a very sharp point, the upper chap being ⅘ of an inch the longest turns down at the point and forms a little hook. the nostrils, which commence near the head are long, narrow, connected and parallel with the beak; the beak is much curved, the curvature being upwards in stead of downwards as is common with most birds; the substance of the beak precisely resembles whalebone at a little distance, and is quite as flexible as that substance. their note resembles that of the grey plover, tho' is rather louder and more varied, their habits appear also to be the same, with this difference; that it sometimes rests on the water and swims which I do not recollect having seen the plover do. this bird which I shall henceforth stile the Missouri plover, generally feeds about the shallow bars of the river, to collect it's food which consists of [blank space in MS.], it immerces it's beak in the water and throws it's head and beak from side to side at every step it takes.

Thursday May 2nd 1805.

The wind continued violent all night nor did it abate much of it's violence this morning, when at daylight it was attended with snow which continued to fall untill about 10 A.M. being about one inch deep, it formed a singular contrast with the vegetation which was considerably advanced. some flowers had put forth in the plains, and the leaves of the cottonwood were as large as a dollar. sent out some hunters who killed 2 deer 3 Elk and several buffaloe; on our way this evening we also shot three beaver along the shore; these animals in consequence of not being hunted are extremly gentle, where they are hunted they never leave their lodges in the day, the flesh of the beaver is esteemed a delecacy among us; I think the tale a most delicious morsal, when boiled it resembles in flavor the fresh tongues and sounds of the codfish, and is usually sufficiently large to afford a plentifull meal for two men. Joseph Fields one of the hunters who was out today found several yards of scarlet cloth which had been suspended on the bough of a tree near an old indian hunting camp, where it had been left as a sacrifice to the deity by the indians, probably of the Assinniboin nation, it being a custom with them as well as all the nations inhabiting the waters of the Missouri so far as they are known to us, to offer or sacrifice in this manner to the deity wat-ever they may be possessed of which they think most acceptable to him, and very honestly making their own feelings the test of those of the deity offer him the article which they most prize themselves. this being the most usual method of we[r]shiping the great spirit as they term the deity, is practiced on interesting occasions, or to produce the happy eventuation of the important occurrences incident to human nature, such as relief from hunger or maldy, protection from their enemies or the delivering them into their hands, and with such as cultivate, to prevent the river's overflowing and distroying their crops &c. sacrifices of a similar kind are also made to the deceased by their friends and relatives. the are was very piercing this evening the [water] friezed on the oars as they rowed. the wind dying at 5.P.M. we set out.

S. 30° W 2 miles to a point of Low timber on the Lar's Side a little above which on the Starboard Side we encamped 

\[ 4\frac{1}{2} \]

2 deer and 3 Elk killed
The morning being very could we did not set out as early as usual; ice formed on a kettle of water $\frac{1}{4}$ of an inch thick. the snow has melted generally in the bottoms, but the hills still remain covered. on the lar\textsuperscript{4} side at the distance of 2 miles we passed a curious collection of bushes which had been tyed up in the form of a faciene \[\text{fascine — Ed.}\] and standing on end in the open bottom it appeared to be about 30 feet high and ten or twelve feet in diameter, this we supposed to have been placed there by the Indians, as a sacrefice for some purpose. The wind continued to blow hard from the West but not so strong as to compel us to ly by. Capt Clark walked on shore and killed an Elk which he caused to be butch[er]ed by the time I arrived with the party, here we halted and dined being about 12 OC\textsuperscript{5}; our usual time of halting for that purpose. after dinner Capt. Clark pursued his walk, while I continued with the party, it being a rule which we had established, never to be absent at the same time from the party. the plains or high lands are much less elivated than they were, not being more than from 50 to 60 feet above the river bottom, which is also wider than usual being from 5 to 9 M\textsuperscript{6} in width; traces of the ancient beds of the river are visible in many places through the whole extent of this valley. since the hills have become lower the appearance of the stratas of coal burnt hills and pumice stone have in a great measure ceased; I saw none today. we saw vast quantities of Buffaloe, Elk, deer principally of the long tale kind, Antelope or goats, beaver, geese, ducks, brant and some swan. near the entrance of the river mentioned in the 10\textsuperscript{th} course of this day, we saw an unusual number of Porcupines from which we determined to call the river after that anamal, and accordingly denomi­nated it \textit{Porcupine river}.\footnote{1 Now Poplar River; the name Porcupine is in our day applied to a branch of Milk River. — Ed.} this stream discharges itself into the Missouri on the Star\textsuperscript{4} side 2000 miles above the mouth of the latter, it is a beatifull bold runing stream, 40 yards wide at it’s entrance; the water is transparent, it being the first of this discription that I have yet seen discharge itself into the Mis-
souri; before it enters a large sand bar through which it discharges itself into the missouri it's banks and bottom are formed of a stiff blue and black clay; it appears to be navigable for canoes and perogues at this time and I have no doubt but it might be navigated with boats of a considerable size in high water. it's banks appear to be from 8 to ten feet high and seldom overflow; from the quantity of water furnished by this river, the appearance of the country, the direction it pursues, and the situation of it's entrance, I have but little doubt but it takes it's source not far from the main body of the Suskashawan river, and that it is probably navigable 150 Miles; perhaps not very distant from that river. should this be the case, it would afford a very favorable communication to the Athebaskay country, from whence the British N.W. Company derive so large a portion of their valuable furs. Capt. Clark who ascended this river several miles and passed it above where it entered the hills informed me on his return that he found the general width of the bed of the river about one hundred yards, where he passed the river the bed was 112 yards wide, the water was knee deep and 38 yard in width; the river which he could observe from the rising grounds for about 20 miles, bore a little to the East of North. there was a considerable portion of timber in the bottom lands of this river. Capt Clark also met with limestone on the surface of the earth in the course of his walk. he also saw a range of low mountains at a distance to the W of N, their direction being N.W. the country in the neighborhood of this river, and as far as the eye can reach, is level, fertile, open and beatifull beyond discription. 1/4 of a mile above the entrance of this river a large creek falls in which we called 2000 Mile Creek. I sent Rubin Fields to examine it, he reported it to be a bold running stream, it's bed 30 yards wide. we proceeded about 3 miles above this creek and encamped on the Star\'s shore. I walked out a little distance and met with 2 porcupines which were feeding on the young willow which grow in great abundance on all the sandbars; this animal is exceedingly clumsy and not very watchfull I approached so near one of them before it percieved me that I touched it with
my escopoon. found the nest of a wild goose among some driftwood in the river from which we took three eggs. this is the only nest we have met with on driftwood, the usual position is the top of a broken tree, sometimes in the forks of a large tree but almost invariably, from 15 to 20 feet or upwards high.

[Clark:]  
May 3rd Friday 1805

we Set out reather later this morning than useal owing to weather being very cold, a frost last night and the Therm\[4\] stood this morning at 26 above o. which is 6 degrees b[e]low freezing. the ice that was on the Kettle left near the fire last night was 3/4 of an inch thick. The snow is all or nearly all off the low bottoms, the Hills are entirely covered; three of our party found in the back of a bottom 3 pieces of scarlet one
brace in each, which had been left as a sacrifice near one of their sweet houses, on the L.S. we passed to day a curious collection of bushes tied up in the shape of facene about 10 feet diamuter, which must have been left also by the natives as an offering to their medison which they [are] convinced protected or gave them relief near the place, the wind continued to blow hard from the West, altho not sufficiently so to detain us. I walked on shore and killed an Elk & had him buchered by the time the Perogus came up which was the usual time of dineing. The high lands are low and from 5 to 9 miles apart and there is evident marks of the bed [bed] of the river having been changed frequently but little appearance of the coal & burnt hills to day. Great numbers of Buffalow, Elk, Deer, antilope, beaver, Porcupins, & water fowls seen to day, such as, Geese, ducks of dif: kinds, & a few Swan. I continued my walk on shore after dinner, and arrived at the mouth of a river on the S' Side, which appeared to be large, and I concluded to go up this river a few miles to examine it accordingly I set out North 1 mile thro wood or timbered bottom, 2 miles through a butifull leavel plain, and 1 mile over a high plain about 50 feet higher than the bottom, & came to the little river, which I found to be a butifull clear Stream of about 100 yds from bank to bank, (I waded this river at the narrowest part and made it 112 steps from bank to bank and at this place which was a kind of fording place the water was near Knee deep, and 38 steps wide, the bottom of a hard stiff Black clay, I observed a Great perportion of timber in the bottoms of this river as far as I could See which was to the East of N. 18 or 20 miles, it appears to be navagable at this time for canoes, and from appearances must be navagable a long distance for Perogus & boats in high water. This river we call Porcupines from the great number of those animals found about it's mouth. a Short distance above about 1/4 mile and on the Lar' Side a large Creek falls in, which R. Fields went to examine & reports that it is a bold running stream 30 yds wide as this creek is 2000 miles up the Missouri we call it the 2000 mile Creek, we proceeded on 3 miles & camped on the S.S. here I joined Cap' Lewis who had in my absence [365]
walk on the upper Side of Porcupine River for some distance. This river from its size & quantity of water must head at no great distance from the Saskashawan on this river I saw emence herds [of] Elk & Buffalow & many deer & Porcupine. I also saw the top of a mountain which did not appear verry high to the West of N. & bore N W. I saw on the high land limestone & pebble. The countrey about the mouth of this river and as far as the eye can reach is butifull open countrey. The greater part of the snow is melted.

[Lewis:]

Saturday May 4th 1805.

We were detained this morning untill about 9 OC't in order to repare the rudder irons of the red perogue which were broken last evening in landing; we then set out, the wind hard against us. I walked on shore this morning, the weather was more pleasant, the snow has disappeared; the frost seems to have effected the vegetation much less than could have been

[366]
expected the leaves of the cottonwood the grass the box alder willow and the yellow flowering pea seem to be scarcely touched; the rosebushes and honeysuckle seem to have sustained the most considerable injury. The country on both sides of the Missouri continues to be open level fertile and beautiful as far as the eye can reach which from some of the eminences is not short of 30 Miles. the river bottoms are very extensive and contain a much greater proportion of timber than usual; the fore part of this day the river was bordered with timber on both sides, a circumstance which is extremely rare and the first which has occurred of any thing like the same extent since we left the Mandans. in the after part of the day we passed an extensive beautiful plain on the Star side which gradually ascended from the river. I saw immense quantities of buffaloe in every direction, also some Elk deer and goats; having an abundance of meat on hand I passed them without firing on them; they are extremely gentle the bull buffaloe particularly will scarcely give way to you. I passed several in the open plain within fifty paces, they viewed me for a moment as something novel and then very unconcernedly continued to feed. Cap Clark walked on shore this evening and did not rejoin us until after dark, he struck the river several miles above our camp and came down to us. we saw many beaver some [of] which the party shot, we also killed two deer today. much sign of the brown bear. passed several old Indian hunting camps in the course of the day one of them contained two large lodges which were fortified with old driftwood and fallen timber; this fortification consisted of a circular fence of timber lade horizontally laping on and over laying each other to the height of 5 feet. these pounds are sometimes built from 20 to 30 feet in diameter and covered over with the trunks and limbs of old timber. the usual construction of the lodges we have lately passed is as follows. three or more strong sticks the thickness of a man's leg or arm and about 12 feet long are attached together at one end by a with of small willows, these are then set on end and spread at the base, forming a circle of ten twelve or 14 feet in diameter; sticks of driftwood and fallen timber of convenient size are now placed with one end
on the ground and the other resting against those which are secured together at top by the with and which support and give the form to the whole, thus the sticks are laid on until they make it as thick as they design, usually about three ranges, each piece breaking or filling up the interstice of the two beneath it, the whole forming a conic figure about 10 feet high with a small apperture in one side which answers as a door. leaves bark and straw are sometimes thrown over the work to make it more complete, but at best it affords a very imperfect shelter particularly without straw which is the state in which we have most usually found them.

At noon the sun was so much obscured that I could not obtain his maridian Altitude which I much wished in order to fix the latitude of the entrance of Porcupine river. Joseph Fields was very sick today with the disentary had a high fever I gave him a doze of Glauber salts, which operated very well, in the evening his fever abated and I gave him 30 drops of laudnum.

[Lewis:] Sunday May 5th 1805

A fine morning I walked on shore untill after 8 A.M. when we halted for breakfast and in the course of my walk killed a deer which I carried about a mile and a half to the river, it was in good order. soon after seting out the rudder irons of the white perogue were broken by her runing fowl on a sawyer, she was however refitted in a few minutes with some tugs of raw hide and nales. as usual saw a great quantity of
game today; Buffaloe Elk and goats or Antelopes feeding in every direction; we kill whatever we wish, the buffaloe furnish us with fine veal and fat beef, we also have venison and beaver tales when we wish them; the flesh of the Elk and goat are less esteemed, and certainly are inferior. we have not been able to take any fish for some time past. The country is as yesterday beatifull in the extreme. saw the carcasses of many Buffaloe lying dead along the shore partially devoured by the wolves and bear. saw a great number of white brant also the common brown brant, geese of the common kind and a small species of geese which differ considerably from the common canadian goose;¹ their neck head and beak are considerably thicker shorter and larger than the other in proportion to it's size, they are also more than a third smaller, and their note more like that of the brant or a young goose which has not perfectly acquired his notes, in all other respects they are the same in colour habits and the number of feathers in the tale, they frequently also associate with the large geese when in flocks, but never saw them pared off with the large or common goose. The white brant associate in very large flocks, they do not appear to be mated or pared off as if they intended to raise their young in this quarter, I therefore doubt whether they reside here during the summer for that purpose. this bird is about the size of the common brown brant or two thirds of the common goose, it is not so long by six inches from point to point of the wings when extended as the other; the beak head and neck are also larger and stronger; their beak legs and feet are of a redish or flesh-coloured white. the eye is of moderate size, the pupil of a deep sea green incircled with a ring of yellowish brown. it has sixteen feathers of equal length in the tale; their note differs but little from the common brant, their flesh much the same, and in my opinion preferable to the goose, the flesh is dark. they are entirely of a beatifull pure white except the

¹ Of these birds, the small goose described is scientifically known as Bernicla hutchinsi; the Canadian goose is B. canadenisis. The brown brant is B. brenta, and the white brant Chen hyperboreus; the last-named bird goes much farther north to breed. — Ed.

[370]
large feathers of the 1st and second joints of the wings which are jet black. Form and habits are the same with the other brants; they sometimes associate and form one common flock. Capt Clark found a den of young wolves in the course of his walk today and also saw a great number of those animals; they are very abundant in this quarter, and are of two species—the small woolf or burrowing dog of the praries are the inhabitants almost invariably of the open plains; they usually associate in bands of ten or twelve sometimes more and burrow near some pass or place much frequented by game; not being able alone to take a deer or goat they are rarely ever found alone but hunt in bands; they frequently watch and seize their prey near their burrows; in these burrows they raise their young and to them they also resort when pursued; when a person approaches them they frequently bark, their note being precisely that of the small dog. They are of an intermediate size between that of the fox and dog, very active, fleet and delicately formed; the ears large erect and pointed the head long and pointed more like that of the fox; tale long and bushey; the hair and fur also resembles the fox th'o' is much coarser and inferior. They are of a pale redish brown colour. The eye of a deep sea green colour small and piercing. Their tallons are rather longer than those of the ordinary wolf or that common to the Atlantic States, none of which are to be found in this quarter, nor I believe above the river Plat.¹ The large woolf found here is not as large as those of the Atlantic States. They are lower and thicker made shorter leged. Their colour which is not effected by the seasons, is a grey or blackish brown and every intermediate shade from that to a cream coloured white; these wolves resort to the woodlands and are also found in the plains, but never take refuge in the ground or burrow so far as I have been able to inform myself. We scarcely see a gang of buffaloe without observing a parsel of those faithfull shepherds.

¹ A description of the coyote (Canis latrans), followed by that of the common wolf (C. lupus occidentalis). Coues thinks that Lewis is mistaken as to the habitat of the latter: "in some of its varieties, it was found in most parts of North America, though it is now exterminated from settled regions" (L. and C., i, p. 297). — Ed.
on their skirts in readiness to take care of the mamed wounded. the large wolf never barks, but howls as those of the atlantic states do. Cap! Clark and Drewyer killed the largest brown bear this evening which we have yet seen. it was a most tremendous looking animal, and extremely hard to kill notwithstanding he had five balls through his lungs and five others in various parts he swam more than half the distance across the river to a sandbar, & it was at least twenty minutes before he died; he did not attempt to attack, but fled and made the most tremendous roaring from the moment he was shot. We had no means of weighing this monster; Capt. Clark thought he would weigh 500 lb; for my own part I think the estimate too small by 100 lb! he measured 8. Feet 7½ inches from the nose to the extremity of the hind feet, 5 F. 10½ In' arround the breast, 1 F. 11. I. arround the middle of the arm, & 3 F. 11. I. arround the neck; his tallons which were five in number on each foot were 4½ inches in length. he was in good order, we therefore divided him among the party and made them boil the oil and put it in a cask for future use; the oil is as hard as hogs lard when cool, much more so than that of the black bear. this bear differs from the common black bear in several respects; it's tallons are much longer and more blont, it's tale shorter, it's hair which is of a redish or bey brown, is longer thicker and finer than that of the black bear; his liver lungs and heart are much larger even in proportion with his size; the heart particularly was as large as that of a large Ox. his maw was also ten times the size of black bear, and was filled with flesh and fish. his testicles were pendant from the belly and placed four inches assunder in separate bags or pouches. this animal also feeds on roots and almost every species of wild fruit.

The party killed two Elk and a Buffaloe today, and my dog caught a goat, which he overtook by superior fleetness, the goat it must be understood was with young and extremely poor. a great number of these goats are devoured by the wolves and bear at this season when they are poor and passing the river from S.W. to N.E. they are very inactive and easily taken in the water, a man can out swim them with great [372]
the Indians take them in great numbers in the river at this season and in autumn when they repass to the S.W.

Courses and distances of May 5th 1805.

S. 70° W. to the willows on the lower point of an Island near the Star's shore, opposite a low bluff

Miles 17.

Point of observation No. 9.

On the Lar's shore near the fourth course of this day, observed meridian Altitude of the O: L. L. with Octant by the back observation to be 68° 47'; the latitude deduced from which is 45° 46. 5"6. I do think this observation can be depended on as it was rather late before I could commence it, the sun was about to decline or perhaps had declined a few minutes.

[Clark:] 5th of May Sunday 1805

We set out very early and had not proceeded far before the rudder Irons of one of the Perogus broke which detained us a short time Cap' Lewis walked on shore this morning and killed a Deer, after breakfast I walked on shore Saw great numbers of Buffalo & Elk Saw also a Den of young wolves, and a number of Grown Wolves in every direction, the white & Grey Brant is in this part of the Missouri I shot at the white brant but at so great a distance I did not kill, The Countrey on both sides is as yesterday handsom & fertile. The river rising & current Strong & in the evening we saw a Brown or Grisley bear on a sand beech, I went out with one man Geo Drewyer & Killed the bear, which was very large and a turrible looking animal, which we found very hard to
LEWIS AND CLARK JOURNALS [May 5, 1805

kill we Shot ten Balls into him before we killed him, & 5 of those Balls through his lights This animal is the largest of the carnivorous kind I ever saw we had nothing that could way him, I think his weight may be stated at 500 pounds, he measured 8 feet 7½ In from his nose to the extremity of the Toe, 5 feet 10½ In around the breast, 1 feet 11 Ins around the middle of the arm, 3 feet 11 In around the neck his tallents was 4 Inches & 3/4 long, he was [in] good order, and appeared verry different from the common black bear in as much as his tallents (talon or nail) were blunt, his tail short, his liver & lights much larger, his maw ten times as large and contained meat or flesh & fish only. we had him skined and divided, the oile tried up & put in Kegs for use. we camped on the Sta Side, our men killed three Elk and a Buffalow to day, and our Dog caught an antelope a fair race, this animal appeared verry pore & with young.
